SIMLA;
The 28th February, 1901.

W. A. BION,
for *Meteorological Reporter to the Government of India and Director-General of Indian Observatories.*

T. W. HOLDERNESS,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, the 2nd March, 1901.

Madras.—The rainfall was fair in Tinnevelly and Travancore and light or none elsewhere. Water-supplies are inadequate in parts of the Deccan Madura and the west coast districts. Ploughing, sowing and transplanting are going on to a limited extent where water is available. Standing crops are generally in good condition, but have been damaged by insects or recent rain in parts of the Deccan, Kristna and Tinnevelly and are withering in parts of the Carnatic. Harvests continue with moderate outturn. Field fodder is generally available, but pasture is scanty in parts of the Deccan, the central and the west coast districts. The condition of cattle is generally good. Prices are almost stationary or slightly rising. Prospects generally are fair. Numbers on relief—Test works Cuddapah, men 355, women 318, children 23, total 796. Weavers, men 1,682, women 1,327.

Bombay.—Slight rain fell during the week in parts of the Karnatak and Sholapur. Agricultural prospects are good in Sindh, fair to good in the Konkan and parts of Surat, Broach, Nasik, Poona, Satara and Dharwar, and moderate to poor elsewhere. Standing spring crops have been damaged by locusts or other insects in parts of Sindh and Nasik and by frost in parts of Hyderabad and Broach, and generally are suffering from want of moisture except in irrigated lands. Harvesting of spring crops is nearly over in parts of Satara and Belgaum and is progressing in parts of Sindh, Ahmedabad, Broach, Surat, Ahmednagar, Poona and Kanara. Threshing has been commenced in parts of Nasik and Ahmednagar. Preparation of lands for next season continues in parts of the Konkan, the Karnatak, Nasik, Poona and Satara. The cotton crops have been damaged by rain in parts of Bijapur. Cotton picking continues in parts of Broach, Surat, the Karnatak and Baroda. The fodder supply is generally sufficient but is scanty in Bijapur and Belgaum. Agricultural stock is in good condition except in parts of Bijapur. The water-supply is getting scanty in parts of Sholapur, Belgaum and Dharwar. Prices have fallen in five districts, risen in three districts and are stationary elsewhere. The price of rice is slightly over normal but easier than in 1900. The price of *bajri* is slightly below normal in Gujarat and considerably over normal in the Deccan, the Konkan and the Karnatak and, compared with 1900, is about the same in the Konkan and considerably easier elsewhere. The price of *juar* is about normal in Gujarat and considerably over normal in the Deccan, the Konkan and the Karnatak and, compared with 1900, about the same in the Konkan and considerably easier elsewhere. The price of wheat is considerably over normal but slightly easier than in 1900 in Gujarat and about the same in the Deccan, the Konkan and the Karnatak.

Daily average numbers on relief—British districts—on test works, 1,016; on relief works, 115,862; dependants, 23,307; total on works, 140,185. In poor-houses, 3,575; on village relief, 34,509; total on gratuitous relief, 38,084. Figures for Ahmedabad, Kaira, the Panch Mahals, Ahmednagar, Khandesh and Nasik are incomplete. Native States—on relief works, 11,818; dependants, 4,280; total on works, 16,098. In poor houses, 960; on village relief, 728; total on gratuitous relief, 1,688. Figures for Rewa Kantha, Aundh, Phaltan and Kolhapur are incomplete. Grand total, 196,055.

Bengal.—Light showers are reported from Hooghly, Monghyr, Sonthal Parganas, Angul, Puri and Singhbhum. The spring crops are being harvested. Pressing of sugarcane and lancing of poppy are going on. Prospects generally are good. Fodder and water are sufficient except in Chuadanga and Chittagong. Fodder is also dear in Bankura. The price of common rice has risen in nineteen districts, fallen in six and is stationary in the rest.

North-Western Provinces and Oudh.—The weather was generally clear except in Almora where slight rain fell. Wheat, barley, gram, millet, mustard, peas and pulse are ripening and are being reaped in places. Prospects are good. Slight damage to crops by caterpillars is reported from parts of Dehra Dun, by rain or hail from parts of Almora, Barabanki, Unao and Mirzapur and by rust from parts of Rae Bareli, Jalaun, Jhansi and Banda. Lands are being prepared for the next autumn crop sowings. Extra crops and new sugarcane are being sown in some districts. Extraction of opium has begun. Manufactured poppy leaf has been discoloured in Azamgarh, but the outturn of the present opium collections is average. Supplies and fodder are ample. Prices are generally stationary with a slightly easier tendency.

Punjab.—A slight rainfall is reported in parts of Hissar. Ploughing and sowing of extra spring crops continue. Sugarcane pressing is still going on in Amritsar. Ploughing for sugarcane and cotton is in progress in Sialkot. The condition and prospects of standing crops are generally good. Crops in Umballa are better than before on account of good sunshine. The stock of food grain in Rawalpindi has been supplemented by imports from other districts. Wheat has been attacked by rust in some districts. The crops in Mooltan have also been partly damaged by locusts. Locusts also appeared in parts of Dera Ismail Khan but did no damage Cattle are generally in good condition. Pasturage fodder is sufficient in all districts except in parts of Mooltan. Prices are generally unsettled. The price of wheat is rising in Hissar and Delhi, falling in Umballa, Amritsar and Shahpur and is unchanged elsewhere Wheat is selling from 10 to 12¾, gram 10 to 12½, maize 15 to 23⅓ and bulrush millet 17 to 30 seers per rupee.

Burma.—LOWER BURMA.—Threshing and winnowing continue in the Hanthawaddy district and the Irrawaddy division. It is reported from Amherst that no damage has been done there by the recent rain, but other districts have not yet estimated the damage done. UPPER BURMA.—Agricultural conditions are much the same as reported last week. Hill-side clearings have commenced in the Southern Shan States and the Ruby Mines. The price of paddy has risen very suddenly in Akyab and fallen in Thongwa. Elsewhere the changes are unimportant.

Central Provinces.—The weather has been again cloudy and unsettled with some showers of rain in all the districts except Nimar. The fall has been light to moderate in most districts but Betul received about 3 inches, Chanda 1⅓ and Mandla and Seoni 1 inch. The rain has caused some damage to standing crops in Chhindwara, but considerable damage has been done to standing and harvested crops in parts of Nagpur, while in Raipur all the spring crops, except wheat, are described as totally ruined. A severe hail-storm which passed over Betul at the close of the week seriously damaged the standing crops. The prospects of wheat are fair in some districts but rust is stated to be damaging the late sown fields in parts and insects continue to damage gram and other pulses in Jubbulpore. The outturn of wheat is estimated at 30 to 40 per cent. Harvesting and threshing of winter crops continue. Pressing of sugarcane has been completed in Sambalpur and continues in Bhandara. Fodder and water are sufficient. Prices are steady in Jubbulpore, Narsinghpur, Chhindwara and Bhandara, and have risen in Mandla, Raipur and Sambalpur. Elsewhere there are slight local fluctuations. The cheapest prices are—wheat 9½, gram 11½, rice 14 and *jowar* 21 seers per rupee. The dearest prices are—wheat 6½, gram 8, rice 8½, and *juar* 12¾ seers per rupee.

Assam.—Slight rain fell in Sibsagar and Lakhimpur. Gathering of mustard is nearly finished. Pressing of sugarcane is in progress. The outturn of sugarcane is fair and of mustard bad, except in Sibsagar and Lakhimpur where the outturn is reported to be good. Pruning of tea is nearly finished. Land is being ploughed for early and late rice. The condition of cattle is generally good. Fodder and water are insufficient in the Khasi and Jaintia Hills and in parts of the Surma Valley. Prices—common rice, Silchar 9, Dhubri and

Dibrugarh 10, Gauhati 12½, Tezpur 10$\frac{10}{16}$ and Nowgong and Sibsagar 12 seers per rupee.

Mysore.—No rain fell in the Civil and Military Station. The rainfall was good in Kadur. Standing crops are in good condition throughout except in parts of Shimoga. Prospects are good in Mysore and Kadur and favourable in Hassan. Paddy, *ragi*, Bengal gram and wheat are being harvested in some parts and in other parts paddy is being sown. Prices are stationary at Mysore and Chittaldroog, have slightly fallen in Shimoga, Tumkur and Kadur and have slightly risen at Hassan and Kolar and other parts of Tumkur and Kadur. Cattle are healthy except in parts of Mysore. Water and fodder are sufficient except in parts of Shimoga and in the Hansur taluk of the Mysore district where scarcity of water is being felt and in Chittaldrug where water is gradually getting scarce.

Coorg.—The rainfall amounted to 29 cents only. Rice threshing and coffee picking are nearly completed. Prices of food grains are stationary. Water and fodder for cattle are sufficient.

Berar.—The weather was cloudy with light local showers. Harvesting of winter crops is in progress. Fields are being ploughed in five districts. Fodder and water are ample. Prices are almost steady.

Hyderabad.—The rainfall during the week was 32 cents, the total from 1st January being one inch 77 cents. The recent unseasonable rainfall has injured the spring crops lying harvested in fields. Winter rice also has been affected in parts. The water-supply is adequate to wants. The condition of cattle is satisfactory. Grain prices are falling. Prices—wheat 5¼, coarse rice 7¼ and *juar* 13⅛ seers per *halli* rupee. Total number of persons on relief works, including dependants, 1,632; gratuitously relieved, 766.

Rajputana.—The rainfall was 5 cents only in Mewar. Rain with hail is reported in some nizamats of Kotah. Agricultural operations are satisfactory. Standing crops are in good condition. Grain and poppy suffered from hail in Kotah. Cattle are in good condition generally. Fodder is ample. The cheapest prices range between 12 to 32 seers per rupee. Numbers on gratuitous relief 302.

Central India.—No rain fell throughout the Agency during the week. Agricultural operations are in progress everywhere. Standing crops are in good condition and the probable outturn is estimated generally to be good. Crops have been damaged by rust in Bundelkhand and Baghelkhand and by wind or rain in Malwa and for want of moisture in Bhopawar. Agricultural stock is in bad condition in parts of Malwa, but is good elsewhere. Prices of food grains are steady in Gwalior and Bhopal, normal in Bundelkhand, above average in Baghelkhand and high in Malwa. The condition of opium is good in Gwalior, Bhopal, Malwa and Bhopawar. Average prices—in Gwalior 17-6 to 27-5, in Bundelkhand 12 to 15¼, in Malwa 17-8, and in Bhopawar 16 to 16½ seers per rupee. On gratuitous relief, Jaora, 57. Number on Jobat and Alirajpur relief work, 3,042.

Baroda.—Standing spring crops are in fair condition but the outturn is estimated to be below normal. The condition of agricultural stock is satisfactory. Prices—*bajri* 30, *juar* 33, wheat 16, rice superior 13, inferior 20 pounds per rupee. Average numbers on relief works—Baroda territory, 12,570; and gratuitous relief, 4,387.

Kashmir.—The weather was mostly bright throughout the week. It is a little cloudy now. Prices are normal, rice selling for 23 seers the rupee.

Nepal.—The rainfall was slight. The weather was cloudy and cold. The standing crops are progressing favourably. The price of rice is 8½ seers per rupee.

The number of persons in receipt of relief during the preceding and present weeks in each Province is shown in the following table :—

T. W. HOLDERNESS,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

(FAMINE.)

Return of the number of persons in receipt of relief in districts affected by scarcity.

3.—The figures are compiled from returns obtained from Local Govern nents and Political Officers, and give the corrected District details of the l totals published weekly in the Crop and Weather Summary of the *Gazette of India*.
-labouring children and other dependants of relief workers are classed as on relief works when distinguished in the local returns from persons sly relieved in poor-houses or at their homes. Weavers relieved in their own trade are shown under "Gratuitous Relief."
dates at the head of the table are the dates of the *Gazette of India* in which the Provincial totals were published. The figures, however, actually numbers on relief in each preceding week

Name of ovince and District.	Population.	For the week ending the 9th February 1901.			For the week ending the 16th February 1901.			For the week ending the 23rd February 1901.			For the week ending the 2nd March 1901.

J. E. O'CONOR
Director-General of Statistics

FINANCE AND COMMERCE DEPARTMENT
March 8, 1901

J. F. FINLAY
Secretary to the Government of India

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

STATISTICS AND COMMERCE.

CUSTOMS.

No. 1293-S. R., dated Calcutta, the 5th March 1901.

READ—

Customs Circular No. V of 1901.

ORDERED, that the circular be published for general information in the Supplement to the *Gazette of India*.

J. F. FINLAY,
Secretary to the Government of India.

CUSTOMS CIRCULAR No. V of 1901.

Arabia and Turkey in Asia should be added to the list of countries the imports from which have been exempted * from the requirements of section 10 (1) (*e*) (*i*) and (*ii*) of the Indian Merchandise Marks Act, IV of 1889.

The exemption should be extended to all the goods shown in the annexed list provided that they are known or proved to be the produce of Africa, Arabia, Persia or Turkey in Asia.

Local Governments may make additions to the list if and when it is found to be defective, but any additions made should be reported for the information of the Government of India.

* See Customs Circular No. VI of 1900.

Articles imported from Africa, Arabia, Persia, and Persian Gulf and Turkey in Asia.

Almonds.
Aloes, Socotra.
Amber.
Aniseed.
Arsenic.
Asafœtida.
" coarse (Hingra).
Attary (Persian).
Bees' wax.
Betelnuts.
Bones.
Bran.
Brimstone (Amalsara).
Buzgand (Gulpista).
Chillies, dry.
Cloves.
Clove stems.
Cloves, Narlavang.
Cocoanuts.
Cocoanuts, sea.
Coffee (Mocha).
Calumba root.
Copra.
Corals.
Cotton, raw.
Cowries.
Cowras.
Currants.
Dates, dry.
" wet.
Dawna.
Dhuppanadi.
Dragon's Blood.
Drugs (Persian) and Medicines.
Earthnuts (with and without shells).
Ebony Wood.
Elephant Tusks.
Figs, dry.
Fish, dry (salted and unsalted).
Fishmaws.
Fruits, fresh and dry.
Gallnuts (Persian).
Garlic.
Genda Horns.
Ghee.
Gowla.

Articles imported from Africa, etc.—contd.

Grain and Pulse.
Gum Ammoniac.
,, Arabic.
,, Bdellium.
,, Bysabol (coarse myrrh).
,, Copal.
,, False.
,, Hirabol (Myrrh).
,, Olibanum.
,, other sorts.

NEVILLE PRIESTLEY,
Offg. Under Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

APPLICATION OF THE NEW LEAVE RULES TO OFFICERS OF DEPARTMENTS HAVING SPECIAL LEAVE RULES.

No. 1589-1614.

Extract from the Proceedings of the Government of India in the Home Department (Public),—under date Calcutta, the 8th March 1901.

READ—

Resolution No. 224—40, dated 25th January 1901.

RESOLUTION.

THE changes in the leave rules which were sanctioned in the Resolution read in the preamble were made applicable by the Resolution only to officers subject to the leave rules in Chapters XIII and XIV of the Civil Service Regulations, the question whether they should be applied to officers of the Departments having special leave rules being held over for future consideration.

2. The Governor General in Council is now pleased to announce that they may be applied, with retrospective effect from January 21, 1901, to the following officers :—

(1) Military officers in Civil employ who are not subject to the Civil Leave Rules (those who are so subject come under Chapter XIII).

(2) Statutory Civil Servants.

(3) Chaplains whose leave is regulated by Section III of Chapter XXVII of the Civil Service Regulations.

In applying the new Rules to Chaplains, who are entitled to privilege leave on a more liberal scale than other officers, when privilege leave is combined with other leave the amount of the privilege leave due shall be calculated under the Rules in Chapter XII instead of under those in Section III of Chapter XXVII of the Civil Service Regulations. The Rules in that Section will continue to apply to the privilege leave of Chaplains when taken by itself.

3 The question whether the new rules should be applied to Judges of High Courts and other officers whose leave is wholly or partially regulated by Statutory rules is under the consideration of the Governor General in Council and will be referred to His Majesty's Secretary of State for India.

ORDER.—Ordered that a copy of this Resolution be communicated to the Departments of the Government of India ; to Local Governments and Administrations for information and guidance ; and to the Heads of Offices subordinate to this Department.

Ordered also that the Resolution be published in the Supplement to the *Gazette of India*.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

GRANT OF REWARDS TO CHAPLAINS FOR PASSING EXAMINATIONS IN THE VERNACULAR LANGUAGES

No. 142-57.

Extract from the Proceedings of the Government of India in the Home Department (Examinations),—under date Calcutta, the 8th March 1901.

READ—

Government of India Resolution No. $\frac{66}{558-570}$, dated the 24th September 1868

Circular letter Nos. 353—362, dated the 18th June 1900, to Local Governments and Administrations, and connected correspondence.

RESOLUTION.

WITH the object of encouraging Chaplains equally with Military officers to pass examinations in the vernacular languages of the Province in which they are employed, the Government of India in 1868 extended to them the rules for the examination of Military officers in oriental languages, and the grant of rewards to Chaplains has since been governed by those rules.

2. In 1895 the rules applicable to Military officers were withdrawn from Military officers in permanent Civil employ, and such officers were, by Home Department Resolution of the 18th January 1896, placed under the rules for the encouragement of the study of oriental languages among junior members of the Indian Civil Service. In 1899 a doubt having arisen as to whether Chaplains should be placed in the same category as Military officers in permanent Civil employ with respect to the examination rules the question was referred to the Government of India. While the matter was under consideration the Government of India were furnished with a Resolution passed by the Episcopal Synod held at Calcutta in January 1900, in which that body suggested that if the rules were to be modified, Chaplains should nevertheless continue to be eligible for rewards for proficiency in languages of practical utility to them in their work in this country.

3. Before coming to any decision in the matter it was considered desirable to obtain the views of the several Local Governments and Administrations and of the Ecclesiastical authorities. After a careful consideration of the replies received, which showed some diversity of opinion, the Governor General in Council is now pleased to decide that in future Chaplains will be eligible for the same rewards as are admissible to junior members of the Indian Civil Service for passing in the High Proficiency or Honour Examination in any vernacular language of the Province in which they are serving, according to the same standards and rules as are applicable to members of that service. Rewards will not be granted for passing any language examination of a lower standard than the High Proficiency, and as they will be restricted to languages which are of practical utility to Chaplains in their work, they will not be given for proficiency in the classical languages,—Sanskrit, Arabic, Persian. The Governor General in Council is, however, unwilling that the present orders should injuriously affect Chaplains who, relying on the Regulations hitherto in force, have made a study of any of the classical languages in the expectancy of earning the prescribed rewards. His Excellency in Council is accordingly pleased to direct that any Chaplain who at the present time has progressed so far in the acquisition of a classical language as to have passed the High Proficiency test, shall be permitted to present himself for the Honour Examination and to earn the reward granted to members of the Indian Civil Service for passing such examination.

ORDER.—Ordered, that a copy of this Resolution be forwarded to all Local Governments and Administrations for information; that a copy be forwarded to the Military and Financial Departments and to the Secretary, Board of Examiners, for information; that a copy be forwarded to the Bishop's Chaplain and to the Presidency Senior Chaplain, Church of Scotland, Bengal, for information.

Ordered, also, that the Resolution be published in the *Gazette of India* for general information.

HOME DEPARTMENT.

EXECUTION OF CONTRACTS FOR PRINTING WORK OF THE MILITARY OFFICES IN THE BOMBAY COMMAND.

No. 303-8.

Extract from the Proceedings of the Government of India in the Home Department (Judicial),—under date Calcutta, the 8th March 1901.

READ the undermentioned papers :—

Resolution of the Government of India in the Home Department, No. $\frac{3\text{-Judicial}}{485-501}$, dated the 28th March 1895, on the subject of the execution of deeds, contracts and other instruments on behalf of the Secretary of State for India in Council.

Memorandum from the Military Department, No. 219-B., dated the 15th January 1901.

RESOLUTION.

IN exercise of the power conferred by Section 2 of the East India Contracts Act, 1870 (33 & 34 Vict., c. 59) and of all other powers enabling him in this behalf, the Governor General in Council is pleased, in continuation of the orders contained in Part B of the Resolution cited in the preamble, to declare that the undermentioned classes of deeds, contracts and other instruments referred to in Section 1 of the Government of India Act, 1859 (22 & 23 Vict., c. 41), may be executed as follows :—

Contracts for printing work of the Military Offices in the Bombay Command.	By the Controller of Military Accounts, Bombay Command.

ORDER.—Ordered, that this Resolution be communicated to the Government of Bombay and the Military Department for information, and that it be also published in the *Supplement to the Gazette of India*.

No. 290 of 1900.—William Oliver Taylor, physician, of the village of Princeton, in the county of Oxford, in the province of Ontario, Canada. *Improvements in compound rotary engines.* (Specification filed 6 March 1901.)

No. 303 of 1900.—William Wilson, pattern maker, of 30 Norfolk Street, Hyde, in the county of Chester, England, and Thomas Bennett, pattern maker, of 76 Grafton Street, Hyde, aforesaid. *Improvements in or in connection with life-saving guards for tramcars and like vehicles.* (Specification filed 6 March 1901.)

No 4:6 of 1900.—William Walter Lean, lieutenant-colonel, 5th Bengal Cavalry, of Cawnpore, North-Western Provinces, in British India. *A new or improved clasp or fastening.* (Specification filed 6 March 1901.)

No. 2 of 1901.—Bernard Crossley, mechanical engineer, of 8 Boothroyden, Warley Road, Blackpool, in the county of Lancaster England. *An improved shuttle changing motion for looms.* (Specification filed 6 March 1901.)

No. 1065 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 134 of 1888.—Fredrick Robert Jones. *Improvements in vertical sugarcane mills.* (From 23 March 1901 to 23 March 1902.)

No. 152 of 1888.—Ernest Hulburd. *Improvements in and relating to metallic packing.* (From 6 March 1901 to 6 March 1902.)

No. 298 of 1889.—Sir William Thomson. *Improvements in valves for water, steam, or other liquids or gases.* (From 15 March 1901 to 15 March 1902.)

No. 20 of 1892.—Harry Heatly. *Improvements in mechanism for actuating punkahs and thermantidotes.* (From 31 March 1901 to 31 March 1902.)

No. 204 of 1893.—William Bennett Rickmann. *An improvement in railway carriage lamps.* (From 10 April 1901 to 10 April 1902.)

No. 6 of 1894.—Charles Hodgson. *An improvement in apparatus for working railway points and signals.* (From 7 April 1901 to 7 April 1902.)

No. 47 of 1894.—Harry Heatly. *Improvements in mechanism for actuating punkahs and thermantidotes.* (From 26 April 1901 to 26 April 1902.)

No. 276 of 1894.—John Isaac Thornycroft. *Improvements in apparatus for automatically regulating the supply of feed water to water tube and other boilers.* (From 3 May 1901 to 3 May 1902.)

No. 29 of 1895.—Harry Heatly. *Improvements in or applicable to filters of the Pasteur type.* (From 3 April 1901 to 3 April 1902.)

No. 273 of 1895.—Harry Heatly. *Improvements in or applicable to hot-air engines for actuating punkahs and thermantidotes, and for other purposes.* (From 19 June 1901 to 19 June 1902.)

No. 44 of 1896.—Taylor Burrows and Dick Edwards Radclyffe. *Improved means or apparatus for degumming or otherwise treating by immersion the fibres extracted from the plants, stems, or straws of flax, hemp, ramie or the like.* (From 19 February 1901 to 19 February 1902.)

No. 135 of 1896.—Nicholas Marshall Cummins. *A device for sealing railway wagon doors.* (From 17 July 1901 to 17 July 1902.)

No. 268 of 1896.—John James Marsland. *A new or improvad apparatus for discharging night soil and the like into sewers.* (From 3 March 1901 to 3 March 1902.)

No. 122 of 1897.—Harry Heatly. *Improvements in or applicable to hot-air engines for actuating punkahs, thermantidotes and for other purposes.* (From 15 June 1901 to 15 June 1902.)

No. 1066 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (*a*), of the said

Act, the exclusive privilege of making, selling, and using the said inventions in British India, and of authorising others so to do, has ceased :—

No. 18 of 1896.—Francis Charles Dixon. *A pendulum motor.* (Specification filed 2 December 1896.)

No. 139 of 1896.—The Apostoloff Automatic Telephone Parent Syndicate, Limited. *A system of automatic telephone exchange.* (Specification filed 25 November 1896.)

No. 170 of 1896.—The American Wire Novelty Company. *Improvements in wire devices convertible into twine holders, flower baskets, egg boilers, sad-iron rests, napkin rings and other household articles.* (Specification filed 25 November 1896.)

No. 320 of 1896.—Augustus Gross. *Improvements in boots and shoes.* (Specification filed 1 December 1896.)

No. 336 of 1896.—William Owen. *An improved manufacture of artificial stone, marble and the like.* (Specification filed 28 November 1896.)

No. 338 of 1896.—John Henry Bernard D'Cruze. *Improvements in apparatus for mechanically actuating punkahs, called "D'Cruze's punkah apparatus."* (Specification filed 26 November 1896.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of ₹50 for each of the above inventions.

No. 103 of 1895.—William Bodden and Frank Ashton. *Improvements in apparatus for lubricating the spindles of spinning and doubling frames.* (Specification filed 26 November 1895.)

No. 111 of 1895.—Jean Jacques Heilmann. *Improvements in electrically propelled vessels* (Specification filed 28 November 1895.)

No. 171 of 1895.—Salomon Berditschewsky Apostoloff and Moïse Freudenberg. *Improvements in telephonic apparatus.* (Specification filed 26 November 1895.)

No. 288 of 1895.—Alexander Paterson. *Improvements in and relating to sight-feed lubricators.* (Specification filed 25 November 1895.)

Fee in respect of the continuance of an exclusive privilege—

4 (*b*) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of ₹50 for each of the above inventions.

No. 118 of 1890.—William Burnett Mactavish and William Charles Hulbert. *An improved method of extracting copper and other metals from ores.* (Specification filed 26 November 1891.)

Fee in respect of the continuance of an exclusive privilege—

4 (*f*) After the expiration of the eighth year and before the expiration of the ninth year from the date of the filing of the specification—

The sum of ₹100 for the above invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The Office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October, 1895, in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitor's room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

S. C. HILL,
Secretary under the Inventions and Designs Act, 1888.

Robert Lyan, employed by Messrs. John King & Co.	Small Pox Hospital, Howrah.	17th February, 1901 .	District Judge of Hooghly, on 25th February, 1901.	No Will. No application.

7, COUNCIL HOUSE STREET;
Calcutta, 14th March, 1901.

L. P. D. BROUGHTON,
Administrator General of Bengal.

AGENT TO THE GOVERNOR-GENERAL IN CENTRAL INDIA.

NOTIFICATIONS.

Central India Agency, Indore, the 9th March, 1901.

No. 2086.—In exercise of the powers conferred upon him by Notifications Nos. 443-I.A. and 444-I.A, dated the 4th February, 1897, by the Government of India in the Foreign Department, the Agent to the Governor-General in Central India is pleased to order that the provisions of the notification of the Central India Agency, dated the 11th February, 1897, regarding the inspection of persons travelling by railway in and through Central India and the segregation in hospital, temporary accommodation, or otherwise of persons suspected by the Inspecting Medical Officer of being infected with plague or bubonic fever shall, until further orders, remain in force at the railway stations at Rutlam and Ujjain only.

No. 2088.—In exercise of the power conferred by Notification No. 1421-I.A., dated the 15th April, 1897, of the Government of India in the Foreign Department, the Agent to the Governor General in Central India issues the following rules under section 2, sub-section (*1*), of the Epidemic Diseases Act, 1897:—

Rules relating to the Cantonments of Mhow, Nimach and Nowgong.

1. If in any house a person becomes ill or dies of a disease which is known or suspected to be bubonic plague, the owner of such house, or if the owner be non-resident, the occupier and every head of a family resident therein, shall forthwith report the occurrence of such illness or death at the nearest police station.

2. If there is, or has been, resident in any house a person who has come from any place in which bubonic plague is prevalent, the owner of such house or if the owner be non-resident, the occupier and every head of a family resident therein, shall report at the nearest police station (1) the illness of any person in such house, or (2) the death of any person in such house, immediately such illness is apparent or death occurs.

3. Any medical practitioner who (1) attends a case of illness in a house in which there is present a person who has come from a place where plague is prevalent, or who (2) attends in any house a case in which he has reason to believe the sick person to be infected with bubonic plague, shall forthwith report such illness to the nearest police station.

4. On receiving a report under rule 1,2 or 3, the officer in charge of the police station shall immediately report the matter to the Inspector of Police, the Cantonment Magistrate, and Health Officer of the Cantonment.

Explanation.—The Staff Surgeon shall be the Health Officer unless another medical officer is appointed by the Local Government to be Health Officer.

5. In the case referred to in rules 1, 2 and 3 a sick person or dead body shall not be removed from the house without the written permission of the Health Officer. and the head of the family shall dispose of a dead body by cremation or burial in such manner as may be directed by the Health Officer.

6. The owner and occupier of a house, and the head of any family resident therein, shall comply with any direction that may be issued by the Health Officer with regard to the disinfection and cleaning of a house, the disinfection or destruction of clothing and personal effects, the disposal of any corpse, the improvement of the sanitary condition of the premises and other similar matters.

7. The Health Officer shall, if he considers it necessary, himself take measures for the disinfection of a house and for the other matters referred to in the preceding rule. Should the Health Officer think it necessary and practicable to burn or otherwise destroy any non-masonry and inflammable structure, he will report the case to the Cantonment Magistrate and act on his orders. The Cantonment Magistrate may order the burning or destruction of any hut or other temporary structure, if disinfection cannot be satisfactorily effected.

8. The Health Officer may, with the previous sanction of the Local Government, require the owner or occupier of any house to permit him to enter his premises and examine any person whom such Health Officer has reason to believe to be infected with bubonic plague. If the person in question be a female, the examination shall, if she or her relatives so desire, be made through a female doctor, female Hospital Assistant, or other female agency.

9 If, on examination of a sick person in a house or other place within the limits of a Cantonment, the Health Officer suspects (1) that such person is infected with bubonic plague. or (2) considers that he is actually suffering from bubonic plague, the Health Officer may, if authorized on that behalf by the Local Government, arrange for the removal of such person (1) to an observation shed or (2) to a temporary hospital established for the purpose, and for his detention, dieting, and medical treatment therein.

10. If in any case a person removed to a temporary hospital is accompanied by a companion or attendant, the Health Officer shall require the companion or attendant to live in the immediate neighbourhood of the temporary hospital in a segregation hut or tent provided for the purpose, and to remain in such place until he receives permission from the Health Officer to depart.

11. If a person is attacked with bubonic plague while so segregated, the Health Officer shall remove such person to the temporary hospital, and shall keep under observation in a segregation hut, tent, or suitable structure, for a period of ten days from the date of such removal, any companion or attendant who has been with the person attacked.

12. Upon the death of a sick person from bubonic plague, the Health Officer, if authorized on that behalf by the Local Government, may for ten days detain under observation all persons who have been in attendance, in segregation huts, tents, or suitable structures established for the purpose in the neighbourhood.

13. If bubonic plague has become prevalent in a portion of a Cantonment, the Health Officer may, with the previous sanction of the Local Government, direct the inhabitants of any street, *mohulla* or other locality to evacuate their houses, to remove to a temporary settlement established, as a place of segregation, at a distance from the infected quarter, and to remain in such settlement for so long as he may consider necessary. After evacuation, the Health Officer shall arrange for the thorough disinfection and cleansing of the empty premises, and shall not permit the inhabitants to return until the premises are considered free from infection.

14. A person dealt with under the foregoing rules shall comply with any directions that may be given to him by the Health Officer with regard to his removal to, and his detention and treatment in, an observation shed, temporary hospital, or place of segregation, and with respect to the disinfecting or burning of his clothing and personal effects, the disposal of any corpse, or with respect to any other similar matter: he shall not depart from any such place of detention without the permission of the Health Officer.

15. In the event of death occurring from bubonic plague, the Health Officer shall arrange for the disposal of the body.

In the case of a European or Muhammadan, the body shall be buried at least six feet deep, and be covered with chloride of lime: the place of burial, if not an authorized cemetery, shall be well away from habitations and sources of water-supply.

In the case of Hindu, the body shall be completely and thoroughly burnt in an isolated locality in the presence of a responsible official.

16. All police officers shall give to the Health Officer such assistance as may be considered necessary in carrying out these rules.

17. Any conveyance, public or private, used for the carriage of a person infected with plague, or suspected of being infected, shall be thoroughly disinfected and exposed to air and sunlight for seven days previous to being again used, articles of furniture belonging to it likely to retain infection being destroyed.

18. A *chhapar* hut, after occupation by a person suffering from plague, should be burnt, and this should also be done to the *charpai* upon which the person is carried to, or which he uses in, the hut. The well should, if possible, be completely cleaned out and disinfected.

19. The foregoing rules shall come into force at once, and shall remain in operation until such time as they shall be withdrawn by notification by the Agent to the Governor-General.

20. Notifications No. 4342, dated the 4th May, 1897, and No. 5455, dated the 9th June, 1897, are hereby cancelled.

ANNEXURE.

Memorandum of instructions for the guidance of officials.

1. *Surveillance.*—The actual work of surveillance can best be performed by the people themselves, and the inhabitants of towns should be encouraged and assisted to keep an organized surveillance over persons arriving from infected areas.

2. *House visitation, etc.*—The measure prescribed by rule 8 attacks the domestic privacy of the people, and should be employed only when it is clear that it will be effectual in saving them from disaster It would be justifiable only when plague exists in small and well defined areas.

3. *Removal of patients.*—This should be compulsory only in places and under circumstances where it can be carried out so completely as to render it an effectual precaution and in the case of persons who are left without any one to look after them or who have no home. But every effort should be made to induce patients to go to hospitals and to lessen the aversion to hospitals by encouraging the establishment of private and caste hospitals, by locating hospitals near infected quarters, by limiting the size of hospitals, so that patients may receive more individual attention, and accommodation may be more readily made available for their immediate families and friends, by arranging for the provision of an adequate number of medical attendants and nurses, and of ample and comfortable accommodation for patients, and by permitting at least two friends to be in attendance on each patient, so that the patient may never be left alone. In the case of moribund cases it would not be humane to forcibly remove from his house a person who has not a fair chance of recovery, and this should never be done except at the express wish of the friends of the patient.

4. *Segregation of contacts.*—The general segregation of contacts is considered ineffective and harassing, and should not be attempted, except where the infection is confined to so small an area that contacts can be accurately known and establishments can be provided sufficient to secure the detention of every contact. When the infection or plague is wide spread in a city, it would be better not to make any attempt to segregate contacts.

5. *Evacuation of infected areas.*— Climatic conditions are a most important factor in determining whether evacuation can be carried out or not, and before the people are subjected to the

discomforts of evacuation during the rainy season, there should be no doubt that the hardships inflicted on them will in all probability yield a balance of advantage.

6. *Disinfection of houses, etc.*—The chemical disinfectant which seems to be most likely to render efficient service is perchloride of mercury, which may, for the purpose of securing complete solution, be made up either with hydrochloric acid or with common salt or any other soluble chloride.

The strength of the disinfecting, perchloride solution should be 1 in 1,000 with the addition of 2 per 1 000 of hydrochloric acid, a little aniline blue or other colouring matter. The solution of perchloride of mercury should be prepared in concentrated form according to the instructions below, and specific directions should be given on the label of the vessel containing it, to show the amount of the concentrated preparation necessary to make a solution of 1 part of perchloride in 1000 in strength, on the addition of one gallon or other convenient quantity of water. But care must be taken that the proper dilution is always observed, and that the solution is not stored in a porous receptacle or brought into contact with metal.

Acid solution of perchloride of mercury (Fort)—

Take perchloride of mercury finely powdered	. .	4 oz.
„ commercial hydrochloric acid	. . .	8 oz.
„ water to	. . . . .	25 oz.

Mix thoroughly in a wedgwood mortar or earthenware vessel until the perchloride is dissolved, and then transfer to a bottle labelled "Strong solution of perchloride of mercury 4 ounces in 25 ounces of water." The bottleful to be added to 25 gallons of water to make a solution of 1 in 1,000. When the above acid solution is liable to injure the articles to be disinfected, a neutral solution can be obtained by using 8 ounces of common salt instead of the hydrochloric acid.

Disinfection may be divided under three headings :—

(*a*) Disinfection of houses and household effects.
(*b*) Disinfection of personal effects.
(*c*) Disinfection of the person.

(*a*) *Houses.*—On opening the house, a stream of the perchloride solution should be poured by means of a syringe through the door over the furniture and as much of the walls as can be seen from the door. This lays the dust and renders entry to the house comparatively safe. The house may then be entered and the walls, ceiling, and everything within reach thoroughly covered with the perchloride solution till they are wet and dripping. The furniture should be collected in one place and thoroughly disinfected, piece by piece, by means of the solution. Clothing should be collected, placed in a canvas bag, sealed with a lead clamp seal, and sent to be disinfected by moist heat—by stream if there is an apparatus; if not, by boiling. Worthless articles should be burnt at once.

After thorough disinfection of the furniture, it should be placed outside to dry in the sunshine.

Each room, passage, staircase, etcetera, should be systematically cleansed in the same way.

There may be certain parts of a room that require special treatment.

If the floor is of earth, it should not be dug up, but should be thoroughly saturated with the perchloride solution.

If the floor is of earth mixed with cowdung, it should be saturated with acid perchloride solution of double strength, *i.e.*, 2 per 1,000 of perchloride and 4 per 1,000 of hydrochloric acid.

Sometimes wooden and stone walls or articles of furniture are covered with a greasy coat of dirt, through which no solution will penetrate. After such a coating has been thoroughly irrigated with the perchloride solution, it should be scrubbed with a hot 5 per cent. solution of carbolic acid and soft soap.

All crevices and cracks should be thoroughly syringed out with the perchloride solution.

When the rooms and furniture have been disinfected in this way, it is generally advisable to open the roof of the house to admit sunlight and air. For this purpose holes not less than 6 feet by 4 feet should be made in the roof, care being taken that no beam runs across the opening. Sometimes it may be necessary to remove the whole roof. Next day the house should be whitewashed. For this purpose fresh lime—preferably stone lime, and not *kankar* lime—must be used. The fresh lime should be added gradually to water placed in convenient vessels until a hot caustic wash is obtained, and this should be applied at once over walls, ceiling, *floor* and doors.

(*b*) *Clothing, etc.*—The disinfection of clothing should be carried out by means of moist heat either in an apparatus specially constructed for the purpose or in a boiler.

When a boiler is used, care must be taken that each article is exposed throughout for at least ten minutes to water at a temperature of 212°F.

Leather and other articles which would be damaged by exposure to moist that must be immersed in a disinfecting solution or thoroughly scrubbed with 5 per cent. carbolic acid solution and soft soap. Clothing and bedding of small value should be burnt.

By Order,

C. J. WINDHAM, *Captain*,

First Assistant to the Agent to the Governor-General in Central India.

TELEGRAPH DEPARTMENT.

NOTIFICATIONS.

Simla, the 22nd May, 1900.

TELEGRAMS FOR THE TROOPS IN SOUTH AFRICA.

No. 9.—The following revised notification is published for general information :—

Until further notice, State and Private telegrams *in plain language* addressed to persons serving with the Field Force in South Africa will be accepted *at Sender's risk*, and charged for at the rate of R1-8 per word from offices in India or Burma. Telegrams in Code or Cypher cannot be accepted at this reduced rate. The address should consist of the following :—

(1) The name, or number, or both of the person to whom the telegram is addressed (in the case of officers the rank may be omitted, and in the case of telegrams for Non-Commissioned Officers and men the name may, in like manner, be omitted if the number is given. Such omissions, however, add to the risk of the telegram going astray, more especially when addressed to Non-Commissioned Officers and men), and

(2) The Regiment (*this will be counted and charged for as one word irrespective of the number of words used*).

These telegrams should be addressed "Bombay for South Africa" (*which words will be signalled free*), and not to any particular Telegraph Office in South Africa. The Bombay Telegraph Office will forward them to the Officer Commanding at Capetown, who will deliver them to the Addressees at whatever place in South Africa they may be stationed.

Senders of telegrams should accurately describe the Regiment, Battalion, Battery or Corps, to which the Addressees are attached, as it appears in the "Army List." For example : the address of an Officer or Private in the "Rifles" should give the number of the Battalion, and make it quite clear whether it is a Battalion of the "Rifle Brigade," the "King's Royal Rifle Corps," the "Royal Irish Rifles," or the "Scottish Rifles (Cameronians)."

The reduced rate will also apply to telegrams addressed to members of the Nursing Staff serving in South Africa, and any telegrams addressed to a Nurse will be treated in the same way as those intended for soldiers and sailors.

Telegrams for officers, Non-Commissioned Officers and men in South Africa who are known to be suffering from wounds or sickness may be addressed to them as if they were with their regiment or corps. Such telegrams, on arrival at the place where the regiment or corps is stationed, will be redirected to the proper hospital.

When, however, the name of the hospital is known to the sender of the message, he may address the telegram direct to that hospital, e.g., "Field Hospital, 1st Cavalry Brigade," or to "No. 2 General Hospital" or to "Mooi River Hospital."

In any case, the telegram should, as already stated, be addressed by the sender to "Bombay for South Africa," which words will not be charged for.

The following are given as examples of addresses and counting :—

"Captain Armstrong, 64th Royal Field Artillery, Bombay for South Africa" (*three words*) ; "Captain Armstrong, Wynberg Hospital, Bombay for South Africa" (*three words*) ; "7303 Murphy, 2nd Battalion, Royal Dublin Fusiliers, Bombay for South Africa" (*three words*) ; "7303, Mooi River Hospital, Bombay for South Africa" (*two words*).

II. Notification No. 5, dated the 8th May, 1900, is hereby cancelled.

The 5th December, 1900.

No. 37.—The British Government announces that the transmission of Private telegrams for the Orange River Colony and the Transvaal, *viâ* Cape Colony and Natal, is now suspended.

Telegrams for Pretoria, Johannesburg Vereeniging, Germiston, Middelburg, Heidelberg, and Standerton are, meanwhile, being accepted for transmission, *viâ* Lourenco Marques, at the usual rates. These telegrams should be written in plain English, and will be accepted only at the risk of the sender. They are also subject to censorship and to delay in transmission.

The 31st January, 1901.

TELEGRAMS FOR SOLDIERS AND SAILORS OF THE BRITISH AND INDIAN FORCES IN CHINA.

No. 43.—The following revised Notification is issued for general information :—

Until further notice, private telegrams *in plain language*, for members of the British or Indian Military and Naval Forces in China, from their friends in India or Burma will be accepted *at sender's risk* and at the reduced rates mentioned below to the three following stations only, *viâ* Madras :—

1. To Shanghai at R 0-15-0 per word.
2. „ Weihaiwei „ 1-3-0 „
3. „ Taku „ 1-4-0 „

In the Official Instructions the words "*Reduced Rates*" should be inserted, and will be signalled free.

Telegrams intended for Military or Naval members stationed at Hongkong should be addressed to *Shanghai*, and those for members stationed at Tientsin or Pekin should be addressed to *Taku*. These reduced rates will also apply to telegrams for Civilians in Military or Naval employ in China.

In the address the name and number of the Regiment, Battalion, Battery, or Corps will be counted and charged for as *one* word, irrespective of the number of words used. For instance, in a telegram addressed to "Capt. Brown, 23rd Field Battery, Royal Artillery, Shanghai," the number of words to be charged for will be *four* only, instead of *eight* words, as usual.

II. Notification No. 34, dated the 22nd November, 1900, is hereby cancelled.

Calcutta, the 7th March, 1901.

No. 47.—The following revised notification is published for general information :—

The Post Master General, London, announces that the British Government have decided to suspend at Aden and the Cape of Good Hope the transmission of all telegrams in Code or cipher, whether of Foreign Governments or private persons, to or from British Central Africa, St. Helena and Ascension. Telegrams in plain language are subject to censorship and can only be accepted at the risk of the sender.

Code messages for the following places, *viz.*, Cape Colony, Natal, Rhodesia, Zanzibar, Seychelles, Mauritius, Madagascar, British and German East Africa, Mozambique and Lourenco Marques may, however, be accepted, if the words used are in one or other of the following Code Books, which have been deposited with the authorities at Aden, *viz.* :—

(1) A B C (4th edition).
(2) A Z.
(3) Scott's (9th edition).
(4) A I.
(5) Telegraphenschluessel of W. Staudt and O. Hundius (published by Julius Springer at Berlin).
(6) The Mercuur Code (2nd edition), enlarged and revised, with the First Supplement
(7) Broomhall's Comprehensive Cipher Code.
(8) Western Union Telegraphic Code and International Cable Directory, Universal Edition, 1900.
(9) Atlantic Cable Directory of registered addresses and Directory Code, 1898.
(10) Atlantic Cable Directory of registered addresses and Directory Code, 1900.
(11) Watkin's Telegraphic Code with Appendix (17th edition), 1900.
(12) International Mercantile Telegraph Code (Meyer), 1880.
(13) The General, Commercial, and Mining Telegram Code, 1897, by C. A. Moreing and F C. McCutcheon.
(14) Bedford McNeill's Mining and General Telegraphic Code 1899.

Telegrams should be endorsed to the effect that the words used actually represent the corresponding expressions given in the above-named Code Books.

As delays occur at Aden in consequence of the difficulty of determining which Code has been employed, senders of telegrams to the above-named places in East and South Africa should write on the message draft the name of the Code employed. For instance A B C; A Z; Scott's; A I; Staudt; Mercuur; Broomhall's; Directory; Atlantic, 1898, Atlantic, 1900; Watkin's; Meyer; McCutcheon; or McNeill. This information will be included in the "Official Instructions" and transmitted free of charge.

II. Notification No. 39, dated the 13th December, 1900, is hereby cancelled.

No. 47-A.—In the event of the establishment in British India of a censorship over telegrams, the first twelve Code Books mentioned in Notification No. 47, dated the 7th of March, 1901, will be used in India for purposes similar to that for which they are employed in Aden.

The public are recommended to provide themselves with such of the Codes as may appear suited to their requirements.

H. A. KIRK,
Director, Traffic Branch.

The 11th March, 1901.

No. 49.—With reference to Telegraph Department Notification No. 14, dated the 18th June, 1900, it is hereby notified that Mr. P. M. Madge, Superintendent, class V, 1st grade, has been granted by His Majesty's Secretary of State for India an extension of furlough for seven days, with effect from the forenoon of the 19th May, 1901.

FRED. MACLEAN,
Director General of Telegraphs.

DIRECTOR-GENERAL, INDIAN MEDICAL SERVICE.

NOTIFICATION.

Calcutta, the 11th March, 1901.

No. 1-*Camp.*—With effect from the date of being relieved of his duties, Lieutenant-Colonel D. P. Macdonald, M.D., I.M.S., Medical Storekeeper to Government, Bengal Command, is granted three months' privilege leave in combination with 18 months' furlough under article 340(*b*) of the Civil Service Regulations and Government of India, Home Department, Resolution Nos. 224—240, dated 25th January, 1901.

E. ROBERTS, *M.B.*,
Major, I.M.S.,
for *Director-General, Indian Medical Service.*

THE HON'BLE THE CHIEF COMMISSIONER OF AJMER-MERWARA.

NOTIFICATIONS.

Abu, the 6th March, 1901.

No. 277.—In exercise of the powers conferred by section 12 of the Code of Criminal Procedure (Act V of 1898), the Honourable the Chief Commissioner of Ajmer-Merwara is pleased to invest Rai Bahadur Pundit Bhag Ram, C.I.E., Judicial Assistant Commissioner of Ajmer, with the ordinary powers of a Magistrate of the 1st class, to be exercised within the Ajmer District, with effect from the date of assumption by him of charge of the duties of the Judicial Assistant Commissioner, Ajmer.

The Honourable the Chief Commissioner is further pleased to invest Rai Bahadur Pundit Bhag Ram, C.I.E., Judicial Assistant Commissioner, Ajmer, with effect from the same date, under section 37 of Act V of 1898 (Criminal

Procedure Code), with the additional powers mentioned in sections 110, 133 and 260 of the said Act, to be exercised within the Ajmer District.

No. 280.—In exercise of the powers conferred by section 357 of Act V of 1898 (Criminal Procedure Code) and under the authority vested in him by section 185 of Act XIV of 1882 (Civil Procedure Code), the Honourable the Chief Commissioner is pleased to notify that in all criminal cases to which the provisions of section 356 of the Code of Criminal Procedure are applicable and in all civil suits in which an appeal is allowed tried by Rai Bahadur Pundit Bhag Ram, C.I.E., Judicial Assistant Commissioner, Ajmer, the evidence of each witness shall be taken down by that officer in the English language only.

No. 284-328.—Under section 12 of Act V of 1898 (Code of Criminal Procedure), Rao Bahadur Govind Ramchandra Khandekar, B.A., is invested, with effect from the 1st March, 1901, the date on which he assumed charge of the office of Assistant Commissioner of Merwara, with the powers of a Magistrate of the 1st class, to be exercised within the Merwara District.

The 9th March, 1901.

No. 309—327-*III*.—It is hereby notified that Rao Bahadur G. R. Khandekar, Extra Assistant Commissioner, 1st grade, Ajmer, was granted privilege leave for 12 days from the 17th to the 28th February, 1901, both days inclusive.

By Order,

E. H. BLAKESLEY,

First Assistant to the Governor General's Agent, Rajputana, and Chief Commissioner, Ajmer-Merwara.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates —per four-ounce tin, *R2-8*; per eight-ounce tin, *R5*; per pound tin, *R10*. The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the under-noted rates: per four-ounce tin, *R3*; per eight-ounce tin, *R6*; per pound tin, *R12*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1900, the price of this Quinine will be as follows:—

1-pound tin, R18, or, post-free, R18-12.
½ „ R 9, „ R9-8.
¼ „ R4-8, „ R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

صنکونا فبري فيوج يعني تپ بھگانے والی سنکونا *

سنکونا فبري فيوج کلکتہ کے بوٹانکل گارڈن يعنے کمپني باغ کے سپرنٹنڈنٹ صاحب سے هر ايک ملازم سرکاري اور ايک مشت چھہ پونڈ تک لينے والا هر آدمي حسب نرخ ذيل خريد کرسکتا هی :— يعنے چار اونس والا ٹين بقيمت دو روپيہ آٹھہ آنہ ؛ آٹھہ اونس والا ٹين بقيمت پانچ روپيہ ؛ ايک پونڈ والا ٹين بقيمت دس روپيہ *

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৯০০ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন ১৮৲ বা ডাকমাশুল বিনা ১৮৲০
½ আধ „ „ ৯৲ „ ৯৲৮
¼ সিকি „ „ ৪৲৮ „ ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে, এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনিডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকট শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাইতে পারে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal 8vo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required:—

VOLUME I.*

Section	I.	Building Materials (1898). R2-0.
„	II.	Masonry (1898). R1-4.
„	III.	Carpentry (1898). R1-8.
„	IV.	Earthwork (1892). R1-4.
„	V.	Tools and Plant (never published).

VOLUME II.*

Section	VI.	Buildings (1899). R1-4.
„	VII.	Bridges (1897). R4-4.
„	VIII.	Roads (1897). R1-8.
„	IX.	Railways (1891). R1-4.
„	X.	Irrigation Works. (Under revision.)

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol.	I.	Direct and Transverse Strain, principally by Analytical Methods. R7.
„	II.	The Stability of Structures, mostly by Graphic Methods. (In the Press.)

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (7th edition with Curve Table). R3.

XIII. Drawing (by Lieut. R. Pulford, R.E.). † R6.

XIIIa. Drawing, First Principles of Geometrical (by do.). R1-4.

XIV. Simple Applied Mechanics (3rd edition), Parts I and II in one. R1-8.

Simple Applied Mechanics, Part II (1st edition) 8*a*.

XV. Examples of Estimating. Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition). R3-12.

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. R1.

XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 0*a*.

Note.—The complete Treatise forms the course of the Civil Engineer and Upper Subordinate classes at the Thomason College in Civil Engineering. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve. 4*a*.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 30 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. 12*a*.

Notes on Chemistry of Building Materials. R1-8.

Tate's Mechanism. R1.

Barman's Descriptive Mineralogy. R2-4.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India. In one large sheet, 12*a*.; mounted on cloth and bound. R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. 12*a*.

Tyndall's Hand-Book of Specifications. (In the Press.)

The Indian Engineer's Pocket Book. R1.

Wooden Bridges and Designs. By Rai Kunhya Lal. (In the Press.)

Blasting under Water (2nd edition). 10*a*.

Waugh's Instructions for Topographical Surveying. R1.

Analysis of Lime and Cement Stones. By Murray Thompson, Esq., M.D., F.R.S.E. 0*a*.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width, very useful for Projects. R1-0.

SCIENCE BOOKS.

Wilson's Inorganic Chemistry. R1-8.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.

Boileau's Tables of Log $\sin^2 \frac{1}{2}$ P (for computing time (4*a*.).

Cape's Logarithms, with Tables of Squares, Cubes, etc. R1-4.

Cape's Geometry. R1-4.

Cape's Mechanics. 8*a*.

Todhunter's Plane Trigonometry. R2-8.

Todhunter's Differential Calculus. R2-8.

Military Topography. 8*a*.

HINDUSTANI.

Elements of Hindustani Grammar. 8*a*.

Technical Dialogues—English and Urdu. R1.

A Vocabulary of Common and Technical Words in English-Urdu.

History of India (*Itihas Timirnásak*), Hindi, Parts I and II. Both 0*a*.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason Civil Engineering College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876 :—

Terms of subscription payable annually in advance.

For the Complete Series, *including postage* . . . R22-8

	Without postage.	With postage.
	R a. p.	R a. p.
For the Calcutta Series	10 0 0	12 8 0
" each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
" a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit :—

	For town.	For mofussil.
	R a. p.	R a. p.
For the Calcutta Series ; per copy . .	0 8 9	0 10 0
" each of the Madras, Bombay, and Allahabad Series ; per copy . . .	0 5 3	0 5 9
" the Calcutta Series. For the year .	7 2 0	8 6 3
" each of the Madras, Bombay, and Allahabad Series. For the year .	4 4 6	4 11 0

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance :—

	One page.	*Half page.*	*Quarter page.*
For one issue .	R 20	R 14	R 9
" three issues	55	" 36	" 24
" six "	100	" 68	" 45
" nine "	145	" 90	" 64
" twelve "	180	" 120	" 80

Several volumes of the BENGAL LAW REPORTS, from August 1808 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates :—

	Without postage.	With postage.
	R a. p.	R a. p.
Bengal Law Reports, for one year . .	20 0 0	22 8 0
Single copies, R2 per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta. Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 9th March, 1901, and is hereby promulgated for general information :—

ACT NO. V OF 1901.

An Act further to amend the Indian Forest Act, 1878.

WHEREAS it is expedient further to amend the Indian Forest Act, 1878; It is hereby enacted as follows :—

VII of 1878. Short title and commencement.

1. (*1*) This Act may be called the Indian Forest (Amendment) Act, 1901; and

(*2*) It shall come into force at once.

VII of 1878. Addition to section 32, Act VII of 1878.

2. To section 32 of the Indian Forest Act, 1878, the following clause shall be added, namely:—

"Whenever fire is caused wilfully or by gross negligence in a protected forest, the Local Government may (notwithstanding that any penalty has been inflicted under this section) direct that in such forest or any portion thereof the exercise of any right of pasture or to forest-produce shall be suspended for such period as it thinks fit."

Amendment of section 33, Act VII of 1878.

3. In section 33 of the said Act, after the words and figures "except as regards any portion of a forest closed under section 29" the words and figures "or any rights the exercise of which has been suspended under section 32" shall be inserted.

Amendment of section 78, Act VII of 1878.

4. From section 78 of the said Act the words "demanding his aid" shall be omitted before clause (*a*), and after clause (*b*) the following shall be inserted, namely :—

"and shall assist any Forest-officer or Police-officer demanding his aid—".

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 9th March, 1901, and is hereby promulgated for general information :—

ACT NO. VI OF 1901

THE ASSAM LABOUR AND EMIGRATION ACT.

CONTENTS.

CHAPTER I.

PRELIMINARY.

SECTIONS.

1. Short title, extent and commencement.

221. Power to exempt labour-district from Act.
222. Notifications not to affect prior acts, etc.
223. Repeal

THE FIRST SCHEDULE.—FORM OF LABOUR-CONTRACT BETWEEN LABOURER AND EMPLOYER.

THE SECOND SCHEDULE.—ENACTMENTS REPEALED.

The Assam Labour and Emigration Act, 1901.

(*Chapter I.—Preliminary.—Sections 1-2.*)

An Act to consolidate and amend the law relating to Emigration to the Labour-districts of Assam.

WHEREAS it is expedient to consolidate and amend the law relating to emigration to the labour-districts of Assam ; It is hereby enacted as follows :—

CHAPTER I.

Short title, extent and commencement.

1. (*1*) This Act may be called the Assam Labour and Emigration Act, 1901.

(*2*) It extends—

(*a*) to the Provinces of Bengal (including the Santhál Parganas), the North-Western Provinces, Oudh and Assam, the Central Provinces and the District of Ganjam in the Province of Madras; and

(*b*) to such other parts of British India as the Local Government may, with the previous sanction of the Governor General in Council, by notification in the local official Gazette, direct.

(*3*) It shall come into force—

(i) in the territories mentioned in clause (*a*) of sub-section (*2*), at once ; and,

(ii) in any territories to which it may be extended by a notification under clause (*b*) of the said sub-section, on such day as may be specified in that behalf in the notification.

Definitions.

2. (*1*) In this Act, unless there is anything repugnant in the subject or context,—

(*a*) "agent" means a garden-sardar or other person engaging or assisting any native of India to emigrate under Chapter V :

(*b*) "Assistant Inspector" means an Assistant Inspector of Labourers appointed under this Act :

(*c*) "contractor" means a contractor licensed under this Act :

(*d*) "dependant" includes any woman (not being a labourer), any child and any aged or incapacitated relative or friend accompanying any labourer with the consent of a contractor, sub-contractor, recruiter, local agent or garden-sardar, or accompanying any emigrant with the consent of an agent :

(*e*) "emigrate" denotes the departure of any native of India (not being a native of a labour-district) of the age of sixteen years or upwards from any part of the territories in which this Act may for the time being be in force, for the purpose of labouring for hire in a labour-district otherwise than as a domestic servant :

(*f*) "employer" means the chief person for the time being in charge of any estate upon which labourers or more than fifty other persons are employed :

(*g*) "estate" means the land upon which any labourers or more than fifty other persons have been engaged to labour :

(*h*) "garden-sardar" means a person employed on an estate and deputed by his employer to engage labourers :

(*i*) "Inspector" means an Inspector of Labourers appointed under this Act :

(*j*) "labour-contract" means a contract, penally enforceable under this Act, to labour for hire in a labour-district otherwise than as a domestic servant :

(*k*) "labour-district" means any of the districts of Lakhimpur, Sibsagar, Nowgong, Darrang, Kamrup, Goalpara, Cachar and Sylhet in the Province of Assam :

(*l*) "labourer" means any person bound by a labour-contract, and includes any person registered as such under section 34 or section 69 :

(*m*) "local agent" means a local agent licensed under this Act :

(*n*) "Magistrate" means a District Magistrate, Subdivisional Magistrate or other person appointed by the Local Government to perform the functions of a Magistrate under this Act :

(*o*) "recruiter" means a recruiter licensed under this Act :

(*p*) "recruiting district" means a district in which this Act is for the time being in force, other than a labour-district :

(*q*) "Registering-officer" means a Registering-officer appointed under this Act :

(*r*) "sign" and "signature" include, in the case of persons unable to write, finger-impressions :

(*s*) "sub-contractor" means a sub-contractor licensed under this Act : and

(*t*) "Superintendent" means a Superintendent of Emigration appointed under this Act.

(*2*) All words defined in the Indian Contract Act, 1872, and used in this Act shall be deemed to have the meanings respectively assigned to them by that Act. IX of 1872.

The Assam Labour and Emigration Act, 1901.

(Chapter I.—Preliminary.—Sections 3-4. Chapter II.—Labour-contracts generally.—Section 5-10.)

3. The Local Government may, with the previous sanction of the Governor General in Council, by notification in the local official Gazette, prohibit all persons from recruiting, engaging, inducing or assisting any native of India, or any specified class of natives of India, to emigrate from the whole or any specified part of the Province to any labour-district or any specified portion of any labour-district, either absolutely or otherwise than in accordance with such of the provisions of this Act as may be specified in the notification :

Local Government may prohibit recruitment, etc., for emigration to any labour-district or part thereof either absolutely or otherwise than under certain provisions of Act.

Provided that a notification under this section shall not take effect until the expiry of six months from the date of its publication in the Gazette, unless for any special reason the Local Government thinks it necessary to direct that the notification is to take effect at an earlier date.

4. (*1*) The Local Government may appoint so many persons as it thinks necessary to be Superintendents of Emigration, Registering-officers, Embarkation Agents, Debarkation Agents, Inspectors of Labourers, Assistant Inspectors of Labourers and Medical Inspectors, under this Act respectively, and, with respect to any such officer, may, subject to the control of the Governor General in Council, declare the local area situate in the Province within which he shall exercise the powers and perform the duties conferred and imposed upon him by this Act or any rule thereunder.

Appointment of officers.

(*2*) Every person so appointed shall be deemed to be a public servant within the meaning of the Indian Penal Code. XLV of 1860

CHAPTER II.

LABOUR-CONTRACTS GENERALLY.

5. (*1*) Every labour-contract shall be in writing in the form set forth in the first schedule, and shall be executed as hereinafter provided in duplicate on substantial paper.

Essentials of labour-contracts.

(*2*) Every labour-contract shall specify—

(*a*) the names of the labourer and his employer ;

(*b*) the term for which the labourer is to labour ;

(*c*) the monthly wages in money of the labourer and the price at which rice is to be supplied to him ;

(*d*) the labour-district in which, and, if the labourer so requests, the estate on which, the labourer is to labour.

(*3*) No labour-contract shall be made for a term exceeding four years or, if the contract is entered into under the provisions of section 118, for a term exceeding one year, commencing from the date of its execution.

(*4*) No labour-contract shall stipulate for a less rate of monthly wages than—

for the first year, five rupees in the case of a man and four rupees in the case of a woman :

for the second and third years, five rupees eight annas in the case of a man and four rupees eight annas in the case of a woman : and

for the fourth year, six rupees in the case of a man and five rupees in the case of a woman :

Provided that the payment of wages under a labour-contract at the stipulated rate shall during the first six months after the arrival of the labourer in the labour-district where he is first employed be contingent on the completion of half the daily task regulated in accordance with the provisions of this Act, unless an Inspector has certified that the labourer is physically fit to perform the whole of such task :

Provided also that in all other cases the payment of wages at the stipulated rate shall be contingent on the completion of such daily task :

Provided further that any labour-contract made before the first day of April, 1903, may stipulate for a rate of monthly wages of not less than five rupees in the case of a man and four rupees in the case of a woman for the second and third years of the term of such contract.

6. No contract made otherwise than in accordance with the provisions of section 5 shall be enforceable under this Act as a labour-contract against the labourer entering into it.

Contracts not enforceable as labour-contracts unless made in accordance with section 5.

7. Unless his labour-contract contains a specific obligation to that effect, no labourer shall be bound by it to undertake any work involving underground labour in mines.

In absence of specific obligation, underground labour not obligatory.

8. Unless his labour-contract specifies the particular estate on which he is to labour, a labourer shall be deemed to have contracted to labour on any estate in charge of the employer for whom he has contracted to labour, and situate in the labour-district specified in the contract :

Where contract does not specify estate, labourer to be deemed to have contracted to labour on any estate in charge of employer and situate in labour-district.

Provided that no labourer shall, without his consent, be separated from his dependants (if any) or from any other labourer, being his or her wife, husband, son or daughter.

9. Notwithstanding anything to the contrary in the Indian Contract Act, 1872, any person of the age of sixteen years or upwards may enter into a labour-contract : IX of

Persons who may enter into labour-contracts.

Provided that no woman shall be capable of binding herself by a labour-contract if her husband or lawful guardian (if any) objects.

10. (*1*) Where the Local Government, after such inquiry as it thinks sufficient, is of opinion that any labourer was recruited or conveyed to a labour-district, or compelled or induced to enter into a labour-contract, by any coercion, undue influence, fraud or misrepresentation, or that any such irregularity has occurred in connection with his recruitment or the execution of his contract as makes it just to rescind his contract, the Local Government may, by order in writing, direct the labour-contract of the labourer to be cancelled.

Power of Local Government to cancel contract in case of wrongful recruitment.

(*2*) On receipt of an order made under sub-section (*1*), the Superintendent, Inspector or Magistrate shall cancel the labour-contract referred to in the order, and shall thereupon make endorsement that it has been so cancelled on the labourer's copy of the labour-contract, or, if that copy is not forthcoming, shall give to the labourer a certificate to the like effect.

The Assam Labour and Emigration Act 1901.

(Chapter II.—Labour-contracts generally.—Sections 11-13.—Chapter III.—Recruitment by Contractors, Sub-contractors and Recruiters.—Sections 14-20.)

Power to cancel contract of labourer related to labourer whose contract is cancelled.

11. Where the labour-contract of a labourer is or has been cancelled under section 10, the Local Government may, in its discretion and on the application of the labourer concerned, cancel the labour-contract of any labourer, being the wife, husband, father, mother, son or daughter of the labourer whose labour-contract is or has been cancelled, who may have entered into a labour-contract at the same place with the same employer or, in the case of a labour-contract cancelled in the labour-districts, may be employed on any estate belonging to the same owner or under charge of the same employer.

Repatriation of labourers whose contracts are cancelled.

12. (*1*) Subject to any orders which the Local Government may make in this behalf, the Superintendent, Inspector or Magistrate may detain and send back to his native district any labourer, together with his dependants (if any), whose labour-contract has been cancelled under section 10 or section 11, and may recover the whole or any part of the expenses incurred during such detention or in so sending him back as follows, namely:—

(*a*) in the case of a labourer in a recruiting district, if the labourer has been recruited under Chapter III, from the contractor at whose depôt the labourer executed his labour-contract;

(*b*) in the case of a labourer in a recruiting district, if the labourer has been recruited under Chapter IV, from the employer by whom the certificate of the garden-sardar concerned was granted or from the local agent of the employer; and,

(*c*) in the case of a labourer in a labour-district, from the employer on whose estate the labourer is under contract to labour, or, if the labourer has been recruited under Chapter III, either from such employer or from the contractor at whose depôt the labourer executed the labour-contract, as to the Inspector or Magistrate may seem expedient.

(*2*) In the case of a labourer recruited under Chapter III, when the whole or any part of such expenses have been recovered from the employer, the employer shall be entitled to recover the same from the contractor at whose depôt the labourer executed the labour-contract.

(*3*) A certified copy of the order in writing of the Local Government under section 10 or section 11 and the receipt granted to the employer for such expenses shall be conclusive evidence of the title of the employer to recover such expenses from the contractor.

Escort for repatriated labourer.

13. (*1*) Where a labourer is sent back to his native district under section 12, the Superintendent, Inspector or Magistrate may provide an escort or make such other arrangements as he may think necessary for ensuring that the labourer is actually conveyed to his native district.

(*2*) Any expenditure incurred in providing such escort or making such arrangements as aforesaid may be recovered as part of the amount expended in sending the labourer back to his native district.

CHAPTER III.

RECRUITMENT BY CONTRACTORS, SUB-CONTRACTORS AND RECRUITERS.

Contractors and sub-contractors.

Licensing of contractors and sub-contractors.

14. Any Superintendent specially empowered in this behalf by the Local Government may grant to persons fitted by character to act as contractors licenses to be contractors within the whole or any part of the local area for which the Superintendent has been appointed; and may also, on the application of any contractor, grant to persons fitted by character to act as sub-contractors licenses to be sub-contractors, on behalf of the contractor, within the whole or any part of the local area for which the contractor is licensed.

Fee for, and form of, contractors' and sub-contractors' licenses.

15. Every license granted under section 14 shall be in such form, and subject to the payment of such fee, not exceeding, in the case of a contractor, one hundred rupees, and, in the case of a sub-contractor, fifty rupees, as the Local Government may, by rule, prescribe.

Duration of contractors' and sub-contractors' licenses and cancellation thereof.

16. (*1*) No license shall be granted under section 14 for a longer period than one year from the date thereof, and, if the licensee fails to comply with any of the provisions of this Act or the rules thereunder, or is guilty of any other misconduct, his license may be cancelled by the Superintendent who granted the same.

(*2*) A contractor or sub contractor may, within one month from the date of any order of a Superintendent cancelling his license under sub-section (*1*), appeal against the order to the Local Government, and the decision of the Local Government thereon shall be final.

Duties of contractors.

17. Every contractor shall, in addition to the special duties imposed upon him by this Act, afford such information to the Superintendent and furnish him with such returns and reports as the Superintendent may, subject to any rules made by the Local Government in this behalf, require.

Sub-contractor to act on behalf of only one contractor.

18. No sub-contractor shall be licensed to act on behalf of more than one contractor.

Contractor or sub-contractor acting as recruiter.

19. A contractor or sub-contractor may act as a recruiter, and shall, when so acting, be subject to all the provisions of this Act relating to recruiters.

Liability of contractors for sub-contractors' and recruiters' acts and defaults.

20. (*1*) Every contractor shall be liable for the acts and defaults as a sub-contractor or recruiter of any person licensed to be a sub-contractor or recruiter on his behalf, and all payments which, under this Act or any rule thereunder, any person so licensed is required to make, may, in case of default, be recovered from the contractor concerned.

The Assam Labour and Emigration Act 1901.

(Chapter III.—Recruitment by Contractors, Sub-contractors and Recruiters.—Sections 21-30.)

(2) The Superintendent may cancel the license of any contractor where the license of any person so licensed on behalf of the contractor is liable to be cancelled under this Act.

(3) Nothing in this section shall be deemed to render a contractor criminally liable for any act or default on the part of any person so licensed on his behalf.

Contractor to establish depôts.

21. Every contractor shall establish and maintain, at such places and for such local areas as the Local Government may direct, suitable depôts for the reception and lodging, previous to their despatch to the labour-districts, of labourers engaged by him or by sub-contractors or recruiters licensed on his behalf, and shall provide at his own expense all necessary food, clothing and medical treatment for any labourers so engaged during their stay at the depôts.

Inspection and supervision of depôts.

22. (1) No depôt shall be used for the reception and lodging of labourers until it has been inspected and approved of by the Superintendent and the Medical Inspector.

(2) Every depôt shall be under the supervision of the Superintendent, the Magistrate or such other officer as the Local Government may appoint in this behalf, and shall be open at all times to inspection by the Superintendent, the Magistrate or such officer as aforesaid, and the Medical Inspector.

(3) Where the Superintendent considers that any depôt is unhealthy, or has become unsuitable for the purpose for which it was established, he may, by order in writing, prohibit the use of the depôt for the reception and lodging of labourers.

Establishment of hospital-depôts.

23. In addition to the depôts hereinbefore provided for, the Local Government may establish separate hospital-depôts for the reception of labourers suffering from dangerously infectious or contagious diseases.

Contractor to contribute towards establishment and maintenance of hospital-depôt.

24. (1) Where a hospital-depôt is established under section 23, the Local Government may require any contractor having a depôt in the neighbourhood of the hospital-depôt to contribute to the expense of the establishment and maintenance of the hospital-depôt such reasonable sum as it may direct, and may recover the same from the contractor.

(2) Every hospital-depôt established under section 23 shall be under the charge of a medical officer appointed by the Local Government.

(3) Any Medical Inspector may direct the transfer of any labourer from a depôt established within the local limits of his jurisdiction to a hospital-depôt established under section 23 within the said local limits.

Recruiters.

Licensing of recruiters.

25. Any Superintendent empowered in this behalf by the Local Government may, on the application of a contractor or of any sub-contractor acting on behalf of a contractor, grant to persons fitted by character to be employed in engaging labourers licenses to be recruiters on behalf of the contractor within the whole or any specified part of the local area for which the contractor has been licensed:

Provided that no person shall be granted a license under this section to be a recruiter on behalf of more than one contractor or to act as such within the local limits of more than one district.

Form of, and fee for, recruiter's license.

26. Every license granted under section 25 shall be in such form, and subject to the payment of such fee, not exceeding sixteen rupees, as the Local Government may, by rule, prescribe.

Duration of recruiter's license.

27. No license shall be granted under section 25 for a longer period than one year from the date thereof; and, if the licensee fails to comply with any of the provisions of this Act or the rules thereunder, or is guilty of any other misconduct, his license may be cancelled by the Superintendent who granted the same.

Recruiter to hold certificate from contractor or sub-contractor.

28. Every recruiter shall hold a certificate in writing authorizing him to act as such and signed by the contractor or sub-contractor on whose application he was licensed.

Magistrate's countersignature of recruiter's license.

29. (1) No recruiter shall engage or attempt to engage any person as a labourer unless his license bears the countersignature of a Magistrate having jurisdiction in the district or sub-division for which he is licensed.

(2) No Magistrate shall countersign a recruiter's license unless and until he has satisfied himself by such inquiry as he thinks fit that the licensee is not, by character or from any other cause, unfitted to be a recruiter under this Act, that he holds the certificate prescribed by section 28, and that sufficient and proper accommodation has been provided in a suitable place and is available for such labourers, or persons intending to become labourers, as may be collected by him pending their removal to a depôt.

Magistrate to supervise accommodation.

30. (1) Every Magistrate shall have, for the supervision, inspection and regulation of any place within the local limits of his jurisdiction in which accommodation is provided under section 29, sub-section (2), the same powers as are by this Act conferred on the Superintendent in respect of depôts.

(2) The District or any Subdivisional Magistrate may authorize any Magistrate subordinate to him, or any officer of police above the rank of sub-inspector, to visit and inspect such places as aforesaid at any time; and all recruiters or other

persons in charge of such places as aforesaid shall afford to subordinate Magistrates and officers of police so authorized every facility for visiting and inspecting them.

Cancellation of Magistrate's countersignature in certain cases.

31. (*1*) Where any Magistrate who has countersigned a recruiter's license afterwards finds reason to think that the licensee is, by character or from any other cause, unfitted to be a recruiter under this Act, or that the accommodation provided under section 29, sub-section (*2*), has become insufficient or improper or has ceased to be available, or that the place in which it is provided has become unsuitable, he may require the licensee to produce his license and may cancel his countersignature thereon, or he may impound the license and send it for cancellation to the Superintendent who granted the same.

(*2*) Every Magistrate refusing to countersign a recruiter's license or cancelling his countersignature thereon shall at once report his refusal or cancellation and the grounds thereof to the Superintendent who granted the license.

Procedure before arrival at Depôts.

Intending labourer to be taken for examination to medical officer.

32. (*1*) Every recruiter who desires to engage any person as a labourer shall appear with the person before such medical officer as the Local Government may appoint in this behalf within the local limits of the jurisdiction of the Magistrate by whom the recruiter's license was countersigned, or, if no medical officer has been so appointed, before such medical officer as the Registering-officer before whom the person is taken for registration as hereinafter provided may direct.

(*2*) The medical officer shall thereupon examine the person, and shall, if satisfied that he is in a fit state of health to proceed to the labour-district in which he intends to labour, and is not incapacitated, by reason of any obvious bodily defect or infirmity, for labour in the labour-districts, give him a certificate to that effect.

If certified to be fit, intending labourer to be brought before Registering-officer.

33. Every person who obtains a certificate under section 32, together with any persons about to proceed to a labour-district as his dependants, shall thereupon be brought by the recruiter before the Registering-officer having jurisdiction within the local area for which the recruiter is licensed, or before such other Registering-officer as the Local Government may appoint for that local area. The recruiter shall, at the same time, produce and show his license to the Registering-officer.

Examination and registration of intending labourer.

34. (*1*) The Registering-officer shall thereupon inspect the certificate given under section 32 and the license of the recruiter, and, if he finds that the certificate has been duly given and that the recruiter is duly licensed, shall then examine the person brought before him under section 33 with reference to his intended labour-contract, and explain the same to him.

(*2*) Where it appears that the person so brought before the Registering-officer is competent to enter into the intended labour-contract, and understands the same as regards the locality, the period and nature of the service, and the rate of wages and the price at which rice is to be supplied to him, that the terms thereof are in accordance with law, that he has not been induced to agree to enter thereinto by any coercion, undue influence, fraud, misrepresentation or mistake, and that he is willing to fulfil the same, the Registering-officer shall register, in a book to be kept for the purpose, such particulars regarding him and the persons (if any) whom he wishes to have registered as his dependants as the Local Government may, by rule, prescribe; and the labourer and his dependants (if any) shall thereupon be deemed to be registered under this Act.

(*3*) Where any woman is produced before a Registering officer for the purpose of being registered under this section, the Registering-officer shall, after such inquiry as may be necessary to satisfy him of the identity of her husband or lawful guardian, as the case may be, and, after such examination as may be necessary to satisfy him of the consent of such husband or lawful guardian, place on record in writing under his own signature that such husband or lawful guardian has consented to her entering into a labour-contract, and such record shall also be subscribed by the husband or lawful guardian with his signature.

(*4*) In the case of any such woman who is alleged to be a widow or of an unmarried woman who is stated to have no lawful guardian living, the Registering-officer shall satisfy himself by the evidence of at least one witness that her husband is dead or that she has no lawful guardian, as the case may be, and shall record such evidence in writing under his own signature.

Arrangements to be made for return to home of intending labourer whose registration is refused.

35. (*1*) Where the Registering-officer refuses to register a person as a labourer under this Act, he shall report his refusal to the District or Subdivisional Magistrate or other officer appointed by the Local Government in this behalf, and such Magistrate or officer as aforesaid may make such arrangements as he may think necessary for ensuring the return of the person and his dependants (if any) to their homes and for their proper housing and support in the interval. In the case of any male under the age of sixteen years or or any female recruited in circumstances which appear to be suspicious, the arrangements may include the provision of an escort home.

(*2*) Any expenditure incurred under sub-section (*1*) may be recovered from the contractor or recruiter concerned, or both.

Copy of registration to be given to labourer.

36. The Registering-officer shall furnish to every person registered under section 34, sub-sec-

The Assam Labour and Emigration Act 1901.

(Chapter III.—Recruitment by Contractors, Sub contractors and Recruiters.—Sections 37-46.)

tion (2), a certified copy written on substantial paper of the particulars referred to therein

Copy of registration and medical certificate to be sent to Superintendent.

37. Every Registering-officer registering a person under section 34, sub-section (2), shall forthwith forward a certified copy of the particulars referred to therein and the original certificate of the medical officer regarding the person to the Superintendent having jurisdiction over the depôt to which the person is to proceed.

Fee for registration.

38. For every person produced before a Registering-officer for the purpose of being registered under section 34, sub-section (2), the recruiter shall pay to the Registering-officer such fee, not exceeding one rupee, as the Local Government may, by rule, prescribe.

Recruiter when to remove person to depôt.

39. No recruiter shall remove or attempt to remove any person to a depôt, or induce or attempt to induce him to go to a depôt, or to leave the local limits of the jurisdiction of the Registering-officer before whom he ought to be brought under section 33, or aid or attempt to aid him in going to a depôt, or leaving any such local limits as aforesaid, unless and until he has been registered under section 34, sub-section (2).

Conveyance of labourer to depôt.

40. (1) After a labourer has been registered under section 34, sub-section (2), the Registering-officer shall direct the recruiter to convey the labour with all convenient despatch to a depôt established by the contractor on whose behalf the recruiter has been licensed, and shall specify the depôt to which the labourer is to be conveyed.

(2) Every labourer shall, while proceeding to the depôt, be accompanied throughout the journey either by the recruiter himself, or by a competent person deputed by him with the approval of the Registering-officer by whom the labourer has been registered.

(3) The Registering-officer shall give to every person so deputed a certificate, under his signature, stating that he has been deputed for the journey to the depôt.

Recruiter to provide food and lodging for labourer on journey.

41. Every recruiter or person deputed by him under section 40, sub-section (2), shall, throughout the journey to the depôt, provide the labourer and his dependants (if any) with proper and sufficient food and lodging.

Procedure at Contractors' Depôts.

Contractor to report arrival of labourer.

42. Within twenty-four hours after the arrival of a labourer at a depôt, the contractor by whom the depôt is maintained, or the person in charge thereof, shall give to the Superintendent, within the local limits of whose jurisdiction the depôt is situate, a notice in writing, in such form and containing such particulars as the Local Government may, by rule, prescribe, of the arrival of the labourer.

Duties of Medical Inspector.

43. (1) The Medical Inspector shall, as soon as may be after the arrival of a labourer at a depôt, examine the labourer and his dependants (if any) to ascertain that they are in a fit state of health to undertake the journey to the labour-district to which they intend to proceed, and, in the case of the labourer, that he is also not incapacitated, by reason of any obvious bodily defect or infirmity, for labour in the labour-districts.

(2) The Medical Inspector shall give a certificate to the Superintendent stating whether he is or is not satisfied that the labourer and his dependants (if any) are in a fit state of health to undertake the journey, and, in the case of the labourer, that he is also not incapacitated as aforesaid.

On grant of certificate, labourer to enter into labour-contract.

44. Where the Medical Inspector gives a certificate under section 43, sub-section (2), with respect to any labourer, and there is, in the opinion of the Superintendent, no valid reason why the labourer should not enter into the intended labour-contract, the labourer and the employer with whom he intends to contract, or the person appearing on behalf of the employer, shall, after the lapse of three, and within thirty, days after the date of the arrival of the labourer at the depôt, execute the labour-contract in the presence of the Superintendent:

Provided that no labour-contract shall be executed as aforesaid except in the district in which the labourer was registered under section 34, sub-section (2), or at such other place within the Province as the Local Government may direct.

Contract to be explained to labourer by Superintendent, and abstract and copies to be made.

45. (1) Before any labourer executes a labour-contract, under section 44, the Superintendent shall personally explain it to him, and shall, after the same has been executed by him and by his employer or the person appearing on behalf of his employer, attest the labour-contract and certify at the foot thereof that he has personally explained the same to the labourer.

(2) An abstract of every labour-contract so executed shall be entered in a register to be kept by the Superintendent for the purpose; and, after the abstract has been so entered, one copy of the labour-contract shall be given to the labourer and the other to his employer or the agent of his employer.

Power for employer to require further medical certificate as to fitness to labour previous to contract.

46. Where the employer with whom any labourer intends to contract, or a person appearing on behalf of the employer, has given notice to the Superintendent that, before any labour-contract is entered into by him or on his behalf with any labourer, the labourer shall be examined by a medical man selected by such employer or person appearing on behalf of the employer and shall be certified by him to be physically and constitutionally fit for labour in the labour-district in which the estate of the employer is situate, the Superintendent shall not permit the labourer to execute a labour-contract, until such medical certificate as aforesaid has been produced and shown to him.

47. Where the employer or the person appearing on his behalf has directed that the examination referred to in section 46 shall be made by a medical officer in the service of the Government, such officer as aforesaid making the examination shall be entitled to receive from the employer or such person such fees as may be agreed upon, or, if no agreement has been entered into, then such fee for each labourer so examined as the Local Government, by general or special order, may direct.

Fee of medical officer when in Government service for examination under section 46.

48. In any of the following cases, namely :—

Power to cancel contract and order payment of expenses of return of labourer in certain cases.

(*a*) where the Medical Inspector, on making the examination required by section 43, sub-section (*1*), or at any subsequent time during the stay at the depôt of a labourer, finds that the labourer is or has become unfit to undertake the journey to the labour-district to which he intends to proceed, or that the labourer is incapacitated, by reason of any obvious bodily defect or infirmity, for labour in the labour-districts, and the Superintendent considers that the labourer has not dishonestly represented himself as fit to undertake the journey; or

(*b*) where the Superintendent finds that any such irregularity has occurred in the recruitment or treatment by the recruiter of a labourer as makes it just to refuse to permit a labour-contract to be executed or to rescind a labour contract which has been executed; or

(*c*) where the contractor on whose behalf or by whom a labourer has been registered does not, after the lapse of three, and within thirty, days after the date of the arrival of the labourer at the depôt, tender to him a labour-contract for execution under section 44, or the employer or the person appearing on his behalf refuses or neglects to execute the contract as required by that section;

the Superintendent may cancel the labour-contract executed by the labourer, and in that event, or if no labour-contract has been executed may order the contractor at once to pay the labourer such reasonable sum as the Superintendent may think necessary to enable the labourer to return to the place at which he was registered or to his native district, as to the Superintendent may seem fit, and such further sum by way of compensation as the Superintendent thinks reasonable; and may take such other steps as he may think necessary for the conveyance of the labourer to such place or district as aforesaid.

49. (*1*) Any labourer who, from his state of health, is, in the opinion of the Medical Inspector unfit to undertake the return journey, shall be entitled to be fed, lodged, clothed and (if necessary) medically treated at the depôt at the expense of the contractor by whom the depôt is maintained, until he is reported by the Medical Inspector to be fit to undertake the return journey.

Labourer when to be lodged, etc., at depôt till he can return home.

(*2*) Where the contractor negligently or wilfully omits to provide food, lodging, clothing or medical treatment for the labourer, the Superintendent may order the contractor at once to pay such reasonable sum as the Superintendent may think necessary to provide such food, lodging, clothing or medical treatment as aforesaid.

50. Where an order is made under section 48 with reference to a labourer, any person registered as his dependant, or any other labourer, being his or her wife, husband, son or daughter, may claim—

Like provisions in case of dependants and relatives.

(*a*) to be conveyed, at the expense of the contractor, with the labourer to the same place as the labourer; and,

(*b*) if the labourer is unable to travel, to be fed, lodged, clothed and (if necessary) medically treated in the depôt at the expense of the contractor until the labourer is able to travel;

and the Superintendent may include such expenses as aforesaid in an order made under section 48 or section 49 with respect to the labourer.

51. Where, upon the arrival of a labourer at a depôt, it appears that during the journey to the depôt the labourer or any person registered as his dependant has suffered ill-treatment at the hands of the recruiter or person deputed by the recruiter to accompany the labourer, or that the recruiter or such person as aforesaid has failed to provide the labourer or any person registered as his dependant with proper and sufficient food and lodging, the Superintendent may order the contractor by whom the depôt is maintained to pay the labourer a reasonable sum by way of compensation.

Compensation to labourer for ill-treatment on the journey.

52. Where the Medical Inspector has reason to think that any person registered as the dependant of a labourer is not in a fit state of health to undertake the journey to the labour-district to which the labourer intends to proceed, the Medical Inspector shall so certify to the Superintendent to whom notice of the arrival of the labourer was given. The provisions of sections 48 and 49 shall thereupon apply to the dependant as if he were a labourer, and the Superintendent may make such orders regarding him as he may make under those sections with regard to a labourer.

Procedure when dependant declared unfit to proceed to labour-district.

53. In any such case as is provided for by section 52, the labourer to whom the dependant is attached shall further be entitled, if he or she so wishes, and if he or she is the husband, wife, son or daughter of the dependant, to receive from the contractor at whose depôt he or she arrived, such reasonable

Labourer and relatives entitled to be returned with dependant.

sum as the Superintendent may think necessary to enable him or her to return to the place where he or she was registered, or to his or her native district, as to the Superintendent may seem fit. If the labourer so returns, then any other persons registered as his or her dependants, and any other labourer, being his or her wife, husband, son or daughter, shall also be entitled to receive a like sum from the contractor.

Failure of contractor to pay sums ordered to be paid under sections 48 to 53.

54. On the failure of a contractor for the space of twenty-four hours to comply with an order of the Superintendent to pay any sum required to be paid under section 48, section 49, section 50, section 51, section 52 or section 53, the Superintendent may pay the same to or on behalf of the labourer or dependant concerned, and may recover it from the contractor.

Provisions as to escort on journey and way-bill.

55. (*1*) All labourers despatched from a contractor's depôt to a labour-district shall during their journey to the place where they are to labour be accompanied by a person appointed by the contractor, and no person shall be so appointed unless he holds a certificate of fitness signed by the Superintendent, who may cancel such certificate for any reason which seems to him sufficient.

(*2*) Every person appointed under sub-section (*1*) shall take with him a way-bill in such form and containing such particulars and instructions as the Local Government may prescribe; he shall present the way-bill at all such places and to all such officers as may be thereupon indicated; and he shall carry out all instructions therein contained for his guidance.

CHAPTER IV.

RECRUITMENT BY GARDEN-SARDARS AND LOCAL AGENTS.

Garden-sardars.

Employer may grant certificate to garden-sardar.

56. (*1*) An employer may grant to any garden-sardar a certificate authorizing him, in such local area within the limits of a single recruiting district as may be specified in the certificate to enter into labour-contracts with persons desirous of becoming labourers upon any estate of which the employer is in charge, and may cancel such certificate at any time.

(*2*) Where any labourer bound by a labour-contract is granted a certificate under sub-section (*1*), his employment under the certificate shall be deemed to be employment under his labour-contract.

Form and particulars to be contained in such certificate.

57. (*1*) Every certificate granted to a garden-sarbar under section 56, sub-section (*1*), shall be in such form and shall contain such particulars as the Chief Commissioner of Assam may prescribe in this behalf.

(*2*) Any employer granting a certificate to a garden-sardar under section 56, sub-section (*1*), may, before the certificate is accepted and signed as hereinafter provided, specify therein the name of the local agent (if any) to whom the garden-sardar is to report himself for orders, the time within which he is to return to his employer, and such other instructions for his guidance as he may think fit.

Certificate to be accepted and signed in presence of Inspector or Magistrate.

58. Every certificate granted to a garden-sardar under section 56, sub-section (*1*), shall be accepted and signed by the garden-sardar in the presence of the Inspector or of a Magistrate having jurisdiction over the place where the employer granting the certificate resides.

Inspector's or Magistrate's countersignature of certificate.

59. The Inspector or Magistrate shall inquire into the facts stated in the certificate, and, upon being satisfied of the truth of the facts so stated, shall, unless it appears to him that the person so accepting and signing the certificate is not employed on an estate of which the person granting the certificate is in charge or is, by character or from any other cause, unfitted to be a garden-sardar, countersign and date the certificate.

Provision for grant of fresh certificate.

60. (*1*) On the application of the employer by whom any certificate so countersigned has been granted to a garden-sardar, the Inspector or Magistrate may, without requiring the appearance of the garden-sardar or making the inquiry prescribed by section 59, countersign a fresh certificate to be granted by the employer to the garden-sardar in renewal of any existing certificate.

(*2*) Every fresh certificate granted under sub-section (*1*) shall be forwarded by the Inspector or Magistrate countersigning it to the District Magistrate of the district in which the garden-sardar to whom it is granted is employed; and the garden-sardar shall, on receiving notice from such District Magistrate as aforesaid, appear before him or any Magistrate specified in the notice and accept and sign the fresh certificate in his presence.

Certificate when to come into force, and duration thereof.

61. No certificate granted to a garden-sardar under this Chapter shall come into force unless and until it has been accepted and signed by the garden-sardar and countersigned by the Inspector or Magistrate having jurisdiction over the place where the employer granting the certificate resides, and also by the District Magistrate of the district in which the garden-sardar is authorized by the certificate to enter into labour-contracts, and no certificate so granted shall continue in force for a longer period than one year from the date of its countersignature by the said Inspector or Magistrate.

The Assam Labour and Emigration Act 1901.

(*Chapter IV.—Recruitment by Garden-sardars and Local Agents.—Sections 62-67.*)

Accommodation to be provided by garden-sardar.

62. (*1*) Every garden-sardar shall provide sufficient and proper accommodation in a suitable place for such labourers, or persons intending to become labourers, as may be collected by him pending their removal to a labour-district.

(*2*) The District or Subdivisional Magistrate shall visit and inspect the accommodation so provided; and every garden-sardar or other person in charge of a place in which accommodation is so provided shall afford to such Magistrate every facility for visiting and inspecting it.

(*3*) The District or Subdivisional Magistrate may delegate the duty imposed on him by sub-section (*2*) to a Subordinate Magistrate or to an officer of police above the rank of sub-inspector.

(*4*) In every such place as aforesaid the garden-sardar providing the accommodation shall make such sanitary arrangements as the Local Government may prescribe.

Cancellation of certificate in certain cases.

63. (*1*) Where a garden-sardar commits a breach of any of the provisions of this Act or the rules thereunder, the Inspector or Magistrate who countersigned his certificate, or the District Magistrate who countersigned the certificate under section 61, or the Superintendent within whose jurisdiction the garden-sardar is employed, may cancel the certificate.

(*2*) Whenever one of the officers aforesaid cancels a certificate, he shall give notice of the fact to the other officers mentioned in sub-section (*1*) and to the employer of the garden-sardar; and, whenever such a certificate is cancelled by the employer, notice of the fact shall be given by him to the officers aforesaid.

(*3*) When the certificate of a garden-sardar is cancelled under this section, any labourers or other persons of whom he is in charge may be forwarded to their destination under the care of any person appointed by the employer for that purpose and approved by the Superintendent.

Local Agents.

Licensing and duties of local agents.

64. (*1*) Any Superintendent authorized in this behalf by the Local Government may, on the application of one or more employers, grant licenses to suitable persons to be local agents for the purpose of representing employers in all matters connected with the supervision of garden-sardars under this Chapter or section 90 or section 91 within such local area and for such period as the employer or employers so applying may desire:

Provided that no contractor and no person who in the opinion of the Superintendent has a share or interest in any contractor's business shall be licensed as a local agent.

(*2*) A local agent shall furnish such information and make such returns as the Local Government may, by rule, prescribe.

Selecting agent.

65. Any Superintendent authorized in this behalf by the Local Government may, on the application of one or more employers, grant licenses, for such period as the employer or employers may desire, to suitable persons to be selecting agents, for the selection, on behalf of the employer or employers, of labourers recruited by contractors, and such selecting agent shall furnish such information and make such returns as the Local Government may by rule prescribe:

Provided that no contractor or local agent and no person who in the opinion of the Superintendent has a share or interest in any contractor's business shall be licensed as a selecting agent:

Provided also that no such license shall be granted for more than one year from the date thereof:

Provided also that a license granted under this section may be cancelled by the Superintendent for any reason which seems to him sufficient.

Prosecution of garden-sardars by local agents.

66. Where any garden-sardar to whom a certificate has been granted under this Chapter by an employer commits any offence punishable under this Act, any local agent of the employer may prosecute the garden-sardar for that offence.

Cancellation of licenses of local agents.

67. (*1*) The District Magistrate of any district within which a local agent acts as such may, by order in writing, cancel the license of the local agent if the employer so requires, or if it is shown to the satisfaction of the District Magistrate that the local agent has—

(*a*) employed any contractor's recruiter to recruit or engage on his behalf persons to be labourers; or

(*b*) permitted persons engaged as labourers by or on behalf of any contractor to use the accommodation provided for the persons engaged as labourers by any garden-sardar under the local agent's control; or

(*c*) allowed any garden-sardar under his control to transfer persons engaged as labourers by the garden-sardar to contractors or to their recruiters or to

any employer other than the employer by whom the garden-sardar's certificate was granted ; or

(*d*) himself taken over persons engaged as labourers by any garden-sardar with intent to despatch them to any employer other than the employer by whom the garden-sardar's certificate was granted

(*2*) A local agent may, within three months next after the date of any order of a District Magistrate cancelling his license under sub-section (*1*), appeal against the order to the Local Government, and the decision of the Local Government thereon shall be final.

Procedure to be followed by Garden-sardars.

Garden-sardar and labourer to appear before Registering-officer for registration.

68. Every garden-sardar who desires to engage any person as a labourer shall appear with the person, together with any others about to proceed to a labour-district as his dependants, before the Registering-officer having jurisdiction within the local area specified in the certificate of the garden-sardar or before such other Registering-officer as the Local Government may appoint for that local area.

Examination and registration of persons engaged by garden-sardar.

69. (*1*) The Registering-officer shall thereupon inspect the certificate of the garden-sardar, and, if he finds that the certificate is in force, shall examine, with reference to the intended labour-contract, the person brought before him under section 68 whom it is desired to engage as a labourer, and explain the intended labour-contract to him.

(*2*) Where it appears that the person so brought before the Registering-officer is competent to enter into the intended labour-contract and understands the nature of the same as regards the locality, period and nature of the service, and the rate of wages and the price at which rice is to be supplied to him, that the terms thereof are in accordance with law, that he has not been induced to agree to enter thereinto by any coercion, undue influence, fraud, misrepresentation or mistake, and that he is willing to fulfil the same, the Registering-officer shall register, in a book to be kept for the purpose, such particulars regarding him and his dependants (if any) as the Local Government may, by rule, prescribe ; and the labourer and his dependants (if any) shall thereupon be deemed to be registered under this Act.

Medical examination.

70. (*1*) Where it appears to the Registering-officer that any person brought before him under section 68 is not in a fit state of health to undertake the journey to the labour-district to which he intends to proceed, or, in the case of a labourer, that he is incapacitated, by reason of any obvious bodily defect or infirmity, for labour in the labour-districts, the Registering-officer may, before registering him under section 69, sub-section (*2*), if himself a medical man, medically examine him, or, if not himself a medical man, send him to a medical man for medical examination.

(*2*) If upon medical examination any person so brought before a Registering-officer is declared unfit to undertake the journey to the labour-district or, in the case of a labourer, incapacitated, by reason of any obvious bodily defect or infirmity for labour in the labour-districts, the Registering officer may refuse to register him.

Fee to be paid for every labourer produced for registration.

71. For every person brought before a Registering-officer under section 68 for the purpose of being registered as a labourer, the garden-sardar who appears with him shall pay to the Registering-officer such fee, not exceeding one rupee, as the Local Government may direct.

Labour-contract to be executed.

72. (*1*) Where a person has been registered under section 69 sub-section (*2*), he shall, within fifteen days after the date on which he was so registered, execute a labour-contract with the employer with whom he intends to contract.

(*2*) The labour-contract shall be signed in the presence of the Registering-officer by the person so registered and, on behalf of the employer, by the garden-sardar who appears with him before the Registering-officer. The Registering-officer shall satisfy himself that the labour-contract is in accordance with any instructions specified in the certificate of the garden-sardar ; and, if he is so satisfied, shall, before the labourer signs the labour-contract, personally explain it to him and, after it has been executed as aforesaid, attest it, and certify at the foot thereof that he has personally explained it to the labourer.

(*3*) An abstract of every labour-contract executed under this section shall be entered in a register to be kept for the purpose by the Registering-officer, and a copy thereof shall then be given to the labourer and a copy to the garden-sardar or local agent.

(*4*) Where any garden-sardar, without reasonable cause, refuses or neglects to execute a labour-contract with a labourer as required by sub-section (*2*) within fifteen days after the date on which the labourer as registered under section 69, sub-section (*2*), the Registering-officer may order the garden-sardar to pay to the labourer such reasonable compensation, not exceeding twenty rupees, as the Registering-officer may think fit.

Procedure when employer requires medical examination previous to registration.

73. Where the employer of a garden-sardar has, in the instructions specified in the certificate of the garden-sardar, directed that every labourer engaged by him shall before registration be examined

The Assam Labour and Emigration Act, 1901.

(Chapter IV.—Recruitment by Garden-sardars and Local Agents.—Sections 74-82.)

by a competent medical man and certified by him to be in a fit state of health to undertake the journey to the labour-district to which he intends to proceed, and physically and constitutionally fit for labour in the labour-districts, no Registering-officer shall register as a labourer any person appearing before him with the garden-sardar until such medical certificate as aforesaid has been produced and shown to him.

Fee of medical officer when in Government service for examination under section 73.

74. Where the employer of a garden-sardar has, in the instructions specified in the certificate of the garden-sardar, directed that the examination referred to in section 73 shall be made by a medical officer in the service of the Government, such officer as aforesaid making the examination shall be entitled to receive from the local agent or garden-sardar such fee, for each labourer so examined, as may be agreed upon, and, if no agreement has been entered into, such fee as the Local Government, by general or special order, may direct.

Garden-sardar when to remove labourer to labour-district.

75. Unless and until a person whom it is desired to engage as a labourer under this Chapter has executed a labour-contract under section 72, no garden-sardar shall remove or attempt to remove him to a labour-district, or induce or attempt to induce him to go to a labour-district, or to leave the local area, or aid or attempt to aid him in proceeding to a labour-district.

Garden-sardar to accompany labourers or send competent person with them.

76. (*1*) A garden-sardar shall either himself accompany labourers engaged by him throughout their journey from the place in which the labour-contract was entered into, to the labour-district wherein they have contracted to labour, or shall send with them some competent person appointed by him with the approval of the local agent of his employer, or, if his employer has no local agent, with the approval of the officer by whom the labourers were registered.

(*2*) When the number of labourers (exclusive of dependants) proceeding on their journey to a labour-district is more than twenty, for every twenty labourers so in excess, or for any number of labourers less than twenty so in excess, one additional garden-sardar or person so appointed by him shall accompany the labourers so proceeding.

No restriction on number of persons engaged by garden-sardar.

77. A garden-sardar may, subject to the instructions specified in his certificate, engage any number of persons as labourers; and, subject to the provisions of section 76 any number of labourers may be despatched at the same time to the labour-districts.

Appointment in certain cases of garden-sardar to accompany labourers not engaged by him.

78. A garden-sardar may, with the previous consent in writing of the local agent of the employer by whom his certificate was granted, or, if the employer has no local agent, with the previous consent in writing of the employer, be appointed under section 76 as a competent person to accompany labourers other than those engaged by him.

Provision for way-bill.

79. (*1*) Every garden-sardar or person appointed by him as aforesaid who accompanies labourers to the labour-districts shall present to the officer before whom the labourers have executed a contract under section 72 a way-bill in such form and containing such particulars and instructions as the Local Government may prescribe.

(*2*) Every such garden-sardar or other person as aforesaid shall also present the way-bill at all such places and to all such officers as may be thereupon indicated, and shall carry out all instructions therein contained for his guidance.

Garden-sardar to provide food and lodging for labourers and dependants on journey.

80. Every garden-sardar or person appointed by him as aforesaid who accompanies labourers to the labour districts shall provide the labourers and their dependants (if any) with proper and sufficient food and lodging throughout the journey.

Power for Magistrate in certain cases to award compensation or cancel contract.

81. Where it appears to any Magistrate, on the complaint of a labourer at any place on the journey, that the labourer or any person registered as his dependant has suffered ill-treatment during the journey at the hands of the garden-sardar or person appointed by the garden-sardar accompanying the labourer, or that the garden-sardar or person so appointed has failed to provide the labourer or any of his dependants with proper and sufficient food and lodging, or has wilfully abandoned the labourer or any of his dependants, the Magistrate may either order the garden-sardar or person so appointed to pay to the labourer a reasonable sum by way of compensation, or may cancel the labour-contract entered into by the labourer and order the garden-sardar or person so appointed to pay to the labourer such reasonable sum as the Magistrate may think necessary to enable him with his dependants (if any) to return to the place at which he was registered, or to his native district, as to the Magistrate may seem fit.

Procedure on failure of garden-sardar to comply with order.

82. On the failure for the space of twenty-four hours of any garden-sardar or person appointed by him as aforesaid to comply with an order made under section 81 to pay any sum, the Magistrate may pay the same to or on behalf of the labourer

concerned, and may recover it from the employer by whom the certificate of the garden-sardar was granted, or from the local agent of the employer.

Medical inspection of labourers *en route*.

83. Any Magistrate or Embarkation Agent may, if himself a medical man, medically examine, and, if not himself a medical man, send for medical examination by a medical man, any labourer or dependant who, while on the journey to the district to which he intends to proceed, appears to the Magistrate or Embarkation Agent, as the case may be, not to be in a fit state of health to proceed thereto.

Detention and return of labourer declared when *en route* to be unfit to travel.

84. (*1*) Where any labourer or dependant is, on examination under section 83, declared not to be in a fit state of health to undertake the journey to the labour-district to which he intends to proceed, the Magistrate or Embarkation Agent may order the labourer or dependant to be detained at such place as he may think proper until in a fit state of health to undertake the journey.

(*2*) In any such case as is provided for by sub-section (*1*), the labourer or dependant, when in a fit state of health to undertake the journey, shall, if the garden-sardar or person appointed by the garden-sardar accompanying him, or the employer by whom the certificate of the garden-sardar was granted, or his local agent, so wishes, be forwarded to the labour-district, or, if otherwise, to his native district or the place where he was registered as to the Magistrate or Embarkation Agent may seem ....

(*3*) While any labourer or dependant is detained under sub-section (*1*), he shall be entitled to be fed, lodged, clothed and (if necessary) medically treated at the expense of the employer with whom the labourer, or the labourer to whom the dependant is attached, has contracted to labour.

Dependants of labourer when to be fed, etc.

85. (*1*) Where an order under section 84 has been made with reference to any labourer, any person registered as his dependant, and any other labourer being his or her wife or husband, shall be entitled,—

(*a*) until the labourer is in a fit state of health to undertake the journey, to be fed, lodged, clothed and (if necessary) medically treated at the place where the labourer is detained, and at the cost of the employer with whom the labourer has contracted to labour, and;

(*b*) to be sent back to the same place if any) as the labourer.

(*2*) Where an order has been made under sub-section (*1*) with reference to any dependant, the labourer to whom the dependant is attached shall thereupon, until the dependant is in a fit state of health to undertake the journey to the labour-district, be entitled, if the labourer so wishes, and if he or she is the husband, wife, son or daughter of the dependant, to be fed, lodged, clothed and (if necessary) medically treated at the place where the dependant is detained and at the cost of the employer with whom the labourer has contracted to labour; and the labourer shall, if he or she so wishes and if he or she is the husband, wife, son or daughter of the dependant, be sent back to the same place (if any) as the dependant.

(*3*) Where a labourer is entitled and claims to be so fed, lodged, clothed and (if necessary) medically treated, or to be so sent back, any person registered as his or her dependant, and any other labourer, being the wife or husband of the labourer, shall be entitled, as the case may be,—

(*a*) to be fed, lodged, clothed and (if necessary) medically treated at the place where the dependant is detained, and at the cost of the employer, until the dependant is in a fit state of health to undertake the journey to the labour-district, or

(*b*) to be sent back to the same place as the labourer.

Payment of expenses of detention and return-journey of labourer.

86. Where a garden-sardar or person appointed by a garden-sardar accompanying any labourer or dependant fails to provide the labourer or dependant with food, lodging, clothing and medical treatment, or to send him back as required by section 84 or section 85, the Magistrate or Embarkation Agent may order the garden-sardar or person so appointed to pay such sum as the Magistrate or Embarkation Agent, as the case may be, may think necessary to provide food, lodging, clothing and medical treatment, or to defray the cost of the return-journey of the labourer or dependant; and, on failure for the space of twenty-four hours of the garden-sardar or person so appointed to comply with the order, the Magistrate or Embarkation Agent, as the case may be, may pay the sum specified in the order to or on behalf of the labourer or dependant concerned, and may recover it from the employer by whom the certificate of the garden-sardar was granted, or from the local agent of the employer.

Representative of employer may procure order from Superintendent cancelling the labour-contract on payment of expense of return.

87. (*1*) Where a labour-contract has been executed by a garden-sardar on behalf of his employer, any local agent or other representative of the employer may require the labourer to appear before the Superintendent for the cancellation of his labour-contract.

(*2*) If, when the labourer appears under sub-section (*1*), such reasonable sum as the Superintendent may think necessary to enable the labourer and his dependants (if any) to return to the native district of the labourer or to the place at which he was registered, as to the

The Assam Labour and Emigration Act, 1901.

(Chapter IV.—Recruitment by Garden-sardars and Local Agents.—Sections 88-89. Chapter V.—Engagement of Emigrants otherwise than under Chapters III and IV.—Section 90.)

Superintendent may seem fit, and such further sum (if any) by way of compensation as the Superintendent may think reasonable, are paid to the labourer in his presence, the Superintendent may declare the labour-contract cancelled, and, in that event, shall make an endorsement to the like effect on the labourer's copy of the labour-contract, and attest the endorsement with his signature.

Cancellation of contracts of relatives.

88. (*1*) Where the Superintendent declares the labour-contract of any labourer to be cancelled, any other labourer who is the wife, husband, father, mother, son or daughter of the labourer and has entered into a labour-contract at the same place with the same employer, may claim to have her or his labour-contract cancelled at the same time.

(*2*) Where a claim is made under sub-section (*1*), the Superintendent shall declare the labour-contract of the claimant to be cancelled, and shall order the local agent or representative of the claimant's employer to pay to the claimant such reasonable sum as the Superintendent may think necessary to enable him and his dependants (if any) to return to the same place as the labourer.

(*3*) On the failure for the space of twenty-four hours of the local agent or representative to comply with an order made under sub-section (*2*), the Superintendent may pay the sum specified in the order to or on behalf of the claimant concerned, and may recover the same from the employer by whom the certificate of the garden-sardar was granted, or from the local agent or representative who appears on behalf of the employer.

Cost of escort for repatriated labourer.

89. When an order is made under section 81, 86 or 88 for payment of the costs of the return journey of any labourer or other person, the Magistrate may order the garden-sardar or other person liable in respect of such costs to pay also the cost of providing such escort to accompany the labourer or other person during his return journey as the Magistrate may think necessary.

CHAPTER V.

ENGAGEMENT OF EMIGRANTS OTHERWISE THAN UNDER CHAPTERS III AND IV.

Special provisions as to engagement of emigrants through garden-sardars.

90. When a notification has been published under section 3, prohibiting the recruiting, engaging, inducing or assisting, natives of India, or any specified class of natives of India, to emigrate from the whole or any specified part of a Province to any labour-district or any specified portion of a labour-district otherwise than in accordance with the provisions of this Act therein specified, the Local Government may, with the previous sanction of the Governor General in Council, by notification in the local official Gazette, declare that specially employed garden-sardars, not being garden-sardars holding certificates granted under Chapter IV, may, in the part of the province specified in the notification under section 3, engage persons on behalf of their employers and assist persons so engaged to emigrate to such labour-district or specified portion of a labour-district subject to the following provisions, namely:—

(*a*) The employer shall grant each garden-sardar specially employed by him under this section a permit in writing, in such form as the Chief Commissioner of Assam may by rule prescribe, signed and dated, specifying the name of the garden-sardar and the recruiting district in which alone the garden-sardar may engage persons on behalf of his employer and assist them to emigrate: Provided that no such permit shall be granted to a garden-sardar who has not resided at least six months on the estate of the employer.

(*b*) The employer shall in the permit certify that the garden-sardar named therein is a person employed on his estate, and shall specify the nature of his employment and the period of his residence on the estate.

(*c*) Every permit shall be presented by the garden sardar named therein in person for countersignature to the Inspector or to the Magistrate having jurisdiction in the place where the garden-sardar resides, and shall not be valid or have effect unless and until it is so countersigned.

(*d*) The Inspector or Magistrate may refuse to countersign any permit, for any reason, to be recorded in writing, which he may think sufficient, and shall refuse to countersign a permit unless he is satisfied that the garden-sardar named therein is employed on the estate of his employer and has resided at least six months on the estate and is a fit person to engage persons and assist them to emigrate.

(*e*) When a permit is duly countersigned the garden-sardar named therein may proceed to the recruiting district and there himself engage persons on behalf of his employer and assist them to emigrate, subject to the provisions of this Chapter.

(*f*) Every garden-sardar so authorized shall, on his arrival in the recruiting district and before he engages any person to emigrate, in person or in writing, report his arrival, and the place at which he intends principally to reside, to the District or Subdivisional Magistrate, and shall, at least three days before his departure from the recruiting district, similarly report his intended departure and furnish a list, in such form as the Local Government may prescribe, containing the names and descriptions of the persons whom he has engaged and is assisting to emigrate.

(*g*) Every garden-sardar shall either himself accompany all persons so engaged by him to the labour-district in which the estate of his employer is situate, or send them there in charge of another garden-sardar holding a permit under this section from the same employer to engage persons in the same recruiting district.

The Assam Labour and Emigration Act, 1901.

(Chapter V.—Engagement of Emigrants otherwise than under Chapters III and IV.—Sections 91-93. Chapter VI.—Transport.—Sections 94-96.)

(*h*) No permit shall have effect for more than six months from the date of countersignature by the Inspector or Magistrate as aforesaid.

(*i*) Any permit granted under this section may be cancelled in the recruiting district by the District Magistrate for any reason, to be recorded in writing, which he may think sufficient. The fact of cancellation shall be endorsed by such Magistrate as aforesaid on the permit, and the permit shall thereupon become invalid and cease to have effect. A District Magistrate who cancels a permit under this clause shall give notice of such cancellation to the employer by whom it was signed and to the Inspector or Magistrate by whom it was countersigned.

Special provisions as to engagement of emigrants through approved agencies or associations.

91. The Local Government may, by notification in the local official Gazette, declare, in the case of any specified agency or any association of employers for purposes of engaging persons to emigrate formed and conducted in accordance with rules approved by the Local Government,—

(*a*) that garden-sardars working in the Province under the control of such agency or association as aforesaid and holding permits granted and countersigned under section 90 may, subject to such conditions as may be prescribed in the notification, engage persons and assist them to emigrate; and

(*b*) that, in the case of garden-sardars holding certificates under Chapter IV and working in the Province under such control as aforesaid, any of the requirements of that Chapter may be dispensed with or relaxed in such manner as may be prescribed in the notification.

Saving of engagement of emigrants otherwise than under foregoing provisions of Act.

92. Subject to the provisions of section 3 and of any notification issued thereunder, nothing in this Act shall be deemed to prohibit any person from engaging or assisting natives of India to emigrate to a labour-district otherwise than in accordance with the provisions of Chapters III and IV and of sections 90 and 91.

Application of Act to persons engaged under this Chapter.

93. (*1*) The following provisions of this Act shall apply to the transport and employment of persons engaged or assisted to emigrate under this Chapter and not bound by labour-contracts, namely:—

(*a*) in CHAPTER VI (TRANSPORT):—

(*i*) sections 94 and 95 (routes and transport by sea);

(*ii*) sections 96 to 99 (passenger licenses);

(*iii*) sections 100 and 101 (Embarkation Agent's powers and returns by master);

(*iv*) section 103 (medical officer);

(*v*) section 104 (delay in departure);

(*vi*) sections 107 to 110 (Magistrates' powers);

(*vii*) section 112 (disinfection);

(*viii*) section 113 (excess passengers);

(*ix*) section 114 (breaches of Act and rules); and

(*x*) section 116 (delegation of magisterial powers);

(*b*) in CHAPTER VII (LABOUR-DISTRICTS):—

(*i*) section 122 (registers and returns);

(*ii*) section 123 (inspection); and

(*iii*) sections 159, 161 and 162 (repatriation);

(*c*) in CHAPTER VIII (RULES):—

all powers conferred by section 163, except in so far as the same relate exclusively to labourers and their dependants;

(*d*) in Chapter IX (PENALTIES AND PROCEDURE);

(*i*) sections 176, 177, 181, 182 and 183, (offences connected with transport by river); and

(*ii*) sections 185 and 186 (offences by employers); and

(*e*) in CHAPTER X (MISCELLANEOUS):—

(*i*) section 215 (recovery of sums due); and

(*ii*) sections 218 to 223 (fines, etc.), Assistant Inspector, officers' powers, exemption, prior notifications, and repeal.)

(*2*) Except as indicated in sub-section (*1*), nothing in Chapters II to IV inclusive or in Chapters VI to X inclusive shall apply to persons engaged or assisted to emigrate under this Chapter and not bound by labour-contracts.

CHAPTER VI.

TRANSPORT.

Routes, etc.

Routes to be followed and rules observed.

94. Every person who forwards or accompanies labourers or emigrants under Chapter V or their dependants to a labour-district shall forward or take them by the prescribed route, or one of the prescribed routes, and shall conform to the rules made under this Act, in so far as the said rules apply to himself and to the persons emigrating under his charge.

Transport by River.

Transport by sea to labour-districts.

95. Nothing in this Chapter shall apply to the transport by sea of natives of India to the labour-districts.

Vessels to carry more than twenty passengers to be ordinarily licensed.

96. (*1*) No master shall receive more than twenty passengers, being natives of India, on board his vessel for the purpose of transporting them to a labour-district, unless a license to carry passengers in his vessel

The Assam Labour and Emigration Act, 1901.

(*Chapter VI.—Transport.—Sections 97-106.*)

has been granted to him under this Chapter by an Embarkation Agent duly empowered in that behalf by the Local Government.

(*2*) The Local Government may, by notification in the local official Gazette, exempt from the provisions of this section any vessel or class of vessels.

Application for license.

97. (*1*) The master or owner of any vessel who desires to obtain a license under this Chapter to carry passengers in his vessel shall make a written application for a license to an Embarkation Agent empowered as aforesaid.

(*2*) Every application made under sub-section (*1*) shall state such particulars respecting the vessel as the Local Government may, by rule, prescribe.

Grant of license.

98. Where the Embarkation Agent to whom an application is made under section 97, sub-section (*1*), is of opinion that the vessel is in all respects suitable for carrying passengers being natives of India to a labour-district, he shall give to the master of the vessel a license to carry passengers therein, specifying the number of passengers, being natives of India, who may be received on board.

Fee for license.

99. Such fee, not exceeding sixteen rupees, as the Local Government may, with reference to the size of the vessel, by rule, direct, shall be paid for every license granted under section 98, and no license so granted shall be in force for more than one voyage:

Provided that a license may, with the previous sanction of the Local Government, be granted under the said section to the master of any vessel for any term not exceeding one year, on payment of such fee, not exceeding one hundred rupees, and on such conditions, as the Local Government may, by rule, prescribe.

Embarkation Agent may limit number to be received on board on any particular voyage.

100. (*1*) Any Embarkation Agent may, in accordance with such rules as the Local Government may make in this behalf, direct, by order in writing, that, on any particular voyage or part of a voyage, any master licensed under this Chapter shall not receive on board his vessel more than a specified number of passengers, being natives of India, which number shall be less than the number specified in the license granted to the master.

(*2*) In computing the number of persons on board a vessel, two children under the age of ten years shall, for the purposes of this Chapter, be reckoned as one person only.

Master to make returns.

101. Every master licensed under this Chapter shall keep such lists, submit such returns, and make such reports in regard to the passengers carried in his vessel, as the Local Government may, by rule, prescribe.

Provisions, clothing, medical and other officers, cooks, etc.

102. Every master licensed under this Chapter shall have on board his vessel carrying labourers and their dependants such supplies of provisions and clothing, and such medical and other officers, cooks and attendants, as the Local Government may, by rule, prescribe.

Medical officer to be licensed.

103. No medical officer shall be appointed to any vessel in respect of which a license is granted under this Chapter, unless he holds a license granted by such authority as the Local Government may appoint in that behalf; and any medical officer so licensed shall be forthwith removed from his appointment on the requisition of any officer empowered by the Local Government to make such a requisition.

Departure of Passenger-vessels and Procedure during Voyage.

Embarkation Agent may order departure of vessel if delay occurs.

104. Where it appears to an Embarkation Agent that the departure of a vessel in respect of which a license is granted under this Chapter is unduly delayed beyond the date fixed by the order of a Superintendent or of the Local Government, or notified by advertisement in the public press, for such departure, he may order the master of the vessel to proceed on his voyage at once.

Master to receive way-bills from Embarkation Agent.

105. (*1*) No master licensed under this Chapter shall proceed on a voyage with his vessel carrying labourers until he has received from the Embarkation Agent the way-bills relating to all labourers on board in respect of whom way-bills are required by this Act or by the rules made thereunder.

(*2*) The Embarkation Agent and the master of the vessel shall together personally ascertain that the number of such labourers on board corresponds with the number entered in the way-bill.

(*3*) The Embarkation Agent shall send a copy of every way-bill granted under sub-section (*1*) to the Magistrate of the labour-district to which such labourers are proceeding.

Labourers not finally to leave vessel at any place other than that mentioned in way-bill.

106. No master licensed under this Chapter shall cause or permit any labourer entered in any such way-bill finally to leave his vessel at any place other than that named in the way-bill as the destination of the labourer:

Provided that nothing in this section shall be deemed to prevent the master of a vessel from permitting such labourers to disembark at any place on the voyage so long as the disembarkation is not intended, or known to be likely, to be final, nor to prevent the final disembarkation of any such labourers or the transfer of such labourers with their dependants to another vessel in case of accident or unavoidable necessity:

The Assam Labour and Emigration Act, 1901.

(*Chapter VI.—Transport.—Sections 107-114.*)

Provided also that every such accident or necessity as aforesaid shall forthwith be reported by the master to the Embarkation Agent by whom he was licensed, and to the nearest Magistrate in the district within which the accident has occurred or the necessity has arisen.

Master to stop his vessel at certain places where there is a Magistrate.

107. (*1*) Every master licensed under this Chapter shall stop his vessel carrying passengers, being natives of India, at such places, being places where a Magistrate is stationed, and shall, unless the Magistrate permits him to depart earlier, remain at each such place for such time, not exceeding six hours of daylight, as the Local Government may direct.

(*2*) The master shall, on arriving at such a place as aforesaid, immediately report to the Magistrate the number of the crew and other persons on board, the general state of their health, and the number of deaths (if any) which have occurred among the persons who embarked on board his vessel.

Power for Magistrates to inspect vessels.

108. (*1*) Any Magistrate may, while a vessel in respect of which a license is granted under this Chapter is within the local limits of his jurisdiction, go on board the vessel and inspect it and all persons, being natives of India, on board.

(*2*) The master and officers of any such vessel as aforesaid shall afford to the Magistrate every facility for inspection, and give him all such information as he may reasonably require respecting the labourers or other persons on board, the deaths (if any) which have occurred on board, and any other facts affecting the health of the passengers.

Power for Magistrates to regulate communication between vessels and land.

109. Any Magistrate may, while a vessel in respect of which a license is granted under this Chapter is within the local limits of his jurisdiction, regulate the communication between the vessel and the land, and prohibit all persons from leaving the vessel, and all persons on land from proceeding on board.

Power for Magistrates to detain vessels for inspection and to detain sick native passengers.

110. (*1*) Any Magistrate may, if he has reason to believe that any passengers, being natives of India, on board a vessel within the local limits of his jurisdiction, in respect of which a license is granted under this Chapter, are, or are likely to be, affected with any dangerously infectious or contagious disease, detain the vessel and depute the civil medical officer of the district or any other qualified medical officer to inspect such passengers as aforesaid and to report on their health, stating whether any or what measures are requisite for the removal or prevention of the dangerously infectious or contagious disease.

(*2*) On receiving the report of the medical officer so deputed, the Magistrate may order any such passenger as aforesaid who is suffering from any dangerously infectious or contagious disease to be disembarked and detained for medical treatment.

Detention of sick labourers by Magistrate.

111. (*1*) Where, on receiving the report of a medical officer deputed under section 110, sub-section (*1*), it appears to a Magistrate that a labourer or any dependant of any such labourer, though not suffering from a dangerously infectious or contagious disease, is not in a fit state of health to proceed to the labour-district in which the labourer has contracted to labour, he may order the labourer or dependant to be detained, and shall cause all necessary arrangements to be made for his accommodation, support and medical treatment.

(*2*) Any expenditure incurred under sub-section (*1*) may be recovered from the employer of the labourer concerned.

Power for Magistrate to detain vessel to be cleansed and disinfected.

112. (*1*) Where, in the opinion of a medical officer deputed under section 110, sub-section (*1*), it is dangerous to the health of the general body of the passengers to allow the vessel to proceed until measures have been taken to cleanse and disinfect her, the Magistrate may detain the vessel for a further period, not exceeding three days, for the purpose of carrying out those measures.

(*2*) Any expenditure incurred under sub-section (*1*) may be recovered from the master or owner of the vessel.

Measures to be taken if excess number of native passengers is found on board.

113. (*1*) Where it appears to a Magistrate making an inspection of a vessel, in respect of which a license is granted under this Chapter, that the number of passengers on board, being natives of India, is larger than the number specified in the license or than the number specified in an order of an Embarkation Agent made under section 100, he may remove the excess number and detain them until another opportunity of forwarding them to their destination is found.

(*2*) Any expenditure incurred in maintaining passengers detained under sub-section (*1*) and in forwarding them to their destination may be recovered from the master or owner of the vessel.

Infraction of the Act and rules to be reported.

114. Where it appears to a Magistrate making an inspection of a vessel in respect of which a license is granted under this Chapter, that any of the provisions of this Act or of any rule thereunder have not been complied with in respect of the vessel, he shall report the fact to the Embarkation Agent by whom the license was

The Assam Labour and Emigration Act, 1901.

(Chapter VI.—Transport.—Sections 115-116. Chapter VII.—Provisions as to the Labour-districts.—Sections 117-121.)

granted; and, if he considers it necessary to do so, he may detain the vessel until such provisions as aforesaid have been so complied with as to make it possible for the voyage to be further prosecuted with safety and reasonable comfort to the emigrants.

Power to make rules regulating disembarkation and other matters.

115. (*1*) The Local Government may make rules to regulate—

(*a*) the disembarkation of labourers and their dependants, and their inspection and accommodation on arrival at their destinations:

(*b*) the detention of labourers and their dependants at debarkation-depôts:

(*c*) the forwarding of labourers to their destinations and the closing and return of way-bills by employers.

(*2*) Any expenditure incurred in pursuance of any rules made under sub-section (*1*) may be recovered from the employers of the labourers concerned.

Deputation of other officer to discharge the functions of a Magistrate under sections 107 to 114.

116. The District or Subdivisional Magistrate may authorize any subordinate Magistrate, medical officer or officer of police above the rank of sub-inspector to exercise the powers and authorities conferred, and to perform the duties imposed, on a Magistrate under sections 107 to 114.

CHAPTER VII.

PROVISIONS AS TO THE LABOUR-DISTRICTS.

Annual Rate payable by Employers.

Annual rate payable by employer.

117. (*1*) Every employer shall, on the first day of January and the first day of July in each year, pay in respect of each labourer then in his employ such rate, not exceeding an annual sum of one rupee, as the Local Government may, by notification in the local official Gazette, direct.

(*2*) On the failure of an employer, for the space of one month after the receipt of a notice in such form and served in such manner as the Local Government may prescribe, to pay any sum due under sub-section (*1*), the same may be recovered from him.

Local labour-contracts.

Labour-contracts executed in labour-districts between employer and native direct.

118. (*1*) Any employer may enter into a labour-contract for a term, not exceeding one year commencing from the date of the execution of the labour-contract, with any native of India within the labour-district in which the estate to which the labour-contract refers is situate.

(*2*) Where an employer has under sub-section (*1*) executed a labour-contract within a labour-district, he shall, within one month from the date of the execution of the labour-contract, forward it in duplicate to the Inspector within the local limits of whose jurisdiction the estate is situate. On receipt of the labour-contract so forwarded, the Inspector shall enter an abstract thereof in a register to be kept by him for the purpose, and shall then give one copy of the labour-contract to the labourer and the other to his employer.

Verification and cancellation of such contracts.

119. When, for the first time after the registration, under section 118, sub-section (*2*), of a labour-contract with a labourer, the Inspector visits the estate on which the labourer is employed, the employer shall cause the labourer to appear before the Inspector for the purpose of having his contract verified, and the labourer may thereupon apply to the Inspector to cancel his labour-contract; and, if the labourer shows cause sufficient, in the opinion of the Inspector, to justify the cancellation of his labour-contract, the Inspector shall cancel the same and shall thereupon make an endorsement that it has been cancelled on the labourer's copy of the labour-contract, or, if that copy is not forthcoming, shall give to the labourer a certificate to the like effect.

Power of Inspector or Magistrate to require labourer who has executed such contract to appear before him.

120. The Inspector or Magistrate may, either on the application of the employer or the labourer or of his own motion, require the employer to cause any labourer who has entered into a labour-contract under section 118 and is employed upon any estate within the local limits of the jurisdiction of the Inspector or Magistrate, to appear before him for the purpose of having his labour-contract verified; and, if the labourer applies to the Inspector or Magistrate to cancel his labour-contract and shows cause which the Inspector or Magistrate, after considering any cause which may be shown by the employer to the contrary, considers sufficient to justify its cancellation, the Inspector or Magistrate shall cancel the same as provided by section 119.

Labour-contracts executed within labour-district before Inspector or Magistrate.

121. (*1*) Notwithstanding the provisions of section 118, an employer may enter into a labour contract with any native of India in a labour-district for a term not exceeding four years commencing from the date of the execution of the labour-contract, if he appears, or deputes some person to appear on his behalf, with the native of India before the Inspector or Magistrate within the local limits of whose jurisdiction the estate to which the labour-contract refers is situated.

(*2*) The Inspector or Magistrate shall thereupon explain the labour-contract to the native of India, and shall, if satisfied that he is competent to enter into and understands the same, call upon him and the employer or the person deputed as aforesaid to execute it in his

The Assam Labour and Emigration Act, 1901.

(*Chapter VII.—Provisions as to the Labour-districts.—Sections 122-126.*)

presence; and, if they execute it, shall attest the execution with his signature.

(3) An abstract of every labour-contract executed under this section shall be entered in a register to be kept by the Inspector or Magistrate for the purpose; and one copy of the labour-contract shall then be given to the labourer and the other to his employer or the person deputed as aforesaid.

(4) In respect of every labour-contract, an abstract whereof is registered under section 118 or under this section, the employer who executes the labour-contract in person or the person deputed to execute the same on his behalf shall pay to the Inspector or Magistrate such fee, not exceeding one rupee, as the Local Government may direct.

Employers' Returns and Magistrates' Inspections.

Registers to be kept and returns made by employers.

122. (1) Every employer shall keep such registers of all labourers and other persons employed on the estate of which he is in charge, and of their dependants, in such form, and shall make to the Inspector, within the local limits of whose jurisdiction the estate is situate, such periodical returns in writing, as the Local Government may, by rule, prescribe.

(2) The Inspector may examine the registers so kept and muster all labourers and other persons employed on any estate within the said local limits, and may verify the accuracy of the entries in the registers, or in any prescribed periodical return.

Power for Inspector, etc., to inspect lands and houses and to make requisitions and inquiries.

123. Any Inspector or Magistrate, or any person authorized by either of them in writing in this behalf, may enter and inspect all lands and houses wholly or partially used by or for labourers, or by or for any other natives of India employed on any estate, and may require that all such labourers or other natives of India as aforesaid, or any particular class or classes or individual or individuals of them, shall be brought before him, and that a copy of the labour-contract of any labourer shall be produced, and may make any inquiries which he thinks proper touching the condition or treatment of such labourers or other natives of India as aforesaid or any of them; and the employer shall be bound to comply with every requisition and to answer every inquiry so made to the best of his ability.

Regulation of Labour.

Schedule of daily tasks to be prepared.

124. (1) Every employer shall prepare a schedule specifying the daily task to be executed by each labourer employed on the estate of which the employer is in charge, and may, from time to time, alter any schedule so prepared.

(2) One copy of every schedule prepared under sub-section (1) shall be filed in a book, which shall be open to the examination of the Inspector, and translations thereof, in such languages as the Chief Commissioner of Assam may direct, shall be affixed in some conspicuous place accessible to the labourers to whom the schedule relates.

(3) The minimum payment for each daily task shall be the quotient resulting from dividing the monthly wage of the labourer concerned by the number of working days in the current month. The number of working days in a month shall be ascertained by deducting the number of Sundays from the whole number of days in the month.

Limitations on tasks and payment of wages.

125. (1) No labourer shall be bound to labour more than six days in one week, or more than six consecutive hours, or more than nine hours in one day.

(2) Every employer shall, on six days in each week, provide for each labourer work sufficient to enable him to earn at least his minimum daily wage; and, failing such due provision of work, the labourer shall, if he can show that he was able and willing to labour for the same, be entitled to claim his minimum daily wage.

(3) On or before the fifteenth day of each month the employer shall pay to every labourer in his employment the wages earned by the labourer during the preceding month and still unpaid.

Provisions for revision of schedule by Inspector subject to appeal to Committee.

126. (1) Where the Inspector considers that any schedule of daily tasks, or any part thereof, is unreasonable, he may, by order in writing, direct that such reduction as is specified in the order be made in the scheduled daily tasks.

(2) The employer shall at once make the reduction so ordered, but may, if dissatisfied with the order of the Inspector, by notice in writing, require the Inspector to summon a Committee to inquire into the schedule.

(3) Every Committee summoned under sub-section (2) shall consist of—

(*a*) the Inspector,

(*b*) some person to be nominated by the employer whose schedule is to be inquired into, and,

(*c*) if practicable, a medical officer.

(4) Where the employer fails to nominate a person within seven days after being thereunto requested in writing by the Inspector, the Inspector, instead of the employer so failing, may nominate a person.

(5) Where the Committee consists only of the Inspector and of a person nominated by the employer or Inspector, the Inspector shall have the casting vote.

The Assam Labour and Emigration Act, 1901.

(*Chapter VII.—Provisions as to the Labour-districts.—Sections 127-133.*)

Committee to revise schedule.

127. (*1*) Where the Committee, or a majority thereof, is of opinion that the scheduled daily tasks or any of them are unreasonable, the Committee shall order them to be modified and reduced in such manner as it may think fit.

(*2*) The employer shall thereupon alter the schedule accordingly, and copies and translations of the same so altered shall be filed and affixed in the manner provided by section 124, and shall, as between him and the labourers concerned, take the place of the former schedule.

Provision for weakly labourers.

128. (*1*) Notwithstanding anything contained in any schedule of daily tasks, the Inspector may order that any specified labourer, who is, in his opinion, unable from weakness to earn by his labour the sum of one anna and a half per diem, according to the schedule, shall receive, in lieu of actual earnings, subsistence-allowance at the rate of one anna and a half per diem, or diet on a scale to be approved by the Inspector.

(*2*) Any subsistence-allowance ordered under sub-section (*1*) may be recovered from the employer of the labourer concerned.

Incapacity for Labour.

Inspector may suspend contract of any labourer temporarily unfitted for labour.

129. (*1*) The Inspector within the local limits of whose jurisdiction a labourer is employed may release the labourer, for such period as he thinks fit, from performing his labour-contract, if he is, in the opinion of the Inspector, temporarily unfitted, by reason of sickness or any other sufficient cause, for the performance thereof.

(*2*) Every release granted under sub-section (*1*) shall be endorsed by the Inspector on the labour-contract, and the time during which the release continues shall not be reckoned as part of the term for which the labourer is bound to serve.

(*3*) Every labourer released as aforesaid shall, during the release, receive such subsistence-allowance from his employer as the Inspector may think sufficient.

Labourer absent from sickness.

130. (*1*) Where any labourer is compelled, by reason of sickness, to absent himself from work, he shall receive from his employer, for each day on which he is so absent, subsistence-allowance at the rate of one anna and a half, or, if in hospital, sick-diet on a scale to be approved by the Inspector.

(*2*) Where the period during which a labourer is so absent exceeds the total number of thirty days in any one year, and the employer, as soon as that number is exceeded, gives the labourer a notice in writing to that effect, each day of absence in excess of that number shall be added to the term of the labour-contract, unless the labourer refunds to the employer the sum of one anna and a half for each day so in excess.

(*3*) The Inspector shall, from time to time, when visiting the estate, on the application of the employer, and may also at any other time, on the application of either the employer or a labourer, endorse on the labour-contract of the labourer, after such inquiry as he may think necessary, the number of days so to be added to the term thereof:

Provided that an employer, who omits to apply for such endorsement as aforesaid at the time when the Inspector is actually visiting the estate, shall, in the absence of sufficient reasons to the contrary shown to the satisfaction of the Inspector, be debarred from applying afterwards for endorsement in so far as days of absence which occurred prior to the date of the Inspector's last visit are concerned.

Discharge of labourer permanently incapacitated.

131. (*1*) Where, in the opinion of the Inspector, a labourer is permanently incapacitated for the performance of his labour-contract or any material part thereof, the Inspector shall certify to that effect in writing and deliver the certificate to the employer of the labourer or to the representative of the employer, and, from the date of the certificate, the labour-contract of the labourer shall wholly determine.

(*2*) Every labourer whose labour-contract so determines shall be entitled to receive from his employer such sum, not exceeding three months' wages, as the Inspector may award.

(*3*) Every sum so awarded and any such subsistence-allowance as is provided for by section 129 or section 130 may be recovered from the employer of the labourer concerned.

Accommodation for Labourers.

House-accommodation, water-supply and sanitary arrangements for labourers.

132. Every employer shall be bound to provide for the labourers employed on the estate of which he is in charge such house-accommodation, water-supply and sanitary arrangements as the Local Government may, by rule, prescribe.

Supply of food-grain for labourers.

133. (*1*) Where the food-grain commonly used by any class of labourers is not procurable by them at reasonable prices in the local markets near the estate on which they are employed, their employer shall be bound to supply them therewith at a reasonable price.

(*2*) The Local Government may, by notification in the local official Gazette, declare, either generally or for each district or part of a district, what shall, for the purposes of this section, be deemed to be a reasonable price

The Assam Labour and Emigration Act, 1901.

(Chapter VII.—Provisions as to the Labour-districts.—Sections 134-139.)

Provisions for rationing

134. (*1*) Subject to such rules as the Local Government may make in this behalf, any Inspector may, by order in writing,—

(*a*) direct that, on any specified estate within the local limits of his jurisdiction, all labourers or any specified class of labourers shall be furnished by their employers with rations, cooked or uncooked, on such scale and for such period, not exceeding three months from the date of their arrival on the estate, as may be specified in the order;

(*b*) direct that any specified labourer shall be exempt from the effect of any general order so made, if he is satisfied that the labourer is able to earn a full wage and desires to provide himself with proper and sufficient food;

(*c*) direct that any specified labourer shall be furnished with rations for any term not exceeding six months, and renew that direction for a like term.

(*2*) The cost of each labourer's ration furnished to him in accordance with any direction given under sub-section (*1*) shall be calculated at current rates as determined by the Inspector, and shall be deducted from any wages earned by the labourer during the period for which the direction is in force.

Provision for hospital-accommodation and medical attendance.

135. Where, in the opinion of the Inspector, an employer does not provide such hospital-accommodation in a suitable place available to the labourers employed upon the estate of which he is in charge, or does not make such provision for the medical treatment of his labourers, as the Local Government may direct, the Local Government may require the employer to contribute to the support of a central hospital to be established, or to the pay of a medical officer to be appointed, such sum, proportionate to the number of labourers so employed, as it thinks fit.

Enquiry whether employer has failed to provide accommodation, etc., as required by the rules.

136. (*1*) Any Inspector or Assistant Inspector, who is himself a Magistrate, may, with respect to any estate situate within the local limits of his jurisdiction, inquire whether the employer in charge of the estate has provided for his labourers house-accommodation, water-supply, sanitary arrangements, food-grains and rations in accordance with any rules made by the Local Government under sections 132 or 134 or any notification issued under section 133.

(*2*) At the instance of any Inspector or Assistant Inspector, a similar inquiry may be made by a Magistrate.

(*3*) Every inquiry under this section shall be made at some place on, or within ten miles of, the estate to which it relates, and shall be conducted and dealt with as if it were an enquiry by a Magistrate under the Code of Criminal Procedure, 1898.

V of 1898.

Localities unfit for the Residence of Labourers.

Report by Inspector and inquiry by Committee.

137. (*1*) Where, in the opinion of the Inspector, an estate or portion of an estate situate within the local limits of his jurisdiction is, at any time, by reason of climate, situation or condition, unfit for the residence of labourers, or of any particular class of labourers, he shall give notice, in writing, of his opinion to the District Magistrate, who shall forthwith, by order in writing, summon a Committee to inquire into the matter.

(*2*) The District Magistrate may also of his own motion summon a Committee, where, either from his own observation or upon the report of an Inspector, Magistrate or medical officer, he is of opinion that an estate or portion of an estate is, for any of the reasons aforesaid, unfit for the residence of labourers or of any particular class of labourers.

(*3*) Every Committee summoned under this section shall consist of—

(*a*) the District Magistrate;

(*b*) the Inspector;

(*c*) the civil medical officer of the district; and

(*d*) one or more employers of labourers:

(*4*) Provided that, if the District Magistrate is unable to procure the service on the Committee of any employer of labourers, he may, with the previous sanction of the Commissioner of the division, appoint one or more persons qualified to serve on the Committee.

Inquiry by Committee by order of Local Government.

138. Where it appears to the Local Government, upon the report of an Inspector, Magistrate or medical officer—

(*a*) that an estate or portion of an estate is, for any of the reasons given in section 137, unfit for the residence of labourers or of any particular class of labourers, or

(*b*) that the percentage of mortality of labourers or of any particular class of labourers employed on an estate or on portion of an estate is such as would justify the institution of an inquiry by a medical officer under section 142,

the Local Government may direct the District Magistrate to summon a Committee under section 137; and the District Magistrate shall forthwith proceed to summon a Committee accordingly.

Proceedings of Committee.

139. Every Committee summoned under section 137 or section 138 shall, as soon as may be, inquire into the healthiness of the estate or portion to which the order appointing it relates, and shall hear and record such information on the subject as the owner of the estate or portion, or the employer in charge thereof, or the Inspector, may desire to place before it.

The Assam Labour and Emigration Act, 1901.

(*Chapter VII.—Provisions as to the Labour-districts.—Sections 140-145.*)

Finding of Committee and consequences.

140. (*1*) Where the Committee, or a majority thereof, is of opinion that the estate or portion, or any part of the estate or portion, is unfit for the residence of labourers generally, or of any particular class of labourers, the Committee shall record a finding to that effect.

(*2*) Where a finding has been recorded under sub-section (*1*), no labourer, or no labourer of the particular class to which the finding relates, as the case may be, shall be bound by any labour-contract to labour on the estate or portion, or part of the estate or portion, as the case may be, which is found unfit for the residence of such labourers.

(*3*) Where a labourer is released under sub-section (*2*) from the performance of his labour-contract to labour on any estate, he shall be bound to labour on any other estate belonging to the same owner or in charge of the same employer and situate in the same labour-district; or, where the finding relates only to a portion of an estate, on any other portion of the same estate. Where the finding relates to the whole of any estate and the owner has no other estate or the employer has charge of no other estate in the same labour-district on which the labourer may be employed, the Inspector shall cancel the labour-contract of the labourer, and shall thereupon make an endorsement that it has been cancelled on the labourer's copy of the contract, or, if that copy is not forthcoming, shall give to the labourer a certificate to the like effect.

Power for Local Government to pass orders on proceedings of Committees.

141. The Local Government may call for the proceedings of any Committee summoned under section 137 or section 138, and, if the finding of the Committee is not unanimous, the Local Government may record any finding thereon which the Committee was competent to record, and the finding so recorded by it shall have the same effect as the finding of a Committee under section 140.

Excessive mortality on estates.

142. Where it appears to the Local Government or to the District Magistrate that the number of labourers employed on an estate who have died thereon, or on any portion thereof, during the last preceding twelve months, or that the average annual number of labourers employed on an estate who have died thereon, or on any portion thereof, during the last preceding three years, bears a larger proportion to the whole number of labourers employed thereon during such period of twelve months or three years, as the case may be, than seven per cent., the Local Government, or the District Magistrate, may depute the civil medical officer of the district or any other qualified medical officer to inquire into and report on the following matters, namely:—

(*a*) the cause or causes of the mortality;

(*b*) the want (if any) of due care or precaution, and of the adoption of proper and available sanitary measures on the part of the owner of the estate or portion thereof, or of the employer in charge of the estate or portion, causing or contributing to the mortality;

(*c*) the fitness or otherwise of the estate or portion for the residence of labourers:

Provided that, when the mortality among any particular class of labourers employed on an estate or any specified portion of an estate exceeds the percentage specified in this section, the Local Government, or the District Magistrate, may direct an inquiry under this section limited to that particular class of labourers.

Medical officer to report.

143. The medical officer deputed under section 142 shall, as soon as may be, inquire into the matters referred to therein and shall hear and record such information relating to those matters as the owner of the estate or portion, or the employer in charge of the same, or the Inspector, may place before him, and shall visit and inspect the estate or portion, and shall make a report expressing the reasons for his opinion, and transmit the same to the Local Government together with the information so recorded and the notes of his inspection of the estate or portion, and the Local Government shall cause the employer to be furnished with a certified copy of such report.

Power for Local Government to declare estate unfit for residence.

144. Where the Local Government, after perusal and consideration of the said report, information and notes, is of opinion that the mortality was caused by the want, on the part of the owner of the estate or portion, or the employer in charge of the same, of due care or precaution or of the adoption of proper and available sanitary measures, or that the estate or portion is unfit for the residence of labourers or of any particular class of labourers, it may make a declaration in writing to that effect, and the declaration so made shall have the same effect as the finding of a Committee under section 140.

Power for Inspector to certify fitness of estate or portion found or declared to be unfit.

145. (*1*) Where it appears to the Inspector that any estate or smaller area, which has been found, or declared under any of the foregoing provisions, to be unfit for the residence of labourers or of any particular class of labourers, has become fit for the residence of labourers or of that class of labourers, as the case may be, he shall, with the previous sanction of the District Magistrate of the district in which the estate or area is situate, give a certificate to that effect signed by him.

(*2*) On the grant of a certificate under sub-section (*1*), all such labourers as are mentioned or referred to in section 140, sub-section (*3*), whose contracts have not been cancelled by

the Inspector under that section, shall again be bound to labour on the estate or area, as the case may be, to which the certificate relates for the unexpired periods (if any) of their respective contracts.

Complaints made by Labourers.

Labourer wishing to complain of personal ill-usage or breach of Act to be sent by employer to Inspector or Magistrate.

146. Where a labourer states to his employer or any person acting on behalf of his employer, that he desires to make a complaint to the Inspector or to a Magistrate of personal ill-usage or breach, on the part of his employer or such person as aforesaid, of any of the provisions of this Act or of any rule thereunder, the person to whom the statement is made shall forthwith send the labourer to the Inspector or Magistrate within the local limits of whose jurisdiction the estate wherein he is employed is situate:

Provided that, where more than ten labourers at any one time so state their desire to make such a complaint, the person to whom the statement is made may, instead of sending them to such Inspector or Magistrate as aforesaid, give the Inspector or Magistrate notice, in writing, of their complaint.

Inspector or Magistrate how to proceed in case of complaint.

147. (*1*) Where a complaint is made to an Inspector or Magistrate under section 146, or where an Inspector or a Magistrate receives, under that section, notice in writing of a complaint, or where an Inspector or a Magistrate has other reasonable grounds for believing that an employer, or person acting on his behalf, has personally ill-used, or committed any such breach as is mentioned in section 146 in respect of, a labourer, the Inspector or Magistrate shall, as soon as may be, proceed to some place, not more than ten miles from the principal place of business of the employer, situate within the local limits of his jurisdiction, and inquire into the matter complained of;

Provided that, if the place in which an Inspector or Magistrate has reasonable grounds for believing that the ill-usage or breach has been committed is situate beyond the local limits of his jurisdiction, he shall, instead of inquiring into the matter himself, forthwith send information thereof in writing to the Inspector or Magistrate within the local limits of whose jurisdiction the ill-usage or breach has been committed.

(*2*) For the purposes of every inquiry made under sub-section (*1*), the Inspector or Magistrate may summon and examine any person as a witness.

Untrue or frivolous complaints.

148. (*1*) Where, upon an inquiry made under section 147 on the complaint of a labourer, the Inspector or Magistrate is of opinion that the complaint is untrue or frivolous or vexatious, he shall dismiss the complaint; and in that event shall endorse on the employer's copy of the complainant's labour-contract the number of days during which the complainant has been absent from work in consequence of the inquiry, and the number of days so endorsed shall be added to the period for which the complainant contracted to labour.

(*2*) Every endorsement made under sub-section (*1*) shall be conclusive evidence that the complainant has absented himself from his labour voluntarily and without reasonable cause during the number of days so endorsed.

Award of compensation to employer.

149. (*1*) Where a complaint is dismissed under section 148, the Inspector or Magistrate may award to the employer any reasonable compenseation on account of the expense incurred by aim in connection with the complaint, and shall hndorse the amount of the compensation so awarded on the complainant's copy of the labour-contract.

(*2*) The complainant shall be bound to pay the amount awarded under sub-section (*1*); and, in default of payment, his labour-contract shall not be deemed to have determined until he has worked off the amount at the rate of one day's labour for each four annas of the same.

Complaints disclosing grounds for further proceedings.

150. (*1*) Where, upon an inquiry made under section 147 by a Magistrate or by an Inspector who is a Magistrate, the Magistrate or Inspector is of opinion that there is sufficient ground for proceeding with the case, he shall dispose of the same according to law.

(*2*) Where the Inspector is not a Magistrate and is of such opinion as aforesaid, he shall without delay send the complainant and his witnesses (if any) to the nearest Magistrate, who shall thereupon dispose of the case according to law.

Recovery of arrears of wages and compensation.

151. (*1*) Where, upon the complaint of a labourer, it is proved to the satisfaction of a Magistrate, that the wages of the labourer are in arrear for two months after the first day of the month succeeding the month in which they were earned, or where it is proved to the satisfaction of a Magistrate that the wages of a person whose labour-contract has determined have been withheld for any period after determination, the Magistrate may award to such labourer or person as aforesaid the amount which appears to be then due to him, and also, by way of compensation, such further sum, not exceeding that amount, as to the Magistrate seems just.

(*2*) On the failure of an employer to pay any amount awarded under sub-section (*1*), the Magistrate may recover the same from the employer and pay it to the labourer or other person concerned.

Power to cancel contract on conviction of employer or accumulation of arrears of wages.

152. (*1*) Where it is proved to the satisfaction of a Magistrate—

(*a*) that an employer, or any person placed by an employer in authority over a

labourer, has been convicted of any offence causing injury to the person or loss or damage to the property of the labourer, and, under the Code of Criminal Procedure, 1898, triable exclusively by the Court of Session; or

(*b*) that an employer or any person placed by an employer in authority over a labourer has been twice convicted of any such offence as aforesaid against the labourer and under the said Code triable by a Magistrate; or

(*c*) that the wages of a labourer are in arrear to an amount exceeding the whole of his wages for four months; or

(*d*) that a labourer has been compelled by his employer or by any person placed by his employer in authority over him to perform any labour while he was unfit for it, or has been subjected to ill-usage by his employer or any such person as aforesaid;

the Magistrate may, if he thinks fit, on the application of the labourer aggrieved, cancel the labour contract of the labourer and award to him compensation not exceeding thirty rupees.

(*2*) Every cancellation under sub-section (*1*) shall be certified by the Magistrate on the back of the labourer's copy of the labour-contract, or, if that copy is not forthcoming, by writing under the Magistrate's hand delivered to the labourer.

Power to Local Government to cancel contracts of labourers whose condition is unsatisfactory owing to insufficiency of earnings.

153. (*1*) Where it appears to the Local Government that the condition of the labourers on an estate, or of any class or any considerable number of them, is unsatisfactory owing to the insufficiency of their earnings to maintain them in health and comfort, the Local Government, after such inquiry as it thinks necessary, may direct that the labour-contracts of all such labourers be cancelled.

(*2*) No labour-contract shall be cancelled under this section until the employer has been given an opportunity for showing cause why it should not be cancelled.

Power to cancel contract of labourer related to labourer whose contract is cancelled or determined.

154 Where the labour-contract of a labourer is or has been cancelled or has determined under section 119, section 120, section 131 or section 152, the Inspector or Magistrate, as the case may be, may in his discretion and on the application of the labourer concerned cancel the labour-contract of any labourer employed on any estate belonging to the same employer, being the wife, husband, father, mother, son or daughter of the labourer whose labour-contract is or has been so cancelled or has so determined.

Determination of Labour-contracts.

Endorsement of determination on labour-contract.

155. (*1*) Whenever a labour-contract determines, the employer shall endorse on the labourer's copy of the contract the fact of determination, or, if that copy is not forthcoming, shall give to the labourer a certificate to the like effect; and, where the employer refuses or neglects to do so, the Inspector may, on application by the labourer, make such endorsement or give such certificate as aforesaid.

(*2*) The employer shall give to the Inspector notice in writing of such determination as aforesaid within one month after the date thereof.

Power to redeem labour-contract.

156. (*1*) Where a labourer is able and desirous to redeem the unexpired term of his labour-contract, or the labour-contract of any member of his family, by payment of a sum equivalent to the value of the unexpired term, the labourer may require his employer to take him, or allow him to go, before the Inspector within the local limits of whose jurisdiction he is employed; and, on his depositing such sum as aforesaid with the Inspector, the Inspector shall give notice to the employer to show cause within one week why the labourer should not be released from his contract.

(*2*) If no sufficient cause is shown as aforesaid, the Inspector shall require the labourer's copy of the contract to be produced, and on production thereof shall endorse thereon a certificate that he has been released under this section from his contract, or, if that copy is not forthcoming, shall deliver to the labourer a certificate under his hand to the like effect; and shall, in either case, hold the sum so deposited to the credit of the employer of the labourer.

(*3*) The value of the unexpired term of a labour-contract shall, for the purposes of this section, be deemed to be the aggregate amount of one rupee for every month of the unexpired portion of the first year, of three rupees for every such month of the second year, and of five rupees for every such month of the third and fourth years of the original term of the contract:

Provided that, if a person who has completed four years' service under a labour-contract enters into a new labour-contract for one year, he shall not be entitled to redeem the unexpired portion of such new labour-contract unless on the payment of two rupees for each month of the said unexpired portion.

Power to equalize terms of contract in case of husband and wife.

157. (*1*) Where the labour-contract of a labourer determines at a time different from that of any other labourer who is the wife or husband of that labourer, the Inspector or Magistrate may, on the joint application of both labourers, equalize the terms of their respective contracts, and may, for this purpose, add to the term of the contract which expires first, and deduct from the term of the contract which expires last, in such proportions as may appear to him to be equitable.

(*2*) Every addition or deduction from the term of any labour-contract made under sub-section (*1*) shall be certified by the Inspector or Magistrate on the back of both the employer's and the labourer's copies of the contract, or, if those copies are not forthcoming, by writing under the Inspector's or Magistrate's hand, copies of which shall be delivered to the employer and the labourer.

Repatriation of Labourers and Others.

Repatriation of labourer whose labour-contract has determined under section 131.

158. (*1*) Where any labourer, not being a native of the labour-districts, whose labour-contract has determined under section 131, desires to be sent back to his native district, the Inspector may, instead of awarding a sum as receivab e

The Assam Labour and Emigration Act, 1901.

(Chapter VII.—Provisions as to the Labour-districts.—Sections 159-162.)
(Chapter VIII.—Rules.—Section 163.)

by the labourer from his employer, as provided by that section, order the employer to deposit such amount, whether in excess of the three months' wages awardable under that section or otherwise, as shall, in the Inspector's opinion, be sufficient to cover the entire expenses of sending the labourer back to his native district. The amount shall be deposited by the employer in the Inspector's office and shall be expended by the Inspector in sending the labourer back to his native district.

(2) On the failure for the space of twenty-four hours of an employer to comply with an order made under sub-section (1), the Inspector may expend the amount specified in the order, and may recover the same from the employer of the labourer concerned.

Repatriation of persons emigrating not under labour-contract who are physically incapacitated.

159. Where any person, being a native of India but not being a labourer, who has emigrated from his native district to a labour-district for the purpose of labouring for hire in any estate situate therein, or, being a dependant of any person who has so emigrated, has no means of subsistence, and is, in the opinion of the Inspector or Magistrate, permanently incapacitated from earning his livelihood in a labour-district, the Inspector or Magistrate may, on the application of such person, send him back, together with his dependants (if any), to his native district, and may, subject to the control of the Local Government, charge the expenses incurred in so doing to the Labour Transport Fund constituted under section 218.

Repatriation of labourers wrongfully recruited.

160. (1) Subject to any orders which the Local Government may make in this behalf, the Inspector or Magistrate may, if he thinks fit, detain and may send back to his native district any labourer, together with his dependants (if any), whose contract has been cancelled under section 119 or section 120 on the ground of coercion, undue influence, fraud or misrepresentation, or of any irregularity in connection with his recruitment or the execution of his contract.

(2) Any expenditure incurred under sub-section (1) may be recovered from the employer on whose estate the labourer concerned was under contract to labour.

Repatriation of persons not under labour-contract wrongfully recruited.

161. (1) Where it appears to the Inspector or Magistrate, on complaint made before him or otherwise, that there is reason to suppose that any native of India, not being a labourer, has been induced by any coercion, undue influence, fraud or misrepresentation to emigrate to a labour-district, the Inspector or Magistrate shall call upon the employer on whose behalf the person was made or induced to emigrate, or to whose estate he is being or has been conveyed, or, if the employer cannot be communicated with without undue delay, upon his agent or any one who is accompanying or conveying the person or has forwarded or otherwise assisted him to emigrate to any labour-district or estate, to appear before the Inspector or Magistrate and show cause why the person should not be sent back to his native district.

(2) Where the Inspector or Magistrate is of opinion, after such inquiry as he thinks sufficient, that such person as aforesaid was engaged or compelled or induced to emigrate by any such coercion, undue influence, fraud or misrepresentation as would justify his being sent back to his native district, the Inspector or Magistrate shall record a finding to that effect and shall, if necessary, detain the person and shall send him, if he so desires, together with any other persons dependent on him, back to his native district.

(3) Subject to any orders which the Local Government may make in this behalf, any expenditure incurred under this section may be recovered from the employer on whose behalf the person concerned was induced to emigrate or to whose estate he was being or had been conveyed, or, if the employer is not known, or if there is no employer, the person who is accompanying or conveying the person concerned or has forwarded or otherwise assisted him to emigrate to any labour-district or estate.

Arrangements may be made for escorting persons ordered to be repatriated.

162. (1) Where a labourer or other person is sent back to his native district under section 158, 160 or 161, the Inspector or Magistrate may provide an escort or make such other arrangements as he may think necessary for ensuring that the labourer or person is actually conveyed to his native district.

(2) Any expenditure incurred under sub-section (1) may be recovered as part of the amount expended in sending the labourer or other person back to his native district.

CHAPTER VIII.

RULES.

General power for the Local Government to make rules.

163. (1) In addition to the powers hereinbefore conferred, the Local Government may make rules to carry out any of the purposes and objects of this Act in the Province.

(2) In particular and without prejudice to the generality of the foregoing power, such rules may—

(a) define and regulate the powers and duties of the several officers appointed by it under this Act;

(b) prescribe what returns and reports shall be made under this Act by any such officers as aforesaid or by any con-

The Assam Labour and Emigration Act, 1901.

(Chapter VIII.—Rules.—Section 163.)

tractors or local agents within the Province and the form in which they shall be respectively so made;

(*c*) prescribe the forms of all registers, licenses, certificates, permits and notices required under this Act with respect to the Province;

(*d*) prescribe the fees to be paid for any license granted under this Act by any officer appointed by it, and for the registration of labourers or their dependants in any district in the Province;

(*e*) prescribe the particulars to be registered by a Registering-officer in respect of each person who is brought before him in any district in the Province for registration as a labourer or dependant;

(*f*) provide for the management and regulation of contractors' depôts and of hospital depôts situate within the Province, and for the support and medical treatment of labourers and their dependants passing through such depôts;

(*g*) provide for the accommodation, food, clothing and medical treatment of all labourers and their dependants detained on account of sickness by order of a Magistrate at any place within any district in the Province;

(*h*) prescribe the conditions upon which any officer appointed by it may grant licences to masters of vessels carrying passengers to any labour-district; provide for the ventilation, cleanliness and water-supply of such vessels in respect of which licenses are granted hereunder by any such officer; and prescribe the lists, returns and reports to be kept and submitted by the masters of such vessels;

(*i*) prescribe the description, quantity and quality of provisions, medical drugs and other stores to be taken on board such vessels carrying labourers when such vessels are within the Province, and the daily allowance to be issued to each labourer and dependant during the journey through the same; prescribe the number of officers, cooks and other servants to be carried on board such vessels; and provide generally for the accommodation of labourers and their dependants on such vessels;

(*j*) provide for the detention and inspection of such vessels and of all the passengers, being natives of India, carried in such vessels, while in transit through the Province;

(*k*) declare the routes through the Province by which labourers, emigrants under Chapter V and dependants shall travel to the labour-districts;

(*l*) prescribe the clothing to be supplied to labourers, emigrants under Chapter V and dependants while proceeding to the labour-districts through the Province;

(*m*) require depôts and rest-houses to be provided by and at the cost of employers, contractors or agents for the accommodation of labourers, emigrants under Chapter V and dependants on any prescribed route, and provide for the sanitation and superintendence of such depôts and rest-houses;

(*n*) prescribe the mode and the numerical strength of the parties in which labourers, emigrants under Chapter V and dependants are to travel, the arrangements to be made by and at the cost of employers, contractors or agents for facilitating the journey of labourers, emigrants under Chapter V and dependants, the length of daily marches by road, and the provision to be made by and at the cost of employers, contractors or agents for the carriage of labourers, emigrants under Chapter V and dependants when suffering from sickness;

(*o*) regulate the food to be supplied by and at the cost of employers, contractors or agents to labourers, emigrants under Chapter V and dependants, and the provision to be made for the proper cooking of such food;

(*p*) regulate the water-supply to be maintained by and at the cost of employers, contractors or agents for the use of labourers, emigrants under Chapter V and dependants;

(*q*) require suitable hospital-accommodation, medical treatment and maintenance to be provided by and at the cost of employers, contractors or agents for labourers, emigrants under Chapter V or dependants when suffering from sickness on their journey to a labour-district;

(*r*) regulate the arrangements to be made by and at the cost of employers, contractors or agents in case of the death of any labourer, emigrant under Chapter V or dependant during the journey to a labour-district;

(*s*) prescribe the house-accommodation, water-supply, sanitary arrangements and amount and kind of food-grains to be provided by employers for their labourers, and regulate the rations to be supplied to labourers under this Act in the labour-districts in the Province; and

(*t*) provide for the hospital-accommodation and medical treatment of labourers in such labour-districts, and prescribe the nature, quality and quantity of medical drugs and other stores to be provided for such labourers.

The Assam Labour and Emigration Act, 1901.

(*Chapter IX—Penalties and Procedure.—Sections 164-169.*)

(*3*) Where an employer, contractor, agent or other person fails to perform any act which he is by any rule made under sub-section (*2*) required to perform, the Local Government may cause the act to be performed and the cost may be recovered from the employer, contractor or agent, as the case may be.

(*4*) In making any rule under this Act the Local Government may direct that every breach thereof shall be punishable with fine not exceeding in any case five hundred rupees.

(*5*) All rules made by the Local Government under this Act shall be published in the local official Gazette, and, on such publication, shall have effect as if enacted by this Act.

CHAPTER IX.

PENALTIES AND PROCEDURE.

Recruitment, etc., in contravention of Act or notification.

164. Whoever knowingly recruits, engages, induces or assists, or attempts to recruit, engage, induce or assist, any person to emigrate in contravention of any of the provisions of this Act or of any notification for the time being in force thereunder, shall be punishable with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

Wilful misdescription by recruiter.

165. Whoever, being a recruiter, wilfully gives false information to a Registering-officer regarding the name, caste, native district or village of any person produced before such officer for registration as a labourer or regarding any other particulars required to be entered in the register prescribed by section 34, sub-section (*2*), shall be punished with imprisonment for a term which may extend to six months, or with fine, or with both.

Recruiter removing, etc., unregistered person.

166. Whoever, being a recruiter,—

(*a*) removes, or attempts to remove, any person to a depôt before he has been registered under section 34, or induces or attempts to induce him to go to a depôt or to leave the local limits of the jurisdiction of the Registering-officer before whom he ought to be brought under section 33, or aids or attempts to aid him in going to a depôt or in leaving any such local limits as aforesaid before he has been so registered; or

(*b*) induces or attempts to induce any person who has been so registered to proceed to any place other than the depôt which has been established by the contractor on whose behalf the recruiter is licensed, or conveys or attempts to convey him to such place;

shall be punishable with imprisonment for a term which may extend to one month, or with fine which may extend to fifty rupees in respect of every such person.

Recruiter not supplying proper food, etc.

167. (*1*) Whoever, being a recruiter or a person deputed by a recruiter to accompany labourers to a depôt, fails to provide any labourer or any dependant whom he accompanies on the journey to the depôt with proper and sufficient food and lodging, or otherwise ill-treats the labourer or dependant on the journey, shall be punishable with fine which may extend to fifty rupees; and, in default of payment of the fine within twenty-four hours, with imprisonment for a term which may extend to one month.

(*2*) The convicting Magistrate may award the whole or any portion of any fine levied under sub-section (*1*) as compensation to the labourer in respect of whom, or of whose dependant, the failure or ill-treatment has occurred.

Labourer refusing without reasonable cause to execute contract at depôt.

168. (*1*) Any labourer engaged by a recruiter who, having been registered under section 34, without reasonable cause refuses or neglects when at the depôt to execute, in accordance with the provisions of section 44, a labour-contract in conformity with the terms made known to him when he was registered, shall be punishable with fine which may extend to the amount of the expense incurred in registering him and conveying him to the depôt and maintaining him therein; and, in default of payment of the fine, with imprisonment for a term which may extend to one month.

(*2*) Any labourer so punished may be forthwith discharged from the depôt.

(*3*) Every fine levied under sub-section (*1*) shall be paid to the contractor, sub-contractor or recruiter by whom such expense as aforesaid was incurred.

Labourer refusing to execute contract with garden-sardar.

169. (*1*) Any labourer registered under section 69 who, without reasonable cause, refuses or neglects to execute, in accordance with the provisions of section 72, a labour-contract in conformity with the terms made known to him when he was registered, shall be punishable with fine which may extend to twenty rupees or to the amount of the expense reasonably incurred by the garden-sardar in procuring his registration, whichever amount is least.

(*2*) Every fine levied under sub-section (*1*) shall be paid to the garden-sardar by whom such expense as aforesaid was incurred.

The Assam Labour and Emigration Act, 1901.

(Chapter IX.—Penalties and Procedure.—Sections 170-176.)

Garden-sardar failing to report himself, etc.

170. Whoever, being a garden-sardar holding a certificate under Chapter IV,—

(*a*) fails, within fourteen days after his arrival in the local area within which he is authorized to enter into contracts under this Act, to report himself to the local agent (if any) specified in his certificate; or

(*b*) fails, without sufficient cause, to return to his employer within the time specified in his certificate; or

(*c*) fails to account for the money advanced to him by his employer for the purpose of engaging labourers;

shall be punishable with imprisonment for a term which may extend to one month, or with fine which may extend to fifty rupees, or with both;

and may, if a labourer under a labour-contract, on the application of his employer or of a person acting on behalf of the employer, be sent back or made over to his employer for the purpose of completing his term of service.

Garden-sardar, etc., abandoning labourers, etc.

171. Whoever, being a garden-sardar holding a certificate under Chapter IV or a person appointed under section 55 or section 76 to accompany labourers to a labour-district,—

(*a*) wilfully abandons any labourer or his dependant on the way to the labour-district; or

(*b*) removes or attempts to remove any person to a labour-district before he has executed a labour-contract in accordance with section 72; or

(*c*) induces or attempts to induce any person to go to a labour-district or to leave the local area specified in the certificate of the garden-sardar before he has executed a labour-contract as aforesaid or aids or attempts to aid him in proceeding to a labour-district or in leaving any such local area as aforesaid before he has executed such a labour-contract;

shall be punishable with imprisonment for a term which may extend to one month, or with fine which may extend to fifty rupees, or with both.

Garden-sardar making over labourers to contractors, etc.

172. (*1*) Whoever, being a garden-sardar holding a certificate under Chapter IV,—

(*a*) makes over to any contractor, sub contractor or recruiter, or to the garden-sardar or local agent of any employer other than the employer by whom his certificate was granted, or, without authority from his employer, to any other person, any person whom he has engaged or intends to engage as a labourer; or

places any such person as aforesaid in a contractor's depôt or in the place of accommodation provided by a recruiter in accordance with the provisions of section 29, sub-section (*2*); or

(*c*) allows any person engaged as a labourer by any contractor or sub-contractor or recruiter to share the accommodation provided by him under section 62;

shall be punishable with imprisonment for a term which may extend to six months, or, with fine, or with both, and his certificate may be impounded by the convicting Magistrate.

(*2*) Any Magistrate impounding a certificate under this section shall send it for cancellation to the Magistrate by whom it was countersigned.

Garden-sardar failing to comply with instructions endorsed on way-bill.

173. Any garden-sardar holding a certificate under Chapter IV or person appointed by him as provided by section 76, who accompanies labourers to the labour-districts and fails to present a way-bill as required by section 79, sub-section (*1*), or to carry out any of the instructions entered in the way-bill, shall be punishable with fine which may extend to twenty rupees.

Unlawful engagement of emigrants by garden-sardar.

174. Whoever,—

(*a*) being a garden-sardar employed under a permit to engage persons and assist them to emigrate in accordance with the provisions of section 90, infringes any of the provisions of that section; or,

(*b*) being a garden-sardar employed under the control of an agency or association to engage persons and assist them to emigrate in accordance with the provisions of section 91, infringes any of the conditions prescribed by or under that section;

shall be punishable with imprisonment for a term which may extend to one month, or with fine which may extend to fifty rupees for every such infringement.

Local agent or selecting agent working with contractor.

175. Whoever, being a local agent licensed under section 64 or a selecting agent licensed under section 65, retains or acquires any interest in the business of a contractor or works for a contractor for hire or reward shall be punishable with fine, which may extend to one thousand rupees.

Master receiving native passengers on board in contravention of Act.

176. (*1*) Whoever,—

(*a*) being a master not licensed under section 97, in contravention of section 96, sub-section (*1*), knowingly receives on board his vessel more than twenty passengers being natives of India; or,

(*b*) being a master licensed as aforesaid, knowingly receives on board his vessel any such passengers in excess of the number specified in his license or in any order of an Embarkation Agent under

The Assam Labour and Emigration Act, 1901.

Chapter IX.—Penalties and Procedure.- Sections 177-189.)

section 100 for the purpose of transporting them to a labour-district;

shall be punishable with fine which may extend to two hundred rupees for each passenger so received.

(2) Nothing in this section applies to the master of a vessel exempted under section 96, sub-section (2).

Fraudulent alteration of vessel after grant of license.

177. Whoever, being a master licensed under section 98, with intent to defraud, does or suffers to be done any act or thing whereby the state of his vessel is altered, so that the vessel is unfit for the accommodation of the number of passengers specified in his license or in any order made under section 100 by an Embarkation Agent, shall be punishable with fine which may extend to two hundred rupees.

Master not complying with section 102.

178. Whoever, being a master licensed under section 98, proceeds on his voyage with his vessel carrying labourers without having complied with the provisions of section 102, shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to five hundred rupees.

Master not complying with order under section 104.

179. Whoever, being a master licensed under section 98, fails to comply with an order of an Embarkation Agent made under section 104, shall be punishable with fine which may extend to two hundred rupees for each day during which he fails to comply with the order after the day on which the order was received by him.

Master permitting labourer to leave vessel contrary to section 106.

180. Whoever, being a master licensed under section 98, causes or permits a labourer finally to leave his vessel in contravention of the provisions of section 106, shall be punishable with fine which may extend to two hundred rupees for each labourer so leaving his vessel.

Master wilfully omitting to stop vessel at certain places.

181. Whoever, being a master licensed under section 98, wilfully omits to comply with the provisions of section 107, shall be punishable with fine which may extend to two hundred rupees.

Person disobeying Magistrate's order as to communication between vessel and land.

182. Whoever disobeys any order made under section 109 by a Magistrate, shall be punishable with fine which may extend to two hundred rupees.

Master or medical officer disobeying or neglecting to enforce rules.

183. Whoever, being a master licensed under section 98, or a medical officer in charge of a vessel, wilfully omits or neglects to obey or enforce on board of the vessel any provision of this Act or any rule thereunder, shall be punishable with fine which may extend to two hundred rupees.

Labourer deserting, etc., after registration.

184. Whoever, having executed a labour-contract,—

(*a*) deserts while on his journey from the district in which he has executed the labour-contract to a labour-district; or,

(*b*) without reasonable cause, refuses or neglects to proceed to the place where he is to labour or to embark in any vessel when called upon to do so by an Embarkation Agent;

shall be punishable with imprisonment for a term which may extend to one month.

Employer refusing or omitting to keep registers, etc

185. Whoever, being an employer, refuse or wilfully omits to kee such registers or to mak such periodical returns i writing to the Inspector as may be prescribed b any rule made under this Act, or knowingl keeps an incorrect register or makes an inco rect return, or wilfully omits to prepare, h or affix a schedule as required by section 12 shall be punishable with fine which may exten to two hundred rupees.

Employer or other person obstructing inspection under section 123.

186. Whoever, being an employer, or actin under the orders or on th behalf of an employer, wil fully obstructs any entry inspection or inquiry, c omits to comply with any requisition made unde section 123, shall for every such offence b punishable with fine which may extend to tw hundred rupees.

Employer or other person compelling labourer to perform labour for which he is unfit.

187. Whoever, being an employer, or actin under the orders or on th behalf of an employer compels any labourer to per form any labour knowing that he is at the time unfi to perform such labour, shall be punishable wit fine which may extend to two hundred rupees.

Persons buying labourer's rations.

188. Whoever buys any rations which hav been furnished under sec tion 134 to a labourer and whoever, being a labourer, sells any ration so furnished to him, shall be punishable with im prisonment for a term which may extend to on month, or with fine which may extend to fift rupees.

Employer omitting to provide house-accommodation, etc.

189. (*1*) Whoever, being an employer, wil fully omits to pro vide house-accommodation water-supply, sanitary ar rangements, food-grains or rations in accordanc with the provisions of this Act or any rule there under, shall be punishable with fine which ma extend to five hundred rupees; and the convict ing Magistrate may order him to comply wit such provisions within a reasonable time to b fixed in the order.

(*2*) If the employer wilfully omits to comply with the order within the time so fixed, he

The Assam Labour and Emigration Act, 1901.

(*Chapter IX.—Penalties and Procedure.—Sections 190-195.*)

shall be punishable with fine which may extend to one hundred rupees for each day during which the omission continues.

(3) If the employer fails to pay the fine imposed under sub-section (2), the person on whose account he has been acting shall be liable to pay the same.

Employer neglecting to provide hospital-accommodation.

190. Whoever, being an employer, fails to provide such hospital-accommodation for, or to make such provision for the medical care and treatment of, labourers, as is required by any rule made under this Act, shall be punishable with fine which may extend to two hundred rupees for each week during which the default continues.

Employer causing labourer to reside on estate declared unfit for residence.

191. Where any estate or portion thereof has been found under section 140, or declared under section 144, unfit for the residence of labourers or any class of labourers, as the case may be, every employer who, until a certificate has been given under section 145, causes or permits such labourers or class of labourers to reside or labour upon the estate or portion shall be punishable with fine which may extend to two hundred rupees.

Unlawful absence from work.

192. (1) Every employer may, on or before the fifteenth day of each month, send to the Inspector a statement in writing containing the names of all or any of his labourers who, voluntarily and without reasonable cause, absented themselves from labour during the preceding month, and specifying the periods of absence. When any employer so sends any statement, he shall, at the same time, notify to each labourer concerned the fact that he has done so.

(2) Every Inspector who receives any statement so sent shall, if the employer so desires, when next visiting the estate on which the labourers to whom the statement relates are employed, inquire into each case of absence in the presence of the labourer concerned, and, if satisfied that the labourer has voluntarily and without reasonable cause absented himself, shall, unless the labourer consents to forfeit to his employer the sum of four annas for each day of absence, endorse the days of absence on the labour-contract of the labourer, and add them to the term of the contract.

(3) The Inspector may also, at any time other than that of his visit to the estate, on the application of either the employer or the labourer, after due inquiry, endorse the days of absence on, and add them to the term of, the labour-contract:

Provided that an employer who omits to apply for the endorsement of such days on any labourer's labour-contract when the Inspector is actually visiting the estate shall be debarred, in the absence of sufficient reasons to the contrary shown to the satisfaction of the Inspector, from applying afterwards for such endorsement so far as days of absence reported in statements sent to the Inspector previous to the date of his last visit are concerned.

Explanation.—Ill-treatment of a labourer by his employer, or failure of the employer to fulfil any condition of the labour-contract binding on the employer, shall be deemed to be reasonable cause within the meaning of this section.

Labourer absent without cause.

193. Whoever, being a labourer, voluntarily and without reasonable cause, absents himself from his labour for more than seven consecutive days, or for more than seven days in any one month, shall be punishable with imprisonment for a term which may extend to fourteen days; and, in case the absence has extended to twenty days in any two consecutive months, shall be punishable with imprisonment for a term which may extend to one month.

Explanation.—Ill-treatment of a labourer by his employer, or failure of the employer to fulfil any condition of the labour-contract binding on the employer, shall be deemed to be reasonable cause within the meaning of this section.

Statement of deserters.

194. Every employer may, on or before the fifteenth day of each month, send to the Inspector a statement in writing in such form as the Local Government may prescribe containing the names of all or any of his labourers who have deserted from his service during the preceding month, or who, having deserted at any previous time, have been absent during the preceding month, or who, having deserted during the month or previously, have been arrested or have returned to his service during the preceding month.

Deserter may be apprehended without warrant.

195. (1) Where any labourer deserts from his employer's service, the employer, or any person authorized by him in this behalf, may, without a warrant and without the assistance of any police-officer, arrest the labourer wherever he may be found:

Provided that, if the labourer is found within five miles of the place where a Magistrate resides or in the service of another employer, he shall not be arrested without warrant.

(2) Every police-officer shall assist in arresting any such labourer if so required by the employer or person authorized by him in this behalf.

(3) Whoever arrests a labourer under this section shall without delay take him to the police-station nearest to the place of the arrest; and if he fails to do so shall be punishable with fine which may extend to two hundred rupees.

The Assam Labour and Emigration Act, 1901.

(Chapter IX.—Penalties and Procedure.—Sections 196-204.)

196. (*1*) The police-officer in charge of such station shall, on the appearance of the parties, take down in writing the statements of the labourer arrested and of the person arresting the labourer.

Procedure at police station.

(*2*) If the labourer admits the contract and does not claim to be forwarded to a Magistrate, the police-officer may permit the person arresting the labourer to convey him to the estate on which he is under contract to labour, and shall then transmit the statements recorded and a report of his proceedings to the Magistrate within the local limits of whose jurisdiction the police-station is situated.

(*3*) If the labourer does not admit the contract or claims to be forwarded to the Magistrate, or if, for any reason, it appears to the police-officer desirable that he should be so forwarded, the police-officer shall forthwith send the labourer, together with the statements recorded as aforesaid and a report of his proceedings, to the Magistrate within the local limits of whose jurisdiction the police-station is situated.

(*4*) If the estate on which the labourer is under contract to labour is not situate within the local limits of the jurisdiction of the Magistrate referred to in sub-section (*2*) or sub section (*3*), the Magistrate shall forward the statements and report received by him from the police to the Magistrate within the local limits of whose jurisdiction such estate is situate. He shall also, when the labourer has been sent to him by the police, either forward the labourer to, or take security for his appearance before, such other Magistrate as aforesaid.

(*5*) On receipt of such statements and report the Magistrate within the local limits of whose jurisdiction the estate is situate may, after making such inquiry as he considers desirable into the case, pass such order in accordance with law as he thinks proper. For the purpose of any such inquiry the Magistrate may, if he thinks fit, in any case in which the labourer arrested has not been sent to or appeared before him, require the labourer to appear before him.

197. Where an employer or a person acting on behalf of an employer complains to a Magistrate that a labourer has deserted from the employer's service, the Magistrate may, without previously examining the complainant, issue a summons for the attendance of the labourer, or a warrant for his arrest, and fix a day for hearing the complaint.

Procedure on complaint of desertion.

198. (*1*) Whoever, being a labourer, deserts from his employer's service, shall be punishable with imprisonment for a term which may extend to one month, or with fine which may extend to twenty rupees, or with both.

Punishment for desertion.

(*2*) For a second conviction for a like offence the offender shall be punishable with imprisonment for a term which may extend to two months, or with fine which may extend to fifty rupees, or with both.

(*3*) For a third and every subsequent conviction for a like offence the offender shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to one hundred rupees, or with both.

199. (*1*) Where it appears to a Magistrate trying a labourer for deserting from his employer's service that such labourer was arrested without sufficient cause, the Magistrate may impose a fine, which may extend to fifty rupees, on the employer or person acting on his behalf by whom or at whose instance the labourer was arrested.

Compensation for wrongful arrest.

(*2*) The Magistrate may in his sentence direct that the whole or any part of the fine levied under sub-section (*1*) be paid by way of compensation to the labourer so arrested.

200. Where a labourer has actually suffered imprisonment for terms amounting in the whole to six months for desertion from his employer's service, the Inspector shall cancel the labour-contract of the labourer, and shall endorse on his copy of the contract a certificate of the cancellation; or, if that copy is not forthcoming, he shall give to the labourer a written certificate to the like effect.

Cancellation of contract by desertion.

201. Whoever, being a labourer, is guilty of habitual drunkenness, or wilfully disregards any sanitary regulation approved by the Inspector and duly notified for the guidance of the labourers on the estate on which the labourer is employed, shall be punishable with imprisonment for a term which may extend to one week, or with fine which may extend to five rupees.

Penalty for drunkenness or neglect of sanitary regulations.

202. (*1*) The employer of a labourer sentenced to imprisonment for any offence under this Act, or any person authorized to act in this behalf for the employer, may apply to the Magistrate that the labourer be made over to him for the purpose of completing his labour-contract.

Portion of sentence may be cancelled on application of employer.

(*2*) On an application being made under sub-section (*1*), the Magistrate may, if he thinks fit, order that the labourer be made over or forwarded to his employer; and in that case the Magistrate shall cancel the sentence passed on the labourer or any unexpired portion of the same, and shall endorse on his copy of the labour-contract a certificate of the cancellation, or, if that copy is not forthcoming, shall give him a written certificate of the cancellation.

(*3*) Nothing in this section shall be deemed to affect the provisions of section 200.

203. Every employer who obtains an order of a Magistrate for the making over or forwarding of any labourer shall be liable to defray the expense (if any) incurred in the making over or forwarding of the labourer; and shall, before the order is issued, deposit with the Magistrate a sum sufficient in the Magistrate's opinion to defray that expense.

Expense of forwarding labourer to be paid by employer.

204. (*1*) On the expiry of any sentence of imprisonment passed on a labourer for any offence under this Act, the Magistrate shall, subject to the provisions of section 200, make the labourer over to any person appointed on the part of his employer to take

Conviction not to operate as a release.

The Assam Labour and Emigration Act, 1901.

(*Chapter IX.—Penalties and Procedure.—Sections 205-214.*)

charge of him ; and no conviction under this Act or imprisonment thereon shall, save as aforesaid, operate as a release to any labourer from the terms of his labour-contract.

(*2*) Where no person is present on the part of the employer to take charge of the labourer on the expiry of his sentence, the Magistrate shall forward the labourer to the principal place of business of his employer situate within the local limits of the Magistrate's jurisdiction.

(*3*) Any expenditure incurred under sub-section (*2*) may be recovered from the employer of the labourer concerned.

Endorsement on contract of imprisonment for offence against Act.

205. (*1*) Where a labourer is sentenced to imprisonment for any offence under this Act other than an offence under section 193 or section 198, the Magistrate shall endorse on the employer's copy of the labour-contract the term for which the labourer is so sentenced.

(*2*) When a labourer is convicted of unlawful absence under section 193 or desertion under section 198, the Magistrate shall endorse the period of the labourer's absence or desertion on the employer's copy of the labour-contract.

(*3*) In a case of desertion falling under sub-section (*2*) no endorsement shall be made if the labour-contract has been cancelled under section 200, or if more than one year has elapsed from the expiry of the original term of the labour-contract or more than three years have elapsed from the date when the labourer deserted, to the date of his conviction.

(*4*) The term of imprisonment to which a labourer is sentenced under section 193 or section 198 shall be deducted from the term of service to which he is bound by his original contract or by any endorsement made under sub-section (*2*).

(*5*) No endorsement shall be made in a case of desertion under sub-section (*2*) unless the employer has duly reported the particulars of the desertion as provided in section 194.

Endorsement on contract of period of any other imprisonment.

206. Where a labourer is sentenced to imprisonment for any time not exceeding three years for any offence other than an offence under this Act, the Court or Magistrate so sentencing him shall, if the employer or a person acting on behalf of the employer so requests, endorse on the employer's copy of the labour-contract the period for which the labourer is sentenced to imprisonment, or, if that period exceeds the unexpired term of the labour-contract on the date of the sentence, so much of that period as is equal to the unexpired term.

Periods endorsed to be added to term of contract.

207. The periods endorsed under section 205 or section 206 shall be added to the term for which the labourer contracted to serve ; and the labourer shall not be deemed to have performed his labour-contract until he has served for the term specified therein in addition to the periods so endorsed.

Other person enticing away, harbouring or employing labourer under labour-contract.

208. (*1*) Whoever, knowing that a labourer is bound by his labour-contract to labour for any employer, voluntarily entices or attempts to entice the labourer to leave his employer, or harbours or employs any labourer who has, in contravention of the terms of his labour-contract, left his employer, shall be punishable with imprisonment for a term which may extend to one month, or with fine which may extend to two hundred rupees, or with both.

(*2*) The convicting Magistrate may, in his discretion, award to the employer with whom the labourer has contracted the whole or any part of any fine levied under sub-section (*1*).

Failure to forward contract under section 118 or to cause labourer to appear under section 120.

209. Whoever, being bound under section 118, sub-section (*2*), to forward any labour-contract to the Inspector, or under section 120 to cause any labourer to appear before the Inspector or Magistrate, wilfully omits or neglects so to forward the labour-contract to the Inspector at or within the time specified, or to cause the labourer to appear before the Inspector or Magistrate within a reasonable time, shall be punishable with fine which may extend to two hundred rupees.

Employer or other person neglecting to send labourer before Magistrate as provided by section 146.

210. Whoever, being bound by section 146 to send any labourer before, or to give notice of any complaint to, an Inspector or Magistrate, refuses or neglects so to send the labourer or to give the notice, shall be punishable with fine which may extend to two hundred rupees.

Employer refusing to endorse labour-contract, etc.

211. Whoever, being an employer,—

(*a*) refuses or wilfully neglects to endorse the labourer's copy of his labour-contract as required by section 155, or

(*b*) detains a labourer after the determination of his labour-contract ; or

(*c*) fails to give to the Inspector notice in writing of such determination as aforesaid within one month after the date thereof ;

shall be punishable with fine which may extend to two hundred rupees.

Employer or other person neglecting to comply with request of a labourer to redeem unexpired term.

212. Whoever, being an employer or a person acting for an employer, refuses or neglects to comply with the request of a labourer made under section 156, shall be punishable with fine which may extend to two hundred rupees.

Abetment.

213. Whoever abets, within the meaning of the Indian Penal Code, any offence against this Act or any rule hereunder, shall be punishable with the punishment provided for the offence. XLV of 1

Place of trial for offences.

214. Whoever commits any offence against this Act or any rule hereunder shall be triable for the offence in any place in which he may be found, as

The Assam Labour and Emigration Act, 1901.

(Chapter X.—Miscellaneous.—Sections 215-218.)

well as in any other place in which he might be tried under any law for the time being in force.

CHAPTER X.

MISCELLANEOUS.

Recovery of sums due under Act.

215. Every sum recoverable under this Act from any person may be recovered on application to a Magistrate having jurisdiction where the person is for the time being resident, by the distress and sale of any moveable property within the limits of the Magistrate's jurisdiction belonging to that person.

Wages due under labour-contract a charge upon estate.

216. All arrears of wages due under any labour-contract shall be a charge upon the estate upon which the labourer to whom the labour-contract relates has been engaged to labour; or, if he has engaged to labour upon any one of several estates managed by the same employer, shall be a charge upon that estate upon which he for the time being actually labours.

Owner of estate for time being has all rights and remedies in respect of labour-contracts charged on it.

217. (*1*) Whenever an estate on which any labourer has under this Act contracted to labour is transferred by act of parties or operation of law or devolves, the person to whom it is so transferred or on whom it devolves shall be bound by the labour-contract of the labourer in the same manner and to the same extent as the person by or from whom it is transferred or devolves would have been bound thereby, and shall have the same rights and remedies under it as such person would have had thereunder, if the estate had not been transferred or had not devolved.

(*2*) No person who has ceased to be the owner of the estate upon which any labourer has under this Act contracted to labour shall be liable in respect of any breach of the labour-contract of the labourer which occurs after he has ceased to be owner.

Fines, fees and rates to be credited to Labour Transport Fund.

218. (*1*) Subject to the power of a Magistrate under this Act or the Code of Criminal Procedure, V of 1898
1898, to award fines in whole or in part as compensation to or for the benefit of any complainant or other person, the Local Government shall credit all fines, fees and rates levied and paid under this Act in the territories under its administration to a fund to be called the "Labour Transport Fund".

(*2*) The Labour Transport Fund shall be at the disposal of the Local Government, in such manner as the Government of India may direct, for paying the salaries and allowances of all officers and establishments appointed by it under this Act and their pensionary and leave-allowances, for meeting the cost of sending labourers and other persons back to their native districts, and generally for defraying the expenses of carrying out the purposes and objects of this Act and any rules made by the Local Government hereunder.

(3) The annual surplus accruing in the Labour Transport Fund shall be applied to reducing the annual rate or the registration-fees leviable under this Act, and not otherwise.

Duty of Assistant Inspector.

219. Every Assistant Inspector shall perform all such duties and exercise all such powers of an Inspector as he is authorized in writing by the Inspector to perform or exercise.

Powers of officers under this Act to be exercisable from time to time.

220. All powers conferred by this Act on any Superintendent, Medical Inspector, Emigration Agent or other officer may be exercised from time to time as occasion requires.

Power to exempt labour-district from Act.

221. The Chief Commissioner of Assam may, with the previous sanction of the Governor General in Council, by notification in the local official Gazette, declare that any labour-district or local area therein shall, on and with effect from a day to be fixed in the notification, cease to be subject to all the provisions or any specified provision of this Act; and from the day so fixed such labour-district or local area as aforesaid shall cease to be subject to the provisions of this Act or to the provision so specified, as the case may be.

Notifications not to affect prior acts, etc.

222 The publication of any notification under this Act shall not affect any act done, offence committed or proceedings commenced before such publication.

Repeal.

223. The enactments mentioned in the second schedule are hereby repealed to the extent specified in the forth column thereof.

THE FIRST SCHEDULE.

FORM OF LABOUR-CONTRACT BETWEEN LABOURER AND EMPLOYER.

(*See section 5.*)

This contract, made under the Assam Labour and Emigration Act, 1901, between *A B* (hereinafter called the labourer) of the one part and *[*C D* (representative, local agent or garden-sardar) on behalf of] *E F* (hereinafter called the employer) on the other part, witnesseth that the said *[representative or local agent or garden-sardar on behalf of the said] employer doth hereby promise the said labourer that if he, the said labourer, do remain and labour† on the $\frac{\text{X estate}}{\text{Y estates}}$‡ of his said employer in the labour-district of for the term of years from the date of the execution of this contract, he, the said employer, will, from the date on which the said labourer commences to labour on the said $\frac{\text{estate}}{\text{estates}}$, pay or cause to be paid to the said labourer monthly wages at the rate of Rs. § for a completed daily task regulated in accordance with the provisions of

* Parts in brackets to be omitted if the contract is made without the intervention of a representative, local agent or garden-sardar.

† State nature of labour, if the labourer is to be required to work under the ground.

‡ As the case may be.

§ State rates for various periods of contract.

The Assam Labour and Emigration Act, 1901.

(*The First Schedule.—Form of Labour-contract between Labourer and Employer.*)

the said Act,* and when such task as aforesaid is not completed, monthly wages calculated at the same rate in proportion to the amount of work actually done, and that during the said period he, the said employer, will supply to the said labourer rice at a price of Rs. per maund and will faithfully comply with all rules regarding house-accommodation, medical treatment and the supply of food-grains or rations to the said labourer which the Local Government may prescribe; and this contract further witnesseth that the said labourer doth hereby, in consideration of the aforesaid promise, agree so to remain and labour for the said employer. In witness whereof the said parties to these presents have hereunto set their hands at this day of 19 .

PART VI.

Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House, Calcutta, on Friday, the 8th March, 1901.

PRESENT:

His Excellency Baron Curzon, P.C., G.M.S.I., G.M.I.E., Viceroy and Governor General of India, *presiding*.
The Hon'ble Major-General Sir E. H. H. Collen, G.C.I.E., C.B.
The Hon'ble Sir A. C. Trevor, K.C.S.I.
The Hon'ble Sir C. M. Rivaz, K.C.S.I.
The Hon'ble Mr. T. Raleigh.
The Hon'ble Sir E. FG. Law, K.C.M.G.
The Hon'ble M. R. Ry. Panappakkam Ananda Charlu Vidia Vinodha Avargal Rai Bahadur, C.I.E.
The Hon'ble Kunwar Sir Harnam Singh, Ahluwalia, K.C.I.E., of Kapurthala.
The Hon'ble Mr. J. Buckingham, C.I.E.
The Hon'ble Mr. H. F. Evans, C.S.I.
The Hon'ble Rai Bahadur B. K. Bose, C.I.E.
The Hon'ble Sir Allan Arthur, Kt.
The Hon'ble Sir A. Wingate, K.C.I.E.
The Hon'ble Mr. F. A. Nicholson, C.I.E.
The Hon'ble Mr. D. M. Smeaton, C.S.I.
The Hon'ble Mr. H. J. S. Cotton, C.S.I.
The Hon'ble Mr. C. W. Bolton, C.S.I.
The Hon'ble Rai Sri Ram Bahadur.
The Hon'ble Mr. R. P. Ashton.
The Hon'ble Mr. R. H. Henderson.

INDIAN FOREST (AMENDMENT) BILL.

The Hon'ble SIR CHARLES RIVAZ moved that the Report of the Select Committee on the Bill further to amend the Indian Forest Act, 1878, be taken

into consideration. He said :—"I explained, when I introduced this Bill, that its object was to strengthen the hands of the executive in dealing with cases of forest-fires by (1) extending to protected forests the provision of the Forest Act, which at present applies only to reserved forests, by which, when a fire is caused wilfully or by gross negligence, the exercise of rights of pasture or to forest-produce in the forest so burnt can be suspended by the Local Government, and (2) making all persons enjoying forest-rights liable to punishment unless they turn out of their own accord and render assistance in extinguishing a forest-fire.

"The Select Committee has proposed, as explained in their Report, some small alterations in the language of the Bill which will have the effect of (1) enabling the Local Government, when suspending rights in a burnt forest, to not necessarily suspend the rights of all right-holders but only of those who are immediately responsible, actively or passively, for the fire, and (2) limiting the cases when persons can be punished for not rendering spontaneous assistance to those of forest-fires."

The motion was put and agreed to.

The Hon'ble SIR CHARLES RIVAZ moved that the Bill, as amended, be passed.

The motion was put and agreed to.

INDIAN MINES BILL.

The Hon'ble SIR CHALES RIVAZ presented the final Report of the Select Committee on the Bill to provide for the Regulation and Inspection of Mines. He said that he proposed, with His Excellency's permission, to ask the Council that day fortnight to take the Report into consideration.

ASSAM LABOUR AND EMIGRATION BILL.

His Excellency THE PRESIDENT said :—"It may perhaps be of convenience Hon'ble Members, and may facilitate the course of the present debate, if tate at its commencement the course which the Government propose to opt. As to the merits, and the desirability of the greater part of the Bill ich we are asked today to pass into law, there are, I understand, no two nions. This legislation is not merely required, but is accepted as salutary l essential by all the different parties concerned. There is, however, one provision in the Bill, namely, that to make a slight increase to the statutory wage of the Act-labourer on the tea-gardens of Assam in the second and third years of his service, which has been the subject of much controversy, and about which opinions are sharply divided, both among the outside public and in this Council. Intimately connected with this question is that of the present condition of the tea-industry, which is alleged by its spokesmen to be in so depressed a condition as to render unwise, if not unjust, any increase to its burdens.

"The Government desire to approach both these questions with absolute impartiality. Though this Bill is a Government Bill, we have throughout shown our readiness to meet criticism or objection by the substantial concessions that have been made in Committee in the proposed increase of wages. We wish that the question should be examined by this Council with as much freedom from bias or from external influence as we have ourselves endeavoured to apply to it. The case is one that should, in our opinion, be decided exclusively upon its own merits, and by the unhampered discretion of this Council.

"We do not of course propose to divest ourselves of our duty, as the body charged with the administration of this country, to give advice to this Council as to the manner in which it should proceed. We are ourselves convinced, after repeated and most careful discussion of the clause, that the case for a modified and reasonable increase in the wage has been made out. That conviction we shall be prepared fully to vindicate in the debate that will presently ensue: and for it the Government will, without exception, vote. Hon'ble Members will thus be in a position to hear both sides of the question. They will

be acquainted with the planters' views; and indeed the latter will bear me out in the statement that I have ensured to them the fullest possible opportunity for giving expression to their opinions by placing two seats upon this Council, and upon the Select Committee, at their disposal, exclusive of those Hon'ble Members who were known in advance to sympathise very strongly with their desires. On the other side will be heard the views of the Government and of the Chief Commissioner of the Province, though, as is known, he would wish to go a good deal further than the Government have been prepared to follow. It should not be difficult for any Hon'ble Members of this Council, who have not previously made up their minds, to decide upon the issue that will thus be placed before them.

"I will now pass to the second point. There is, I think a legitimate distinction between the acceptance of a proposal as justified in itself, and the insistence upon its enforcement at a particular time. For instance, a man may perfectly well hold that a case for the increase of the Act-coolie's wages in Assam has been made out, and he may resolve to vote for it. But he may also hold that, owing to the present condition of the industry, it would be inopportune, and might be harsh, to bring that increase into operation at the present moment, or for a fixed period of time. Now, I understand that the representatives of the tea-industry propose to ask this Council to reject *in toto* that clause of the Bill which provides for any increase in the wage. They are of course quite entitled to do so; and if they were to succeed, the Bill would not be lost, but that particular clause would disappear. If, however, this Council accepts the advice of Government and retains the clause, and if any Hon'ble Member were then to bring forward a further amendment to the effect that the operation of the wage clause of the Bill should, for special reasons, namely, the present condition of the industry, be postponed for two years, he will have my permission to do so, and, in the event of a good case being made out for such postponement, the Government will not stand in the way of its acceptance by this Council. They will even be prepared to vote for it themselves. We cannot divest ourselves of our responsibility to secure to the labourer that additional statutory protection to which we consider him to be entitled. But we have no desire to secure it at a time or in a manner that may be oppressive to a hard-hit industry, which, not less than the coolie, has a claim upon our dispassionate consideration.

"This then is the course which the Government propose to adopt. We shall ourselves support the compromise offered with our consent by the Hon'ble Sir Charles Rivaz in Select Committee—in the shape of a modified increase of wage in the second and third year: and we believe that the reasons which we shall adduce in favour of this course will be such as will commend themselves to a majority of this Council. Should our advice be accepted, Hon'ble Members will then be invited, after listening to the discussion, to vote upon the question of a two years' postponement of the operation of the clause—which in practice will mean that the enhancement will not commence to take effect until the close of the third year from now; since it is only in the second year of the coolie's service that it will begin to operate, while it will not become fully operative until the first batch of coolies to whom it applies have been for three years upon the plantations. I venture to entertain the hope that this course may vindicate the impartiality, without any abnegation of the responsibility, of Government, and may conduce to a harmonious solution of the disputed problem that lies before us."

The Hon'ble SIR CHARLES RIVAZ moved that the Report of the Select Committee on the Bill to consolidate and amend the law relating to Emigration to the labour-districts of Assam, and on the Bill to make better provision for the health, supervision and control of Emigrants proceeding to or from the labour-districts of Assam, be taken into consideration. He said:—"I explained, when introducing this Bill eighteen months ago, that its main object was to remedy the abuses and malpractices which have sprung up in connection with the system of assisted emigration to the labour-districts of Assam which is permitted by the present law as contained in Act I of 1882 and its amending

Act VII of 1893. These Acts, while providing in a minute and careful manner for the licensing of contractors and recruiters, for the recruited labourers being brought before a Registering-officer in the district of recruitment, for the execution of labour-contracts after such registration, and for the conveyance of the labourers thus put under contract under proper safeguards and official cognizance to Assam, allowed a system of so-called 'free emigration' to be carried on outside the elaborate provisions which I have just mentioned. The consequence was that a horde of unlicensed and uncontrolled labour-purveyors and recruiters sprang into existence who, under the guise of assisting 'free emigration,' made large illicit gains by inducing, under false pretences, ignorant men and women, chiefly from the most backward districts of Bengal and the Central Provinces, to allow themselves to be conveyed to Assam, and by practically selling these people to the planters for the purpose of being placed under labour-contracts in that province. These evils were forcibly exposed by a Commission which was appointed by the Lieutenant Governor of Bengal, Sir Charles Elliott, in 1895, to enquire into the whole labour-question. The Commission, on which the Indian Tea Association was represented by Mr. Gladstone and Mr. Begg, reported in 1896, after visiting the recruiting districts, that the cost of importing labour to Assam was steadily increasing owing to the abuses arising from the competition of unlicensed professional recruiters, and they made various recommendations for the adoption of measures to check such abuses which, after consulting the Local Governments and Administrations concerned, were generally accepted by the Government of India and embodied in the Bill now before the Council. Briefly, the Bill first provides for a system of recruiting by licensed contractors and recruiters and by certificated garden-sardars, subject to close supervision and control. All persons thus recruited will have to be brought before a Registering-officer in the district of recruitment, and after being registered and medically examined they will be placed under a labour-contract in the district of recruitment, or at all events at some other place within the same province as the Local Government may direct. They will then be conveyed under proper supervision to the estate in Assam where they have bound themselves to serve. The Bill further enables, on the one hand, the Local Government of a recruiting province to prohibit, with the sanction of the Government of India, all persons from recruiting, or engaging or assisting, any native of India to emigrate from any specified part of its territories to any labour-district or any specified portion of a labour-district otherwise than in accordance with the provisions of the Bill, and on the other hand enables the Local Government with similar sanction to allow, after such a prohibitory notification has issued, a system of assisted emigration by specially employed garden-sardars acting under permits granted by their employers, as described in Chapter V of the Bill. A means is thus provided of putting a complete stop to the present unlicensed and uncontrolled system of free recruiting, and of substituting for it a system of *bonâ fide* assisted emigration by garden-sardars who will be deputed by individual planters to bring up coolies from the recruiting districts to the planter's particular garden, and who will not be required to register their coolies or to place them under contract before taking them to Assam. Provision has been made for withdrawing at any time the concessions which are thus proposed for these specially employed garden-sardars if they are found to be abused.

"As regards the work of the Select Committee, the modifications which we have proposed after giving the Bill our most careful consideration are all aimed at the main object of keeping professional recruiters under strict control, and encouraging recruiting and assisted emigration by *bonâ fide* garden-sardars. These modifications are fully explained in the Committee's report, which has been in the hands of Hon'ble Members for the past fortnight, and I need not take up the time of the Council by repeating the explanations already given. It will be seen that, for the sake of simplicity and convenience, we have proposed the incorporation of the provisions of the Emigrants' Health Bill, which was introduced as a separate Bill, with those of the Assam Labour and Emigration Bill.

"So far I have referred only to the recruitment provisions of the Bill under our consideration. I explained, when introducing it, that it was not proposed

to make any alterations in the labour-system which was constituted by Acts I of 1882 and VII of 1893 except in the one matter of the minimum statutory wage. The minimum wage-rate fixed by Act I of 1882 for a completed daily task was five rupees a month in the case of a man and four rupees in the case of a woman for the first three years of a labour-contract, and six rupees in the case of a man and five in that of a woman for the fourth year. The Bill as introduced provided for six rupees a month in the case of a man and five in that of a woman as the minimum wage-rate throughout the whole period of contract. The Bill as now amended proposes to maintain the present wage-rate of five rupees for a man and four for a woman in the first year, to raise it by eight annas a month both for men and women in the second and third years, and to keep the present maximum rate of six and five rupees, respectively, for the fourth year. It is further proposed, as explained in the paragraph of the Committee's report which deals with clause 5 of the Bill, to afford special protection to the newly-joined labourer by entitling him to receive a full wage for the performance of a half task during the first six months of his contract unless the Inspector certifies that he is physically fit to perform a whole task. As this one clause of the amended Bill, clause 5, has not been accepted by all the members of the Select Committee, and as I see that my Hon'ble friend Mr. Buckingham intends to move an amendment regarding it, I will defer making any further remarks on the wage-question until I reply to my Hon'ble friend's motion."

The Hon'ble RAI BAHADUR P. ANANDA CHARLU said:—"Clause 9 is the outcome of the wholesome desire to respect marital rights. The practice of spiriting away (as it were) of a wife in defiance of the wishes of the husband is, as remarked by the Select Committee, a scandal, but it is a scandal which needs, in my view, to be qualified by a somewhat pungent epithet. I should, however, have been better satisfied if the original provision in the Bill were left alone, *i.e.*, if the consent of the husband was made a condition precedent rather than the absence of it a subsequent invalidating incident. It too often happens that the wife is, so to speak, smuggled away without the husband having the least scent of it. In such cases the husband, whose waking hours are mostly occupied in labouring for daily bread out of doors, comes to know of the exact cause of his wife's disappearance or of her whereabouts rather too late, *i.e.*, after the inducement to keep her from straying from the straight path has given way to the depressing sense of irreparable outrage perpetrated against him. This is as undesirable as demoralising. Nothing would be easier, if some little trouble were taken, than for the recruiter, or for the many officials through whose hands the recruit is made to pass, to get at the husband and obtain his consent at the outset and at first hand. Practical objections are stated to have necessitated the alteration of the clause from what it was at first. It seems to me that no amount of practical objections—be they real or exaggerated—ought to have weighed against the strictest recognition of the sensitiveness of man on this, the tenderest of his feelings—feelings which are no less keen in the labourer than in the well to-do. So strongly have I felt on this point that my first thought was to frame an amendment and urge it. But the words in clause 34, sub-clause (*3*)—the words which import that the Registering-officer should 'satisfy himself of the consent of the husband,'—might be extended to and made to embrace enquiry from the husband direct or from witnesses of a reliable kind, notwithstanding the fact that, whereas the words 'evidence' and 'witness' occur in sub-clause (*4*) as regards widows, &c., they are absent in sub-clause (*3*), as though they were deliberately omitted in order to make a distinction between the two classes of cases. I trust that the officers, who are charged with the duty, will be proof against plausible arguments based on allegations of such fancied distinction.

"On the provision in the next sub-clause (*4*) of clause 34, I feel some difficulty and doubt. It is possible elsewhere perhaps for widows or other species of women who are not wives to remain outside lawful guardianship; but wherever Hindu law applies, either expressly in terms or by adoption as a body of binding usage as is widely done, a woman without a lawful guardian, for civil purposes, is an unmeaning expression. I am not aware that the buck

of the classes from among whom the emigrant labourers are drawn are clean outside such limits. *If they are not*, then the fact must be realised that the provision in question, so far as it applies to widows and other women who are not wives, runs counter to established laws and valid usage among the people of this country. As yet, the spectacle is rare of women, floating, as so many drifts, on the stream of Hindu society in ordinary times: and the evil would only be precipitated if facilities were offered for social moorings to snap asunder, so as to permit of lapses to multiply and, by slow degrees, undermine the inter-dependent household, held together by long traditional sentiments in the main.

"Another aspect of the conjugal relationship is apparently unnoticed or unconsidered. It is not unoften that a husband skedaddles, if I may use an expressive colloquial word, under a sudden impulse of glowing, migratory ambition, leaving, in the lurch, wife and children—not to speak of aged parents—to shift for themselves as best they might. Such instances occurred in connection with emigration to Mauritius within my knowledge, and the wife only woke up to the dreary reality months after the scamp of the husband gave her leg bail. One result of it shall remain nameless. It appears to me that, for every one labourer who might thus be gained for a planting employer, society, and eventually the State, would have, thrown upon its hands, not a few she-waifs as well as orphans for no fault of theirs. It may be a question, worthy of more than a passing thought, whether the scrutinising, intermediate officers between the initial recruiter or garden-sardar on the one hand and the ultimate employer on the other hand should not be authorised to institute an enquiry in this regard and to see to the forsaken family being either, if fit, enrolled as well among the recruits or to arrangements being made to allot to the members of the family, so left behind, a definite part of the earnings of the runaway bread-winner, such as he is. Cases such as this are only the converse of the cases for which provision is made under clause 50, whereby the labourer is entitled to secure the manumission of his wife, daughter or mother, when he himself has obtained his own repatriation. I believe that it will serve a useful purpose, if also a humane and economical purpose, if express directions should be issued to watch and note cases of this kind, in view to an amendment of the Act, if such cases grew appreciably numerous enough. Attention to matters of this description will be found, in the long run, to facilitate rather than retard the cause of emigration. Public policy requires it."

The Hon'ble SIR CHARLES RIVAZ said:—"The question raised by my Hon'ble friend was very carefully considered by the Select Committee, and we intentionally made a distinction between the case of women who are recruited by the professional recruiter and women who are recruited by the garden-sardar. As I have said before, the whole object of our Bill is to encourage recruiting by garden-sardars and to place material restrictions on recruiting by professional recruiters. Therefore, in the case of recruiting by garden-sardars, we thought it sufficient to provide that a woman may be recruited, unless her husband or guardian comes forward and objects, whereas in the case of the professional recruiter we have placed a definite obligation on the Registering-officer who is required by sub-clauses (*3*) and (*4*) of clause 34 of the Bill to satisfy himself that the husband or lawful guardian, where there is one, actually consents to the woman being recruited."

The motion was put and agreed to.

The Hon'ble MR. BUCKINGHAM moved that for the first portion of sub-clause (*4*) of clause 5 of the Bill, as amended, from the beginning down to but excluding the provisos, the following shall be substituted, namely:—

> "(*4*) No labour-contract shall stipulate for a less rate of monthly wages than five rupees in the case of a man and four rupees in the case of a woman for the first three years of the term of the contract, and six rupees in the case of a man and five rupees in the case of a woman for the fourth year of such term."

He said:—"My Lord, the amendment standing in my name is, that in clause 5 (4) of the amended Bill the wages of coolies should not be increased for the second and third years but should remain as at present, *viz.*, Rs. 5 for a man and Rs. 4 for a woman.

"With Your Excellency's permission I will now state my reasons for moving this amendment.

"I stated in my note of dissent that 'wages in Assam are generally higher than in the tea-districts of Bengal, where coolies emigrate under a free system for a similar description of labour.'

By the last Assam Immigration Report (for 1899) the number of Act coolies is given as	131,958
Number of non-Act	267,985
TOTAL	399,943
Non-Act children	240,639

"Average monthly pay given in Immigration Report earned by Act coolies during 1899 was—

	R a. p.
Men	4 12 0
Women	3 11 3
Ditto non-Act—	
Men	5 4 4
Women	3 12 0
Children	2 4 10

"Taking the proportion of 1¼ children per man and woman, we have an average of Rs. 2-4-10 to be added to the family earnings, making the earnings per family of Act coolies to be Rs. 11-4-3 and non-Act Rs. 11-13-4. As, however, some gardens do not enter all the ticca earnings, the returns are not of much value in ascertaining actual wages.

"It should be noted that although I have taken the total number of Act and non-Act coolies in the Province, representing 757 gardens, 11 gardens were not inspected and therefore not included in the wage-statement in the Immigration Report. On this account, therefore, the wage would be somewhat higher than that given. To the above should be added various perquisites the coolie receives, such as medical comforts, sick allowances, diet to sick coolies given free, loss on rice sold to coolies, land given free of rent, free housing and firewood, amounting in all to an equivalent of about Re. 1 per mensem per adult and 8 annas per child. In 1893 Sir William Ward alluded to the collateral means of livelihood of the coolie in the following terms:—'The fact is,' he said, 'that the statement of wages when reduced to a tabular form is not of much value in enabling an idea to be formed as to the actual condition of the labourer,' and in the Special Report of 1890 it was pointed out that many of the circumstances which led to low average pay are such as tend to make a garden popular with coolies, some coolies working only a few days in the month, their pay being included in the average.

"I may here mention that in the Indian Association's letter to the Government of India it is said that in the Assam Administration Report for 1894-95 the Chief Commissioner desired that the returns of wages should be accompanied by an account of the extent to which collateral means of livelihood other than garden-work were available to coolies. It is said that subsequent reports contain no reference to the subject, and hence it is inferred that no such means of livelihood exist. The order referred to was given by Sir Charles Lyall in paragraph 33 of the Annual Labour Immigration Report for 1893. The remarks of District-officers on the subject are quoted or summarised just after the wages statements in the reports for 1894 and 1895, and the subject is briefly referred to in the same place in the report for 1896. The last enquiry on the subject was made in 1889, and is described in paragraph 150 of the Special Report of 1890.

"It is a significant fact that since 1891 the yearly reports have not given a statement showing the highest wages earned by Act and non-Act coolies.

"In the Immigration Report for 1890 the following figures were given for the Assam Valley :—

	R	a.	p.	
Non-Act men drew wages up to	18	0	0	per mensem
Non-Act women	14	8	6	
Act men	15	4	0	
Act women	14	0	0	
and children as much as	8	12	0	
In 1891 Act men drew as much as	15	4	5	
Women	17	2	8	
In 1891 non-Act men	21	0	0	
In 1891 non-Act women	20	13	0	

This statement, I think, disproves the Hon'ble the Chief Commissioner's remarks in his note on the Bill when he says the great mass of labourers get little or nothing from overtime work.

"Mr. Cotton gives a range of wages in Bengal from Rs. 4-8 to Rs. 9 and Rs. 6 8 to Rs. 9. Regarding Duars labour, we find in a letter from the Secretary to the Government of Bengal to the Government of India that the mean earnings, including extras, from twelve typical gardens amounted to the following :—

	R	a.	p.	
Men	4	14	0	per mensem.
Women	3	2	7	" "
Children	1	6	0	" "

"Mr. Cotton's statement that Duars labour is better paid than Assam does not therefore appear to be correct.

"These coolies are brought to the Duars gardens by contractors, who receive advances, such advances being all charged against the coolie, and cut monthly from his pay amounting in many cases to Re. 1 per mensem. His Honour the Lieutenant-Governor alludes to these stoppages in the fourth paragraph of his letter to the Government of India, dated the 15th September, 1900.

"Again, is it fair to compare temporary emigration to coal-mines, and factories, near the coolies' own homes, with emigration to Assam? In the former case they go with the intention of making money, and returning as soon as possible to spend it elsewhere. In the latter, they live the true type of an emigrant, finding a home for life.

"I most emphatically deny that the coolie in the Duars gets practically all the advantages of the Assam coolie which Mr. Cotton asserts he does. In addition to the above-mentioned stoppages, the Duars coolie gets no pay for Sunday, no pay for extra or sick leave and no pay for incompleted tasks.

"The expenditure on hospital and housing accommodation is a mere cypher compared with what it is in Assam, and I am informed, that dieting sick coolies at the factory expense is unheard of, and what perhaps is the heaviest tax we have in Assam, *viz.*, to provide rice at Rs. 3 per maund, the Duars planter is exempt from, his coolies having to provide themselves with rice at market-rates. The fact is, there is no occasion for these extras; the coolie is well off without them. At one garden in Assam, where the yearly pay-bill amounted to Rs. 32,530-14, I found Rs. 5,868-6-6 were expended on coolies' Sunday and other leave, showing that they actually get 20 per cent. of their pay for no work at all. As to the loss on rice, one of the largest companies in Assam lost in one year £5,340 sterling in rice, equivalent to 2½ per cent. on its capital. Others lost in the same proportion. Mr. Cotton, in his letter to the Government of India, says, 'the rate of wages current in Bengal may also be taken as a guide in determining what minimum rates should be specified in penal contracts in Assam.' He then goes on to quote the wages of able-bodied agricultural labourers in Bengal from Mr. O'Conor's *Prices and Wages in India* from 1873 to 1897. These wages are quite useless for comparison with coolie wages, for they are all compiled on the assumption that the coolie works every day in the month, and not on what he *actually* earns, as Assam coolies' wages are calculated. Mr. O'Conor, in his evidence before the Currency Commission in London in 1899, questions the often-stated assertion that the wage of unskilled agricultural labour *has* increased

during the last twenty years, and he tells me he still adheres to this opinion; and yet Mr. Cotton suggests that the coolie should share in the general rise in wages.

"Another reason given by Mr. Cotton for the raising of wages is that the price of nearly all food commodities have increased, and in paragraph 19 of his letter to the Government of India he says: 'Statistics of the price-current are not available, but it will suffice to say that the other articles besides rice are all ordinarily imported from Bengal.' This is hardly correct, for the ordinary bazar of the coolies, with the exception of clothes (and these are one-third of the price they were thirty years ago), is procured in the local markets; for example, oil, ghee, dal, sugar, fowls and ducks, fish, vegetables, etc. I laid before the Select Committee a statement showing the present cost of food-commodities in Assam and in the Duars, comparing them with the prices paid twenty years ago in Assam, and they show in nearly all cases a decrease. I presume it cannot be disputed that the price of liquor has fallen; if it has, my Lord, I may mention that one witness—*vide* '*Collection of Government Papers relating to Excise*,' deposed that, whereas some years ago it would have cost him four annas to get drunk, he could now get dead drunk for one anna.

"The Chief Commissioner himself states in his letter to the Government of India that 'there is no higher authority on the subject of labour-immigration into Assam than Lieutenant-Colonel Campbell, the Civil Surgeon of Shillong.' On this account, therefore, I think I am fully justified in quoting his letter to the Chief Commissioner on the increase of wages and status of the coolies.—

'No. 439, dated Shillong, the 9th November, 1899.

'From—Lieutenant-Colonel R. N. CAMPBELL, M.B., I.M.S., Civil Surgeon, Shillong,

'To—The Secretary to the Chief Commissioner of Assam.

No. 186 L. & L.—4528J., dated Shillong, the 1st November, 1899, from the Secretary to the Chief Commissioner of Assam, to Lieutenant-Colonel R. N. Campbell, I.M.S

'WITH reference to the communication as per margin, I have the honour to forward my opinion on certain of the provisions of the Bills.

'*1.—Assam Labour and Emigration Act, 1900.*—The two important points in which this Act differs from Act I of 1882 are—(1) the proposal to raise the monthly minimum wage from Rs. 5 to Rs. 6 in the case of a man, and from Rs. 4 to Rs. 5 in the case of a woman; and (2) initial registration and execution of labour-contract in the district in which the labourer is recruited. I will consider these in detail.

'(1) *Minimum monthly wage.*—The arguments in favour of the proposal to raise the monthly wage are: (*a*) the present rate is too low, regard being had to the rise in prices; (*b*) the higher rates which labour commands outside Assam. In my opinion, this change is not only unnecessary and uncalled for, but inadvisable as being a decided hardship and tax on the tea-industry.

'The only grounds on which this proposal might have been supported are: (*a*) that the pay of the labourer is such that he cannot live on it in comfort owing to the rise in prices, or (*b*) that by raising the wages a better class of labourer may be attracted. Regarding the former, *i.e.*, the question of the labourer being unable to exist in comfort on his present pay, it is a well-known fact that a labourer and, more especially a family man, after a few years in Assam, is really well off and wants for nothing as far as his desires can go.

'Let us now enquire how far the rise in prices has affected the labourer. His house costs him nothing more to build, in fact, it never has cost him anything, though it costs the employer more, as he has to build better houses than were supplied twenty years or more ago. His food, the chief staple of which is rice, costs him no more, though it may cost the employer considerably more, as he must supply it at the same price as twenty years ago, *i.e.*, Rs. 3 per maund. No. instead of his food costing more, it is probably cheaper and certainly more varied and more easily procurable than twenty or thirty years ago, because communications are much better, and there are more *hâts*, and they are nearer at hand, at which the labourer can procure vegetables, fish, etc.

'His firewood costs him no more and his clothing is not more expensive.

'I think the labourer is as well off, nay, better, than twenty or thirty years ago, though his minimum monthly wage has remained the same. He is better housed, all his sanitary arrangements, as the water-supply, etc., are much improved, and there is a marked difference in the arrangements made for his medical care and treatment. His expenses have not increased as I have shown above, and he can really make more on most gardens, as gardens are better supplied with labour than in the old days, and so kept in better order, and the tasks necessarily lighter, and at certain seasons of the year a much larger wage can be made than the minimum one. On the other hand, the employer or importer of labour has to pay much more than twenty or thirty years ago. It is he that has to pay for the rise in prices. The initial cost of the labourer is much greater. The labourer has to be clothed,

fed and generally cared for from the date he leaves his home till he arrives on the garden, and everything costs more than it did quarter of a century ago outside Assam.

'After reaching the garden, the labourer is better cared for, better housed, has a better water-supply, better medical arrangements, and is fed and nurtured if unable for full task work. This feeding may have to go on for some time till the labourer is accustomed somewhat to the life and surroundings and fitted for ordinary task work. The medical arrangements are infinitely better and far more expensive, as in most gardens there is now general European supervision, and, in all of any size, good native doctors are resident. It seems to me, therefore, that the rise in prices, not to say the cost of improvements in housing the healthy and treating the sick, affects only the employer of labour and not the labourer, and that this argument in favour of raising the minimum monthly wage is worthless.

'The labourer is, as a rule, contented and well-to-do, many of them possessing poultry, pigs, cattle, and even rice-fields to cultivate where such are close to the garden.

'It is possible that, if the minimum wage is raised, some of the employers may raise the tasks and diminish the rate paid for *ticca* so as to equalise matters, and that the labourer may, on the whole, have harder work and get no more pay than he at present receives.

'2. The higher rates which labour commands outside Assam is the second argument in favour of raising the minimum wage. By raising the wage, will the class of labourer be improved? I think not. The same class would still emigrate even if the minimum wage was increased 50 per cent. Will labourers emigrate in greater numbers if the minimum wage is raised? I think not Of course, if the rates in places outside Assam attracted labour so that it was difficult to procure labour or the proper class of labour for Assam, without raising the minimum wage, this would necessitate the change; but no such state at present exists, and, as long as a sufficient supply of suitable labour can be procured at the present rates, why should the present rates be changed when, as has been shown above, the labourer not only is paid sufficient for all his wants, but is really well off?

'Many tea-concerns could not stand the extra charge of 20 per cent. in the case of the man's wage and 25 per cent. in the case of the woman's, for many can only just pay their way, and some cannot do that, with the present rates.'

"It is worthy of notice also that only three or four of the officers in the Assam Commission agreed with the Chief Commissioner's proposal to raise wages. Again, in answer to Mr. Cotton's assertion that the price of food-stuff has risen, I read to the Select Committee extracts from the Report of the Commission sent up in 1867 from Bengal to report on tea and the condition of coolie-labour. The Commission (composed of Messrs. W. Ainslie, H. Steward Reid and J. M. Cunningham) said, coolies were actually unable to procure dal, oil, ghee, salt, fish, and they generally were without them because there was no market near (paragraph 132). Then again in 1873 Mr. Edgar in his report, page 15, said, 'Surplus food in tea-districts is very little, and food for imported labour had to be imported; there was no machinery for the distribution of food, and thousands died through mere want.' Also at page 17 he said, 'Food scarce and dear'; and at page 20, 'the number of imported labourers far exceeded the supply of food available.' Very gradually communication improved, food became cheaper, coolies took to cultivating, supplying to a great extent their own requirements, and the conditions of their life became thoroughly satisfactory. The chapters on wages and food in the Special Report of 1890 on the working of the Act fully bears me out in this statement. Mr. H. W. Stevens at page 15 in the *Collection of Papers relating to the Excise Administration 1890*, stated in his evidence before the Commission that he considered the price of food during the last twenty years had not increased, *i.e.*, in normal years.

"A convincing proof also, I think, that food-commodities have not increased in price, is that in 1871 the yearly cost of feeding prisoners in the jails of Assam was Rs. 34-9 against Rs. 33-10-9 in 1899, and I believe about the year 1884 their diet was raised.

"Such evidence as I have given above appears to me to entirely refute Mr. Cotton's statement as to the increase in the price of the necessaries of life to coolies

"It will naturally be asked, what does it cost a coolie to live in Assam, and does he simply get a mere living wage? In the Special Report of 1890, page 232, it will be seen that one coolie with his wife and two children gave their monthly cost of living at Rs. 7-11-3 when their combined earnings amounted to Rs. 11. The man said he had bought a Kabuli blanket for Rs. 6, also a silk cloth

for Rs. 8; he had given his wife Rs. 8 worth of jewellery; he also possessed a cow; he had worked on for four years on the garden; coolies, therefore, living together in a family can maintain themselves in comfort at a cost of from Rs. 2-8 to Rs. 3 per head per mensem, and, as a further proof of this, I may mention that one coolie usually charges another for keep Rs. 3 a month, and this he would not do unless he made something over the transaction. Even Mr. Cotton said in the Emigration Report for 1897, paragraph 45, 'With the high prices at present prevailing, Rs. 3 a month is probably the smallest amount on which a coolie *can live and keep in good health*, and it is the duty of inspecting officers to enquire carefully into each case in which this maximum in not attained, and in the absence of special reasons to the contrary to direct that the person concerned be fed in the general mess till such time as he or she is able to earn Rs. 3 per mensem at least.'

"After giving such instructions to his officers it does appear extraordinary that he should have written the following to the Government of India on the 25th December, 1899. Alluding to our resolution at the Tezpore Conference, *viz.*, to give men Rs. 3-8 a month and women Rs. 3 for the first two years of their indenture, irrespective of the work they do, Mr. Cotton said that—

'such a proposal should have been brought forward is an illustration of the unsatisfactory footing on which the recruitment of labour for the tea-gardens of Assam now rests. It is contemplated apparently that the labourers when they first arrive in Assam will be so weak and sickly that for two years they will be unable to perform the tasks required to earn the satisfactory minimum wage, which is in most cases much less than a full day's work. During that time it is proposed they should be given *a miserable pittance* not *sufficient to keep body and soul together* or merely fed and clothed at the expense of the employer without receiving any wages'!!

"As to cost of living I also notice in the Immigration Report for 1899 that the average cost of diet per diem in the Government dispensary shelter at Sylhet was 1 anna and 1 pie per head or Rs. 2-1 per mensem.

"The Hon'ble Mr. Cotton also quotes from *Prices and Wages in India* that the average monthly wages of an able-bodied agricultural labourer in Assam in 1897 rose to Rs. 8·27; in 1892 it was Rs. 8·4. These of course are originally his own figures. All these, however, are on the assumption that the labourer works every day in the month. Fifteen to twenty days a month is the outside the independent labourer works; therefore his average pay, according to Mr. Cotton's figures, would be reduced to nearer Rs. 4 than Rs. 8. Gardens in many places are able to secure village-labour at 3 annas per diem or at the rate of Rs. 5 per mensem, no pay being given for Sunday.

"It is true that the average rate of pay for the Assam constable, the process-server or chaprasi varies from Rs. 6 to Rs. 8 a month, but their wives and children earn nothing; so how can this be compared with tea-garden earnings, where the women and children are bread-earners and can easily contribute between them Rs. 12 or Rs. 15 per mensem? Municipalities in Assam offer as much as Rs. 11 a month, and are unable to get sufficient voluntary labour, and this very circumstance is produced as a proof that wages have risen and that we do not pay our coolies sufficient. In my opinion it proves the reverse; the coolies prefer the tea-garden system and its family earnings and the general advantages a tea-garden gives. If it did *not* prove what I say, why do not time-expired coolies (of whom there are thousands) flock to the municipalities for Rs. 8 or Rs. 10 a month? And now let us see what pay the Assam Administration gives to witnesses attending the Criminal Courts. I will quote their rules—

'(*a*) for the ordinary labouring class of native two annas per diem,

'(*b*) for natives of higher rank in life four annas per diem.'

And this is all they get if they have to perform a journey of 100 miles. Surely we may call this 'a miserable pittance.'

"The average prosperity of the people of India cannot, therefore, be identified by the wage-test. To guage the value of the daily wage-quotation, it will have to be shown that daily employment is obtainable. The experience of owners of industrial factories is, that the free labourer earning a daily wage on piece-work does not work continuously throughout the year, that he takes holidays frequently, and absents himself for long periods to suit his inclination.

"His Honour the Lieutenant-Governor says—

'The figures given by the Chief Commissioner in paragraph 14 of his letter are surprising; it appears that for three years, 1873-75, the wages of free agricultural labour, *i.e.*, of coolies entertained otherwise than under the contract-system of the Emigration Act, ranged from Rs. 6·53 to Rs. 6·94. After fluctuations, which show that the returns may be relied on, as faithfully following the actual changes of the market, wages settled down for five years, ending in 1889, between Rs 6 and Rs. 7. Since 1889 they have been far below Rs. 7, but apparently they have not been much above it. In 1897, the famine year, and its successor they rose to Rs. 6-4. It thus appears that till the very exceptional period of the great famine, there has been no material rise in the wages of free labour in the open market. It cannot be denied that these unexpected figures give considerable support to the argument that an enhancement of the minimum wage of the contract coolie is *not required* on the ground of absolute justice to him.'

"Mr. Cotton, in commenting on our resolution at the Tezpur Conference to give coolies Rs. 3-8 and Rs. 3 a month irrespective of work done (letter dated 25th December, 1899, to the Government of India), says he 'does not consider the law should encourage by *any form of recognition* the practice of importing coolies so debilitated as to be incapable of doing a day's work;' and yet in his note on the Bill he states he is thankful the Committee have been pleased to accept a reduction of tasks for newly arrived coolies. I would ask, my Lord, if this is not a recognition on the part of the law that coolies are unable at first to do a day's work? His Honour the Lieutenant-Governor considered that Inspectors should utilize more freely the powers under section 117, *viz.*, that of reducing tasks. Mr. Cotton's answer to this was that his executive is not powerful enough; but in paragraph 23 of the letter above quoted he says that as regards house-accommodation, medical assistance and water-supply the law affords ample power to Inspectors 'for insisting on adequate provision being made;' why not as regards tasks it is difficult to understand. I cannot follow the Chief Commissioner when he says:—

'It is not correct to say, as was said at the Tezpore Conference, that coolies under contract are not affected by fluctuations in the price of rice.'

"We maintained that the coolie did nor suffer when market-price of rice was over Rs. 3 per maund, but that it was an equivalent of extra pay to him. From the year 1866 to 1890 the coolie was beneficially affected to the extent of over Re. 1 per mensem in his pay if he cared to take rice regularly at Rs. 3. In the famine year 1896-97 he was beneficially affected to the extent of Rs. 2-8 per mensem, taking the consumption at 30 seers per mensem per man. Coolies, therefore, do receive an equivalent of a rise in pay. Wages rise with the cost of living, and generally move upwards more slowly than the price of food. If the value of rice expresses a rise that has taken place in the cost of living in Assam, then residents, who under statutory enactments, or from privilege, are protected from an increase in the cost of the staple food, must be no worse off than they would have been in previous years, and in some respects may be better off. They must be better off than the indigenous labourer and compared with those who receive a wage in other employment. This was verified by the Hon'ble the Chief Commissioner of Assam on the 29th April, 1897, when he said at the meeting held at the Bengal Chamber of Commerce that 'immigrants are well off, and they benefit the Province from every point of view.'

"Mr. Cotton says in his letter to the Government of India that during the ten years 1865 to 1874 the average retail price of common rice throughout the Province of Assam was about Rs. 2-3-5 per maund. *Now the inference from this* would be that, having to sell rice to coolies at Rs. 3 per maund, we must have made a profit during those ten years. In paragraph 29 of the Commission's Report they say that in 1867 for many months rice cost Rs. 5, Rs. 6 and even Rs. 10 a maund; the above statement, therefore, of the Chief Commissioner is most misleading; the average price is no criterion whatever, for when rice is high we lose an enormous amount in selling it at Rs. 3. We also have to keep a large stock in store, and this, when prices fall, has to be sold to coolies at current rates. I may mention that, in 1896-1897, 1½ million maunds of rice were imported into Assam.

"Among other collateral means of livelihood I may mention one garden where 307 acres of paddy are cultivated by coolies, producing approximately 4,605

maunds, valued at Rs. 8,058. The Government rent on this land would have been Rs. 3 per acre; coolies are charged 7 annas 6 pies. The gain, therefore, to coolies by thus cultivating would be Rs. 8,835-16, which sum is as good as extra pay, but this sum actually goes against the planter in his wage-return, for coolies get leave to cultivate this land and the average wage shown in Government returns is thereby stultified. A census of cattle taken a short time ago by order of the Chief Commissioner showed there were 947 cows and buffaloes on this garden, 513 young stock, 41 sheep, 390 goats, 15 ponies, 164 ploughs and 102 carts. Are all these statistics pigeon-holed in Shillong? They appear to be.

" Mr. Quinton said in his Special Report:

'The coolies with other means of livelihood in addition to garden-work are undoubtedly better off than they would be in their own country; *but excluding these*, and taking into consideration only such coolies as are entirely dependent upon the garden for their living, the tasks required and the wages earned are such that every coolie in ordinary health or of ordinarily industrious habits can get a sufficiency of food and yet be able to save.'

" In the statement I placed before the Select Committee of coolies' earnings there was one company employing 14,412 coolies (men 6,311, women 6,210, children 1,891): men earned for the year an average per mensem of Rs. 6-3-5, women Rs. 4-14-8, and children Rs. 2-8-6, or an average of Rs. 12-1-0 per family in hard cash. With perquisites the average per family was Rs. 12-15-3. At another garden employing 6,557 coolies, the average per family was Rs. 11-11-8; at another 3,301 coolies=1,413 families earning Rs. 13-0-10 per family. In fact, the average pay for 51,322 coolies per family was just Rs. 11-8. I find that new coolies' pay averaged even higher than old coolies' in many cases, and in this I am supported by a statement shown in the Special Report on Act I, paragraph 146, before alluded to, where Act I women earned on an average more than non-Act women. The average pay of non-Act men was slightly in excess of Act men.

" In advocating an increase in wages, the Chief Commissioner seems to try and smoothen matters by stating in his letter of the 25th December, 1899, paragraph 23, that employers will be justified in raising the task-rates, and insisting on the performance *of a full day's work* for a fair wage. We next find the Chief Commissioner slightly moderating this statement, by saying we are entitled to a *fair day's labour* for the legal wage; then again in his letter to the Government of India, dated 10th September, he says, this increase will immensely benefit the great mass of labourers, who will get through a *slightly augmented task*. These statements are so conflicting, that I am afraid the amendment made, that coolies for the first six months should have full pay for half tasks, would, according to Mr. Cotton's theory, be no amendment at all; for a full day's work of nine hours certainly represents just double what is expected out of the coolie at present. Mr. Cotton says that the 'mere fact of tasks being light, and that overtime payments are allowed, afford a strong consideration in favour of raising wages.' It is plain, therefore, that he advocates the abolition of work of an optional character, so dear to the coolie, and so universal throughout the whole of India. Is Mr. Cotton ignorant of the fact that the coolie is master of the situation, and that the present system of labour has grown up for generations? Ought not legislation, therefore, to aim at the regulation of methods which the immigrants have themselves adopted, rather than to attempt to force the current of emigration back into channels of its own creation?

" Such changes in pay and in tasks may easily be taken by coolies as an indication that the Government distrusts employers. I know such is not the case, but this may and probably will be the view taken by coolies, and such an impression is not likely to promote the good relations between employers and labourers.

" An increased rate of payment leads to a lesser task instead of an augmented task, the coolies taking out the balance, so to speak, in the only form of luxury which appeals to an Asiatic, *viz.*, the luxury of sitting still and doing nothing; for instance, at one of the collieries in the Asansol District, where labour is scarce, the outturn was very small and they did exactly as Mr. Cotton would have done; they raised the rate per ton of coal cut, hoping thereby to stimulate

the coolie to increased exertion; what happened? The outturn diminished. The fact was, the coolies were thoroughly satisfied with their previous income, and on a higher rate they merely worked a fewer number of hours. A similar result must follow if wages are increased in Assam. At page 17 of the Report of the Labour Enquiry Commission it is stated that coolies will not do more work than they are obliged to do, and are only anxious to earn enough to live on, and when they have collected enough for a few days eating, they take themselves off—they live only for the day.

"We hear everywhere of wages being reduced instead of increased: take for instance what Mr. Muir said on the 3rd December last at a meeting of the Duars Tea Association. He said—

'When considering the proposal of reducing pay, under the existing system, the labourers really worked about three or four days a week, and lower wages would necessitate their working six days with a corresponding benefit to the garden; it was proposed and carried that wages should be reduced one rupee in case of men and eight annas for women.'

"Compare this with Mr. Cotton's proposal that wages should be increased and tasks augmented. In practice we should find that less work would be done, and we should have to import more labour. In Coorg, on the 24th April last, the reduction of wages was considered. The institution of overtime work, His Honour the Lieutenant-Governor of Bengal describes,—

'as one not infrequently adopted in English industries and is indeed an excellent and proper system for industries where the employment is monotonous or where from the shortness of the labour-supply the most has to be made of a limited number of labourers. It is universal in the tea-gardens of the Bengal Duars.....It is difficult to avoid the uneasy feeling that we must be on wrong lines when we remedy the evils on a minority of badly managed gardens by upsetting the system of the good ones, which are the majority, or force the good gardens to depart from a system which experience elsewhere as well as in Assam shows to be essentially the best.'

"The system the Hon'ble the Chief Commissioner wants to upset is described by himself as the payment of a minimum wage for a light nominal task supplemented by a liberal overtime wage for overtime work. I need hardly say that such a proposition will meet the greatest opposition among coolies themselves; and even Mr. Cotton acknowledges in his letter to the Government of India, dated the 25th December, 1899,—

'that some inconvenience will no doubt be caused by a general alteration of task-rates, but there is no reason to suppose it will be serious. It must be remembered that every industry is subject to occasional disturbance from fluctuation in the rate of wages, and it cannot be expected that the tea-industry will entirely escape such inconvenience.'

"Such direct interference with the liberty of employer and employé, my Lord, is unwarrantable, and, I may say, unheard of. Mr. Cotton argues that the coolie's ignorance and helplessness entitles him to protection in pay as well as in other directions. Can it possibly be proved that there is general ignorance or helplessness?

"Only last year the Hon'ble Mr. Cotton in his letter to the Government of India stated that the *great mass of coolies comprising more than half of the total number imported under the Act who are recruited by contractors* know nothing about Assam.

"In the Immigration Report for 1899 the following figures are given:—

In	1896	18,870	contractors' coolies	only out of a total of	61,308 adults imported.
„	1897	18,127	„	„ out of	66,328 adults imported.
„	1898	10,559	„	„	35,516 „
„	1898	11,065	„	„	25,872 „

"Surely the total number of coolies imported should be taken and not those only under the Act.

"Out of the 4,000 to 5,000 sardars annually sent down, coolies cannot be so

ignorant of the circumstances of Assam as the Chief Commissioner makes them out to be. Even ten years ago Mr. Quinton said :—

'In the latter (alluding to the new recruiting grounds), coolies may be ignorant of the conditions of life on a tea-garden and liable to be imposed upon; but in the former (old recruiting grounds), with a constant flow of emigrants between Assam and the recruiting districts, anything like misrepresentation on a large scale, except solitary cases seems impossible.'

"I notice in the resolution on Inland Emigration, Bengal, that, in 1899 67 per cent., and in 1898, 70 per cent, of the registered coolies were collected by garden-sardars, many of them from outside Bengal.

"As the Hon'ble Mr. Cotton in his note on the Bill alludes to the death-rate of coolies, I am glad to have this opportunity of correcting an erroneous idea that certainly seems to be in the minds of some regarding this subject.

"An officer of the highest standing in the Assam Commission, in his letter to the Secretary of the Chief Commissioner of Assam, dated 21st December, 1899, says :—

'The average death-rate during the last ten years of Act-labourers has been 53·6 per mille.' He continues, 'Comment is superfluous. That amongst an adult population of over one lakh all in the *prime of life* there should be, year in and year out, a constant death-rate of 53·6 per mille indicates something radically wrong. The fact is certain and cannot be explained away.....The coolie (during the term of his contract) remains and dies at a rate which, if it occurred among the prisoners in our jails for a series of years together, would infallibly draw forth the most scathing comment of Government.'

"Now, in the first place, Mr. Cotton tells us that all the beggars in the bazar, men and women of bad health, or idle, and of dissolute habits, who have failed to make a living in their native districts, are swept together and sent up to the gardens of Assam, where for a year or two at least they will not do a full day's work and swell the returns of sickness and mortality.

"The Deputy Commissioner of Sibsagar in report for 1894 wrote :—

'I do not think it can fail to strike any one who looks at a number of batches of newly arrived coolies that most of them are not average specimens of the labouring classes of India, but people of inferior physique and constitution, who, having failed to make a living in their own country, emigrate to Assam as a last resource.'

"Can coolies, I ask, such as these, and those who are weak and emaciated by famine, fail to swell the returns of sickness and mortality ?

"The Hon'ble Mr. Cotton himself owns to this fact, and yet an officer in the Assam Administration *says it cannot be explained away*. Again, can the prime of life be applied to such people ? I maintain that at forty years of age the native of India is long passed his prime of life. I should be inclined to call them old, and for the sake of full rates being paid many a coolie over forty is smuggled in.

"The exultations of the Assam Administration over a slightly reduced mortality in their jails for 1898 must have been sadly marred by the result of 1899, when the Director General remarked that 'in face of these figures congratulations were at least premature.' The figures of mortality alluded to by the Director General for the last four quinquennial periods in Assam jails were 45, 48,55 and 51 per mille.

"The average death-rate for the last ten years *among all classes of the coolie population is 35·8 per mille*. In 1899 the death-rate was 27·5 per mille, being considerably less than among the general population. I certainly should not have alluded to this excessive mortality in jails unless comparison with tea-gardens had been drawn.

"In paragraph 58, Provincial Report for 1900, Sir Dennis Fitzpatrick remarked that—

'the climate of Assam under the most favourable sanitary arrangements is fatal to new arrivals. We must,' he said, 'make up our minds to accept the above as one of the drawbacks to emigration ; but only people who are unwilling or unable to view the position as a whole, and who ignore the fact that the bulk of those who emigrate to Assam would have far more evils to face in their own homes than this additional risk to die, would contend that there is any reason for stopping or discouraging emigration.'

"It has frequently been asserted that the penal system of the Act is responsible for not only low wages but also for the high rate of mortality among Act-coolies. This is not the case. Take, for instance, Assam and the Surma Valley. The average pay earned per family by Act-coolies in Assam for 1896 was Rs. 11-11-1, against Rs. 10-4-4 in the Surma Valley, or Rs. 1-6-8 in favour of Assam, and for non-Act coolies per family in Assam Rs. 12-9-6 against Rs. 10 14-10 in the Surma Valley, or Rs. 1-10-2 in favour of Assam; and yet Assam with more than 90,000 Act coolies in excess of the Surma Valley showed a mortality of only 37·6 per mille against 34·3 per mille in the Surma Valley, showing plainly that the wage-question need hardly be considered The Chief Commissioner's attention was directed three years ago by the Government of India (see Report on Labour Emigration, 1897) to the fact that a number of sick and destitute coolies had been noticed in the Tippera District of Bengal travelling on foot from the direction of Assam. The tea-planting community were saddled by the Government of India with the responsibility attached to these coolies; and the Chief Commissioner, appealing to our feelings, impressed upon employers of labour the responsibilities which rested upon them of co-operation with Government officers in grappling with the difficulty. Mr. Cotton said he had observed for himself the consideration and humanity displayed by the great majority of employers towards coolies who had worn themselves out in the service of their garden, and he called upon all to support him to the utmost of their power in remedying the evil.

"It is satisfactory to find in the report (Immigration Report, 1898), dealing with the subject, that the Deputy Commissioner of Cachar was unable to trace a single case of a worn out or sickly coolie being turned out of a garden.

"As to the tea-industry not being in a position to bear such an additional tax as the enhancement of wages would mean, I am of the opinion that to raise the rate of wages for two years would similarly affect wages at any period. It would in the first place be impossible to import Act labour on one scale and non-Act on another scale of wages. We invariably treat Act and non-Act coolies on the same footing: if Act labour get rice at Rs. 3, it would be unfair to deny this privilege to non-Act. Coolies themselves fail to recognize a difference. The effect, therefore, of raising wages eight annas would be an additional charge of 10 per cent. on labour-charges. The expenditure on a garden on account of pay for labourers is calculated at nearly three-quarters the actual total expenditure in placing tea on the market; this would mean, therefore, an increase of 7½ per cent. on our present expenditure, or an equivalent of nearly 2 per cent. on the capital invested in tea.

"The accounts for 1900 have not yet been closed, but the results are certain, as far as profit and loss are concerned. The bulk of tea now sold in Calcutta and London is being disposed of at three farthings or one penny per pound below cost price, and more than 75 per cent. of tea-gardens will be worked at a loss. A continuation of such conditions must assuredly lead to a collapse of the tea-industry.

"In paragraph 12 of Mr. Cotton's letter to the Government of India, he says:—

'The insufficiency of the wages paid to labourers under contract has repeatedly been the subject of notice in official reports; it will suffice here to refer to the remarks contained in paragraph 35 of report for 1896, paragraph 45 of report for 1897, paragraph 44 of report for 1898.'

"This, I think, is misleading, for we may certainly infer from the above that other reports, besides those mentioned, take up the subject of low wages. Such, however, is not the case. We have only to refer to reports for 1893, 1894 and 1895 to see that Sir C. Lyall and Sir W. Ward make no reference to low wages as telling against the coolie, but confirm the evidence given in the Special Report.

"The reports referred to by Mr. Cotton (it is almost needless to say) are those compiled during his administration.

"I maintain that in 1896 the Hon'ble Mr. Cotton could not possibly have had an opportunity of either seeing for himself the status of the coolies or of consulting with his officers on the wage-question. In fact, in Mr. Cotton's report, dated the 25th January 1899, No $\frac{126}{410}$, Emig., it is stated (alluding to the

question of raising the minimum wage and of reducing the term of contract, that they are reserved for further consideration, and that 'on these two latter subjects Mr. Cotton adheres to the opinion he has already expressed and has nothing to add to them.....The Chief Commissioner has written it while on tour and has not consulted the officers or any representatives of the tea-industry in regard to the proposed legislation.'

"In the Immigration Report for 1896, Mr. Cotton quotes some remarks of Mr. Monahan, Deputy Commissioner of Sibsagar, in report for 1894, with which he says he fully agrees. In the *same report* Mr. Monahan (alluding to the occupations of coolies), says, 'as a rule, however, their occupations, or at any rate the most profitable of them, are confined to coolies who have been *a year or two* on the gardens, during which time, if they keep in good health and are industrious, they may be able to acquire the small capital necessary.' This of course was not quoted by Mr. Cotton.

"My Lord, I do not think it is sufficiently realised what the ultimate effect of a rise in wages will mean, not only to the tea-industry but to the coolies themselves. There are benevolent people at home who denounce fox-hunting, little thinking that, if such a proposition was carried into effect, it would cause a wholesale slaughter and extermination of that animal we take such a pride in preserving. The Hon'ble Mr. Cotton with his philanthrophic ideas is similarly dealing a death-blow not only to the coolie but also to the industry we have such a pride in sustaining. Sir Alexander Mackenzie's recommendations for raising wages were based upon the view that the abolition of free recruiting would lower the cost of importing labour (see paragraph 8, Bengal letter of 29th December, 1896).

"Sir Charles Lyall did not say that he agreed to the raising of wages, but simply that he would like to see the rate raised, but that it must be left to Assam. Sir John Woodburn considers that an increase in the minimum wage might disastrously injure the system under which tea is produced without substantially benefiting the labourer.

"The real question is this, the minimum legal rates are already exceeded by arrangements which have gradually grown up and which suit both employer and labourer. Are there sufficient reasons for disturbing these arrangements? The burden of proof is on him who asserts there are sufficient reasons. He has to prove—

(1) that wages are insufficient ;
(2) that the proposed re-arrangement will result in sufficient wages being paid ;
(3) that the arrangement can be carried out without undue disturbance of the labour-system ; and
(4) that the industry *can meet* the financial burden of the proposed increase in wage.

"Not one of these points have been proved. How can the fact that tasks are light, such as can be performed in much less than a day, and that overtime payments are allowed, afford (as Mr. Cotton says) a strong consideration in favour of raising the statutory rate of wage ?

"Your Excellency said at Tezpur :—'In the long run a problem of this sort will not be settled by Labour Commissions or by Government Bills ; it will be decided by the immutable laws of supply and demand ; you cannot make water run up-hill, and you cannot provide labour for an industry below its market-price.' I need hardly say, my Lord, we accept this responsibility.

"I trust I have clearly demonstrated by the foregoing remarks that no reasonable grounds for enhancement of wages have been produced, and that coolies financially are in a better position than they ever have been, wages earned being considerably in excess of their requirements.

"With Your Excellency's permission I should like to place on the table extracts from the last Land Revenue and Excise Reports, the former showing to what extent immigration has benefited the Provinces. The Land Revenue Administration Report for last year shows that, at the end of 1899-1900, 85,881 acres of Government land were settled direct with immigrant cultivators, *viz.*, 71,159 acres with *ex*-tea-garden coolies and 14,712 acres with other immigrants. The area settled with *ex*-tea-garden coolies increased by 10,558

acres during the year. In 1890-91 the area settled direct with immigrants was not more than 30,000 acres, nearly 24,000 acres being settled with *ex*-tea-garden coolies. In 1880-81 the area settled direct with immigrants was just over 3,000 acres; almost all settled with *ex*-garden coolies. During the last nine years the area settled direct with immigrants has increased by about 56,000 acres, or at the rate of over 6,000 acres a year, the area settled with *ex*-garden coolies having increased by 47,000 acres, or at the rate of over 5,000 acres a year. These figures by no means represent the whole cultivation of immigrants; large numbers also cultivate as sub-tenants of grant-holders or Assamese *raiyats*.

"It is estimated that the number of *ex*-tea immigrants (including their Assam-born childern) who have left tea-gardens and settled down in the Assam Valley, chiefly in the districts of Sibsagar and Lakhimpur and in the Tezpur Sub-division of Darrang, is at the present time probably something between 150,000 and 200,000. This represents the actual colonisation work done by the tea-industry. In 1891 the colonists numbered something between 80,000 and 90,000. In 1881 they numbered not more than 25,000. Including tea-gardens, the total number of persons of the immigrant classes, including those born in the province, in the four upper or tea districts would not fall far short (if at all) of 500,000, or more than one-third of the total population of those districts. In 1891 the total number of persons of these classes in these districts was less than 300,000. In 1881 the number could not have been more than 150,000 at the outside; and in 1872 probably not more than 40,000.

"The above shows the work done by the tea-industry in populating and colonising the province in the Assam Valley only. I have no doubt that the record in the Surma Valley is equally satisfactory. When we add to the above the fact that the tea-industry in this province affords a livelihood to a labour-population of about two-thirds of a million and to over 50,000 emigrants annually, especially in times of famine or scarcity, we shall be in a position to realise the obligation which the Assam province chiefly, but also, to some extent, the other provinces from which the emigrants come, are under to the tea-industry.

"In 1899, Rs. 6,38,573 were realized from liquor-shops in Assam and Rs. 3,66,868 from ganja The Chief Commissioner acknowledges that this 6¼ lakhs are almost wholly derived from coolies. I calculate it amounts to over Rs. 5 per annum per drinking head. Mr. Davis says regarding the consumption of ganja :—

'The labouring emigrant population which furnish the bulk of our ganja-consumers increased by 33,725 or 26·99 per cent. in five years; the consumption has increased from 36 maunds in 1890-94 to 53 maunds in 1896 97 or by 32 per cent. In addition to this the revenue from rum, chiefly consumed by garden-coolies, amounted to Rs. 6,177.'

"The revenue derived from opium also amounted to Rs. 15,81,991, a large proportion of this drug being consumed by coolies. The figures given above for spirits and ganja are for licenses only, so we may add nearly 50 per cent. for vendors' profits drained out of coolies new and old, who, according to our Chief Commissioner, are unable to earn a living wage."

The Hon'ble SIR CHARLES RIVAZ said :—"As I cannot accept on behalf of the Government of India the amendment which my Hon'ble friend has moved, I must ask the forbearance of the Council if I give my reasons for the position we have taken up at some length. I trust I shall be able to show that in this matter we have good reasons for our belief that some improvement in the statutory wages of the tea-garden labourer of Assam is called for, and that we should be parties to one-sided legislation if we failed, when amending the Act of 1882 in so many respects in the interest of the employer and when altering the recruiting law in accordance with his wishes, to do something also for the labourer who is the subject of these penal contracts. The penal contract system has become so familiar to the tea-industry of Assam, that there is a tendency to regard it as something quite normal, and to question the right of the Government to revise for the better protection of the labourer any of its details. But in reality the whole system is entirely opposed to the conditions ordinarily existing between employers and employed, and a heavy responsibility rests upon the Government which allows it to continue. The Gov-

ernment is bound to see that the wage, as well as all other conditions of service, is reasonable, and in insisting that it shall be increased on the state of the labourer being shown to be unsatisfactory, the Government is acting strictly within the limits of the responsibility which it has accepted in sanctioning the continuance of the penal contract system.

"My Hon'ble friend states that the minimum legal rates are already exceeded by the arrangements which have grown up between the employers and the labourers: and he throws the burden of proof on us that the present wages are insufficient. I am content to meet him on these two points. His first contention is, that the minimum legal rates are already exceeded, and the evidence he relies on practically amounts to this, that the average earnings of what he considers a normal family, that is, an able-bodied man, an able-bodied woman and an able-bodied child and a further quarter of an able-bodied child, amount to a trifle over Rs. 11 a month. But, on his own showing, the wage of the individual man and of the individual woman is less than the prescribed minimum wage, and what we have to look at is the individual and not the family. Therefore, I cannot allow that he has proved his first point. As to his second point I am quite willing to grant that the expert acclimatised labourer who has retained his health and has adapted himself to his new country earns in one way or another a fair subsistence. But, if anything has come out clearly in the course of the discussions which our proposal has evoked, it is this, that the condition of the emigrant in the first years of his contract is far from satisfactory. My Hon'ble friend has cited the opinions of officers who, writing generally of the condition of the labourers in Assam, describe them as fairly prosperous. Against these opinions I am content to set the opinion of the present experienced Commissioner of the Assam Valley Districts, who, with wider and more mature knowledge than his subordinate officers and with sympathies strongly inclining towards the employers, has strenously insisted on the necessity for discriminating between the condition of the old and expert labourer and that of the labourer in the first years of his contract. The condition of the latter, he has emphatically said, requires to be safeguarded. His opinion was endorsed by the conference of planters and officials at which he presided, and which put forward a proposal that a minimum wage, sufficient to purchase food, should be secured by law to every labourer, irrespective of task, for the first two years of his contract. What was this but an admission that the present minimum wage, as it actually works in practice under those arrangements which my Hon'ble friend states 'have gradually grown up,' fails to secure the labourer a living wage? This is the evil to which we cannot shut our eyes, and which justifies our decision that the revision of the law for the benefit of the employers in their recruiting operations ought to be accompanied by some improvement in the wage-scale.

"My Hon'ble friend has not alluded to the fact that the present average wage of the labourer under penal contract is, taking it all round, less than the legislature 35 years ago intended it should be, as my Hon'ble friend the Chief Commissioner of Assam has pointed out in his note which he has appended to the Report of the Select Committee. This is a very remarkable fact, which it is well to bear in mind, when we are told of other 'arrangements which have gradually grown up.' I doubt if there is any other place in India where the cash-wage of today is substantially less than the cash-wage of 35 years ago. When the system of a penal labour-contract was instituted by Bengal Act VI of 1865, a fixed minimum monthly wage was prescribed, which was Rs. 5 for male adults and Rs. 4 for female adults. This system of a fixed monthly wage was altered by Act I of 1882 to the present system of a minimum wage-rate contingent upon the completion of a daily task, the regulation of which is practically in the hands of the employer. I doubt if the full effect of this alteration was realised by the legislature. The effect has been that even in the busy season of the year, when the labourer gets overtime earnings, the prescribed minimum wage-rate of Rs. 5 per man and Rs. 4 per woman is in many cases not earned; while at other times of the year it is seldom, if ever, earned, at all events by the newly-joined coolie during the first two years of his contract. The annual returns of the average monthly wage earned in each district of Assam show that, even including payment for overtime, the average

wage of the whole year round in almost every sub division of the province is less than Rs. 5 per man and Rs. 4 per woman. As the skilled workers admittedly earn on good gardens more than the minimum wage, the only possible explanation of these figures is that the newly-joined and unskilled members of the labour-force earn materially less than the minimum wage-rate. When we bear in mind that, when this minimum wage-rate was fixed, it was fixed on the supposition that even the newly-joined coolie would be able to earn it by performing a fair day's work for 26 days in the month, we must in my opinion, recognise that this failure on the part of a considerable section of the labour-force to earn the prescribed wage constitutes a very strong argument for the enhancement of the present wage-rate which is proposed in the Bill now before Council. For we have, I repeat, the undeniable fact that for the first years of their service on the gardens the labourers do not receive the wage which the legislature supposed in 1865 and again in 1882 it was guaranteeing to them. I know that it has been said that though the legislature may have intended that no labourer should receive less than Rs. 5 a month if a man, or Rs 4 if a woman, yet the law was impracticable, and that it was found convenient to depart from these benevolent intentions, and to convert the monthly wage into a daily wage contingent upon a fulfilment of a task fixed by the planter. But the change was to the detriment of the labourer, and to it must be ascribed the evil which, as I have said, is admitted to exist. I cannot help thinking that the practice of strictly enforcing the daily task and of keeping down the labour bill by the method of '*fractional hazirís*,' that is, of paying half or three-quarters wage for short tasks, has grown of late years. It is not noticed as a prominent abuse in the report of the Committee of Enquiry which preceded the enactment of the Act of 1882. Any one reading that report would come to the conclusion that the full monthly wage was ordinarily earned by the coolie in those days, and that tasks, if set, were only for the punishment of the able-bodied labourer who was wilfully idle. That at all events was the view taken by the then Viceroy, Lord Ripon, in the course of the debate on the Bill. Replying to the objections taken in certain quarters to the wages fixed in the Bill as being too low, Lord Ripon said that they were minimum rates, designed to secure that under no circumstances should the labourer get less than a living wage, and that the Government was convinced that the real earnings of the great majority of the labourers would far exceed this minimum. We know that these anticipations have not been realised, and that under the task-system as practised today in Assam the living wage which the minimum rates of the Act are supposed to represent is not earned or earnable by a considerable proportion of the labour-force. Therefore, I say that the lot of the labourer is worse than the legislature in 1865 and in 1882 intended that it should be, and that this fact alone would amply warrant a larger increase in the monthly wage rate than we propose.

"But the case for raising the wage does not stop here. When I introduced the Bill two years ago I stated that, since the wage was first fixed in 1865, a great rise had occurred in the prices of food and in the wages of labour. The fact seemed to me too notorious to require demonstration. Every one who has long experience of India is conscious that money will neither purchase as much food or labour as it did twenty or thirty years ago. As my Hon'ble friend has alluded to Mr. O'Conor's evidence on this point before the Currency Commission of 1898, I have looked up what Mr. O'Conor actually said. He said that there had been a great increase all over India in the wages of skilled and unskilled labourers. He subsequently stated that in the case of the wages of agricultural labourers the rise was largely disguised in the official returns by reason of their still being paid in kind This is perfectly true, but, as we are here dealing with cash wages, it does not affect the question before us. If we test Mr. O'Conor's evidence by the Assam figures, we find that, whereas for the ten years preceding the enactment of Act I of 1882 the average price of rice in the Province of Assam was over 19 sers the rupee, for the ten years preceding the present time the average is less than 13 sers. Measured in rice, therefore, the minimum wages fixed in 1882 are not the minimum wages of today: that is, the sum Rs. 5 or Rs. 4 a month purchases less rice now than it did in 1882. It has been argued that the prices of other commodities have fallen in Assam

owing to improved communications and establishment of local marts. I am ready to admit that this may be the case. But the ruling figure in the coolie's budget is what he spends on rice, and the evidence to my mind is clear that rice is much dearer today in Assam than it was when the present wages were first fixed. The labourer is, I admit, provided by his employer with rice at Rs. 3 the maund, the equivalent of a rate of 13·3 sers per rupee. But my contention is that in old days rice on the average was far cheaper than this in the province. I think, therefore, that, on the ground of prices alone, a case could be made out for raising the minimum wage. We have also the fact that wages of free labour have risen of late years in Assam, and that they are considerably higher than the wages of the penal contract. We have also the fact that, in the districts from which the planters seek to draw their labour-supply, there is an active and increasing competition for labourers for mills and mines and the colonies, and that much higher rates are offered than the present minimum rates of the Act. Putting all these things together, it is impossible to avoid the inference that not only prices of food, but also wages of labour of the particular kind required by the planters, have risen.

"My Hon'ble friend has attempted to show that the Act-labourer in Assam is better off than the free labourer in the Duars. The circumstances between a free-labourer and a labourer under a penal contract are so radically different that such a comparison is of little real utility, even if we accurately knew all the facts about wages and tasks and overtime in the Duars. It is, however, clear that the lowest wage-rate in the Duars for a man is Rs. 6 a month, and that he can earn this by performing a very moderate task for 20 days. When my Hon'ble friend states that the average wage actually earned by adult male labourers on certain selected gardens in the Duars is under Rs. 5 a month, he omits to notice the important qualification supplied by the Deputy Commissioner of the district that many of the labourers have other occupations, and that they do not on an average work on the tea-gardens more than 18 or 20 days in the month. The Duars planter cannot compel them to work as an Assam planter can his Act labourers. The comparison is thus vitiated by this circumstance alone. We also have it in evidence that labour prefers to go to the Duars rather than to Assam, and we quite recently have been told in the correspondence columns of the *Englishman* that labour in the Duars is more expensive than in Assam. I cannot, therefore, see that there is any force in the argument about the Duars.

"I now return to my statement that the actual condition of the labourer under penal contract is not satisfactory, at all events during the first two years of his contract, and that it requires to be improved. In the first place, the Labour Commission of 1895 distinctly recognized the fact by saying in their Report that, if Government took measures for reducing the cost of importing the coolie into Assam, it would be fairly entitled to demand some increase in the pay of the coolie and some reduction in the term of contract. In the next place, the Bengal Government in forwarding this report to the Government of India expressed an opinion that, if the recommendations of the Commission on the subject of recruiting were carried out, the term of contract ought to be reduced to three years and the minimum wage also raised to Rs. 6 for a man and Rs. 5 for a woman throughout the period of contract. The then Lieutenant-Governor (Sir Alexander Mackenzie) expressed a very decided opinion that wages were kept at too low a level in Assam, even allowing for all the expenses of the present system of recruitment. When the report of the Commission was circulated to the other Local Governments and Administrations concerned, there was a consensus of opinion on the part of the North-Western Provinces Government, the Central Provinces Administration and the Assam Administration that the minimum wage-rate ought to be enhanced as proposed by the Bengal Government, and provision was made accordingly in the present Bill as introduced. Since the introduction of the Bill, opinions on this point have no doubt changed in some quarters; still all concerned are agreed that something ought to be done for bettering the present position of the coolie during the first two years of his contract. The remedy proposed by His Honour the present Lieutenant-Governor of Bengal was to reduce the statutory task; but it was found that the planters were opposed to

this solution, and it was consequently dropped. Another proposal which was put forward at the Conference convened by the Commissioner of the Assam Valley Districts at Tezpur to discuss the Bill was that the labourer during his first two years in Assam should be guaranteed, if a man Rs. 3-8 a month, and if a woman Rs. 3 a month, for this period irrespective of task. This proposal was, however, considered insufficient by the Chief Commissioner and was also eventually rejected by the planters themselves. We had, therefore, when considering the Bill in Select Committee, to fall back on some other solution of the question, and it seemed to us that, as increased protection of the newly joined labourer was the matter of foremost importance, this end could best be attained by providing that he would be entitled to earn a full wage by performing half an ordinary task during the first six months of his service. This, however, taken alone fell considerably short of protecting the coolie for the first two years of his contract, which, as I have just said, has been generally admitted to be required. The representatives of the planters on the Committee were opposed to applying the half task rule to a longer period than six months. We therefore provided, while maintaining the present minimum wage for the whole of the first year subject to the half task rule for the first six months, a very moderate increase of eight annas a month for the second year of the contract, nor did we go beyond this moderate increase for the third year. The present wage-rate for the fourth year has been left untouched. I think I may reasonably claim that in doing this much, and this much only, we have shown the planters all possible consideration compatible with the obligation of Government towards the coolie whom it allows to be placed under a long term of penal contract ; and it must be remembered that the small proposed enhancement of the wage-rate is not accompanied by any reduction of the period of contract at present allowed, although such a reduction was pressed upon the Government of India by the Secretary of State in 1893 and was, as I have already said, contemplated by the Labour Commission in 1895.

"Coming now to the practical effect of the moderate enhancement thus made in the wage-rate of the second and the third years, let us see what it comes to. The aggregate earnings of a man during the four years of his labour-contract would amount, under the present wage-scale, if he earned the full wage throughout, to Rs. 252 and of a woman to Rs. 204. The increase in these aggregate earnings will be Rs. 12 only, that is, less than 5 per cent. in the case of a man and less than 6 per cent. in the case of a woman Now, as I have already pointed out when speaking earlier today, the main object of the Bill before the Council is to cheapen the cost of importing the coolie into Assam by abolishing the present unlicensed and uncontrolled system of so-called free recruiting and encouraging recruiting and assisted emigration by *bonâ fide* garden-sardars. The Labour Commission estimated that the cost to the planter of each contractor's coolie was from Rs. 125 to Rs. 150, while the average cost of the coolie recruited through the garden-sardar was Rs. 60 to Rs. 65. The Report on Labour Emigration into Assam for 1899 estimates the average cost of importing coolies from about Rs. 50 for a sardari recruit to Rs. 120 for a labourer recruited through a contractor. It may therefore be fairly estimated that the difference in cost between a labourer obtained from a contractor and one recruited by the garden-sardar comes to at least Rs. 50. Setting aside for the moment the Surma Valley, where in a labour-force of over 160,000 there are only 12,000 Act labourers, statistics show that about 18,000 coolies go annually to the Assam Valley, of whom about 12,000 are obtained at present through professional recruiting. It is evident, therefore, that there is considerable room for substituting the cheaper sardari recruit for the more expensive contractor's coolie in the Assam Valley, supposing, that is to say, that, as is alleged on behalf of the planters, the labour-supply in the recruiting districts is ample if only the garden-sardar is given fair play. By the present Bill we are giving him fair play by virtually carrying out all the recommendations which were made in this direction by the Labour Commission; and if, after the garden-sardar has been freed from the illegitimate competition of the unlicensed contractor and recruiter, he finds himself unable to procure an adequate supply of coolies for his employer, I think all will admit that it is a legitimate inference that

the wage offered, even if enhanced as proposed in the Bill now under consideration, is insufficient to attract a proper supply of labour, and that the employers will have to offer further better terms on their own initiative. It has, however, been urged on behalf of the planters that the increase in the wage-rate contemplated by the present Bill will not only affect the price of Act labour but also of labour outside the Act. I am not prepared to admit this. In the Surma Valley it certainly will not, for, as I have just mentioned, the proportion of Act labourers to non-Act labourers is so small that the proposed small rise in the wage-rate of Act labourers cannot possibly affect the wage-rate of the non-Act labourers Then, as regards the Assam Valley proper, where the number of Act labourers and non-Act labourers are about equal, Mr. Melitus, the Commissioner of the Assam Valley Districts, has shown that the average wage of the non-Act labourer is materially higher in that part of Assam than the average wage of the Act labourer. This being the case, there seems no reason for supposing that our proposed very moderate increase in the wage of the Act labourer need necessarily have the effect of increasing the wage-rate of the non-Act labourer.

"I trust I have shown sufficiently that the increase which we propose to make in the wage-rate is in reality an exceedingly moderate one, that the interests of the planters have received all possible consideration, and that this increase in the wage-rate will not have the damaging effect on the tea-industry which has been so vehemently asserted in some quarters."

The Hon'ble MR. HENDERSON said:—"My Lord, I desire to make a few remarks in support of the amendment proposed by the Hon'ble Mr. Buckingham.

"It would naturally be expected that, before the Hon'ble Mr. Cotton introduced a Bill affecting in such a serious manner the very important interests of a great industry and the welfare of the great population depending on that industry, he would have made careful personal investigation in every district in the Province, and his failure to inspect a single estate during the years of his Chief Commissionership must detract considerably from the value which would otherwise attach to his opinions.

"His predecessor, Sir William Ward, whose long residence and great experience in the labour districts made him peculiarly qualified to speak with authority, has not recorded any opinion that the enhancement of wages is advisable, nor has any previous Chief Commissioner done so.

"The Hon'ble Mr. Cotton's experience of Assam has been limited in the first place to a residence of a few years in a portion of the Province which is not a labour-district, and in the second place to hurried tours through the Province.

"I am not aware that during these tours he has ever made even the most superficial inspection of any tea-estate in the Assam Valley, and he has certainly not done so in the Surma Valley.

"It is obvious therefore that the very strong views he has expressed as to the necessity for increase in wages are not the result of personal observation, nor can they be based on the reports of the District-officers; for I find that the Commissioner of the Assam Valley, an official of great experience, is opposed to him on this question, and amongst eight Deputy Commissioners in charge of labour-districts he has only succeeded in finding one supporter.

"With Your Excellency's permission I desire to criticise the reasons given by him for his dissent from the Report of the Committee.

"I would point out in the first place that he has made no reference in his memorandum to the general rise in the cost of articles consumed by the labourer, which he originally gave as a principal reason for the proposed increase of wages. I do not know whether we are justified in concluding that the reason of this omission is that he has already realised the fact that the statement could be effectually refuted.

"With reference to the concluding paragraphs 6 to 15 of his memorandum, I would submit with all due deference that they are full of inaccuracies and exaggerations.

"In paragraph 6 I find the extraordinary statement that the general rise of wages of unskilled labour in Assam has on an average amounted to 44 per cent. in 25 years. The Hon'ble Member who represents the Assam

Valley has dealt with the question so far as regards the Asssm Valley and the rest of India.

"Of the Cachar and Sylhet Districts, where local labour is more plentiful than in the labour-districts of the Assam Valley, I have had a very extensive experience dating since 1880. I can assert most positively that in that year the pay earned by unskilled local labour was not lower than that earned in recent years, and that actually at the present time the rates of pay for such labour in Cachar are lower than I have ever known them.

"During the twenty years from 1880-1901 I have been a very large employer of local labour, and in no case have I ever paid more than four annas per working day, and frequently less.

"The rates quoted by the Hon'ble Mr. Cotton in his paper entitled *Wages in Assam* are overstated to the extent of 30 to 40 per cent. in case of the two districts above referred to.

"I should be inclined to think that the explanation of the high figures quoted there is that the rates quoted are those prevailing in the sadr stations, where living is more expensive, or are those paid to skilled labourers, and possibly in some cases they refer to labour impressed for Government service, which is always unpopular.

"If you add to the wages paid to the imported tea-garden labourer the cost of house-accommodation provided, medical attendance, medicines, sick allowances and the numerous other advantages enjoyed by the coolies, it will be easy to show that the tea-garden labourer is at no disadvantage compared with the outside labourer.

"The statements in paragraph 8 that the Duars coolie earns higher pay than his neighbour in Assam have been shown to be incorrect, and comparison between Calcutta and Assam rates of pay is manifestly unfair unless accompanied by a comparison of cost of living.

"It is specially stipulated both in the present Bill and in Act I of 1882 that labourers imported into Assam shall not be bound to perform underground labour, and this recognition of the special nature of this employment entirely vitiates comparison between the Assam coolie and the mining one.

"I am unable to agree with the statement in paragraph 9 that the minimum rate of wage has proved insufficient to attract an adequate supply of suitable labour.

"It is true that estates in Assam for which Chota Nagpur labour is alone suitable have serious difficulty in securing the number of labourers required, partly because this district has already been depleted of its surplus population by many years' recruiting, and partly because the system of free recruiting for the Duars is more popular.

"The result has been that there has been very severe competition and consequently very high prices for labour from that district.

"To state the price of contractors' coolies at Rs. 120 to Rs. 150 per head is an obvious exaggeration. I do not consider that the average figure should be over Rs. 80 for all contractors' coolies imported to Assam, and the allegation that a saving of 13 lakhs would be effected by a higher rate of pay reducing cost of recruitment is utterly absurd.

"There is no reason to suppose that an increase in wages would result in any reduction of cost of importation: or in any improvement in the class of coolie.

"To assume, as is done in paragraph 10, that an increase in the rate of wages would result in such an improvement in the physique and class of labour that a reduction of 50 per cent. in rate of mortality would occur is as unreasonable as it is to place an arbitrary valuation of Rs. 130 per head on the presumably inferior class of coolies who have succumbed.

"Cases may have occurred, but I am certain they have been very rare, when an insufficient living wage is paid; but an increased rate of wages would scarcely affect this evil unless at the same time an increase in tasks is prohibited.

"The remedy in such cases—a very minute minority—is to be found in more stringent control by District-officers and not by special legislation.

"In any case, it is probable that the low earnings referred to were the

result and not the cause of the unhealthy labour-force on gardens where such cases have occurred.

"There is no doubt that the tea-industry cannot afford to pay higher rates of pay than it is doing at present, and unless the proposed increase of pay is accompanied by an increase of tasks the ruin and closure of many estates will result, and the labourer himself will eventually be the principal sufferer from this ill-judged effort to benefit him.

"Assuming that the increase of tasks corresponds to the proposed increase of pay, it is evident that the lazy and inefficient labourer will not benefit in any way, and the strong, healthy, efficient coolie will suffer, because a larger proportion of his work will consist of daily task work and less time will be at his disposal for the performance of the more highly paid and more congenial ticca work.

"All employers of labour will cordially agree with the remark of His Honour the Lieutenant-Governor that the system of over-time work and remuneration is an excellent and proper system.

"Any legislation which would have the effect of making the labourer's earnings depend on daily task work to the exclusion of ticca work would inflict an injury on the best class of labourer as well as on the employer, who would require to largely increase his labour-force if the labourer were discouraged from doing over-time work.

"I trust that in coming to a decision on this important question Your Excellency will give full consideration to the serious effect of a rise in wages on the industry in its present very critical state, and that by your decision you will not further aggravate the almost overwhelming difficulties which we have at present to face."

The Hon'ble MR. ASHTON said:—"My Lord, I support the amendment moved by my Hon'ble friend and beg Your Excellency's leave to state my reason as follows.

"The Hon'ble Member in charge of this Bill commenced his argument by stating that the existence of a penal contract is not a normal condition of things. Of course it is not normal, because other conditions are not normal. It is an effort to give to a coolie in the only possible way an ability which he did not before possess—the ability to make a contract to better his condition, and has no sinister significance. It is a survival of a more patriarchal condition of things suitable for the society for which it is devised. Ninety-nine out of a hundred of the aboriginal coolies are poor beyond the poverty that is measured in rupees and pice. A civil obligation is unknown to them; so that the penal contract is the only form of contract possible between them and the planter. This being admitted, Government is called on only to see that the coolie is not deluded into a situation less desirable than that which he desires to leave. The law, aided by the private interest of employers, however, goes far beyond this, and that it does so with practical effect there is abundant evidence. The Hon'ble Member of Council who has so warmly advocated an increase in the minimum wage has indeed argued that the opposite is the case; but there is overwhelming evidence against him. The minimum wage for a minimum task is only one out of many advantages that the coolie secures. He secures, for instance, a master whose direct interest it is to keep him well and happy, because a tea-manager who fails in the treatment of his labour fails in everything. He secures his housing, his doctoring. His staple food, rice, must be furnished him at a price that is not allowed to exceed Rs. 3 per maund. In further evidence of how carefully he is looked after I may instance a tea company for whom my own firm are agents, who, in the year 1899, spent Rs. 62,610 on medical officers and medicines for the benefit of coolies. The company virtually pays the premiums of a sick insurance fund at the rate of Rs. 4-4 per head of the men, women and children employed, which premiums are expended on the sick at an average rate per head, the amount of which I have not ascertained, but which must be far beyond the reach of a coolie. In one year alone the same company spent Rs. 11,565 in condensed milk for coolie children, most of them born in Assam. Would the parents have been able to give them this? I think not. It is beyond argument that many lives are saved annually by the care, attention and money which tea-gardens expend on their labour-force. It is only necessary to study

the financial columns of the newspapers to see how many gardens there are that, as a matter of fact, exist mostly for the benefit of the coolie. Shareholders have had nothing; the manager toils for a salary that allows him to save nothing; yet the coolie continues happy in the knowledge that he has exchanged the fear of famine for a certain livelihood and modest savings. Add a little heavier burden and these gardens are closed and the coolie's livelihood ends.

"Much has been made of the cost of securing and landing coolies in Assam It must be more costly than of old, because regulations are more complicated and thus give a handle to those who trade on the fact. Just as it is necessary to pay a skilled barrister to pilot one through the perilous and tortuous channels that lead to justice, or a patent agent to help one to find protection for an invention, so it is necessary to employ a forwarding agent to shepherd the coolies through the police and inspectors who hang on the line of their march from their own country to the gardens. If abuses occur, it is in fact in the recruiting districts, but not on the tea-gardens. The broad facts are that the coolies are badly off in their own country and well off in the tea-gardens. I think that this fact has been prominently brought forth in this discussion by the prominence that has been given to the weak and emaciated condition of the coolies on their first arrival at the gardens, as may be expected, seeing the famine-stricken districts from whence they come, and by the fact that special provisions are made in order to give the gardens sufficient time to reconstitute their health and strength by care and attention. The difficulty is to get them from the one to the other without hardship or abuse, and the obvious remedy is to make the road from the coolies' forest home to the gardens plain and easy, and it is towards this end that effort should be directed. Every tea-manager is at one with every Hon'ble Member of this Council in a wish to see the coolie well, happy and contented and his lot improved. Remedies for the coolie's lot may be required, but of this I am certain, that the raising of the minimum wage is not the one for which we ought to seek."

The Hon'ble RAI SRI RAM BAHADUR said :—"My Lord, instead of recording a silent vote against the amendment moved by the Hon'ble Mr. Buckingham, I beg, with Your Lordship's permission, to make a few remarks on the motion before the Council, and, by adopting this course, I hope on this occasion to exonerate myself, at least to some extent, from the general charge, just made by the Hon'ble Member, of being an Asiatic and doing nothing.

"No sensible person, my Lord, can underrate the difficulties which exist with regard to legislation of the class to which the Assam Labour Bill belongs. The first question which comes to one's mind with respect to a legislation of this nature is, why the contractual relations between labourers and their employers, instead of being left to be governed by the ordinary law of contract, should be subjected to a legislative enactment of an exceptional character, and why the whole thing should not be left to regulate itself by the economical laws of supply and demand, and the contracting parties allowed to settle their own terms, but, on the contrary, the legislature should intervene to fix the rates of wages which the employers have to pay to the labourers. These points do naturally force themselves upon one's attention in considering the question before the Council. But it appears that the existence of circumstances of a very peculiar nature induced the Government, in time past, to have recourse to special legislation on the subject of emigration of labourers to Assam, and that the continuance of those circumstances, though now changed to a considerable degree, has led the Government to still retain that legislation, with such necessary alterations and modifications as the exigencies of the time require.

"My Lord, had it been the case of two contracting parties standing on a footing of equality as regards intelligence, knowledge, experience and facility and opportunity to get sound advice, a wholesale repeal of the law on the subject would have been the most acceptable course to be adopted by Government. But in reality such is not the case. Of the two contracting parties, in the first stages of the negotiations which ultimately result in the contract, on one side we have the astute and shrewd recruiting agent or labour-contractor, who receives large premia to procure labourers for the tea-plantations, and whose measure of pecuniary gain depends upon the number of labourers he succeeds in securing for his employers. On the other side, we have the villager, simple, illiterate,

ignorant and not possessed of the capacity to fully comprehend the consequences or realize the nature of the liabilities to which he is subjected by the terms of the contract into which he is led to enter by the contractor's persuasive words, blandishments and rose-coloured accounts of the place to which he is to be taken —that place being so distant from his native home. These contracts are not of a purely civil nature, but breaches of their terms, real or assumed, make the labourer liable to criminal punishment by a Criminal Court.

"My Lord, it was the consideration of the helpless condition of the men engaged as labourers, and the gross abuses which had been found to exist at the time in the system of recruitment, which first forced the Government to have special legislation on the subject, and Act III of 1863 was the first enactment passed by the Bengal Council—Assam in those days forming a part of the Government of Bengal.

"The avowed object of that legislation was the protection of coolies and the removal of abuses in the system of recruitment. But in subsequent legislations on the subject, on the representations made by the planters, penal clauses have been added from time to time, their object being to give greater facilities to the planters to enforce, by the machinery of the Criminal Courts, terms of the contracts entered into by the labourers.

"Act VI of 1865 of the Bengal Council, passed in the Spring of that year, fixed for the first time the minimum monthly rates of wages—Rs. 5 a month for an adult male and Rs. 4 a month for an adult female. Additions to, modifications of, and alterations in the different provisions of the Assam Labour Law were made from time to time by the Bengal Council as long as the tea-districts remained under the Bengal Government, and by this Council after the constitution of Assam into a separate Administration. But the amount of minimum rates of monthly wages to be paid to the labourers has continued the same as they were fixed thirty-six years ago. A general rise in the rates of wages has taken place throughout India, prices of food-grains have arisen all over the country, and cost of living has increased to a considerable extent in almost all the provinces of the Indian Empire. Those who advocate the retention of the minimum rates of wages laid down in the law at present in force do not take into their consideration these factors. According to them no advance in the way of raising the standard of minimum wages to be paid to the poor Assam coolies should be made by the Government, but legislation in this respect should remain as severe and stereotyped as the laws of the Persians and the Medes.

"My Lord, the ordinary wages earned by the labourers in their own districts were much lower in 1865, when the law for the first time fixed the minimum rates. In the North-Western Provinces and Oudh there has been a general rise of wages of the common labourer, in many places such rise averaging between 25 and 33 per cent., and in some as high as 50 per cent. In 1865 the demand for labour in the tea-districts of Assam was not so high, because at that time the number of plantations was not so great as it is now.

"There is a consensus of opinion of the Governments of the North-Western Provinces and Oudh and the Central Provinces and of others from which places many of the labourers are recruited, in favour of raising the minimum monthly wages.

"A glance at the table of monthly wages received by both of the classes of labourers, those governed by the Act of 1882 and those not so governed, shows that the labourers of the latter class in most cases are much better off in respect of the wages received by them than their brethren of the former class. I have refrained from quoting figures in support of my proposition, as I understand that other Hon'ble Members, in particular the Hon'ble the Chief Commissioner of Assam, who can speak with the greatest authority on the point, are going to speak on this subject.

"My Lord, it is said that there is a danger looming in the distant horizon, threatening the prospects of the tea-industry in this country, and that the present is not an opportune time for raising the minimum rates of wages. That danger may actually be realized or not, but its mere apprehension should not outweigh the proved necessity for raising the wages of the poor labourers.

"My Lord, an increase of only eight annas a month in the wages of labourers, during the second and third years of their engagements, does not go

far enough to completely meet the circumstances of the case. One rupee a month, as provided in the original Bill, would have been more appropriate. But, as there is no amendment before the Council to restore the rate originally proposed, I am obliged to support the one now fixed by the Select Committee as a sort of compromise.

"It is a matter of regret that the Maharaja Bahadur of Darbhanga, the only Indian member on the Select Committee of this Bill, was able to take part only in four or five of its sittings. During the rest of the deliberations of the Committee there was no Indian member to represent the views of the Indian community respecting such an important measure.

"So far as I know, there is no expressed desire on the part of the planting interest to have a repeal of the law governing coolie-labour. The existence, in that law, of provisions favourable to the interest of the tea-planters may account for their desire for its retention. If the special legislation containing penal provisions unfavourable to the interests of the labourers is to remain, no valid objection can, I think, be raised against the proposed small increase in the minimum rates of wages—an increase completely justified by change of the circumstances in the labour-market.

"I therefore vote against the proposed amendment of sub-clause (*4*) of clause 5 of the Bill."

The Hon'ble MR. BOLTON said:—"The freedom which, I understand, may be exercised by the official Members in voting on this motion places before me the plain duty of voting in accordance with my personal and independent judgment. I may say that I came to this Council with a mind entirely open on this subject, that I have since studied it with great care, that I am in no sense, directly or indirectly, interested in the tea-industry, and that I have formed my final judgment with strict impartiality on the materials before me, guided also by my personal knowledge and experience, so far as they apply. The conclusion to which I have been brought—and I regret that it differs from that of the Government of India—is this, that the case for an increase of the minimum contract wage has not been made out; and I must accordingly vote in favour of the Hon'ble Mr. Buckingham's motion. I am in no doubt as to the necessity of facilitating the earning of a full wage by the weak and unacclimatised coolie during the early stage of his stay in Assam, and I am glad to find that the motion leaves untouched the important proviso of the Bill on that point. I have also concurred in the introduction of the new section which will empower the Local Government to cancel the contracts of labourers on any garden where the earnings cannot be such as to maintain them in health and fair comfort. These two provisions appear to me to do all for the labourers that the existing circumstances demand, and I have personally not been convinced by the arguments advanced in support of the raising of the wage. In fuller explanation of my vote I am constrained to notice those arguments on which the greatest stress is laid; but I will do so briefly. It is said that the wages of agricultural labourers in Assam are much higher than those of the garden-coolie. That is so, but it affords, to my mind no ground for raising the garden-coolie's wage. Local labour in Assam is scarce, and the labourer is able to impose his own terms. His appears, therefore, to be, not a necessary, but a special wage, which cannot be taken as a guide in fixing the pay for labourers imported from a distance at great cost. It should be remembered also that the agricultural labourer whether in Assam or elsewhere, does not obtain work throughout the year, and that, therefore, with a higher rate of monthly wage it does not follow that his earnings for the entire year exceed those of the garden-coolie, who is assured labour and remuneration for every working day of the year. Comparison has, again, been made between the wages of the garden-coolies and those which are paid to the mill and mine hands in Bengal; but it is open to the coolies who emigrate to Assam to seek work in the mills and mines of Bengal, and, if they do not, or are not an acceptable class, it can hardly be urged that their wages in Assam should be regulated by those paid to men who are actually employed on such labour. Finally, a general increase is said to have taken place in the wages of labourers, from the benefit of which the

garden-coolie should not be excluded. There is evidence of such increase in the towns, but it cannot be affirmed that it has extended to the class of agricultural labourers in the interior, employed by zamindars, middlemen and well-to-do tenants, from which the emigrants to Assam mainly come. These labourers are paid chiefly in kind, receiving little more than a bare subsistence wage, and their lot is certainly inferior to that of the garden-coolie.

"It seems to me that these arguments do not point out the true tests of the sufficiency of the garden-labourer's wage, but that the adequacy of the wage should be tested, first, by the willingness or otherwise of the coolie to emigrate to Assam, and, secondly, by his condition generally in that Province. We are left in no doubt on the first point. Thousands, acquainted with the conditions of labour on the tea-gardens, willingly emigrate every year from Bengal and the Central Provinces, and the inference is reasonable that the wage attracts and is deemed sufficient. On the second point there is much testimony to the well-being of the coolies in Assam generally. Many cultivate patches of land and own cattle, goats and pigs, they spend a good deal on what may be termed luxuries, and they also make remittances to their native districts. So far, therefore, as it is possible to form an opinion without intimate personal knowledge of the life of the coolies in Assam, it does not appear that the wages earned are insufficient. There are necessarily exceptions, but for such cases relief will be available in the two provisions of the Bill to which I have alluded.

"If the tea-industry were prosperous, an argument might be found for raising the wage, even though its insufficiency were not clearly proved, in the principle that the labourer should have a share with his employer in the prosperity to which he largely contributes. We have, however, evidence on all hands that the industry is passing through a period of extreme depression, and the time is certainly inopportune for adding to its burdens. An early and continued improvement must be the hope of all, and in that hope it is gratifying to learn that the Government is prepared to consider favourably a proposal to suspend the increase of the wage for some time."

The Hon'ble MR. COTTON said:—"My Lord, I support the Hon'ble Member in charge of the Bill in opposing this amendment of the Hon'ble Mr. Buckingham, and in doing so I fear I shall be obliged to trespass on Your Excellency's indulgence in addressing the Council at considerable length upon a question which has excited an unusual degree of interest in Assam and in Calcutta. My excuse is that the responsibility for the proposal to raise the wages of contract labourers on tea-estates in Assam rests mainly on my shoulders, and that its justification must in some measure depend on the arguments I may be able to adduce in its support.

"In the first place, I must ask for Your Lordship's permission to advert to the considerations which have made it necessary to fix by law the minimum rate of wages under penal labour-contracts, and I must point out that there seems to be the more occasion for doing this as these considerations have been conspicuously ignored in some of the arguments which have been advanced against the proposal to raise the minimum rate. Let us therefore clearly understand that the conditions in Assam are not those of the ordinary labour-market, where the rates of wages can safely be left to be regulated by the economical laws of supply and demand. The whole of the special legislation regarding labour-immigration into Assam is based on the assumption that the conditions of the labour-market on Assam tea-gardens cannot be regulated by those economical laws. The existence of a penal contract is justified on this ground. The protection of the labourer is justified on the same ground. The law as it stands, and in an equal degree the law which the Council will be to-day asked to pass, impose on the labourers serving under contract thereunder in the tea-districts penal provisions of extreme stringency—to such a point that the coolie who is conveyed to the labour-districts under this law ceases legally and practically to be a free man. My Lord, I will not go so far as Sir George Campbell did, who, when the Act of 1873 was under consideration, declared from his place as President of the Council that the coolie was reduced to the position of a slave. I do not wish to use

any expression which would cause offence, but I will say that the coolie is compelled to labour to the end of his contract as a man not free or his own master. He is bound down for a term of years not only by penalties under the law, but by physical subjection to his employer, who, on a labourer attempting to run away, is empowered to seize him and bring him back to work. In a country where the tea-plantations are generally far removed from authority that is a tremendous power given to employers over their labour-force. I do not deny that it is necessary in the interests of the tea-industry to confer this power; but, when I say this, I venture to remind the Hon'ble Members of this Council that the recognition of this necessity by a provision in the Statute-book affords sufficient evidence of the length to which the Legislature has deemed it proper to go in order to give something more than mere moral support and encouragement to the industry. It is not too much to say that the material support accorded to the tea-industry by the provisions contained in the Labour Law for the enforcement of labour under a penal contract is the mainstay of the industry, and it is simply amazing to hear, as we have so often heard in the recent public discussions on the subject of this Bill, that the Government affords no assistance to tea in Assam. It is needless for me to add that the Bill now before the Council in no way ameliorates the condition of the tea-labourer in regard to his deprivation of freedom while he is under contract. But, my Lord, the legislature has another duty to perform, and, while the Statute law of the country has deprived the labourer of his status as a freeman, it has also always recognised that a corresponding obligation rests upon the Government to compel the employer to provide for the labourer's wants, to protect him against overwork, to shield him from ill-usage of all kinds and to secure to him a reasonable wage. The law before us therefore provides for all these things. A penal labour law and Government protection to the labourer are correlative terms, and it follows from the peculiar nature of a penal contract that it is absolutely necessary for the protection of the labourers who enter into such a contract to make it by law obligatory upon the employer to pay a reasonable wage for their services.

"When we speak of the interests of the tea-industry, we are accustomed to mean the interest of the proprietors of tea-gardens, of the share-holders of Companies, of the agents in Calcutta and London, and of the employers of labour; and this customary use of the expression is a true indication of the fact that we are too apt, not only in our language but also in our thought and actions, to contemplate the interests of the industry exclusively from the capitalist's point of view. And so it is not surprising to find that, in the somewhat stormy agitation which has taken place outside these walls regarding the rate of coolies' wages, the question has been looked at solely from the attitude of the capitalist. When an industry is carried on under normal conditions, when labour is free and wages are regulated by the ordinary laws of supply and demand, a claim for increase of wages, if one is made, is naturally put forward by the labourers themselves. If the claim is resisted, the labourers have their own remedy for endeavouring to enforce it. Trades-unions and strikes are the means by which the operatives of the West can make their power felt. Eventually a settlement is come to after discussion during which both parties have been heard. The Press is catholic enough to ventilate the case on both sides, and the sympathies of the public are as often with labour as with capital. But the circumstances now before us are very different. The labourers in Assam are an ignorant and voiceless community, and they have no organ to press their demands; while, on the other hand, the whole of society and all the newspapers of the British Press are pledged to the hilt in the defence of their own interests. The truth is that we are now confronted, in a very singular manner, with the old struggle between capital and labour: there is no need to comment on the energy and ability with which the capitalists are represented in this Council; but there is no Labour Member to argue the coolies' cause, and I have therefore felt it peculiarly incumbent upon me, as representative and Head of the Province concerned, to state the case on their behalf as temperately and completely as it is in my power to do.

"My Lord, I am not indifferent to the praise or blame of my own countrymen, and on the contrary I attach such value to their good opinion that it is with very

painful feelings that I have taken up a position which, for a time at least, has alienated from me their sympathy. I do not wish to vapour about a sense of duty, but in this Council at least it will be admitted that I am animated by a high sense of responsibility: I am not undertaking a pleasant or agreeable task: I am adding to the obloquy I have already incurred: but I am convinced of the justice of the cause and of the righteousness of the claim I have put forward on behalf of labour, and I apprehend that with the mass of facts, figures and reasoning I shall now lay before the Council I shall have little difficulty in persuading Hon'ble Members to agree with me that the raising of the Assam coolies' wage is a necessity which we are bound to face.

"By Act VI (B. C.) of 1865, a minimum monthly rate of wages was first fixed by the legislature. The rate so fixed 'after communication with persons who had a thorough acquaintance with the state of the labour-market in the Eastern Districts,' and which the Select Committee of that time were 'assured by those deeply interested in the cultivation of tea to be an equitable and reasonable minimum rate,' was Rs. 5 for male adults and Rs. 4 for females. This is the rate which prevails up to the present time. But the important point connected with the legislation of 1865, to which I invite the attention of the Council, is that the status of the labourer thereunder is that of a monthly labourer receiving a certain wage, which could not under any circumstances be reduced by the employer. It was only by order of the Protector of Immigrants or on conviction before a Magistrate that the labourer could receive less than the statutory rate. The object of prescribing a fixed wage was thus explained by the Select Committee in its Report on the Bill:—

'We think that such minimum rate should be fixed, not so much with reference to the amount of profit which a labourer, leaving his own district to labour for a term of years in one far distant, might reasonably and fairly expect to make, but rather with reference to the great practical difficulty which now exists in ensuring that the labourer really knows what rate of pay it is he is undertaking to contract for. At present he agrees to perform work according to a schedule of tasks, the real practical effect of which agreement neither he nor his employer is in a position to know. It has been found that the result of this is that under such agreement men who thought they were engaged for liberal wages have in fact received less than the wages ruling in the districts from which they were taken. Proceeding on this view of the matter we have fixed the rates mentioned in section 4, which, while interfering as little as possible with the economical law of supply and demand, will save the labourer from the possibility of making in his ignorance a contract which shall be a positive loss to him, even if it does not bring him to the very verge of starvation.'

"I have quoted these remarks because they are strictly applicable to the present situation. 'The practical difficulty in ensuring that the labourer really knows what rate of pay it is he is undertaking to contract for' still remains, and it has not been overcome by any subsequent legislation. It was met by the law of 1865, but that law was evaded and ignored. It was found in practice impossible to enforce the payment of a fixed wage, and, as one of my predecessors, Sir Steuart Bayley, reported in 1880:—'The alternative universally adopted, and, I may add, universally accepted by the Magistrates, is to have a fixed scale of *hazirí* or tasks, and payment is made, not by the day or hour but by the task.' This is the practice to which the legislators of 1865 had objected, but which they were powerless to stop. Accordingly by Act I of 1882, which is the present law, the practice was recognised and the payment of monthly wages is prescribed at the rate of Rs 5 and 4 for a completed task, and, when such task is not completed, provision is made for the payment of monthly wages calculated at the same rate in proportion to the amount of work actually done.

"I hope I have made it quite clear what the meaning of the legislature was when the present rates of Rs. 5 and 4 were first fixed in 1865, and what these rates have come to mean now. In 1865 the labourer was engaged on a monthly wage of Rs. 5. He might, and no doubt did, in many cases by overtime earn more, but he could not earn less than five rupees, and his employer could not, on account of his absence from work or laziness, reduce his wage below the statutory minimum. The rate was then, what it purported to be, a *minimum* rate.

Now, it is not too much to say that, excluding from consideration overtime payments, which are only earned by a certain number of labourers and which existed, though perhaps not to the same extent, under the old system, it is a *maximum* rate, for it is only by performing a full task for every working day in the month, without exception, that five rupees can be earned.

"It follows that under the operation of the Act of 1882 the status of the coolie has been practically altered to that of a daily labourer. That Act gave effect to the practice which was allowed to prevail generally—the old law and Government orders notwithstanding—with the tacit consent and approval of Assam District-officers. But the Act in giving legal sanction to this practice could not shake itself free from the old fiction of the monthly minimum, and obscured the effect of the change which it introduced by declaring that five rupees could only be earned by completing as many tasks as there were working days in the month, and by detailing the method of arriving at the number of working days in the month. This arrangement, so unnecessarily complicated and cumbrous, is reproduced in the present Bill, although the same result might have been arrived at in a more direct and intelligible manner by declaring specifically in section 5 the daily wages for each class of labourer. I urged in Select Committee that this change should be made and that a statutory minimum daily rate should be adopted in place of a monthly rate. I regret that this proposal was not accepted, for it is calculated to meet the difficulty of the Committee of 1865 by ensuring that the labourer shall really know what rate of pay he is going to get. A crucial objection to any system of fixed pay is that it is inevitably attended by much compulsion to work. It is not likely that planters who are required to pay a coolie irrespective of task will allow him to sit idle, and there is a risk of a sick or incapable coolie being bullied to work. The failure of the law of 1865 is not, therefore, a matter for much regret. What is wanted is a law which shall secure to the labourer the wages which he believes he will get when he enters into his contract. The Act of 1882 does not provide for this, and the Bill now before the Council does not provide for it. The labourer does not find, till he gets to his destination and begins to work, that he will not get five rupees a month or five rupees eight annas or six rupees, as the case may be, but he finds that he is paid at these rates according to a daily task, and that, unless he completes a full task every working day in the month, he will not get that wage. I do not hesitate to say that under the present system a tacit deception is practised when the terms of the contract are explained to an intending emigrant. He is induced to believe, and actually believes, that he will get a monthly salary, but he does not get it. My Lord, I endeavoured to persuade my colleagues in the Select Committee to agree to a daily rate of wage, which the labourer would have readily understood, in place of the monthly rate which he understands only so far that he is deceived by it; and I do not cease to deplore that I was unsuccessful in persuading them to adopt this amendment.

"I shall now show to the Council that the wages fixed for the labourer under the Act of 1865, even if he worked no overtime whatever, are higher than the average wages, including overtime, advances and sick allowances, actually earned in any of the past seventeen years by labourers under the Act of 1882. It will be wearisome to give the figures, but I shall proceed to do so. In the year 1883 a statement, based on Inspection Reports, was first included in the Provincial Annual Immigration Report, giving details of wages earned by Act and non-Act labourers in the various districts of the Province. In 1888 a statement was, in addition, first included in the Report, intended to show the wages earned in each district during the busy or manufacturing and during the slack or non-manufacturing seasons. The accuracy of the figures contained in these statements, which are obtained from the employers' accounts, is perhaps open to question, and there is reason to believe that the averages returned in recent years are in excess of the wages actually earned. Personally I share in these doubts, but, overstated as they probably are, I am willing to accept the figures as they stand. The following statement shows the

average wages earned throughout the province in each year since 1883, calculated from these two sets of figures :—

Statement showing Provincial average Wages of Tea-garden Coolies under Act I of 1882.

Years.	Average wages of Act coolies based on figures obtained during inspections of gardens.		Average wages of Act coolies, being the mean of wages earned during the manufacturing and non-manufacturing seasons.

"In paragraph 145 of the Special Report of 1890—this is the report to which our particular attention has been drawn by my Hon'ble friend Mr. Buckingham—it was pointed out that the calculation of average wages in the past had been vitiated by the neglect to include such items as advances, overtime, and sick allowances. To correct these errors and to ascertain exactly the average wages earned, returns showing the average wages earned in two months—one in the rains and one in the cold weather—in selected gardens in each subdivision were submitted for inclusion in the report of 1890. The statement will be found in paragraph 146 of the Special Report. I give the Provincial average for Act labourers, which was not struck in the statement:

	Rs. As. P.
Act men	4 3 8
Act women	3 7 5

"The returns of which this is the net result were prepared with special care and may be taken to accurately represent the wages of Act labourers ten years

ago. In recent years, advances, overtime and sick allowances are always included in the calculation of average wages, and the returns since 1890 are not open to the objections taken in paragraph 145 of the Special Report.

"I have quoted these figures with the definite object of showing that the average wages of labourers under Act I of 1882 have never reached what is euphemistically called the statutory minimum. These labourers draw less salary now than it was intended by the legislature of 1865 that they should receive. I now pass on to establish my next point, which is that there has occurred in recent years in Assam a general rise in the wages of unskilled labour, in which tea-garden coolies under penal contracts have not participated.

"I have already shown that the Act I labourer is in no sense a monthly but a daily labourer. It seems right, therefore, and here I entirely agree with the Hon'ble Mr. Buckingham, that, so far as the present question is concerned, regard should be had to daily and not to monthly wages. The two things are by no means the same, and fortunately comparison is facilitated by the fact that in the official returns daily wages are given. The following statement compiled from Provincial Administration Reports show for each district the daily wages of unskilled labourers for the past 26 years :—

"A rough examination of this statement is sufficient to show that a general rise has everywhere taken place, but, to make the figures more intelligible, I give for the Surma Valley which contains less than 10, and the Assam Valley which contains over 50, and for the four Upper Assam Valley districts which contain 90, per cent. of the Act population of the Province, the daily wages in each of the five quinquennial periods between 1874-1875 and 1898-99 :—

—	1874-75—1878-79.	1879-80—1883-84.	1884-85—1888-89.	1889-90—1893-94.	1894-95—1898-99.
1	2	3	4	5	6
	As.	As.	As.	As.	As.
Averages for—					
Surma Valley	4·8	5·8	5·0	5·3	5·7
Assam Valley	4·1	4·8	5·1	5·6	6·4
Four Upper Assam Valley districts (Darrang, Nowgong, Sibsagar and Lakhimpur).	4·3	5·1	5 5	5·8	6·3
All plains districts	4·28	5·0	5·06	5·5	6·2

"Adopting a useful device used by the Statistical Department, I repeat the last statement, denoting in each case the figure for the first quinquennial period by 100, with a view to illustrate the percentage of fluctuation in each case :

	1874-75—1878-79	1879-80—1883-84.	1884-85—1888-89.	1889-90—1893-94.	1894-95—1898-99.
1	2	3	4	5	6
Surma Valley	100	120	104	110	118
Assam Valley	100	117	124	136	156
Four Upper Assam Valley districts (Darrang, Nowgong, Sibsagar and Lakhimpur).	100	118	127	134	146
All plains districts	100	116	118	128	144

"It will be noticed that the general rise in Assam amounts on an average during the past twenty-five years to 44 per cent.

"I will now advance to the next step of my argument and show that the present average rate of wages paid to unskilled labour in Assam is more than double that of the wage prescribed by law for Act coolies. The present daily wages of an Act I labourer in a month of 26 working days amounts to three annas a day, and this is the rate at which all *hazíris* in the province are calculated. Denoting this daily rate at 100, I commend the following highly significant table to the consideration of the Council :—

			Annas.
Present daily wages of an Act I labourer		100	or 3·0
Average daily wages of an unskilled labourer during the quinquennial period 1894-95—1898-99 in	Cachar	162	5·0
Ditto	ditto Sylhet	208	6·4
Ditto	ditto Goalpara	149	4·6
Ditto	ditto Kamrup	267	8·2
Ditto	ditto Darrang	172	5·3
Ditto	ditto Nowgong	208	6·4
Ditto	ditto Sibsagar	192	5·9
Ditto	ditto Lakhimpur	254	7·8
Ditto	ditto the Surma Valley . . .	185	5·7
Ditto	ditto Assam Valley	208	6·4
Ditto	ditto four Upper Assam Valley districts	205	6·3
Ditto	ditto all plains districts . . .	201	6·2

"The average daily wage of an Act I labourer who does full tasks is three annas, the average daily wage of an unskilled labourer in Assam is a little over six annas or more than twice as much. These are the facts. They speak for themselves, and comment on them is superfluous.

"It is, indeed, obvious that the minimum statutory wage should not be lower than the average wage current for ordinary unskilled labour in the district in which the contracting labourer is to serve, due allowance being made for any additional expenditure imposed by law on the employer, which can properly be included in wages. I cannot admit that the cost of the medical and sanitary arrangements, which the Legislature requires to be provided for large bodies of coolies living in an unhealthy climate, should be included in wages. But such items of expense as the cost of free coolie lines and the cost of medicines and subsistence money or diet given to sick coolies may properly be included. When, however, these items are taken into account, they will in no way compensate the contract labourers for the fact that the rate of wages they receive is less than half the current market-rate.

"I will now allude to the cost of living in Assam and show that it has increased, notwithstanding the assertion of my Hon'ble friends to the contrary. They have not been able to furnish any authoritative figures on the subject, and I am not careful to disprove or dispute the statement that calicos and salt and probably tobacco and pepper are cheaper in 1899 than they were in 1882. I have had some difficulty in getting figures myself, and the only official statistics I have been able to procure in regard to the price of staples are those which refer to cleaned rice in ordinary use, to pulses in ordinary use and to wheat. A reference to the Bengal Administration Report of 1871-72, a year of normal prices, shows that the average price of rice in Assam was then 22 seers a rupee, of pulses 20 seers, and of wheat 20 seers. The average price now is approximately 12 seers for rice, 12 seers for pulses and 10 seers for wheat. It is true that employers are bound to supply rice to their Act labourers at the rate of three rupees a maund, which comes to about 13⅓ seers for a rupee; but the fact remains that in regard to these main staples of food the price has greatly risen. When the minimum was first fixed in 1865, it was the rule for employers to bind themselves to supply rice to their coolies at the rate of one rupee a maund. This was gradually relaxed to two rupees and then to two rupees eight annas, and it was in Sir George Campbell's time that the three-rupee rate was established. In any case, it is untrue to say that coolies under contract are not affected by fluctuations in the price of rice. The prescribed rate of R3 a maund is the maximum price at which employers are bound to supply rice when the market-price rises above that limit, but in most of the tea-districts it has until recently been below R3 a maund and coolies are left to make their own arrangements for their supply. It is in the Dibrugarh gardens only that the price of rice to the coolies has practically remained constant at R3 a maund. But it is among the Dibrugarh gardens, as I have ascertained by personal enquiry, that the objection of the employers to raising the rate of wages is comparatively slight. The rate of six rupees a month has already in the most important gardens of that district been accorded to the labourers employed therein.

"The rates of wages on Assam tea-gardens are sometimes compared with the rates current in the districts from which the tea-coolies are recruited; but this is not a fair comparison. Although wages may be low in the country of recruitment, they are not low in the vast field for labour in the vicinity thereof. Coolies from Chota Nagpur, Behar and the North-West and Central Provinces migrate in large numbers for work to Eastern Bengal, to Calcutta, and the districts near it, and look to these places for employment as much as to their native districts. They are in demand in the coal-mines of Raniganj, the jute-factories around Calcutta and at Narainganj, and the tea-gardens of the Duars, and it is not to be expected that they will willingly emigrate to Assam under a penal contract at a lower rate of wages than they can obtain by free labour so much nearer their homes. It is a truism applicable to all classes of workers in all parts of the world—as much to the Hon'ble Members of this Council as to tea-coolies—that they will expect a higher rate of wages far from home than when employed in or near to their own country.

"Upon the subject of wages earned at coal-mines in Bengal I cannot do better than quote paragraph 44 of the Report of the Labour Enquiry Commission of 1896. The Commission wrote :—

'From the experience already gained, there is but little doubt that on good mines a hard worker should earn his 8 to 10 annas a day cutting coal, and so far the average has been above that. At Gaurangdi 12 annas a day were being earned when the President visited the place. On some mines these amounts cannot be earned, but even on them a North-Western Provinces miner can earn three times the amount he would be able to get in his own country; and when the supply of labourers is at present less than the demand, miners will not stay unless they get good pay. What amount a coal-carrier would be able to earn it is difficult to say, and North-Western Provinces people are hardly likely to carry coal except as members of a gang, when they would of course share with the coal-cutters. Where coal-carriers are engaged separately, they generally earn from 3 to 6 annas a day.'

" From the statement furnished by the Jute Association, which is given in paragraph 101 of this Report, it appears that for 'general coolies' work at jute-mills the minimum rate of wages is Rs. 5 a month and the maximum Rs. 9 a month. For different kinds of work suitable for women the rates vary from Rs. 4-8 to Rs. 9 a month. The statement in Appendix O to this report, which is the only detailed information I can find, shows that wages at the Shamnagar jute-mill, which employs more than five thousand workmen, are higher than the above, the rates for 'general coolies' ranging from Rs. 6-8 to Rs. 9 a month. In Calcutta the wages of labour are usually paid at a daily rate which is certainly not less than four annas a day, and jungly coolies such as those required for Assam are, when engaged on a monthly salary, paid at not less than 9 rupees a month. With regard to the Duars tea-gardens, full information is supplied in the letter from the Deputy Commissioner, Mr. Forrest, dated 21st August, 1900, which is among the papers laid by the Bengal Government before the Council. He writes, 'the monthly rate for men's work (which is practically entirely confined to hoeing and pruning) is the same all over the district, *viz.*, Rs. 6 for a man who performs his *haziri* every day in the month except Sunday.' The rate for women, he explains, varies from Rs. 4 to Rs. 5. He adds that the supply of efficient labour is at present not equal to the demand, and that, although theoretically this state of things should lead to a gradual rise in wages, the fact that it has not yet done so is due to the imperfect mobility of coolie-labour, to combination among managers who are controlled by superintendents in charge of large concerns who regulate tasks and wages according to a uniform principle, and, lastly, to the all powerful influence of custom. 'It is the *dustoor*,' he writes, 'to pay Rs. 6 per month for a *haziri*, and the coolie accepts this as fair pay for his daily labour and is content.' In addition to this salary the coolies enjoy all the miscellaneous additional advantages which are allowed to a tea-coolie in Assam. Mr. Forrest writes, 'a coolie's minimum requirements are a good thatched house, free medicine, a fairly abundant supply of water, a sufficiency of fuel and a market close at hand; and he will not go to a garden where any of them are not complied with.' He does not get rice at three rupees a maund, but rice is cheaper in Jalpaiguri than in the Assam Valley, and coolies are able to procure rice without the intervention of the planter at a lower price than three rupees a maund.

" My Lord, these are the wages which a jungly coolie is able to command in Bengal without the paralysing condition of a penal contract in a distant province for a term of years. The contract labourer who is expected to serve for five rupees a month in Assam as an *adscriptus glebæ* is able to earn from six to ten rupees a month in service as a free man much nearer to his home. I should be justified in declaring that for this reason alone the minimum rate of wage prescribed by the present law should be raised. But I can go further. This minimum rate has never been sufficient to procure suitable labour for the Assam tea districts. So long ago as the 27th December, 1868, the then Lieutenant-Governor of Bengal, Sir William Grey, wrote :—'The simple fact is that the wages * * * are not sufficient to induce people who are in good circumstances to run the risks of emigration in order to secure them. It is perfectly clear that the wages paid will not tempt in ordinary years and for a continuance anything like first class labourers.' What was true more than

thirty years ago is now more true than ever. I have long since found it impossible to avoid the conclusion that the inadequate rate of wages offered is the principal, if indeed it is not the sole, cause of the difficulty of obtaining labour which has resulted in such a keen competition for labourers and in the enormous premia paid to labour-contractors. Coolies of good physique and constitution, willing to emigrate to Assam under a penal contract, are not to be obtained in the labour-market at the present rates, and, to meet the demand, contractors are compelled to search far and wide for people who are in such a state of destitution that they are prepared to emigrate on any terms as a last resource. Men and women who owing to bad health or idle or dissolute habits have failed to make a living in their native districts, beggars collected in towns of Bihar and the Central and North-Western Provinces, are swept together and sent up to the tea-gardens of Assam, where for a year or two at least they will not do a full day's work but will only be an expense and burthen to their employers and swell the returns of sickness and mortality. The recruiter or *arkati* lies in wait for wives who have quarrelled with their husbands, young people who have left their homes in search of adventure, insolvent peasants escaping from their creditors. In carrying on his business he has to display considerable activity and resource; he has to incur unpopularity and even physical danger; he must bribe chaukidars, police underlings and zamindari servants. Occasionally he brings himself within the meshes of the criminal law. When unsuitable coolies are recruited their names and castes are changed before they are sent up to the labour-districts; and if his frauds are discovered or any irregularity in the recruitment is brought to light, the contractor is liable to have the coolies returned on his hands. It is not surprising that for such difficult and risky work the contractor demands a high rate of remuneration which the keen demand for labour enables him to obtain.

"There is indeed a regularly established business of 'buying and selling' labour, and employers now pay for every labourer recruited under penal contract a sum varying from Rs. 120 to 150, whereas a quarter of a century ago they paid for the same class of coolie about Rs. 50 or 60. The difference in price, or on an average about Rs. 80 for a coolie, represents the increased cost now incurred by the tea-industry in procuring labour. The average number of Act I labourers imported by contractors into Assam during the five years from 1895 to 1899 inclusive is 16,093, and at a cost of Rs. 80 per head the average annual net increased loss to the industry during this period has been nearly 13 lakhs of rupees. This money has filled the pockets of an army of middlemen—agents, contractors, *duffadars* and *arkatis*. It is money which would not have been spent if the rate of wages offered were as sufficient to secure suitable labour as it was twenty-five years ago. The rate was notoriously insufficient then, and it is by the measure of this difference the more insufficient now. The total annual loss incurred by the tea-industry on account of these buying and selling transactions, which are so objectionable on other grounds, cannot be estimated at less than 16 lakhs of rupees.

"These transactions are a great curse to the recruiting districts. In too many instances the subordinate recruiting agents resort to criminal means, inducing their victims by misrepresentation or by threats to accompany them to a contractor's depôt or railway-station where they are spirited away before their absence has been noticed by their friends or relations. The records of the Criminal Courts teem with instances of fraud, abduction of married women and young persons, wrongful confinement, intimidation, and actual violence—in fact a tale of crime and outrage which would arouse a storm of public indignation in any civilised country. In India the facts are left to be recorded without notice by a few officials and missionaries. I would refer those who are curious in this matter to the reports of my late lamented friend, Mr. Grimley, who was for six years Commissioner of Chota Nagpur, and to the note of the Reverend Father Hoffman, which was submitted to His Honour the Lieutenant-Governor of Bengal in 1899.

"Upon the tea-industry of Assam the effects of the system are, if possible, even more disastrous. They are seen in the appalling rate of mortality among contract labourers, which is due to the importation of unsuitable labour and to insufficient feeding, the result of inadequate wages; in the frequent desertions;

in the wretched worn out and diseased coolies who find a miserable end in the public hospitals or by the way side. The importation of a bad and even of the worst class of labour has always been a great practical difficulty with the tea-industry, and it augments year by year. It is the principal cause of the excessive mortality among Act labourers in Assam, which during the past thirteen years from 1887 to 1899, inclusive, has averaged 53·2 per thousand. It must be remembered that this is the mortality among adults in the prime of life. It amounts to what would be considered a very heavy mortality if all ages were included. It is at least twice as much as it would be if the rate of wages were sufficient to enable the employers to reject all but healthy labourers. I have examined the rate of mortality during the year 1899 for the whole province of Assam among persons from 15 to 40 years of age, and find that it amounts as nearly as possible to 24 per thousand. The rate of mortality among Act coolies is therefore quite double that of the mortality among the general population. In regard to the death-rate among prisoners in jail, the Hon'ble Mr. Buckingham will be glad to hear that, whatever the sad mortality may have been in former years, it has fallen in the past year, 1900, to 23 per thousand. The total average mortality among Act labourers in the Province during the past thirteen years has been 6,175. If half of these could have been maintained alive, an annual saving at the estimated rate of Rs. 130 per head, amounting to Rs. 4,01,310, would have been effected. Apart from all considerations of humanity, the industry is thus a heavy loser from paying wages on a scale which is insufficient to attract strong and healthy labourers.

"My Lord, this is the real canker that is eating at the vitals of the tea-industry. One of the most important principles of the present Bill is to encourage sardari recruiting and to discourage recruiting through contractors. This is a most sound principle and it meets with my hearty concurrence. It means that recruiters should be labourers employed on the estate, who are sent down by their employers to their own country to recruit among their own people and near their own homes where they are known, who are understood and trusted by those among whom they operate, and who are able to explain fully to them the circumstances and conditions of labour on the garden from which they come. Such men are able to certify that the garden is a healthy one, that the coolies are well treated, that their tasks are light, and that they can easily earn overtime money in addition to the legal wages under their contracts. This would indeed be an ideal state of things, and if all recruiting were carried on in this way there would be little or no necessity for special legislation. But unfortunately recruiting is not, and cannot, so long as the present rates of wages continue, be carried on in this way. It is only in years of scarcity in the recruiting districts that even well-managed gardens are able to recruit coolies of a good class through garden-sardars at present rates, and it is only a very small number of employers who are able to recruit all the coolies they require through garden-sardars. The late Mr. Huttman, who was for thirty years or more the Superintendent of the important Jorhat Tea Company, wrote in 1890: 'Now-a-days we have to send away 100 sardars for 300 or 400 coolies required. Formerly we calculated on getting 15 to 20 coolies for each sardar.' When Mr. Huttman was a young man, the rate of wages was more adequate than it is now, and sardars were able to return from the recruiting districts with 15 or 20 men apiece. Those halcyon days, alas! are gone. In 1890 garden-sardars were able on an average to bring only four or five recruits apiece. But since then things have gone from bad to worse, and I find from the last report which has been submitted to Your Excellency's Government that in 1899 the average number of recruits per sardar amounted to only 1·4. How often have I not seen for myself on the river steamers sardars returning to their employers empty handed! 'Why have you not brought recruits?' I ask. 'What could I do, Sahib?' is the reply,' the harvest is good and no one will come.' It is the old story that the wages are insufficient. During the year 1899, 5,411 garden-sardars were sent from Assam into the recruiting districts and they brought back with them only 7,571 coolies. The number of contractors' coolies imported in the same year was also below the average, but it amounted to 11,065. The official explanation is: 'this was due not to a decreased demand for labour, but to the difficulty of ob-

taining coolies during a year of plenty in the recruiting districts.' In other words, the wages offered were insufficient to attract recruits. During the past year the influence of famine had made itself felt, and a great stimulus has been offered to recruiting. But even so the supply of labour has not been equal to the demand for it, and the Hon'ble Members who represent the tea-industry on this Council are, if possible, even more alive than I am myself to the fact that there is a grave deficiency in the supply of labour to the province. My Lord, it is generally unwise to venture on prophecy, but I do not think I am betraying myself in a moment of indiscretion when I say from my seat in this Council that the well-considered and well-intentioned provisions of the Bill before us are not calculated to facilitate the importation of labour into Assam. That has been our object, but it will not be attained until a reasonable market-rate of wage is offered to Assam coolies. Until that is done, and our present Bill does not do it, sardari recruiting will be no more successful in the future, except during a famine year, than it has been in the past, and it will always be necessary to buy coolies, the very scum and riffraff of the labour-market, at an extravagant and, I fear, increasing price which, with such difficult and risky work as the crimping of labour involves, will always be demanded by the contractor. No one knows this better than the employers themselves; and there was remarkable evidence to this effect in the speeches of Messrs. Ashton and Hart at the recent special meeting of the Tea Association on the 22nd of February, when it was urged that this Bill would not reduce the cost of importing coolies and that the planters would still have to bribe recruiters and police-officers and village-chaukidars to obtain recruits.

"The question may be asked, why it is that, if the market-rate of wages and the demand for labourers have increased, the wages of tea-garden coolies have not also increased, and why it is that the rates of premium paid to contractors have enormously increased instead. Now, I have already been told, as is perhaps natural enough, that the planters know their own interest better than I do, and that it is their own look-out if they prefer to pay their money to middlemen rather than to their coolies, and to lose their labourers by death and sickness and desertion rather than pay wages which will secure the service of healthy and contented employés. But, when the issue is set up in this form, it is impossible for the Government to look on with unconcern, and I cannot forget that one of the highest duties imposed upon me as Head of the Administration is to protect against their employers these very labourers who are entrusted into their hands with all the rigours of a penal contract for a term of years. I altogether repudiate the contention that the rate of wages is no concern of mine. I am aware, however, that the ordinary principles of political economy have very little application to the question, and that the real answer is to be found in the peculiar conditions of the tea-industry. Wages in Assam tea-gardens, having been fixed at the outset at the minimum statutory rates, which were then comparatively high rates, have been kept from increasing by concerted action among employers. I think it may be said that in all avenues of business employers combine as much as they can to keep down wages: that is one of the normal points of antagonism between capital and labour; but in the Assam tea-industry such combination is exceptionally strong and effective, not only because the labourers are very ignorant and helpless, but also because, being bound by a penal contract, they are unable, as operatives are elsewhere, to strike for an increase of wages. If they were to strike, they would be sent to prison. On the other hand, a rise of wages has not yet been forced on employers by the impossibility of obtaining labourers at the old rates. Contractors still continue to supply labour at those rates, but they do so with increasing difficulty and risk for which they are compensated by a rise in the price of coolies, while, at the same time, the quality of the labour has perceptibly diminished. The question how much longer contractors will be able to supply coolies at the old rate of wages is another matter, but it is evident that there must be a limit beyond which employers cannot allow the price of coolies to rise and a limit below which they cannot allow deterioration to fall. The legislature has now stepped in and is proposing some amelioration in the rate of wages. In my opinion we are not going far enough, but we are at least

preparing an unwilling industry for a further increase in the rate which, in a short time, will become inevitable.

"I have often heard it said, but I regard it as a mere utterance of despair, that an increase in the rate of wages will not improve the quality of labour. That it will do so I conceive to be a truism which admits of no serious discussion; and I presume that the same argument which is held to be applicable to the highest officers of State—the argument which was brought forward by the Chamber of Commerce for increasing the salaries of the Judges of the High Court of Judicature for instance—will equally apply to the raising of the wages of labour in the humblest sphere of life.

"My Lord, I wrote in my note on clause 5 of the Bill, which, with Your Excellency's permission, has been annexed to the Report of the Select Committee, that I was expressing myself with studious moderation when I said that I believed that one of the causes of the heavy mortality among Act coolies was that they did not always receive a living wage. To that remark the strongest exception has been taken, and I have been severely criticised for making it; but I did not write those words without a due sense of responsibility, and I shall now proceed to prove them to the letter. It is not an uncommon experience of Inspectors to report regarding tea-gardens where the coolies have an underfed and anœmic appearance, where the death-rate is high, and where desertions are numerous, indicating discontent among the labour-force, that the chief cause for this unsatisfactory state of things is the insufficiency of wages In tea, as in every other great industry, there are a number of concerns which, owing to one cause or another, are not prosperous and which are carried on with difficulty, yielding little or no profit; and in such cases there is the strongest temptation to the manager to effect a short-sighted economy by increasing tasks and cutting down wages. I am not careful to ransack the records of the Assam Secretariat to obtain evidence of bad cases, but I think I shall not be deemed to have adopted an ungenerous or unreasonable course if I fall back on proof in support of my statement from cases which have come to my official notice during my present stay in Calcutta as a Member of Your Lordship's Council. I will not mention names or places, but will refer only to districts from which the cases are reported. I will add also, to avoid misconception, that these reports are submitted by District-officers in the ordinary course of their official duties, that they have not been specially called for by me in any way, and that they might be paralleled by similar reports received by me during any period of any administration.

"My first case comes from Cachar. The Magistrate reports that the Act I wages returned from January to June last year are 'absurdly low,' especially those for women in June, *viz.*, Rs. 1-12-3 only. He found that one woman who turned out to work every day in June earned only Rs. 2-4-3, while in no case was a higher wage than Rs. 2-10-0 earned in that month. The highest wages earned by Act coolies during the year were in September, when Rs. 3-6-9 were earned by the men and Rs. 3-6-7 by the women. It is stated that these low wages were not due to the coolies being new to the work, inasmuch as they had all of them been on the garden over two years. The Magistrate adds, 'after careful enquiry I do not think it would be fair to the garden to reduce the schedule of work which is not at all an excessive one,' and it is said that non-Act coolies on this garden are drawing fair wages on the same tasks. The only explanation of this state of things is that 'Act I coolies are of a most inferior stamp, mostly from the Central Provinces.'

"My next case is from the Dibrughar District. Here the Civil Surgeon had been out to inspect an unhealthy garden—this means a garden, in which the mortality had exceeded 7 per cent.—and he reports that sixty or seventy per cent. of the force were anœmic and weedy, and that, in concert with the Civil Medical Officer employed on behalf of the tea-garden' he had repatriated 45 labourers then and there. The cause of this was bad recruitment. He writes, 'I found Telis, Napits, Halwais, Muhammadans and others sent up as Gonds.' He reports also that there were many illegal advances debited against coolies and deducted from their wages, 'including 12 cases in which rewards were paid for deserters recovered.' This is an illegal practice. When labourers desert their

employers naturally adopt every means to recover them and are in the habit of paying five rupees or more to the garden chaukidar, to the ferry-man who may intercept them, or to any one who may bring them back. There is no impropriety in this, but it has become an outrageous custom to debit this reward as an advance against the recovered labourer and to deduct it from his wages until the amount is paid.

"I come now to the Sibsagar District. The Civil Surgeon in this case had gone out to inspect an unhealthy garden where the mortality had varied for two or three years from 132 to 65 per thousand. I quote his remarks in full, for they are worth quoting. He writes :—

'Heavy mortality seemed to have been due to inferior coolies having been sent up when first class coolies were orderd. I am informed by the manager that many of these coolies were actually taken from Calcutta slums. I actually found a few natives of Howrah amongst them. Efficient coolies can never be made from such people, especially in a newly-opened garden. There was better recruitment later on, and the coolies who are now on the garden may almost be described as survivals of the fittest. The manager has evidently tried his best in the matter of procuring suitable coolies : on one occasion he had to send back, *i. e*, refuse to take delivery of, a whole batch of 22 adults who were unfit for any class of garden-labour. The coolies in the garden, such as they are, are taken good care of,' &c., &c.

"No case could afford clearer evidence than this of the insufficiency of the present statutory rate of wages to attract suitable labourers, and of the terrible mortality which results among the half-starved refuse of the labour-population who are sent up in their place.

"I turn to a Tezpur case. I received some time ago a pathetic petition which purported to come from the coolies of a tea-estate, who declared that they 'had executed contracts under the impression that they were serving the Maharani,' and made a complaint of continuous gross and systematic ill-usage on the part of the proprietor who was also manager of the garden. It has now been officially ascertained that the deaths occurring on the estate were systematically unreported—being entered as desertions—and, in spite of this, the recorded death-rate among all coolies for 1899 was 207 per thousand, and for 1900 it was 112 per thousand. I am afraid that the facts of the complaint are substantially true, and that the whole case illustrates the deplorable results of the power which the Act gives to an unscrupulous manager over his coolies. The culprit in this case has left Tezpur, but the management of the estate is, I fear, still open to exception, and this is another gross case of under-payment of the labour-force, oppression and consequent mortality among tea-coolies.

"I come back to another Sibsagar case in which the Civil Surgeon is again reporting on an unhealthy garden. It is a peculiarly instructive case, for it illustrates the manner in which coolies' wages are cut and the labourers are brought down to starvation point. The Civil Surgeon writes :—

'Out of 95 Act women, 74 actually owe the garden from Rs. 33 to smaller sums, or on an average of well over 10 rupees each for the whole female Act force. The amount owing by the women comes to Rs. 1,036. Out of 35 Act men, 19 owe the garden Rs. 155 between them, or on an average of Rs. 4-8 each for the whole number. These advances have been carried on from month to month, from periods which could not be traced : had it been only a few people owing money, the matter could possibly be got at, but 78 per cent. of the women and 54 per cent. of the men owe various amounts.

'The way these advances accumulated was during periods of sickness. No half haziris, or subsistence allowances, were credited or given, and the coolies were practically charged for the food they consumed while sick. This of course was exceedingly irregular, but I am glad to state that this has not occurred during the present management.

'Another item I noticed which I consider irregular if not quite illegal. If a coolie absconds and is brought back by the garden-chaukidar, a sum of Rs. 5 is debited against the absconder as a cash advance and is paid to the person who brings him back.'

"Of course the practice is illegal, but, as I have said before, I have reason to believe that it is a common one. It appears there had been 25 desertions from this garden during the year up to the date of the Civil Surgeon's inspection on the 30th of November.

"I come now to what is probably the worst of the cases which have been lately before me, and I must say that it is an unusually bad case. It comes also

from the Sibsagar District. The Deputy Commissioner made an inspection on the 28th of July last, when he reported as follows :—

'The price of feeding sick coolies varies from Rs. 2-4 to Rs. 3 a month, which is put down as an advance against the coolie and deducted from his pay. This is the usual system on gardens, but in a well-managed garden the manager always sees that a coolie unable to cover his expenses at the hotel by his work gets a certain amount of money paid him at the end of the month for petty luxuries, etc. Here, however, this is not done, and I found cases where coolies had not received any money for some months. The result is that they are absolutely beggared and cannot buy clothes, oil, etc., and they go from bad to worse. When a coolie gets very bad, and there is little chance of getting any work out of him, he is "discharged by mutual consent." This, the manager explained, means that he is told that he must either work or clear out. Being *ex hypothesi* unable to work, he clears out. I met some of these people: they were absolutely destitute, but did not want to go back.'

"The Deputy Commissioner then cites special cases, of which I give an abstract. One Joharu was debited with Rs. 8-1 as the cost of feeding at the hotel for three months, during which he earned only nominal wages, not a pice of which was paid to him, and he was then 'discharged by mutual consent.' One Kanhai was debited with Rs. 10-12-6, and one Dulan with Rs. 17-10-3 and both were eventually discharged in the same way without receiving any wages. One Somer was debited with Rs. 15-2, made up of advances for food, and of a sum of five rupees reward to a person who caught him when absconding. No money was paid to him for four months. Upon receipt of this report I ordered a committee to enquire into the condition of the garden. That committee sat on the 31st December last, and I will read the following extract from their report :—

'The condition of affairs on the garden is, in the opinion of both the Deputy Commissioner and Civil Surgeon, disgraceful. The average wages for the best part of this year work out to a little over half the statutory rate. Many of the coolies were in rags. From the nature of the work, which is principally hoeing—at the best of times severe labour—coolies especially women, would have to work very hard to earn a full haziri, and a glance at the haziri books will shew that it seems almost impossible for a great number of men and women to be able to earn anything like a full day's pay. The number of fractional haziris far exceed the full ones. The committee do not propose quoting individual cases in the matter of wages, as they would have, in all probability, to quote such a large number. For this reason the haziri books are sent and cases which are noteworthy are marked with a blue pencil.'

"I regret that this *hazira* book or labour-register did not reach me until after the deliberations of the Select Committee on the subject of coolies' wages had closed. But I have now brought this book to Council with me—it lies on the table and is open to inspection—and with Your Excellency's permission I will indulge in a running commentary on its contents. I begin with the month of June, 1899, when I find that the Civil Surgeon observes: 'From this month it may be noticed that a system of quarter haziris seems to have been started. This means that because the manager decides that only a quarter task has been done, only a quarter of a full day's salary is to be paid. For a quarter haziri, therefore, a coolie draws a daily salary of three pice only. Talk of a living wage, indeed! I trust for the honour of the industry that this is not a common practice in tea-gardens, but I cannot say that it is absolutely illegal, and Hon'ble Members can see for themselves how it is applied in one garden in Assam. The Civil Surgeon writes of this month: 'Not a single woman on this page has earned a full month's pay, and on the next two pages: 'Not a single full month's pay earned.' For July he points out that 'fractional haziris preponderate in this month,' and that not a single full wage has been earned by men and only one by a woman. During this month I detect no less than 5 cases in which 5 rupees have been debited as an advance against deserters who had been recovered. For August the Civil Surgeon draws attention to the number of sick cases who are not credited, as they should have been, with sick or half haziris. There is not a single full wage earned, and I find 4 cases in which deserters have been debited with an advance of 5 rupees. I note that pregnant women are allowed nothing when absent from their work. In September I note that the Civil Surgeon, whose honest indignation is rising as he goes

on, comments against the name of an unfortunate wretch who is entered as 'dead,' who had received no wages and had a large advance debited against him on account of his subsistence while sick,—'Better off'! Aye! Better off indeed! Better dead than slowly dying of starvation! There are only two full wages earned this month, and I am mistaken if these were not earned by the syces of the manager. There are three sick coolies entered as absconded against whom the Civil Surgeon enters large queries, and he implies that they are dead, but have been entered as absconded—in the way we saw followed in the Tezpur case—to reduce the rate of mortality. There are apparently six recovered deserters against whom 5 rupees advance has been debited in each case. In October there are no full wages earned by coolies employed on the garden, but I find that among the coolies a full haziri was earned by a dâk-wallah, a syce and a cook. There are two miserable sick coolies this month who are 'discharged,' that is to say, as the Civil Surgeon bluntly puts it, 'turned out to die.' There are 9 cases in which 5, 6 or 7 rupees, as the case may be, are entered as an advance against a recovered absconder. In November the only coolies who earned full pay are a dâk-wallah, a herdman and a cook. One sick coolie is discharged, or 'turned out to die;' in seven cases 5 rupees are entered as an advance against a recovered absconder. In December there is another sick coolie discharged 'to die on the road,' and no coolies, except servants, earned a full month's pay. In January some full months' wages were earned, but nobody got as much as five rupees, as old advances on account of deserting and feeding were cut from wages. There were six more deserters with the usual advance of five rupees against them this month. And so the sickening tale goes on. My Lord, I have said enough. Have I not proved my assertion to the letter? Do I not well to be angry? I confess that my blood boils at this recitation of misery and wrong, and I shall be surprised if I do not carry with me the sympathies and have not roused also the indignation of Your Lordship and of the Hon'ble Members of this Council.

"I do not wish it to be understood that these are ordinary cases. I trust and believe that they are very exceptional cases, and I should be conveying a very false impression to this Council if I did not state distinctly that, in the great majority of tea-gardens in Assam, the coolies are well cared for and that the managers of gardens are ordinarily humane and kindly hearted gentlemen. All the gardens I have personally visited in Assam are of this type. But reports on bad gardens are submitted to me in the course of business, and it is with reference to the standard prevailing on bad gardens that our legislation has to be framed. It is the duty of the Government and of the Council to remember this in deciding upon the character of the legislation we are bound to follow.

"I observe that the objection taken by the majority of the Select Committee to the increase in the rate of wages proposed in the Bill originally introduced into this Council is that, if it were adopted, it would impose an excessive burden on employers. Now I do not deny that it would impose some burden. But it was never contemplated, when minimum rates were first imposed, that they should be fixed for ever, and I have certainly failed in my endeavours to convince the Council if I have not shewn that a heavy weight of moral responsibility will rest upon the Legislature if it does not intervene to remedy the crying evils I have described. Those evils, which are simply strangling the tea-industry, all hinge upon this question of the insufficiency of wage. I admit, and no one can be more sorry than I am, that in other directions the industry has fallen upon evil times. The present tea crisis, as it is called, is attributed to over-production. Now it is true that there has been, and still is, over-production. Tea-planters everywhere are suffering from this cause, and the fall in the price of tea is a very serious matter to proprietors and share-holders. It is probably not so serious as the fall in prices would seem to indicate. Profits can now be made at prices which a few years ago would have been deemed impossible, and I am afraid that the extension of cultivation is not likely to cease in places where tea can be produced at a cost of less than two annas a pound and the outturn is about twelve or fourteen maunds per acre. The dividends of good gardens have, no doubt, greatly diminished, but it can hardly have been expected that they would keep up to a level of

20 or 25 per cent. These large profits of a few years ago are one of the principal causes which have led to over-production. New gardens have been over-capitalised and must work at a loss. In any case, however, the present crisis is not to be compared to the crisis in the sixties which was due to speculation. The industry recovered from that blow, and it will recover from over-production also, as other industries have done which have been stricken by the same cause. The crisis from over-production will pass away as new markets are opened out and the supply learns to adapt itself to the demand. There is nothing to interfere with the operation of the laws of political economy or to deny them their free scope in this direction. I could wish indeed that this crisis were not synchronous with the growth to a climax of the far more deeply-seated and dangerous evils on which I have dilated and which have their poisonous root in the heart of the industry. But these evils have been growing up for a long time, and nothing will remedy them but an increase in the wages of labour. It is certain that there are some tea-concerns which, owing either to mismanagement, or the inferior productive capacity of their estates, or undue inflation of their capital by speculation, are unable to earn a dividend for their shareholders by legitimate means and eke out a precarious existence by exacting from their labourers the maximum of toil for the minimum of wage at the cost of untold misery, suffering and loss of life. To such moribund undertakings an increase of the minimum rate of wage might give the *coup de grace*. But there can be little doubt that the effect of such a measure on the majority of tea-estates which rest upon a sounder basis will be to meet the increase of wages by a corresponding saving from the excessive burdens which are now placed on employers, such as the heavy cost of purchasing coolies and the heavy cost of avoidable mortality, which are directly due to the payment of an inadequate wage. I repeat, moreover, as I have said all along, that there is no reason why, with a suitable adjustment of tasks, the increase of wages should involve any increase of expenditure in the majority of gardens where the coolies are now well treated and contented. I do not anticipate that there would be any practical change in the condition of the labour-force on gardens where the tasks are at present light and the wages, including overtime payments, are already sufficient. The proposed increase in the statutory minimum rate of wages is not likely to produce any effect upon the first-class labourers who make and will continue to make large profits from over-time work, and it would not in itself, unless accompanied by the reduction in the rate of tasks which the Bill now before the Council enjoins, produce any effect on newly-arrived coolies who are unable to do a full day's work, but it will immensely benefit the great mass of labourers who are content to, and can, perform the present task and will, therefore get through a slightly augmented task in return for higher wages, but will, as they do now, get little or nothing from over-time. I have been told that the raising of task-rates in proportion to the increase in wages would be a matter of difficulty, that it would cause inconvenience and not be understood by the coolies, and that it would upset the labour-force and cause discontent. To this I reply, that all industries must expect to be liable to some occasional disturbance in respect of wages, but that, although some inconvenience will no doubt be caused by an alteration of task-rates, there is no reason to suppose that it would be serious. Task-rates are not uniformly or rigidly laid down. They vary from garden to garden and from time to time, in some cases from day to day and from one part of a garden to another, under conditions and circumstances which are constantly changing. There is an elasticity in the system which lends itself to a modification in the rates with the minimum of disturbance.

"My Lord, I have now done. I have stated my case with a degree of elaboration which I am afraid has fatigued the Council. I thank Your Lordship and Hon'ble Members for the patience with which you have heard me. I regret that the increase in the rate of wages, which was proposed in the Bill as introduced before the Council, has been withdrawn, but I trust and am confident that the amendment of my Hon'ble friend opposite, which does not accept even the modified increase contained in the Bill now presented by the Select Committee, will be rejected by a decisive majority."

The Hon'ble SIR ALLAN ARTHUR said:—"My Lord, it is with the strongest

conviction that an increase in the minimum wage is unnecessary, and if imposed will deal a severe blow to the tea-industry, that I support the Hon'ble Mr. Buckingham's amendment. During the discussion on the raising of the minimum wage in Select Committee, a remark was made by one of the official Members of Council, which seems to me to go to the root of the whole question. The remark was in the form of a query, and was to this effect :— 'Are we not killing the goose that lays the golden egg?' I regret that the Select Committee should have answered the query in the negative: and I will endeavour to show where, in my opinion, they were wrong.

"The Hon'ble Mr. Buckingham has dealt so fully with the question of the present prices of food-stuffs in Assam as compared with price years ago, and with the other question as to whether the minimum wage is or is not a mere living wage, that I will not attempt to add much to what he has said on these points.

"The evidence which has been placed before the Council in regard to them is of a very conflicting character, and I admit that Hon'ble Members who have no actual knowledge of the subject cannot find it altogether easy to come to a decision as to which of the two sides is right. On the one side we have some of the official advisers of the Government strongly recommending the raising of the minimum wage on the ground that it is absolutely necessary. On the other side we have the tea-planters strongly opposing any change. The first named, with the exception of the Chief Commissioner of Assam and the few Assam officials who support him, may be called non-expert witnesses ; but they are entirely unbiassed. The second named are expert witnesses, dealing with the labourer every day of their lives; but they cannot be called altogether unbiassed, because their pockets will be affected by the change. If the matter rested there, the Council would have to decide between official opinion and non-official opinion. But a consideration that strikes me as very much in favour of the planter's contention is that on his side is ranged a very large number of Assam officials, who are entirely unbiassed, who have thoroughly studied the question, and who do not admit the necessity of an increase in the minimum wage. In numbers they greatly exceed those officials who support the Hon'ble Mr. Cotton ; they include the Commissioner of Assam, than whom there is no greater student of the coolie question in the Province. And they are supported by no less an authority than His Honour the Lieutenant-Governor of Bengal, who in a letter to the Government of India, a précis of which was placed before the Select Committee, showed, if I do not mistake His Honour's words, that in his opinion the case for an increase in the wage had not been substantiated. That the number of Assam officials who oppose the increase is greater than the number who support it is a point in favour of the planter which has weighed with me in considering the question, and which I cannot help thinking must also weigh with the Members of this Council.

"Another point which appears to me to be in favour of the planter is this. The tea-planter is not a fool. Every labourer imported into Assam costs him at least Rs. 100, and what I would submit to the Council is this : is it likely that a hard-headed man of business, such as the tea-planter is, will not do everything in his power to keep the labourer, who has cost him so much money to import, in good health and in good circumstances, much less to give him a wage on which he will starve? If it were necessary in the interests of the labourer that he should receive a higher wage, the planter in his own interests, because the labourer has cost him so much, would surely be the first person to raise the wage. A business man is not so blind to his own interests as not to do what is obviously necessary, and it does not require a legislative enactment to compel him to look after his own interests.

"These points seem to me to be very much in favour of the planter's case, but there are other general considerations which bear on the question, and which I should like to lay before the Council.

"When the Government of India decided to close the Mints to the free coinage of silver and to fix and maintain the rate of exchange at 1*s.* 4*d.*, it was generally recognised—and I think the Currency Committee recognised it—that the tea-industry, for at all events a certain time, would be very adversely affected. The effects of the raising of the rate of exchange are now only too

apparent, and the tea-industry has suffered far more severely than anyone ever anticipated. The economic effect of a rise in the exchange of a country (Indian exchange between 1893 and 1900 rose from below 1*s.* 1*d* to over 1*s.* 4*d.*) is to lower, or at all events to arrest a rise in, wages. If exchange had gone on tumbling down, the ultimate result must have been a rise in wages, and the planter would have had to face this; but with the fixing of the rupee at 1*s.* 4*d.* he had the consolation of knowing, or at all events of hoping, that whatever other disadvantages he might have to face from the raising of the rupee, a rise in wages was not one of them. He did not count on the Government nullifying the economic effect of their currency policy by arbitrarily raising the wages of his employés. He did not think it possible that after dealing a severe blow at the tea-industry by fixing the rupee at 1*s.* 4*d.* the Government of India would deal a second blow by raising the wages of the labourer. But this is what is proposed, and in view of the fact that I have named, *viz.*, that the effect of raising the exchange of a country is to reduce, or at all events to check a rise in, wages, the proposal to raise the wage seems to me to imply that one department of the Government of India is not recognizing what another department is doing or has done; or, in other words, the Government is giving with one hand and taking away with another.

"I now come to another point, *viz.*, the prices of tea and the rate of exchange during the last few years, and I give these in a tabulated form:—

	Tea.	Exchange.	Rupee equivalent	
	d.		As.	pies.
1893-94	8·75	1-3 5/16	9	1½
1894-95	9·75	1-1 ½	11	6½
1895-96	8·75	1-1 3/32	10	5¼
1896-97	9	1-2 1/32	9	11¼
1897-98	8 64	1-3 3/32	8	11½
1898-99	8·78	1-4	8	9¼
1899-1900	8·23	1-4 5/16	8	1½
1900-1901 to 15th Feb.	7·32	1-4 ½	7	3

"The rates taken for tea are the average sterling prices at which the crops of each year have been sold in London, and are converted into rupees at an exchange on the basis of ⅛*d.* above the annual average of the bank's selling rates for on demand drafts. It was in 1896 that the Hon'ble Mr. Cotton first proposed an increase in the minimum wage. As my figures show, the rupee rate per pound in 1896 was 9 annas 11¼ pies, and tea-gardens generally were doing well. If the Hon'ble Mr. Cotton in a year such as 1896 had argued that it was only right that the coolie should share in the prosperity of the tea-planter, his case would have been a stronger one. But circumstances today are entirely different; the rupee rate at which last season's crop up to the 15th February last was sold was 7 annas 3 pie per pound, or a decrease as compared with the crop of 1896 of 27 per cent. Since 15th February the London market has further declined, the last average being telegraphed on 21st February as 6¼*d.*; and when the total crop of 1900 has been sold it will no doubt be found that the average will be less than 7·32*d.*, and the difference between the 1896 and last year's crop will be considerably over 27 per cent.

"It may be said that the low average of last season's crop is due to the large quantity of coarse quality tea that has been made: this may be so to a certain extent, but it does not by any means account for the vast difference between the average rate of 1896 and of 1900. The difference which my figures show between the 1896 crop and last season's crop is 2 annas 8¼ pies per pound, and, in order to meet the objection of any one who may say that the reason of the decline is due almost entirely to the large production of low quality teas, I have been furnished with certain figures by Messrs. Thomas & Co. They have given me the average prices for no less than 70 gardens in Assam, and the average decline in price for these 70 Assam gardens between 1896 and 1900 is 2 annas per pound against my figure of 2 annas 8¼ pies per pound. It is a well-known fact that Assam is not the district which floods the market with low-priced teas, and we may take it that the decline in the average value of tea is due to

another cause than the large proportion of inferior quality teas. The cause of the decline is great over-production consequent on the false stimulus that was given to the cultivation of tea by a constantly declining exchange. It is idle, however, to discuss the cause which led to the present depression in tea. What we have to face is the actual position, and we may take it that the rate at which last season's crop was sold was very much lower than it has ever been before; it is at all events so low that very few gardens have worked to a profit. Nearly all are compelled to sell their produce at under cost, and when I say that the tea-industry generally is in the very depths of depression, I in no way exaggerate the position.

"My Lord, I have been able to get particulars of the results of the working of a large number of tea-companies for the past season, and I venture to lay the results before the Council. Of the 31 Assam, Cachar and Sylhet companies registered in India and quoted in *Capital*, I have been able to get figures for 28 of them. Two of those gardens will pay 10 per cent., three will pay 5 per cent., one will pay 3½ per cent., one 3 per cent., one 2½ per cent., and the remaining twenty will pay no dividend whatever. Of those which will pay no dividend, I notice that one of them paid 10 per cent. for the previous year. Of the 52 Assam, Cachar and Sylhet Companies registered in London and also quoted in *Capital*, I have been able to obtain the results for 33 of them. Four of these companies will pay 5 per cent., their dividends for the previous season being 10 per cent., 13 per cent., 15 per cent. and 20 per cent. respectively. One will pay 3½ per cent., one will pay 3 per cent., three which last season paid respectively 15 per cent., 10 per cent. and 6 per cent., will only pay 2½ per cent. this season, one will pay 2 per cent., and the remaining 23 companies will pay *nil*. One of these last-mentioned gardens paid 12 per cent. last season. I may say that the particulars I give are for the ordinary and not the preference shares of any company. I have the list from which these particulars have been taken, and shall be glad to shew it to any Member of Council who may desire to see it. My Lord, I think Your Excellency will admit that this list bears eloquent but melancholy testimony to the assertion of those interested in the tea-industry that the industry is not in a position to bear any further burden. With the particulars which I have given it seems to me that to persist in 1901, when the prospects of the tea-industry are of the blackest, in a recommendation to enhance the cost of production, a recommendation which in 1896 may have had something in its favour, indicates that those who persist in it have for the time being lost all sense of proportion.

"My Lord, it is not surprising that the tea-garden proprietor, when we look at the results of last season's working, is doing all in his power to reduce and cut down expenditure. Some companies are dismissing their European assistants, and of my own knowledge I know of eighteen Europeans who have been thus dismissed. Other companies are reducing the wages of their non-Act coolies, and it was only yesterday that I heard of a garden in Sylhet, on which there are a few Act coolies, and in which the bonuses had been reduced Rs 2 all round. The bonus is merely a portion of the wage, and the reduction was peaceably and willingly accepted by the labourers. I leave the Council to imagine what the effect on the whole labour-force would be if the wages of the few Act coolies were raised. It does seem particularly hard on the planter, when necessity is compelling him to curtail expenditure, to find the Government insisting on increasing it. It is somewhat difficult to arrive at what the raising of the wage will mean to the industry, but that it will enhance the cost of production in a marked degree there is absolutely no doubt, and in the present condition of the industry any enhancement in the cost may have most far-reaching and serious consequences. It may in fact lead to the breaking point, and I think I have said enough to show that if the Council throw out the Hon'ble Mover's amendment we shall be within measurable distance of killing the goose that lays the golden egg.

"If it is admitted that we are near the breaking point, we are forced to the further conclusion that the proposal to raise the wage cannot possibly benefit those whom it is intended to benefit, *viz.*, the labouring classes. There is no question that with a wage of Rs. 5 a coolie is ever so much better off in Assam than he is in his own country. In Assam the wage of Rs. 5 will at all

events ensure him a full stomach, which is not what he can always count on in his country. But it is not only the Rs 5 wage that the coolie gets in Assam. He has other perquisites, and that is a consideration which is not usually sufficiently kept in view. If these are allowed for, the minimum wage is nearer Rs. 6 to Rs. 7 than Rs. 5—

(1) The coolie is comfortably housed free of charge in houses which are maintained in good order and in thoroughly sanitary condition.

(2) He is provided with the best drinking water obtainable from pukka wells sunk at his doors—very often at great expense to the proprietor.

(3) He is provided with a hospital and with medical attendance free of charge, and garden medical statistics show to what an enormous extent he takes advantage of this.

(4) Last, but not least, he obtains his rice at prices never exceeding Rs. 3 per maund, the average price of rice in the district being probably at least Rs. 3-8, frequently rising to Rs. 4-8, and even to Rs. 5 per maund in Assam.

"It was only last year that the Government of India were spending crores of rupees in keeping millions of the poorest of the people alive, and that Your Excellency was appealing to the whole world for assistance for another portion of the poor of India. But they were only parts of the population, and there must be many other thousands who would only be too glad to get a wage of Rs. 5 per month in return for a light day's work. In the interests of the millions of India, it seems almost cruel to make it harder for the employer of labour to give the labourer employment. That is really what the proposal to raise the minimum wage amounts to, and Members of this Council should weigh the position most carefully before they decide to veto the Hon'ble Mr. Buckingham's amendment. They will have to be absolutely certain that the burden they will place on the industry is a burden that the industry can bear; otherwise the result of the raising of the wage may mean the ruin of many of the tea-gardens of India, and the consequent closing of a field of employment to thousands of the labouring classes of India. If this should prove to be the result of the rejection of the Hon'ble Mr. Buckingham's amendment, the responsibility will lie with those Members of this Council who reject it.

"My Lord, I have given the position as it occurs to me. I have not overstated the case in order to gain a vote or two for the Hon'ble Mover's amendment. I know how critical the position of the tea-industry is; and I hope the Members of this Council will not aggravate the embarrassment of the industry by rejecting the amendment."

The Hon'ble RAI BAHADUR BIPIN KRISHNA BOSE said:—"My Lord, my excuse for interposing in this debate lies in the circumstance that of late years emigration to Assam from the Central Provinces has assumed large proportions, and the question involved in the amendment is therefore likely to affect a considerable number of the people there. It has been argued on behalf of the tea-industry that 'compulsory increase of wages by legislative enactment' is wrong. Stated in this naked form, the argument is no doubt sound. But the real question at issue is, whether the Government, having in the interest of the employers imposed restrictions on the liberty of action of the labourers and having thereby prevented an automatic settlement of the wage through the free action of economic laws, has not placed itself under an obligation to fix from time to time the minimum wage in the interest of the labourers. It has been said that, in spite of the increased facilities of communication and the diffusion of knowledge of the benefits of employment in the tea-gardens, the time has not yet come when penal legislation for enforcing labour-contracts can be done away with. The tea-industry has undoubtedly conferred great benefit on the country, and when those responsible for the welfare of the people think that penal laws are still needed for its advancement, I accept the position. But, if so, the continued right of the Government to intervene to protect the interests of a class of people who are unable to protect themselves and whom its own laws have placed under a special disability, cannot in reason be denied. The question, therefore, resolves itself into this, whether, since the wage-limit was fixed in

1865, anything has happened in the economic condition of the country calling for its revision with a view to make it accord with existing circumstances. Now, it is clear that no wage which may be earned by emigrating to a labour-district can lay any claim to fairness which is not higher than the wage which the emigrant could have earned in his own province and without severing his connection with his home-life.

"Comparing the scale of wages given in the settlement-reports of the sixties, when the Central Provinces were still in most part land-locked, that is, just about the time when the wage-limit was fixed at Rs. 5, with the scale of wages as given in Mr. Fuller's review of the progress of the province during the thirty years following the settlement, it would appear that the grain-wage has remained pretty constant though the level of prices of food-grains in which the wage is given has largely gone up, while, as regards the cash-wage, it has generally risen by fifty per cent. This was to be expected. Since 1865, the country has been linked with the principal centres of trade by two systems of railway helped by feeder roads in all directions. Seven cotton-mills giving employment to nearly 8,000 heads of families have been set up, besides 40 other factories. The two Government coal-mines, with their annual output of about three lakhs of tons, give lucrative employment to a large number, while the numerous provincial and local public works serve the same purpose to an even greater degree. These new openings for labour have materially helped to raise the wages of the labouring classes. Mr. Fuller mentions as a significant fact that, during the course of the extensive field survey-operations of the new settlement, labourers could not be had *in their own* villages for a less remuneration than Rs. 4 a month in the out-of-the-way hill districts and Rs. 5 in the plains. The officers of the Department of Public Works are also compelled to work largely with immigrants from Upper India who come to take up earth-work which local men would not accept. In a normal year now-a-days a male coolie can command a wage of three annas a day, which is half as much again as the rate prevailing in 1865. It is hardly reasonable, I submit, to take these people away from their homes by alluring prospects of gain as held out by recruiters, which prospects are seldom wholly realized, to work in a far-off, uncongenial and unhealthy country, where the wage to be earned may be no more than what they could have earned had they never been made to leave their province.

"The figures of emigrants from the Central Provinces since 1892, after the Bengal-Nagpur Railway had been in full working for a year, go to show that, apart from famine conditions, the wage to be earned in the tea-gardens of Assam had no attraction for the people. Up to 1894, the number was within 2,100. But when one seasonal disaster after another began to dislocate the ordinary local openings for labour, then came the opportunity of the recruiter. In 1895, the number went up to 8,000. With the deepening of distress next year, it more than doubled itself. In the following year, it touched 20,000. With the return of better times in 1898, the number fell to 7,000, which figure was maintained in 1899. The figure for the recent famine year is not yet out. My private information is that in one centre alone as many as 4,200 coolies were registered in 1900. Even when working among a famine-striken population, the recruiter had to adopt special measures to induce the people to go to the tea-gardens. I have seen many a batch of coolies travelling by rail, gaily dressed, the women with shining trinkets on their person, all presumably presents from the recruiter. He can well afford to give them, seeing that he is able to make as much as Rs. 80 per coolie. In some of the depôts, I am told by one who has personal knowledge of the matter, music, dancing and feasting used to go on day after day, the object evidently being not to allow the intending emigrant time to reflect and change his or her mind. When, even in times of deep distress, such questionable expedients had to be resorted to, it is not an unreasonable inference to draw that the inducement of the wage was not effective enough for the end in view. Such a wage can hardly be called adequate.

"It has been said that, besides the wage, the statute-bound coolie has the advantage of free housing, medical aid, food-grain at a fixed price, and other conveniences. As regards the first, the Central Provinces coolie comes

generally from a class of people who live in huts made by their own labour and most of the materials of which they are able to have free of charge from the village-forest. Food-grains at normal times can in all the recruiting tracts be had for much less than Rs. 3 a maund, and as for medical aid, these people hardly need any. Be that as it may, unless these conveniences result in improving the general health of the Act-bound coolie, they cannot count. The average death-rate for the *whole* population in the Central Provinces, excluding famine years, is under 33 per mille; the rate among *adult* tea-garden coolies from the Central Provinces was at one time as high as 85·9. In 1899 it was 55·6 as against a rate of 24·30 for the provinces generally. So far then as a Central Provinces coolie is concerned, he is much better off in point of health in his humble hut in his own province than in a tea-estate with all its conveniences. In the gardens themselves, a non-Act coolie without these conveniences seems to enjoy better health than an Act-bound coolie with them. For I find that in 1899 the death-rate among the former was 26·3 as against 43·6 among the latter, and this difference is more or less observable in past years.

"Whether the existing wage be adequate or not, it has been said that, in the present critical condition of the tea-industry, any additional burden imposed on it will submerge some estates and cripple many more, and thus the present openings for employment for the congested population of the Central Provinces and other provinces will be contracted. I shall have something to say on this matter later on; but for the present I have to point out that the argument does not apply to the Central Provinces, which next to Chota Nagpur and the Sonthal Parganas now supply the largest number of coolies, the percentage of Central Provinces coolies in 1899 being 28. Although apart from land, which has gone out of cultivation under the stress of the recent cycle of bad seasons, there is not now left much good culturable waste in malguzari estates, there is a large opening for extension of cultivation by the admission of the plough to lands in Government forest-reserves. The scheme for opening them out to cultivation launched a few years back has received a check owing to the famine, but it is hoped that with the return of better times it will be pushed forward with vigour. And the class of people who are most prized and whom it is the constant endeavour of the recruiter to secure, and who have constituted the majority of the emigrants within recent years, are the very men who will be most useful in this work of reclamation. I refer to the Gonds and other jungle tribes. The former, though only a moderately good cultivator himself, is a hard-working, honest farm-labourer. Again, from the Ghât Districts these people descend in thousands to the plains during the rabi harvest, and help to reap it and thereby earn a good wage. A large proportion of field-embankments is also done by them. The Province can ill spare these hardy agricultural labourers. It would, perhaps, have been an advantage if some of the broken-down agriculturists from the congested tracts had gone, but no inducement of wage and other benefits to be had in the tea-gardens of Assam has hitherto succeeded in making *them* leave their lands. Considering then the Province as a whole with special reference to such highly-prized recruiting districts as Balaghat, where about half the culturable area is now awaiting reclamation, it is a mistake to say, as has been said, that the administrators of this Empire would be more usefully employed if, instead of framing laws to increase the wage, they were to help the surplus population to emigrate from the over-crowded districts of the Central Provinces to Assam. I may state here that the incidence of rural population per square mile in the rice-districts of the Province is 227 and in the non-rice it is no more than 172. What with two acute famines and several years of scarcity, there is reason to think that the population has gone down since 1891, and the figures of the recent census, as far as they are out, seem to point to this conclusion.

"It has been said that the Assam coolie is able often times to go back to his native place with a saving made while employed in the gardens. This may be the case elsewhere, but in the Central Provinces such a person has up till now been conspicuous by his absence. My friends in the recruiting districts whom I have consulted, and who are in a position to know, have not come across such a person as yet. I find the Collector of Ganjam, the only recruiting district in Madras, says the same. He states, 'Emigration from this district takes

place on a very large scale, notably to Burma. The latter emigration is purey spontaneous, unrecruited and unaided. The wages earned are high, and largel sums are remitted weekly to their families in the Ganjam District by these emigrants. The case of emigration to Assam is very different. There is no voluntary or spontaneous emigration, the wages earned are low, nothing is remitted to the Ganjam District by such emigrants, who are quite unable to save anything out of their pittance, while they are seldom able to return to their homes on the expiry of their contract term of labour. The labourers recuited for Assam come from the poorest and most ignorant class.....; they are too ignorant to distinguish, in their homes, between Burma and Assam. They know that numerous emigrants to Burma return home laden with accumulated savings, and dazzled by a similar prospect fall an easy prey to the recruiter, only to learn, too late, the difference between Burma and Assam.'

"Apart from the special circumstances of the Central Provinces, attention has already been drawn to the fact that wages in Assam generally have risen. Whereas the average wage of an agricultural labourer in 1888 was Rs. 7, it was Rs. 8·4 in 1898, an increase of 20 per cent., which is double the increase proposed in the Bill. Even in the tea-gardens a difference is observed between the wages of non-Act and Act coolies. In 1899, during the manufacturing season, in 14 out of 15 sub-divisions the excess of the former over the latter ranged from 3 annas 6 pies to 1 rupee 3 annas. In one sub-division only was the difference in favour of the latter, it being 4 annas 4 pies. As regards the non-manufacturing season, in 3 sub-divisions the Act coolies earned something under 3 annas more than the non-Act coolies. In the remaining 12 sub-divisions the former earned from 4 annas 9 pies to 1 rupee 10 annas less than the latter. Whether during 1899 the Act coolies had an advantage owing to their being entitled to have rice supplied to them at a reasonable price fixed by the Local Government, I cannot say. For the *Prices and Wages in India* for 1899 is, I believe, not yet out. The difference in the wages of these two classes of labourers has, however, been a permanent feature in most sub-divisions for years past, and as it has not been shown that there has been a corresponding abiding difference in the price of rice in the local markets and the price as fixed for Act coolies under section 124, it seems reasonable to conclude that the Act has in a manner compelled the coolies whose relations with their employers are governed by its provisions to remain content with a wage which would not be accepted by those who were free to work as they pleased. It would further appear that the average wage of the Act coolie has on the whole been below the statutory minimum. It is no explanation to say that he sometimes earns extra wage, for the extra wage has no reference to the task to which the minimum wage relates.

"As regards this extra wage, which in well-regulated gardens the coolies are able to earn by working overtime, figures have been published showing that in six such gardens it ranged from Rs. 5-4-5 to Rs. 7-7-9, the average being 20 per cent. more than the minimum, or Rs. 6. Admittedly these figures include earnings of acclimatised coolies, and as they are able to earn more than the newly imported indentured coolie, the average earnings of the latter class alone must be somewhat less. However that may be, the average income of a free agricultural labourer in Assam has since 1888 never been below Rs. 7. Moreover, the above fact loses its importance in the face of the admission that in gardens not well-managed the earnings do not exceed the minimum. Here the task is so severe as to exhaust the labourer's entire time and energy, and thus to put it out of his power to earn an extra wage. To meet these cases the Bengal Government had, I find, suggested a reduction by two hours of the maximum period of compulsory labour. But evidently this suggestion has not proved acceptable, for the existing limit of nine hours has been reproduced in clause 125 of the Bill. Failing this, the only remedy for an admitted evil, however limited may be its operation, seems to be that which the Bill provides. At least none other has been suggested on behalf of the tea-industry.

"As regards the argument that the tea-industry cannot afford to bear the additional burden which the clause under discussion will entail, I venture to submit, though with great diffidence, that when the wage cannot in the interest of the industry be allowed to find its own level untrammelled by penal laws, it is the duty

of the Government to see that the labourer gets a fair wage, and what that wage is to be must depend mainly on the wages obtaining in similar industries and occupations where labour is free. Whether capital can, without trenching upon what it considers is its legitimate profit, pay this wage should occupy a subordinate position in the decision of the question. Moreover, it is not quite clear that those considerate employers who treat the coolie kindly will be affected. For there does not appear to be any insuperable difficulty in their so adjusting the remuneration paid for overtime work as to keep the total earnings within the present limits. It is the badly managed estates, where a fair wage cannot now be earned, which will suffer, and surely they deserve to suffer. Again, it strikes one that if to make the industry pay it is necessary to cut down the cost of production, why should not a well-directed systematic effort be made to reduce the present heavy commission paid for recruitment, the benefit of which mostly goes into the pockets of men who least deserve it and who would certainly be unable honestly to earn anything like the sum they now earn in any other occupation?

"On these grounds I feel bound to dissociate myself from a proposal which, I believe, will not advance the best interests of the people of the Central Provinces, and in doing so I follow a line of policy which has the support of my Local Administration. The Hon'ble Mr. Fraser, the Hon'ble Mr. Ibbetson and Sir Charles Lyall are, in my humble opinion, better judges of what is good for the people than outsiders who know little or nothing of the Province and who are precluded by their very position from considering the matter in a spirit of judicial impartiality."

The Hon'ble KUNWAR SIR HARNAM SINGH said:—"My Lord, I venture to think that it will be conceded by every one that the provisions of the Assam Labour and Emigration Bill have received the most careful consideration from Government. There were a great many points in controversy when the Bill was introduced into Council two years ago. But I am happy to observe that the Select Committee have satisfactorily dealt with all of them. There is a consensus of opinion that the Bill, as it has emerged from the Select Committee, is eminently calculated to secure the object in view. The only point at issue now, and with regard to which there is a difference of opinion, is in reference to the monthly rate of wages to be given to the labourers. The representatives of the tea-industry contend that the proposed increase will injuriously affect the interests of the proprietors of tea-gardens, while those who consider the question from the labourers' point of view deny that such increase will in any appreciable degree damage that industry, and assert that a substantial increase in the monthly rate of statutory wages will secure comfort to the contract coolies, and make service in the tea-gardens more attractive. I believe that the Select Committee have wisely chosen a middle course. They observe that,—

'though some increase in the present minimum wage is desirable in the interest of labourers, the increase proposed in the Bill as introduced would, if adopted, impose an excessive burden on employers. The newly-joined labourer needs special protection, as he is often unable for some months after his first employment, owing to his weakly condition and want of skill, to complete the daily task allotted to him, and therefore to earn the minimum wage prescribed by the present law. To meet such cases we have proposed in our amended sub-clause that all such labourers should be entitled, unless the Inspector certifies that they are physically fit to perform a whole task, to receive full wages for the performance of a half task during the first six months of their contracts. With this concession we think that the present minimum rate of wage may be maintained for the first year.'

"This concession, in my opinion, is just, and I am sure it will be keenly appreciated. During the first six months after his arrival at the tea-garden, the labourer, who needs special protection at this time, will get a salary of Rs 5 per month, and he ought to be satisfied with it.

"Although Mr. Melitus, the experienced Commissioner of the Assam Valley Districts, thinks that there are not sufficient reasons for raising the rate of wages generally, he is still of opinion that a distinction ought to be made between the average labourer able to do full tasks and earn full wages, and the new immigrant who has not yet settled down and learnt to make himself comfortable,

who naturally suffers more than the acclimatized coolie from the Assam climate during his first two rainy seasons, and who has not yet thoroughly learnt his work. The latter cannot always earn sufficient wages, and it is for this reason that a minimum monthly wage has been suggested. 'But I would be opposed,' he says, 'to extending the minimum monthly wage to labourers other than immigrants of less than two years' standing.'

"It will be seen from this that, in the opinion of such an experienced officer as Mr. Melitus, a clear distinction ought to be made for two years between new immigrants and acclimatized labourers. The Select Committee, instead of accepting Mr. Melitus' recommendation in its entirety, have taken into consideration the interests of both labourers and employers, and have fixed the statutory minimum wage only for the first year.

"The Hon'ble Mr. Cotton, the Chief Commissioner of Assam, who is intimately acquainted with the labour conditions of his Province, says that—

"there can be no doubt that the mortality among tea-immigrants of less than two years' standing is terribly high, and that these new immigrants, as a rule, are indifferent workers and earn far lower wages than acclimatised labourers. The Chief Commissioner has come across instances in which new labourers earn absolutely nothing at all, and go from bad to worse, until there is no chance of getting any work out of them, and at last they are discharged by mutual consent, and wander on the high-way or find their destination in the Government hospitals, sick unto death and absolutely destitute."

"This state of things is greatly to be deplored, and it must be admitted that the Select Committee in fixing a minimum wage for a half task for the first year has benefited the labour-community and has done a distinct service to the cause of humanity.

"When the labourer acquires some knowledge of the surroundings in which he is placed, and is able to regulate his mode of living, he becomes capable of performing the full task that may be allotted to him. The employer becomes benefited by the work which he gets from the labourer, and the latter naturally expects that some consideration should be shown to him for the increased work that he is able to perform. It has been authoritatively stated that, with the aid of the existing statutory wage, the labourer is not able to meet even the ordinary expenses of living, far less to live in comfort. If he is expected to do his full work, he must be allowed to take sufficient food and to live in some degree of comfort. We are informed that dissatisfaction among the labour-force is great owing to insufficient wage. The numerous desertions which take place on the tea-gardens indicate that there is discontent among the labourers. I believe that to remedy this state of affairs the Select Committee have very properly come to the conclusion that the existing wage should be raised, and, after all, the increase they have proposed is not exorbitant. I should think that an addition of eight annas to the monthly wage is but barely sufficient to meet the requirements of the case.

"In this connection I would invite Your Excellency's attention to the following remarks of the Chief Commissioner of Assam in which he points out that the present special legislation creates certain definite obligations which cannot be ignored both in the interest of the labourers and their employers. The Hon'ble Mr. Cotton observes :—

'In the first instance, I am to advert to the considerations which have made it necessary to fix by law the minimum rates of wages under statutory labour-contracts and to say that there appears to be the more occasion for doing this, inasmuch as those considerations have been conspicuously ignored in some of the arguments advanced against the proposal. If in this case, as in the conditions of the ordinary labour-market, rates of wages could safely be left to be adjusted by the law of supply and demand, there would never have been any necessity for laying down minimum legal rates. The whole of the legislation regarding labour-immigration into Assam is based on the assumption that the conditions of the labour-market on Assam tea-gardens cannot be regulated by the economical laws of supply and demand. The existence of a penal contract is justified on this ground. The protection of the labourer is justified on the same ground. It has been found by experience, and it follows from the peculiar nature of a penal contract, that it is absolutely necessary, for the protection of the labourer who enters into it, to make it by law obligatory upon the employer to pay a reasonable wage for a full daily task. The reason for this is obvious. When a labourer enters into a contract to labour for a long period under severe penalties in a distant country, of which he has no knowledge,

and where the cost of living is much higher than in his native district, his ignorance and helplessness entitle him to protection in this as well as in other directions.'

"The fact is that, if special legislation is necessary in the interest of the proprietors of tea-gardens, it is equally necessary in the interest of the contract labourers. The present rate of wage was fixed more than thirty years ago, and the wage which was then sufficient is inadequate now. The expenses of living must necessarily have increased, and the rise in wages is almost universal. Why should the statutory wage of the poor coolie alone be left in its original state, while there is an universal demand for higher wages to meet even their most ordinary wants? If the representatives of the tea-industry demand special legislation for the security of their interests, it is the absolute duty of the legislature to see that the interests of the contract labourers are properly safeguarded, and the proprietors of the tea-gardens should be prepared to accede to the Government demand.

"I do not deny that the proprietors of tea-gardens are considerate in many ways to the labourers on their estates. But it is clear, nevertheless, that the coolies are not attracted to their service, and I would not be surprised if, in the present situation, free choice were given to those who are now under contract, a large number would leave their work on the gardens.

"It is denied that the proposed enhancement will have any injurious effect on the tea-industry. On the contrary, it has been abundantly made clear that the industry will be benefited. The cost of recruitment will be considerably diminished; the service in the tea-gardens would be made more attractive; by securing a stronger and healthier class of coolies, their mortality would be greatly lessened, and this alone ought to ensure a considerable saving to the proprietors of the gardens. The increase proposed, instead of putting employers to much additional expense, would, in the long run, I am inclined to think, be for their distinct benefit.

"I have, however, my Lord, a grave doubt about one point. Is this the most appropriate time for raising the wages when the tea-industry is admittedly face to face with a crisis, when a large quantity of the annual produce is lying unsold in the market; and when duty on tea is threatened with a further increase? This is a matter which requires most serious consideration.

"The question may fairly be asked whether the proposed action would have the result of closing some of the gardens, and thus have an injurious effect on the tea-industry. My Lord, India requires industrial development in every form, for which more capital is needed, and nothing, in my opinion, should be done to prevent capital flowing freely into this country. Of course, it must be left to Your Excellency's Government to decide whether clause 5, sub-clause (*4*), of the Act should be enforced *at once*, or whether enforcement of this sub-clause should be postponed till a notification of the Government should be issued fixing a time for such enforcement. With these few observations, I oppose the amendment and beg to give my cordial support to the Bill."

The Hon'ble RAI BAHADUR P. ANANDA CHARLU said:—"The point raised is what minimum wages should be entered in the labour-contracts. Such contracts endure for no more than four years, and the question that has been raised is, what are to be the minimum wages in the preparatory stage That there should be a variation on this account is the opinion on both sides, on the part of planters and on the part of the Select Committee, though, speaking for myself, I find sounder reason in the original provision in the Bill, that there ought to be no difference from first to last, inasmuch as such a stage of comparative slight inefficiency must exist in all walks of life and in all spheres of labour, and inasmuch as there is no such distinction made in any one of them. But that is now beside the issue before us. That issue is this: whether three-fourths of the contracted period should be the preparatory stage, as the planters virtually contend, or a fourth only as the Select Committee have held. We have to eliminate the last and fourth year from our consideration, because both sides agree as to the wages for that year. Looking impartially into the matter, the best that could be said in favour of the planters is that, in the first and opening year of labour, the raw recruit might not be quite up to the mark, for the obvious reason

that he has to adjust himself to the novel surroundings and to form the requisite habits for ready and almost automatic discharge of the mechanical work that falls to him—though, let me repeat what I already once emphasised, *that* by itself is no ground for reduced wages in this line by way of an exception to the almost invariable rule.

"In taking note of the first year's comparative inefficiency of the recruit, the Select Committee appear to me to have already over-stated the case for the employers. They, the Select Committee, speak of two circumstances, one of which alone, I humbly think, is sound and relevant. They speak (1) of the labourer's weakly condition, and (2) of his want of skill. Against the latter, as a fact, I have nothing to say. But I must demur to the tenability of the former, in the face of the repeated examinations, not less than three in number, to which the recruit is successively subjected in view to a pronouncement on his physical fitness, *i.e.*, under clauses 32, 43, 46 and 47. This is not all. The employer is given the further chance, before accepting the recruit, to have the latter further examined under section 73 by a medical man of his own choosing; and, what is more, he can challenge also the Government medical officer to give his verdict. In the teeth of all this elaborate process of sifting and sifting, again and again, it is too much even to presume a possible physical unfitness, without casting an unmistakable slur on the several officers who have successively borne testimony favourable to the recruit.

"I am inclined to think that, so far as this item of physical fitness is concerned, the presumption is all the *other* way, and it ought to prevail, until rebutted by clear and positive evidence to the contrary. In this view, the one sole ground on which alone a reduction of wages during the first year could be said to be justified is want of skill, which even as I pointed out is, strictly speaking, not a proper ground at all. But the Select Committee did not stop here. They have, for reasons which they have not recorded, made a difference as regards the two years between the first and the last. They have, for those two intermediate years, added a half rupee per head. Taking into account the sort of work that awaits the labourer, it seems to me that the first year is long enough to acquire the so-called skill. If the wage of the fourth year is an index of payment for efficiency,—as I feel bound to take it,—then the addition of a half rupee, instead of one rupee, is as unwarrantable as unaccountable for the intermediate period in question. But if the fourth year's wage is not to be taken as a standard, even then surely a graduation of some sort would seem reasonable. If, in making the proposal they have done, the Select Committee have erred, I must say that they erred on the side of the richer and more influential party. I do not, by any means, grudge them the fruits of this error; for the interests of the planting classes require all legitimate safeguarding that one can secure to them, having regard to the circumstances that they have brought capital, energy, perseverance and enterprise—if not, as is said, to convert a howling wilderness into a smiling scene of verdure and harvest—at least to open up and develop an industry, congenial to areas which had perhaps frowned on all prior efforts to utilise them. But it will be a one-sided justice if, in lively sympathy with them, we ignore the claims of the mass of labourers who help no less in securing success to the enterprising, energetic and persistent capitalists. Neither class, it seems to me, could get on without the other. Each is the complement of the other. Between classes, so interdependent, nothing short of harmony and mutual good-will ought to prevail, and I should be the last party to any measure which might introduce among them a discordant element or a cause for irritation; for when bad blood is stirred up, even level heads are thrown out of balance, while generous impulses run the risk of being checked or dried up, for a time at least. I am quite alive to the fact that it is within the power of the better situated employer to starve or drive to the wall the weaker workmen, with their limited staying powers and with little or nothing to fall back upon. Even the extreme case of cutting off the nose to spite the face is not altogether beyond the range of possibility. For this reason, and for the further reason that I happen honestly to differ from some here and out of this

hall enjoying my highest respect, I have looked into the question, again and again.

"But I cannot persuade myself out of the proposals made by the Select Committee—proposals which are of doubtful soundness, so far as the reduction of wages for the first year is concerned, and of doubly doubtful soundness so far as they relate to the unaccounted-for reduction of wages, recommended for the second and third years of the contractual period of service.

"Such legislation may perhaps not be insisted upon where the employer and the employed are part and parcel of the same nation, and where, on that ground in particular, much less friction and much greater fraternal feeling are to be met with. Where conditions for such congenial mutuality and for such hearty 'give and take' do not exist, or rather are at a discount, there is an *à fortiori* case for periodical intercession to cancel unconscious excesses of unilateral proclivities. Again, opinions are quoted and tables of the labourer's bill of fare, his remittance and his trinkets are set forth, to show that the labourers are well off physically and financially. All this is irrelevant and inconclusive and is quite capable of being explained on other than the hypothesis relied on by the planters. But seeing how late it is, I shall say no more."

The Hon'ble SIR EDWARD LAW said:—"I think that the case as regards rates and comparative rates of wages has been fully argued from both of the contending points of view, but I may perhaps point out that the effect of the proposed addition to wages does not appear to me to be likely to prove as great as is apparently anticipated in some quarters.

"The increase actually proposed amounts to 16 annas on 21 rupees, the 16 annas being the proposed addition of eight annas per mensem to coolies in the second and third years of service, and the 21 rupees the monthly wage of four coolies respectively in their first, second, third and fourth years of service.

"The net result then of the increase will, according to my calculations, be approximately, but will not exceed, a five per cent. addition to the entire wage expenditure. If then we admit—and it appears to me to be even hypothetically a considerable admission—that the increase will necessarily be extended to all coolies, Act and non-Act alike, the total charge to the tea-industry will be five per cent. of three-fourths of the total expense of production, *i.e.*, 3¾ per cent. of this total, and therefore, to follow what I understood to be the calculations of the Hon'ble Mr. Buckingham, the total cost, admitting hyphotheses concerning which I am personally doubtful, will not exceed one per cent. on the capital invested in the tea-gardens.

"I do not say that one per cent., if this be not an exaggerated estimate, would not prove a heavy tax on the industry; but I think and hope that a tax in the form of extra wages will not be without *some* compensatory advantage, and that reviving prosperity will at an early date permit of its being easily supported by the tea-industry without prejudice to its interests."

The Hon'ble Mr. RALEIGH said:—"My Lord, we have listened to a number of speeches, full of information and argument, contributed by Hon'ble Members much better qualified by special knowledge than I can claim to be. If I venture to prolong the debate, it is only for the purpose of stating, as clearly as may be, the question on which we are now to vote.

"We are legislating in respect of a matter which lies outside the domain of contract, in the ordinary sense of the word. When my Hon'ble friends Mr. Buckingham and Sir Allan Arthur speak of supply and demand, the reference appears to me to be beside the point. The labour-contract authorised by this Bill is a transaction by which, to put it rather bluntly, a man is often committed to Assam before he knows what he is doing, and is thereupon held to his promise for four years, with a threat of arrest and imprisonment if he fails to perform it. Conditions like these have no place in the ordinary law of master and servant. We made them part of the law of British India at the instance and for the benefit of the planters of Assam. It may be, as my Hon'ble friend Mr. Ashton contends, that the contract is, on the whole, for the good of the coolie. I think it is, otherwise I could not vote for the pro-

posal to renew the Act. But the fact remains that the motive power in this legislation is the interest of the planter, not the interest of the coolie.

"Under cover of our legislation a system has grown up which none of us can regard with satisfaction. It is a system under which labour is made expensive to the employer without being made profitable to the labourer. The cost of importing a coolie into Assam is about Rs. 25; the reward paid to the importer has ranged as high as from Rs. 100 to Rs. 150. The difference between cost and reward is absorbed by agency expenses: that is to say, it is spent in bribing chaukidars and policemen, in buying off indebted men from their creditors, in swelling the gains of the *daffadars* and *arkatis*, for whom nobody has a good word to say. The system is described in the report of the Labour Enquiry Commission of 1895. Hon'ble Members are aware that the Commission was a body mainly composed of business men, and that the report was signed by Mr. E. Cable, Mr. H. C. Begg, and Mr. W. B. Gladstone. After describing the nature of the traffic, the Commission ask why the tea-planter is content to nourish 'this numerous brood of blood-suckers.' The answer to that question might have been given in the one word 'competition.' Large profits were being made; the supply of labour was not equal to the demand, and the price rose accordingly.

"For some time past, the abuses of the labour-traffic have engaged the attention of Government. There were those who thought that the time had come to dispense with special legislation; the planters asked that Act I of 1882 might be renewed, and we now propose to renew it. They suggested various changes in the law, with a view to reducing the cost of importing coolies; these changes we have in substance adopted. As to the measure of relief we have afforded, I will take the figures quoted in the Labour Commission's Report. We find there that in the Sibsagar District in 1889 contractors' coolies cost on an average Rs. 100 and sardari-recruited coolies between Rs. 45 and Rs. 58. In 1893 the average from the justens was Rs. 82 for sardari and Rs. 105 for contractors' coolies. I do not 77 gardwar propose figures, because we do not know exactly what the expense of wish to press these on you under the amended Bill. My Hon'ble friend Mr. sardari-recruiting will be under the cost of importation under the Henderson has hinted that the figures shewing present system may be exaggerated; but, like all who take this line, he is content with a general statement. Balancing their precise assertions against their somewhat vague denials, I come to the conclusion that, on the planters' own showing, this is a Bill which will enable them to effect great economies in the importation of labour.

"On the question of the statutory wage, the Commission reported as follows:—

> 'It has been pointed out,' they say, 'that the expense of importing the coolies should be very little over half what it now is, and, if Government would insist on reducing the cost, it would be fairly entitled to demand some increase in the pay of the coolie, and some reduction in the term of contract.'

"My Hon'ble friend Sir Charles Rivaz has referred to this expression of opinion; I quote it again, because it is the foundation of our case. In this Bill we keep the term of contract unaltered. We demand an increase in the pay of the coolie, and I contend that the planters themselves have admitted that the demand is just.

"Our discussion today has been of a practical character; but during the agitation which has been carried on in Calcutta and elsewhere, the business aspect of the case has been frequently ignored, or dealt with in a perfunctory way. We have all read speech after speech, letter after letter, in which it is assumed that the demand for a better wage is entirely gratuitous, and that the motives of Government are merely philanthropic. In my opinion, philanthropy has no place in our discussion today. I hope the Government of India will never attempt that kind of statesmanship which consists in claiming credit for generosity at other people's expense. We are simply driving a bargain for ignorant people, who cannot bargain for themselves; and we are asking terms which we consider to be fair.

"Our opponents acknowledge that this is a Bill such as they wished to have. Mr. Begg stated that its provisions would benefit the tea-industry. Our Hon'ble colleague Mr. Buckingham confirmed the statement, and he was kind enough to compliment the Select Committee on the manner in which its work was done. I read his speech with great satisfaction. At the close of an enquiry, which at some points was acutely controversial, it is pleasant to know that we part on friendly terms. But compliments are not business. I want Mr. Buckingham to take the figures of the Report, or any other figures he can give us, and to tell us what he thinks this Bill is worth to those whom he represents. When he has done that, I will ask him to say whether there is anything unfair or oppressive in our contention that the coolie should have (as the Commission said he ought to have) some share in the benefit conferred.

"It may of course be argued that, while an increased wage is, in the abstract, desirable, the demand ought not to be put forward at the present time —first, because the coolie is well off, and does not need it; and second, because the employer is badly off, and cannot pay it. I will deal with these arguments in their order.

"As to the sufficiency of the present wage, we have before us a considerable body of statistics. I have spent a good many hours in studying these figures, and have come to the conclusion that there is nothing approaching an arithmetical demonstration on one side or on the other. This is exactly what we might expect to find. Any fixed income whether it be Rs. 5 or Rs. 5,000, is sufficient for one, and not for another; we have to strike an average by comparing very diverse cases. Bearing this in mind, we must, I think, decide that many of the tables presented to us, interesting and important as they may be, are not complete enough to justify any confident opinion. There are, for example, the tables which show that some coolies are able to save money which they remit to their former homes. This no doubt is a gratifying fact; but I observe that the number of remittances shown is not large in proportion to the total labour-force; and we have evidence to the effect that saving among coolies may sometimes mean privation. The North-Western man is famous for his thrifty habits; but we are told that he sometimes saves money by limiting himself to one meal a day, and that he will endure hardships rather than break open the box in which his money is hoarded. Still less importance attaches to the figures which show that part of the wages paid is spent in drink. For, if the saving is mostly credited to the North-Western man, the drinking is mostly done by the jungli man, who spends his money as fast as he gets it. Whether in England or in Assam, expenditure in drink is no index of the real prosperity of the labourer.

"The question, whether the cost of living in Assam has increased since 1865, has been keenly debated; but again the figures are inconclusive. Improved communications have no doubt cheapened many articles of consumption, but, as they tend also to expenditure on a greater variety of things, the coolie probably finds, like the rest of the world, that five rupees do not go quite so far now as they did in 1865.

"Much trouble has been spent upon comparisons between the Assam coolie and labourers in other parts of India, but a comparative statement of money-wages tells us very little. To ascertain whether coolie A is better or worse off than coolie B, you want the family budgets of both, showing their receipts and their necessary and usual expenses. In most of the cases which are referred to in the papers now before us, complete information of this kind is altogether wanting. There is, however, one comparison which is close enough to be instructive. The free coolie on a tea-garden in the Duars appears to enjoy, roughly speaking, much the same advantages in respect of house-accommodation, etc., as the coolie in Assam. What, then, is the amount of his money wage? Here and throughout this controversy we are always being involved in ambiguities because the word 'wages' is used to mean the rate at which a man is paid, and the money which he actually receives. Our opponents are at variance as to the coolie in the Duars. We were told today that wages there were for men Rs. 4-14-5 a month and for women Rs. 2-1-2, the inference being, of course, that the Assam coolie is comparatively well off. But a few days ago we saw a letter from a gentleman in the Duars, asserting that the usual *rate* in that part of the country is Rs. 6 for a man, Rs. 4½ for a woman and Rs. 3 for a child. The gentleman

is anxious that the facts should not be incorrectly stated, and why? Because he is getting up a movement in the Duars for the reduction of wages. So that, while the Duars coolie is cited at Calcutta and used as an argument against raising wages in Assam, the Assam coolie may expect to be used in the Duars as an argument in favour of reducing wages there.

"We are on somewhat firmer ground when we come to the figures which show the actual cost of living in Assam at the present time; for here we are able to compare some more or less complete family budgets with the figures given by employers who have tried what is called the hotel system, and with the Government returns which show the cost of maintaining prisoners in jails. Combining the information derived from all these sources, I come to the conclusion that the maintenance of a single man costs about Rs. 3 a month. This corresponds pretty closely with the language of the Labour Commission's Report in regard to the mining districts. They tell us that 'the ordinary miner, who does not drink, can live on 1½ to 2 annas a day.' If we take into account the fact that every wage-earning man has some personal expenses beyond mere subsistence, and the fact that many members of the coolie community are dependent on the wage-earners, we may, I think, fairly conclude that Rs. 5 is a low wage. Even if it were a certain minimum, there would be a strong case for raising it, but, as Sir Charles Rivaz has shown, it is not certain; there are may cases in which coolies earn less than the statutory rate. The cases quoted on this point by the Hon'ble the Chief Commissioner were admitted by him to be exceptionally bad; but they show how far the actual wage may fall short of the nominal rate.

"When we take all the facts into account; when we consider that a Commission of business men reported in favour of raising the wage in a certain event, that Sir Alexander Mackenzie declared the wage to be too low, and that the present Chief Commissioner of Assam has imperilled his popularity in the Province by preaching the same doctrine, Members of Council must admit that the Government of India had strong reasons for deciding that some improvement in the wage should be made a condition of the renewal of a penal Act.

"But we are told, this improvement cannot be conceded, because the industry is depressed, and the planter cannot pay. Depression is an undoubted fact, and it is a fact which the Government cannot regard with indifference. We should indeed be less than human if we could not sympathise with the anxieties of men who have worked honestly at this business, and now have to face one misfortune after another. The present position is bad; and Mr. H. K. Rutherford, a high authority, tells us that things will be worse before they are better. But let us look at this as a business question, from the coolies' point of view. The time has been, not very long ago, when the tea-industry flourished, and large dividends were paid. That made no difference to the coolie; he went on earning his five or six rupees, subject to deductions. In business we are all familiar with the maxim that you must take the rough with the smooth: if you receive the profits of a concern, you must bear the charges and losses. I have endeavoured to show that we are not adding to the burdens of a depressed industry. The primary object of the Bill is to get rid of the incubus of the *arkati*. Our opponents are not fighting to throw off a burden wantonly imposed. They are fighting to get the benefit of this Bill without doing anything for our client, the coolie.

"We have been told that, if our proposal is adopted, gardens will be ruined and closed, and the industry generally will collapse. On the best consideration I can give to the question, I see nothing to indicate general collapse; but there can be no doubt that the industry has entered upon a period of severe stress. If at this moment we insist upon a small enhancement of wages, it is because we are bound by repeated declarations to secure some improvement for the coolie, and also because we feel that no body of employers can profit in the long run by paying less to their labourers than justice and good policy require."

His Excellency THE PRESIDENT said:—"We have listened to a long and interesting debate on this amendment: and it will, I am sure, be the opinion of Hon'ble Members that the respective views have been stated with much ability

and force. The Hon'ble Mr. Buckingham, assisted by some other Hon'ble Members, has proved a valiant and capable champion of his cause; and on the other side have been given the views of Government, as expressed by Sir Charles Rivaz, who has conducted this Bill through its various stages with much tact and skill, and by Mr. Raleigh, as well as the opinions, stated with obvious sincerity and with an authority which cannot be denied, of the Chief Commissioner of the Province. Of him I will only say in passing that I have no sympathy with the attacks that have been made upon him, not in this Chamber, but in other quarters, for the conscientious discharge of what he has believed to be a public duty: and that it is a doctrine which I cannot myself accept, and which, when I came out to India only two years ago, I was universally implored to repudiate in the case of Assam, that the Government of India should not attach much weight in a matter of internal politics to the counsels of the head of the Local Administration. The Government of India have not been prepared to go as far as the Hon'ble Mr. Cotton would have wished: but I desire emphatically to express my opinion that he has been actuated by no other desire than to secure the welfare of the province with which his name has been so long and honourably associated, and that to impute to him any other motive is unjust.

"Before I proceed to sum up the grounds upon which the Government must advise this Council to reject the amendment of the Hon'ble Mr. Buckingham, I must make a few preliminary observations upon the conditions under which we are called upon to intervene in this matter at all. It seems to have been inferred in some quarters that the Government is now taking upon itself, in an uncalled for and malevolent manner, to interfere with the movements of an industry which only asks to be left to itself. I have read a great deal in the Press about grandmotherly legislation and a grandmotherly Government. And yet I venture to say that, if the Assam planters were offered the option of dispensing with the grandmother altogether, they would very speedily discover the virtues of her existence. Why, the governing factor of the whole situation is that the Government of India has been called upon to constitute itself a grandmother to the tea-industry in Assam, that, without her protection, it would never have been called into being, and that, but for her assistance, it would long ago have dwindled and died. Do not imagine for a moment that *we* are enamoured of the system of penal contracts. It is an arbitrary system, an abnormal system, and sooner or later it will disappear. But it has been devised not in the main in our interests, but, as Mr. Raleigh has pointed out, in the interests of an enterprise with which the Government could not but sympathise, namely, the effort to open up by capital and industry the resources of a distant and backward province. In order to secure that end we have created, and are now revising, a law which enables the planter to procure the labour without which he could not cultivate the soil, and which is not forthcoming in the country itself; and in order to render this alien labour continuous and remunerative, we have further placed the coolie under a penal contract, which enables the planter to arrest a deserter without warrant and to treat a breach of contract as a criminal offence, punishable with imprisonment by the Courts. These are great privileges and great advantages; and in return for them the least that the Government can demand is that the coolie, who is not a shrewd or independent personage, but is often an almost unknowing partner to the contract, should not suffer from his ignorance or his timidity, but should be accorded a protection corresponding to the stringency of the conditions by which he is bound. That protection we offer him by statutory stipulations as regards the term of his contract, the conditions of his employment, the price of his food, and, above all, the rate of his wages; and we have just as much right to revise the latter, if we think them unjust or inadequate, as we have to provide the machinery which brings him into Assam at all. The Hon'ble Mr. Buckingham quoted with approbation a passage from a speech which I made when in Assam a year ago, and in which I said that, in the long run, this question will be settled by the immutable laws of supply and demand. So it will. But we are dealing here not with the long run, but with the short run; and the less Hon'ble Members talk at the present stage about

the laws of political economy in the present context, the better, I venture to say, for their own position. Where, I wonder, are the laws of supply and demand at the present moment, when the coolies cannot be imported, at any rate in sufficient numbers, without the assistance of the law, when they cost Rs 150 apiece, when they are not allowed to combine or to strike, when they are compelled to stay for four years whether they like it or not, and when they are put into gaol if they run away? The less, therefore, that is said about the laws of supply and demand, I venture to think, the better. I should be only too pleased to revert to them at once. But if I proposed to repeal this legislation altogether, and to leave the entire industry in Assam to the operations of natural laws, from whom would the loudest protests come? It would not be from the coolies, but from my Hon'ble friends who represent the employers' interest. This, then, is the justification for our interference. It is the corollary of the whole of our action in the matter for the last thirty-six years: and if we ceased to intervene, it would be capital and not labour that would utter the bitterest outcry. The Hon'ble Sir Allan Arthur said that, if a higher wage were called for, why should not the planters give it? The answer is that, as long as the penal contract remains, by which capital is rendered relatively secure of its labour, so long will capital continue to resist a reduction of the wage. It is merely another illustration of the proposition that the ordinary laws of supply and demand do not apply to Act-labour in Assam.

"And now as regards the case for the particular increase of wage that is advocated by the Government. I confess that I find it rather difficult to distinguish between all the calculations and statistics with which we have been favoured by opposite speakers. I have never come across a more striking illustration of the proposition that figures are obedient servants but queer masters. Each Hon'ble Member has provided himself with a store of these pliable instruments, which have done for him all that he could desire. But then another Hon'ble Member has appeared upon the scene with a rival batch of figures, leading to a diametrically opposite conclusion; until we have all felt ourselves in the position of the bewildered interrogator who asked, What is Truth? I cannot of course claim to be any better judge of these rivalries than any one else; but I have at least set myself to a very patient examination of them, and the conclusion to which I have come is the following. I cannot conceive how it can be argued that a wage which was considered a fair minimum wage nearly forty years ago is a fair maximum wage (for so it is in general practice) now. Whether we compare the wages of Act-coolies with those of free-labour coolies upon the Assam gardens, or the wages in the plantations of Assam with those in Bengal, or the wages in the tea-industry with those in other forms of industrial enterprise, or the wages of Assam coolies with those of the Indian emigrants who proceed to foreign countries —and I have endeavoured to apply all these tests—we cannot, in my judgment, resist the conclusion that, where his fellows or neighbours or competitors have gone ahead, the Act-coolie in Assam has relatively stood still. But then I shall be told that the answer to this is the contention of the Hon'ble Mr. Buckingham and his friends, namely, that the average coolie already gains more than the minimum wage, and therefore that it is a task of superfluous generosity to increase his pittance. These were Mr. Buckingham's words, 'The minimum legal rates are already exceeded by arrangements which have gradually grown up between employers and employed.' Now this is exactly the contention which is disputed by the Government, and which is, I believe, incapable of being sustained. For, in the first place, the contention fails to specify that the arrangements spoken of are absolutely voluntary, and are provided for by no law. Next the calculations upon which the contention is based include overtime payments, which are not earned everywhere or by everybody, or at every time of the year: they also, I believe, in many cases include the bonuses paid to time-expired coolies to induce them to re-engage. They are further based, as Sir Charles Rivaz has pointed out, upon the unit, not of the individual, or of the man and his wife, but of the family. If all these deductions be made, and if it be remembered further that at the end of every calendar month a subtraction is also made on account of the uncompleted tasks during the preceding twenty-six working days, then I

do not hesitate to say that the monthly wage earned by the average indentured man and woman on the Assam tea-gardens, so far from being Rs. 5 + Rs. 4, *i.e.*, Rs. 9, which is the statutory minimum, will be below it. In other words, the statutory minimum is in excess even of the normal maximum; and the law which provides for the former has in practice broken down. That this is so is conclusively proved, as regards first and second year coolies, by the action of Mr. Melitus at the Tezpur Conference in recommending a fixed minimum of Rs. $3\frac{1}{2}$ for a man and Rs. 3 for a woman for the first two years, irrespective of task. Why should he have made any such proposal, if this minimum, in itself far below the statutory minimum, were commonly exceeded in practice? I am not here saying one word in criticism or in depreciation of the management of the majority of the gardens. I saw enough of them in my short visit of last year to justify much admiration. But I say that we have to deal with the average coolie, and not with the exceptional coolie, with the average garden, and not with the exceptional garden; and that a situation in which the law has fixed a minimum wage for the male and female coolie, and in which the majority of them fail to earn it within the limits of their ordinary task, is not a situation which the Government can accept with equanimity, or in whose permanent continuation they can acquiesce.

"I am aware that pictures have been drawn in these discussions of the contentment of the coolie, and of the happy Arcadia in which he dwells. It is impossible in this context to ignore the evidence placed before us today by the Hon'ble Mr. Cotton. It may relate to exceptional cases; but even if they be exceptional, how is it possible to defend a system under which such things can occur? So far as it goes—and I desire to push it no further—the evidence is, in my judgment, overwhelming. I have seen some excellent plantations, in which I think that favourable conditions may reasonably be predicated: though even there I should very much like to hear the coolies' view of the situation. But if the planters' contention is generally true, and if, as is also alleged, the coolie knows perfectly well what he is going to when he is enlisted for Assam, then I fail to see why the stream of emigration to this peasant paradise should be drying up, or why there should be such difficulty in securing eligible recruits. It cannot be due to the superior attractions of labour in the coal-fields or jute-mills of *Bengal*, or in the gardens of the Duars, because Hon'ble Members decline to admit that the wages there are any higher, or the prospect more alluring. How then does it come about, to quote the Hon'ble Mr. Buckingham's figures, that the total number of imported adult coolies sank from 61,000 in 1896 to 25,800 in 1899, and of Act-coolies from 18,800 in 1896 to 11,000 in 1899? Famine conditions, and the facility of procuring labour in famine years, do not explain these variations How are we to account for the figures that were given in his speech, by Mr. Cotton? It seems to me that the argument that the coolies know exactly what they are about in going to Assam, when coupled with the startling reduction in the totals in which they go there—a reduction that, it should be noted, has been simultaneous with an extraordinary expansion of the industry—is fatal to the hypothesis that they find in the existing prospect, which turns mainly upon the wage, a sufficient attraction. The Hon'ble Mr. Bolton said that the coolie need not go to Assam, and nevertheless that thousands go every year. But how much does the poor ignorant coolie really know of where he is going to? One recruiting agent comes along and tempts one man by glowing promises to go to Assam. Another agent appears and persuades another man by an equally glowing picture to go to the coal-mines or the Duars. Not too much stress should, I think, be laid upon the volition of the coolie. As for the thousands in which they are alleged to go, the whole point is that the thousands are diminishing. That has been conclusively shown by the figures quoted by Mr. Buckingham.

"It is not unreasonable also to suppose, if the coolies are so familiar with the prospect that lies before them, that they are acquainted with the terribly high rate of mortality that prevails among the Act-labourers as compared with free-labourers in Assam. No one has disputed the figures upon this point: and to my mind it seems clear that the consciousness that there awaits the exile a wage lower than that of his fellows, and a risk of mortality immensely greater,

is quite enough to staunch the flow of the emigrant stream. The Hon'ble Mr. Henderson remarked that he had himself experienced no difficulty in procuring sufficient labour. Yes, but his plantations are, I believe, in Cachar, where the Act-coolies are in so small a minority that the proposed increase of wage will have little effect. Tne conditions of Cachar, moreover, are very different from those of the Brahmaputra Valley: and the dearth of labour in the latter is a matter of universal complaint and is incontestable.

"I next pass to the cost of the proposed increase of wage. I read some astonishing statements at a recent public meeting in Calcutta to the effect that it might involve the tea-industry in an additional annual burden of 30 lakhs. This calculation proceeds in the first place upon the assumption that because there is a slight increase in the wage of the Act-coolies, there must be a corresponding increase in the wage of all the non-Act-coolies, both in the Surma and Brahmaputra Valleys. I believe this to be an erroneous hypothesis. In the Surma Valley the Act-coolies are, as it is known, in a small minority compared with the free-labourers, and might, so far as I can see, be dispensed with altogether. Secondly, the planters have themselves contended throughout that there is no anology between the circumstances or conditions of the two parties. Thirdly, it is generally admitted that the wages of the free-labourers are already higher, so that there need be no question of bringing the two sets of wages on to the same level. I believe this surmise, therefore, to be destitute of any widespread or general foundation. Mr. Buckingham has given the number of Act-coolies as 132,000. Out of these it can be shown by calculations that about 50,000 are in their second or third year. An increase of 8 annas per month to the wage of each of these persons for two years means an increase in each case of 12 rupees, or a total increase. spread over the two years, of 6 lakhs. Now I understand that the labour bill of the Assam gardens is about 200 lakhs a year, or 4 crores in two years An addition to this total of 6 lakhs is an addition of only 1½ per cent. in each of two years, not, I should have thought, a burden that would have reduced even an embarrassed industry to ruin.

"But perhaps it may be said that the arguments which I have been using might equally justify the larger increase advocated by Mr. Cotton, with the smaller increase proposed by the Government of India. I am not sure that this is not the case, and that we have not been too moderate. But we have preferred to err, if at all, on the side of leniency rather than of severity. We have tried to see how best we could reconcile our responsibility to the labourers with our desire to do no injury to the planters: and we have accordingly diminished our proposals to the minimum point compatible with fairness. What then is the upshot of the contemplated legislation in respect of wage? For the first year of the quadrennial period, the maximum wage will remain, as under the existing law, at Rs. 5 a man and Rs. 4 a woman, with the proviso that those who are physically unfit for the discharge of a full task shall receive the same wage for a half task during the first six months. In the second year the wage will be Rs. 5½ for a man and Rs. 4½ for a woman, instead of Rs. 5 and 4. In the third year, the figures will remain the same as in the second year. In the fourth year, they will be raised, as they already are under the existing law, to Rs. 6 and 5. I have further indicated in my opening remarks our willingness to consider favourably the postponement of this very modest increase for another two years. I submit to this Council that our proceedings have been actuated by conspicuous and almost excessive moderation, and by the most anxious desire to strike the delicate mean between the two great interests which it has been our duty to consider: and I cheerfully ask the consent of this legislative body to a proposal which, when it comes into operation, will I believe, do something to ameliorate the lot of the labourer, to attract a better class of coolie to the Asssam plantations, and in the long run to benefit the employers even more than the employed."

The Hon'ble MR. BUCKINGHAM, in reply, said:—"My Lord, allusion has been made by the Hon'ble Chief Commissioner to the *penal* contract between employer and employé, as if it was a dire misfortune for the coolie to be bound by such a contract. In my opinion the coolie benefits to a great extent by such

contract. I should like to state what late Chief Commissioners had to say on the subject.

"Sir Charles Lyall in his letter to the Government of India, dated 8th July, 1898, said,—

'Government insists on a great deal more in Assam than would be possible under any Factory Law of which the Chief Commissioner is aware, and the penal contract is thus compensation to the employer for an amount of interference and control in all the details of his relations with his labour-force, which could not be justified without some such contract.'

"Sir Charles Elliot remarked in 1885:—

'As to the tea-coolie, the protection he gets, the excellent cottage he lives in, the good water-supply, the fairly cheap food and the fairly reasonable wage he gets, are the *quid pro quo* granted in return for the penal clauses which compel him to carry out his part of the contract. He would not get the one without the other, and he would certainly be worse off if he had to part with both. The alternative would be a migratory class of labourers whom no one would go to much expense in hutting and providing for, because he could not be sure of retaining their labour, who would be constantly shifting from one place to another under the influence of enticement and bribery, who would have to build their own houses and would build them of poor materials on unhealthy spots, who would be entitled to no medical care when ill, and would have no opportunity of making complaints or getting grievances redressed such as they have now when the Inspector's official visit takes place. Such a state of things would be good neither for their *morale* nor for their bodily welfare; but such a state of things would necessarily arise as long as population is scarce and the labourer of great value to the planter, if the law did not intervene to give permanence and solidity to the mutual relations of planter and labourer.'

"Allusion has also been made by the Hon'ble Mr. Cotton to the so-called Rs. 5 minimum pay, which, by Act I of 1865, he says, the coolie was entitled to receive irrespective of work done. Whatever may have been the intention of the Government of Bengal at the time, suffice it to say it was never carried out in practice. The Bengal Commission sent up to report in 1867 stated at page 65 of their report that—

'The wording of section 4, Act VI of 1865, was ambiguous. Had the word "rate" been omitted, the meaning would have been clearer. By many it has been interpreted to mean that the labourers were to be paid at these rates, the insertion of the word "rate" implying that the actual amount of pay earned was to be determined by the actual work done.

'This view of the case, moreover, is supported by the wording of the form of contract which is required, and which has the force of a document drawn up and brought into operation by the Government. The fourth section of that contract states that so long as the said labourers respectively shall work nine hours daily, or so much thereof as shall be required of him or her, he or she shall receive monthly the sum payable to the class to which he or she may belong,' clearly implying (so the Commission said) '*that when the labourers did not work they lost their claim to the full amount of wages.*'

"The Hon'ble Mr. Cotton *has not* even alluded to the *term of the contract*. I need hardly add that the *terms of contract* were adhered to in Assam, not only by planters, but also by the officers of the Public Works Department, who imported coolies on the same terms as we did.

"It is worthy of note that in Act II of 1870 the legislature abandoned the rate of wage altogether, providing, however, that the *contract* should 'specify the monthly wage in money', and so it remained for no less than twelve years, during which time no advantage whatever was taken by planters to reduce rates.

"My Lord, alluding to the Hon'ble Sir C. Rivaz's remarks on this Bill and on what I stated *re* wages, I did not accept the immigration statement of wages, for I added that 'some gardens did not enter all the ticca earnings; so the returns are not of much value in showing actual earnings.'

"As to the Rs. 3-8 and Rs. 3 suggested at the Tezpur Conference, we simply wished to make law what in reality was being done at most gardens in behalf of coolies who could not do full tasks; in fact, that the very small minority of gardens should be compelled to act as the majority did."

The motion being put, the Council divided :—

Ayes—5.

The Hon'ble Mr. R. H. Henderson.
The Hon'ble Mr. R. P. Ashton.
The Hon'ble Mr. C. W. Bolton.
The Hon'ble Sir Allan Arthur.
The Hon'ble Mr. J. Buckingham.

Noes—13.

The Hon'ble Rai Sri Ram Bahadur.
The Hon'ble Mr. H. J. S Cotton.
The Hon'ble Mr. F. A. Nicholson.
The Hon'ble Sir A. Wingate.
The Hon'ble Rai Bahadur B. K. Bose.
The Hon'ble Mr. H. F. Evans.
The Hon'ble Kunwar Sir Harnam Singh.
The Hon'ble Rai Bahadur P. Ananda Charlu.
The Hon'ble Sir. E. FG. Law.
The Hon'ble Mr. T. Raleigh.
The Hon'ble Sir C. M. Rivaz.
The Hon'ble Sir A. C. Trevor.
The Hon'ble Major-General Sir E. H. H. Collen.

The Hon'ble MR. SMEATON abstained from voting.
So the motion was negatived.

The Hon'ble MR. BUCKINGHAM then said :—"Alluding to Your Excellency's opening remarks I will ask permission to move the following amendment :—that to clause 5 of the Bill, as amended by the Select Committee, the following further proviso shall be added, namely :—

'Provided further that any labour contract made before the first day of April, 1903, may stipulate for a rate of monthly wages of not less than five rupees in the case of a man and four rupees in the case of a woman for the second and third years of the term of such contract.'

"Our position, my Lord, is such, that we readily grasp at any straw which, coming within our reach, might relieve us for the present of additional taxation.

"The state of the tea-industry has arrived at such a crisis that it is almost impossible to exaggerate it. I am afraid, my Lord, I have another small batch of figures. I have before me the results for the last four years of 52 joint stock tea companies registered in London with a capital of £4,552,814. The average dividend paid in 1896 was 7·39, in 1897, 6·07, in 1898, 5·41, and in 1899, 5·34.

"I must state, however, that in many instances reserve funds were encroached upon to provide dividends.

"Of 20 Assam Valley joint stock companies registered in Calcutta, representing nearly 70 lakhs of rupees, the dividend paid per cent. in 1896 was 4·16, in 1897, ·93 only, in 1898, ·88 only, and in 1899, ·98.

"Of an average of 22 gardens in Cachar and Sylhet representing nearly 76 lakhs, the dividend paid per cent. in 1896 was 5·88, in 1897, 1·59, in 1898, ·62, and in 1899, 3·34.

"As to the results of season 1900, I will now show that there must be a very serious loss to the majority of gardens.

"A fall of one anna per pound in the price realized for tea represents no less than 5 per cent. depreciation in dividends payable on the capital of a company.

"Comparing therefore the prices realized in Calcutta of the crop of 1900 with that of 1899, we find the average price has fallen from Re. 0-5-11 to Re. 0-5-4 per pound, or rather more than an equivalent of 2½ per cent. on the capital, thereby reducing the dividends of the Assam Valley and Cachar gardens to *nil*.

"In Messrs. Gow, Wilson and Stanton's Indian Tea Report of the 8th February we see that the total average of tea sold to date on garden account averaged for last season 7·35*d*. against an average in the previous year of 8·38*d*. per pound or 1*d*. decrease, thereby reducing dividends to ·34 per cent. As, however, stocks are at present over 119 millions pounds against 103 millions pounds

at the same time last year, we cannot but expect an even greater fall before all the season's teas are sold.

"The tea sold in the Calcutta market from the Brahmaputra Valley from September to December averaged Re. 0-5-9, or about 3 pie under total cost of placing it in the market.

"Similarly, tea from the Surma Valley averaged Re. 0-4-6, or 3 pie under cost price.

"I have shown that, taking the industry all round, dividends for last season will be reduced to *nil*. What must, therefore, the position of say 80 per cent. of the gardens be, if as many as 20 per cent. of the most favoured gardens *do* pay fair dividends? It is utterly impossible to continue working at a loss; it has indeed, my Lord, come to a point when the employer has to ask the labourer to give him a share of his income, to continue the industry; for what else is it, when we are compelled to reduce the wages of all coolies except those under the Act? The Hon'ble Mr. Cotton enquired, when expressing a doubt regarding the depression of tea, how it was that we had been going on with extensions for so many years? The answer is simple. If we *had not* made the extensions, many an old garden would have collapsed long ere this. Extensions have enabled us to place our tea in the market at a greatly reduced rate. I see from the Annual Tea Reports that only 15 years ago, tea from the Assam Valley cost, placed in the market and cluding sale charges, over 8 annas per pound, and in the Surma Valley over 7 annas. Within this period, owing greatly to these extensions, the yield has increased per acre from 320 pounds to 448 pounds, and we can place tea in the market two annas cheaper. Could we remain looking on quietly when Ceylon, the Duars and Travancore were rushing tea out and slowly driving us out of the market? It is not, therefore, fair to blame the Assam planters for the present state of affairs.

"The Tea District Labour Supply Association informs me that they have forwarded to date 1,934 coolies only to Assam, against 20,715 to the same date last year.

"Owing to the depressed state of tea, orders for coolies are being cancelled in many quarters. It must not be thought that the above decrease is owing in any way to the scarcity of coolies, for our requirements can be easily met.

"My Lord, every effort is being made by the planters themselves to reduce the output of tea either by abandoning 10 per cent. of the area of their cultivation or else by actually curtailing the estimates for the coming season by 10 per cent. By some it is thought, and by all fervently hoped, that by adopting the above precautions the tide of events may be satisfactorily passed over.

"Another point I should like to mention, and it is this. It is absolutely impossible to foretell with any accuracy the result of the working of the Act in the recruiting districts, *i.e.*, whether or not the amendments made will reduce the cost of labour. I understand that a notification under section 3 will be issued with as little delay as possible, but in my opinion it will be necessary to defer putting Chapter V into operation, until the present pernicious arkati system is thoroughly rooted out. This will be a matter of time. It must be remembered that any remarks of the Labour Enquiry Commission on the increase of wages were made on the assumption that the cost of importing labour would be materially diminished, but the 'unfulfilled prophesies' in connection with the working of past Acts are inclined to make one feel sceptical in the present instance.

"We look, my Lord, for stronger executive supervision: the system is too slippery to be confined in a legislative straight waistcoat.

"An industry, my Lord, which does not progress, must by the law of nature retrograde, and finally disappear. I could not believe that Your Excellency would be so deaf to the overwhelming majority of official opinion against this enhancement of wages, or so blind to the fatal consequences of its becoming law, that you, my Lord, will persist in it, as it now stands, and not consent to the slight modification I have now proposed."

The Hon'ble SIR CHARLES RIVAZ said:—"I endeavoured to explain, in replying to my Hon'ble friend's previous motion for amending clause 5 of the Bill, that while the Government of India was convinced of the necessity for

their very moderate enhancement of the present wage-rate of the coolie who is put under penal contract in Assam. At the same time, I am quite ready to admit that my Hon'ble friend has shown that the tea-industry is passing at present through a phase of acute depression which we all sincerely hope will very soon be followed by a return of prosperity and that at the present moment it is really unable to bear an additional burden, however moderate. I think, therefore, that on this ground, and also because the planters will probably require some little time for making their arrangements for availing themselves of the new system of recruiting by garden-sardars which is provided by Chapter V of the Bill, I am justified in accepting the present amendment on behalf of Government. The provision about a half task for the new coolie during his first six months will of course come into operation at once."

The Hon'ble MR. COTTON said:—" My Lord, I confess that this proposal, of which no notice has been given to Hon'ble Members, has come upon me somewhat as a surprise, although I was not absolutely unaware that a motion of the kind was possible. But, my Lord, I think that, if this recommendation is accepted by the Council, we shall stultify in a very complete manner the comparative benefit which we have today accorded to the tea-coolie in Assam. As I understand it, the effect of it will be that it will be for a period of four years at least before even the small concession—a wholly inadequate concession as I think—which the Council have today agreed to will be accorded to the long-suffering labourer. If there is a postponement of two years from the 1st April next,—and one year follows from the operation of the Bill as it now stands,—it will be in the fourth year before he will gain the small increment of eight annas above the rate which he at present draws of Rs. 5. If this small increase of salary is postponed for so long a period as that, I think Hon'ble Members might as well postpone it altogether. The only reason for the postponement—so far as I am able to understand it, because the discussion on the subject has been very brief—is that the industry is suffering from a temporary depression. Well my Lord, a great deal too much in my opinion has been made out of this so-called depression. The real reason of this depression is that the industry a few years ago—and not so many years ago—was so extraordinarily prosperous that everybody put their money into tea, and the extension of tea-cultivation was so great, and the production so large, that the market was over-supplied. I do not blame the Assam planters in the smallest degree for this result, but that this is the explanation of the so-called temporary depression there can be no doubt. I have not come to this Council primed with figures of dividends which tea-gardens in Assam gave a few years ago; but my memory on the subject is not altogether indistinct, and I know this, that only a very short time ago the prosperous gardens in the Province, and they are not inconsiderable in number or extent, were giving dividends varying from 30 to 15 per cent. per annum. Well, I suppose that even my Hon'ble friend opposite (Mr. Buckingham) would consider that to be evidence of prosperity; at all events the general public took that view and put their money largely into tea. The production of tea has enormously increased, and the price of tea has run down, and dividends now, instead of being 20 or 25 per cent., have become in prosperous gardens 10 per cent., 7 per cent. or in some cases 5 per cent., and in some less. But, my Lord, even 10 per cent. or 7 per cent. is not altogether a bad return for your money, and so long as gardens are able to give dividends of 10 and 7 per cent. and even [redacted]nt., I must say that it seems to me that the outcry that the indus[redacted] such a crisis that it is on the point of expiring is an idle one. In Calcutta today's paper—I do not mean the *Englishman*, I refer to the *Indian Daily News*—that what I take to be the first garden of this year which is giving a dividend for 1900, *viz.*, the Hoolungurie Tea Company, has declared a dividend of 5 per cent This is not a very large garden, the cultivation is somewhat under 1,000 acres, but I see it has given a dividend of 5 per cent. on the outturn of 1900. During 1899 this garden gave a dividend of only 3 per cent. It was able to give 5 per cent. during the past year because it has got a higher price for its tea and, I presume, has done better plucking. I do not say that this is a typical garden at all, but what I do say is that this is a garden

which has understood the position and, instead of flooding the market with rubbish, has confined itself to the manufacture of the best class of tea. It has got an increased price and is able to offer an increased dividend. The Hoolungurie Garden seven years ago was only able to give 3 per cent. It is now able to give 5 per cent. I know nothing of the internal management of that garden, but I state the facts as I find them. Now, my Lord, the tea-industry is not the only industry that has passed through a crisis in connection with over-production. I have been for more than thirty years familiar—not perhaps in the same degree as some of my Hon'ble friends—but familiar with the fluctuations which take place in the market in regard to jute and other large and important industries. I was, for instance, an original shareholder in the Budge Budge Jute Concern. I can remember the fluctuations and depression in the prosperity which we have sustained as shareholders of a jute-mill. I can remember rushing up to dividends of 20 per cent. I can remember the corresponding over-production due to other mills being started and to the extreme depression under which we laboured. For some years there was no dividend given at all. Since then we have recovered. The immutable laws of supply and demand, of which we have heard so much today, have been allowed free operation, and as in the jute-industry so in other industries. Take the cotton-industry for instance, a decidedly larger industry than either jute or tea. The fluctuations there have been of a somewhat similar nature. They have been due chiefly to over-production as is the case before us now, but the crisis through which those industries have passed was never looked upon as being of such an exceptional character as to excite the sympathy of the public in such a way as we have today been called upon to sympathise with it. I can remember also the crisis through which the tea-industry went a little more than thirty years ago when I first came to the country. I well remember the Commission of which the Hon'ble Mr. Buckingham has spoken, and of which Mr. Justice Ainslie was the President. The crisis through which the industry passed at that time was much more severe, much more dangerous and acute, than that through which it is now going on account of over-production. Then it was due, as I stated in the remarks which I made earlier in this discussion, to speculation, and it was so serious that those gardens which were subsequently able to give from 20 to 25 per cent. were really in a very bad way and able to give nothing at all. That was a time when there was reason to fear that the tea-industry might go under; but there is nothing whatever in the condition of the industry at present which justifies us in adopting the extraordinary—I can only describe it by such a term—extraordinary proposal of postponing this provision of the Bill which, after full and elaborate discussion, we have provided for the benefit of the coolie. I trust that Your Excellency—and I speak with great diffidence in this matter—I trust that the mind of Your Excellency is not absolutely made up on the subject; and I hope that the Council will not by a second resolution today carry an amendment which completely stultifies and destroys the benefit of the clause in the Bill to which we have agreed; but that this amendment of Mr. Buckingham will be rejected as decisively as the former amendment which he put forward."

The Hon'ble SIR ALLAN ARTHUR said:—"I understood the Hon'ble Mr. Cotton to say that there is nothing in the condition of the tea-industry which suggests my Lord is in a bad way. I am very much surprised that the Hon'ble Mr. Cotton made a statement of this sort after the figures which I read in the course of my former speech, which only showed that, out of 61 representative gardens, 45 of them this year have not paid a dividend at all. I should think, my Lord, that that is sufficient proof that the tea-industry is in a very bad way. Further, out of 33 companies registered in England, the highest dividend that any of them paid last year was 5 per cent I read these figures, as I say, before, and showed the Council that the industry was in as depressed a condition as it could possibly be. I should like to point out to the Council that tea is not like other crops. If the price of jute or wheat declines so low that it cannot be grown at a profit, all that the cultivator has to do is to throw his land out of cultivation, grow another crop, and wait till the market improves. It

costs him nothing to throw his land out of cultivation. Tea is entirely different in this respect. If the planter were to stop cultivating for a season, the bushes would grow into jungle, the coolies would leave the estate and the planter would be a ruined man. The only thing that can help tea is an increase in consumption, and for that the planter must wait for some years. The end of the present depression is not in sight, and I think it would be of great benefit to the industry if this increase in the wage of the coolie could be postponed for two years."

The Hon'ble RAI BAHADUR P. ANANDA CHARLU said:—"I regret I have to oppose this amendment. Between the employer and the labourer, the former can afford to bear the burden, as Your Lordship pointed out incidentally, while the latter can ill-afford to go without the increased wage. If the former will be appreciably worse off, the latter will be very much more so. To the former it may mean the reduction of some luxury, while to the latter it will be serious privation."

His Excellency THE PRESIDENT said:—"I am sorry that this proposal has met with so unfavourable a reception at the hands of the Chief Commissioner of the Province. He seems to have considered that it is one of an extraordinary character. I hope he will allow me to say that it is in no sense extraordinary. It is not at all an uncommon thing in legislation in England, and it has not been an unknown thing here, if the Government or the Council have, upon their responsibility, decided upon legislation of a particular character affecting a particular interest, and if any circumstances have been brought forward which have demonstrated to the satisfaction of the legislative body concerned, that a change in the law which, upon general principles, they have accepted, could only be put into operation at a certain moment at the cost of some injury to one of the parties concerned—I say it is not at all an uncommon thing, either at home or here, to accept an amendment or proviso postponing for a short time the operation of the Act or clause in question. Nor, again, do I think that there is anything extraordinary in the circumstances of this particular case. We have now had a long debate lasting the greater part of the day, and widely as our opinions have differed, and difficult as it has been to test the figures that have been given, undoubtedly the calculations which have, in my judgment, least admitted of dispute have been those which have indicated that the tea-industry in this country, and Assam in particular, has, during the last year or two, passed into a depressed and impoverished condition. However, the Chief Commissioner says that we are now about to stultify—this is very strong language—the benefits and the advantages which it is proposed to confer upon the coolie by this Act. Well, I would submit that he is ignoring or forgetting the fact that the postponement of the wage clause will not in the least degree affect the particular concession as regards the full wage for the half task during the first six months of the term of service of the Act-coolie. He is also ignoring the great and indisputable advantages that ought to accrue to the coolie no less than to the employer from the improved methods of recruiting and superior supervision that will be effected under this Act; and he is also ignoring, as has been pointed out, the remarkable figures and calculations given in the table that was read by the Hon'ble Sir Allan Arthur this afternoon. There is, therefore, I submit, nothing extraordinary in such a proposal being submitted to this Council; and while it is true that its acceptance may involve the postponement of certain of the advantages of this Bill, to say that it will stultify them, is language which exceeds the bounds of that which is reasonable or just. What we are called upon to do is to strike a balance between the two parties. No doubt it is true that it would be more to the advantage of the coolie that the increase of wage should come into operation at once; but even the Hon'ble the Chief Commissioner must remember that were his advice accepted, it would not do so for a whole year, inasmuch as the rise of wage only begins to apply to the coolie in his second year. He has himself, therefore, already by his vote signified his acquiescence in a position which does postpone for an entire year the increase of wage which he now argues

ought to take immediate effect. Then, as I have said, we have not only to consider the wage of the coolie, on the one hand, but we also have to consider the effect that might be produced upon him by the imposition of this additional tax upon the industry that employs him at a time when it is very seriously depressed. Is not this point worth considering—that if the increase of wage began to operate at once, and if the facts are, as they are alleged to be, in connection with many of these plantations, even the modest additional expenditure entailed by the increase in the wage of the Act-coolie, in its effect upon these impoverished firms and companies, might be followed by a very unfavourable reaction upon the coolie himself? I think, therefore, that even in the interests of the coolie a case may be made out for postponement.

"We have, as I indicated in my remarks at the opening of this debate, been prepared to listen with an open mind to the arguments which might be adduced in favour of such a postponement. At the same time there are certain of these arguments in which I cannot profess to find any peculiar force. I have heard it said, both inside this Council and outside, that if, and when, the slight addition to the wage of the Act-coolie in Assam, that we have sanctioned by the vote of this Council, be put into operation, the majority of gardens will pass out of cultivation, and that Assam will revert to a howling wilderness. Having heard a good deal of public and platform declamation, I have learned that in speeches wildernesses always howl. But they do not do so in fact; and even were this increase of wage which we have passed to come into immediate operation, I should not be in the least alarmed as to the relapse into waste of any considerable part of the cultivated area of Assam. It might unfavorably affect a number of tottering ventures, and I am willing to regard this as a ground for postponement; but I cannot believe that it would appreciably retard the general development of the province.

"There is another claim that was specially put forward by the Hon'ble Sir Allan Arthur which I must equally decline to accept. It is the claim that we owe some special reparation to the planters for our currency policy, which, by raising the rate of exchange, is alleged to have raised against them the cost of production. Now, this case was argued before the Currency Commission in London in 1898 by prominent representatives of the planting interest; and I do not hesitate to say that it completely broke down It was conclusively proved before that Commission that the depression in the industry was due, not to the closing of the Mints by the Government of India, nor to the fiscal policy of the Chancellor of the Exchequer in raising the tea-duty, but to over speculation, over competition, and over production. I have gone very carefully into the figures: and they show most conclusively that, whereas in the nine years preceding the closing of the Mints, that is, from 1885 to 1893 inclusive, the area under tea-cultivation in India increased by 39 per cent., and the quantity produced by 85 per cent., in the six years following upon the closure of the Mints, namely, 1894 to 1899, the area increased by a further 43 per cent., and the produce by a further 76 per cent.; while in 1899 the increase in production was double what it had been in any previous year. So much for all India. I will next take the case of Assam alone. In the nine years from 1885 to 1893, the increase in area was 30 per cent., in production 75 per cent.; in the six years from 1894 to 1899 it was 38 per cent. in area, and 67 per cent. in production. Further, if we eliminate the years 1893-1897 while the rupee was steadily rising from 13*d.* to 16*d.*, and if we take the years posterior to 1897 only, during which the rupee reached and maintained stability, we shall find that, in the two years 1897-1899, there was an increase of 20,000 acres in Assam alone brought under cultivation, and of 21 million pounds of tea produced Moreover, the fall in the price of tea, about which we have heard so much, continued long after exchange had become stable. It is clear, therefore, to me that the argument derived from the closure of the Mints is of very little value: and that the tea-industry has been disastrously affected not by the currency policy of the Government of India, but by the ill-considered rush of speculation, and by the production of more tea than there were markets to purchase or mouths to swallow.

"However that may be, we have to deal at this moment not so much with causes as with results; and I am quite prepared to recognise that the facts that have been placed before us, testify to a condition in the industry which is one of much embarrassment. The situation has changed materially, and for the worse since 1899. Figures have been given in this debate of the fall that has taken place in the prices of tea. I am far from admitting that this fall involves a corresponding abridgment of profits, since I learn that there has been a considerable reduction in the cost of production, arising from more scientific cultivation, better plucking, and improved methods in general. But nevertheless the fall in prices has been continuous and unarrested, and cannot fail to re-act unfavourably upon the industry. Similarly I have examined the dividends of the Joint Stock Tea Companies throughout India, in order to realise the general impression that was being produced upon them by the stagnation, resulting from excessive production, in the industry. I gather from the statistics that the turn for the worse did not come till after 1899. Up till that time many were doing very well. Of 31 companies registered in India in 1899, six paid dividends of 4 to 10 per cent., and five of 10 to 15 per cent. or over. On the other hand, that production was already becoming extravagant was shown by the fact that 17 of the 31 paid no dividend, and of these 8 never had paid any dividend. The figures for 1900 have been given by the Hon'ble Sir Allan Arthur and the Hon'ble Mr. Buckingham, and I need not repeat them. Of the 50 companies registered in England, 12 in 1899 paid no dividend, 16 paid 5 to 10 per cent. and 11 paid 10 to 15 per cent. He e again we have received the figures for 1900 from the Hon'ble Sir Allan Arthur and the Hon'ble Mr. Buckingham. The Hon'ble Mr. Cotton has spoken as though 10, 7 and 5 per cent. were still common figures. I believe that this is not the case; and I think that the mistake he has made is his failure to recognize that there has been a marked decline since 1899.

"I am prepared, therefore, to admit that not merely in Assam, but throughout India, the tea-industry is at the present moment in a position which demands much sympathy and deserves respectful consideration. Other calculations and reasonings have been placed before us by the spokesmen of that industry at this table. Though I do not for one moment shrink from the position that the increase to the wage of the coolie which was recommended to this Council by Government, and which has been accepted by a majority of its votes, was a right and a wise decision, I will not refuse on behalf of my colleagues and for myself to accept the postponement that has been suggested, in the hope that in the space of time that will intervene before the change in the law comes into operation, there may under the new Act be an improvement in the facilities for recruitment by the garden-sardar, and a reduction in the price of importation, that will render the planting interest itself more favourable to an enhancement of wage that will provide it with a better article at a reduced cost.

"But here, in conclusion, let me say a friendly word to the representatives of that interest. I am a believer in the policy of helping those who know how to help themselves. I see the tea-merchants of India and Ceylon scrambling for the markets of England, the Continent and the United States of America. Why do the Assam planters not recognise that there lies the most splendid market in the world at their doors? Millions of Indians now burn kerosine oil, consume ice, carry umbrellas, and smoke cigarettes. Twenty-five years ago these habits would have been scouted as impossible. Now they are common and in some cases universal. Why do you not tempt these people also to drink tea? What is the good of scouring the world for the thousands? You have the millions at your gates. If I were a planter in Assam I would never rest till the pluckings of my garden became the staple drink of the Indian artisan, in place of the spirituous poison which he is now tempted, for want of anything better, to pour down his throat. I give you this suggestion for what it is worth: and, whether it be taken or not, I hope that Hon'ble Members will at least admit that throughout the controversial discussion of today the Government has shown itself a critical, but a not unfriendly, champion of the composite interests of the most interesting province of Assam."

The motion being put, the Council divided :—

Ayes—15.

The Hon'ble Mr. R. H. Henderson.
The Hon'ble Mr. R. P. Ashton.
The Hon'ble Mr. C. W. Bolton.
The Hon'ble Mr. D. M. Smeaton.
The Hon'ble Mr. F. A. Nicholson.
The Hon'ble Sir A. Wingate.
The Hon'ble Sir Allan Arthur.
The Hon'ble Mr. H. F. Evans.
The Hon'ble Mr. J. Buckingham.
The Hon'ble Kunwar Sir Harnam Singh.
The Hon'ble Sir E. FG. Law.
The Hon'ble Mr. T. Raleigh.
The Hon'ble Sir C. M. Rivaz.
The Hon'ble Sir A. C. Trevor.
The Hon'ble Major-General Sir E. H. H. Collen.

Noes—4.

The Hon'ble Rai Sri Ram Bahadur.
The Hon'ble Mr. H. J. S. Cotton.
The Hon'ble Rai Bahadur B. K. Bose.
The Hon'ble Rai Bahadur P. Ananda Charlu.

So the motion was agreed to.

The Hon'ble SIR CHARLES RIVAZ moved that the Bill to consolidate and amend the law relating to Emigration to the labour-districts of Assam, as amended, be passed.

The motion was put and agreed to.

The Council adjourned to Wednesday, the 20th March, 1901. His Excellency THE PRESIDENT explained that the Budget would be presented on that day, and that the Indian Mines Bill would be taken at the sitting on Friday, the 22nd March.

CALCUTTA;
The 14th March, 1901.

J. M. MACPHERSON,
Secretary to the Government of India,
Legislative Department.

SUPPLEMENT TO

The Gazette of India.

No. 11.} CALCUTTA, SATURDAY, MARCH 16, 1901.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

APPROPRIATION REPORT ON THE ACCOUNTS OF 1899-1900.

GENERAL REVIEW.

Throughout the report the rupee figures are in thousands of rupees and the sterling figures in hundreds of £; thus 10,64 reads as ten lakhs and sixty-four thousands of Rupees and £71,2 reads seventy-one thousand and two hundreds of pounds sterling. The Indian rupee figures are converted into sterling amounts at R15=£1.

1. The Budget Estimate closed with a surplus of £2,621,8 or R3,93,27 after providing for the full amount of the Famine grant £1,000,0 or R1,50,00. The rate of exchange taken in working out the Budget was 15¾ pence. The year opened with fair agricultural prospects and the Budget looked forward to an expansion of revenue under almost all the principal heads of Revenue, and from Railway receipts. Owing to the cessation of military operations on the North-West frontier a large reduction in army expenditure was anticipated; while on the other hand it was expected that there would be increased expenditure on account of the plague, and a reserve of 20,00 was provided for this purpose.

2. The occurrence of a widespread famine necessitated heavy expenditure on actual famine relief (R3,10,68) in the Central Provinces, Bombay and the Punjab, and to a smaller extent in all the other Provinces except Burma and Assam, and led to a serious loss of revenue under many heads, but especially under Land Revenue and Provincial Rates. The famine also led indirectly to an increase of expenditure under many heads, chiefly in connection with the grant of compensation for dearness of provisions and charges for supplies. The expenditure on Famine Relief and Insurance, mainly actual famine relief, exceeded the Budget by £1,345,7 or R2,01,85, and the total loss of Revenue and increase of expenditure, due directly or indirectly to famine, are estimated at £3,438,1 or R5,15,75. On the other hand there was an improvement, of 66½ lakhs under Opium owing to increased sales of Bengal opium, and under Customs and Forest. Receipts from Post Office, Telegraph and Mint showed an improvement of 66 lakhs, chiefly under Mint owing to the large rupee coinage of over a crore; and Railways yielded an increase of 1,41 lakhs in consequence of the movement of food-grains, and the transport of troops sent to South Africa. There was an increase of about 15 lakhs under Irrigation resulting from an increase in the area irrigated owing to scanty rainfall, and 16 lakhs under Army. Receipts owing to recoveries from Her Majesty's Imperial Government on account of stores, etc., sent with troops to South Africa. The expenditure under Buildings and Roads was curtailed in view of pressing famine needs, and there was an improvement of over 132 lakhs under Army Expenditure due mainly to the despatch of troops to South Africa, Ceylon and Singapore. The rise in the rate of exchange to 16·068 pence caused a saving (including Exchange Compensation Allowance) of £179,6 or R26,94. The net result of the year's account is a surplus of £2,774,6 or R4,16,19, which shows an improvement, as compared with the Budget, of £152,8 or R22,92.

3. The most important change in the form of the accounts is that due to the new method of exhibiting exchange, as described in paras. 4 to 6 of the Financial Statement of March 1900. Under this plan no addition on account of exchange is made under the various heads of Revenue and Expenditure, but for the purpose of combining the Indian and English figures, the former are converted at R15=£1 or 16 pence = R1. The small difference which arises from the use of this rate is shown together with the gain or loss on remittances in working out the figure under the head XXIV or 31—Exchange. The only other change which need be noticed is the transfer of the charges for railways, other than those for strictly protective purposes, from 34—Construction of Protective Railways to 48—State Railways, Expenditure not charged to Revenue, as stated in para. 7 of the same Financial Statement.

4. The following summary gives the Budget and Account figures of 1899-1900, which are reviewed in this report. The details will be found in the statements on pages 168 to 180:—

Receipts. Budget. £	Receipts. Accounts. £	Revenue and Expenditure.	Outgoings. Budget. £	Outgoings. Accounts. £
44,544,8	43,654,3	A Principal Heads of Revenue .	7,568,3	7,424,1

Comparison with the year 1898-99.

5. The comparison in respect of revenues with the year 1898-99 is as follows:—

Revenues.	1898-99. £	1899-1900. £	Difference, 1899-1900. Greater (+) or less (—). £	R
Principal Heads of Revenue . .	44,455,2	43,654,3	—800,9	—1,20,13
Interest	706,3	605,8	—100,5	—15,07
Post Office, Telegraph, and Mint	2,048,5	2,486,1	+437,6	+65,64
Civil Departments	1,151,0	1,185,0	+34,0	+5,10
Miscellaneous .	679,3	557,8	—121,5	—18,22
Railways . .	15,160,5	16,587,8	+1,427,3	+2,14,09
Irrigation . .	2,308,7	2,399,9	+91,2	+13,67
Buildings and Roads	470,0	440,9	—29,1	—436
Army Services .	616,3	719,5	+103,2	+15,48
TOTAL .	67,595,8	68,637,1	+1,041,3	+1,56,20

6. The important variations under *Principal Heads of Revenue* are the following:—

	£	R
Land Revenue	—1,101,1	—1,65,17
Opium	+585,1	+87,77
Salt	—216,2	—32,42
Stamps	+67,1	+10,06
Provincial Rates	—116,0	—17,39
Customs	—67,6	—10,15
Other Heads	+47,8	+7,17
TOTAL	—800,9	—1,20,13

7. The decrease under *Land Revenue* was largest in Bombay (78,81), the Punjab (35,70), Madras (23,56), the Central Provinces (29,79) and the North-Western Provinces (18,02). The decrease was almost entirely due to famine, to which the falling-off under *Provincial Rates* is also chiefly attributable, but it was enhanced by the collection of arrears amounting to 66,71 during 1898-99. The decline under *Salt* occurred mainly in Bombay, where the receipts were reduced by famine, and in Madras, where the realizations of the year 1898-99 had been unusually large. The falling-off under *Customs* was mainly due to the diversion of a considerable portion of the rice trade of Burma to non-dutiable Indian ports owing to famine, and to the depression of trade in Bombay on account of famine and plague, but there was a large increase in imports in Bengal. The improvement under *Opium* occurred entirely in Bengal owing to an increase in the price obtained, and to the sale of a larger number of chests. Increased litigation brought in better receipts under *Stamps*.

8. Under *Interest* the decrease was mainly due to the interest on the capital debt of the Bombay Port Trust, which fell due on 1st April 1899, having been paid in advance in 1898-99, and to the inability of agriculturists to pay the interest on advances made to them. There was an improvement of 4,84 in *Post Office Revenue*, which represents normal growth. Under *Telegraph Receipts* the improvement of 16,83 was caused by an increase in message traffic owing to famine and to the transmission of war news from South Africa. Of the increase of 43,97 in *Mint Receipts* 32,69 represents the profit on the coinage of a crore and thirty lakhs of rupees, and 9,22, the gain on copper coinage due to the large copper coin demand for the famine districts. The difference under *Civil Departments* is small. The decrease under *Miscellaneous* was partly due to the smaller recoveries on account of famine expenditure, than in the previous year, and partly to change in the method of showing Exchange in the year under report as explained in para. 3.

9. Under *Railway Revenue* the large improvement was mainly due, as stated in para. 2, to the movement of food-grains to famine districts and to military traffic. The principal contributors to the improvement were the following:—

	R
East Indian Railway	56,97
Rajputana-Malwa Railway	49,20
Bengal-Nagpur Railway	33,62
Eastern Bengal Railway	19,74
Bombay, Baroda and Central India Railway	16,87
Indian Midland Railway	16,20
Bengal and North-Western and Tirhoot Railway	15,35
Southern Mahratta Railway	12,99
Oudh and Rohilkhand Railway	12,38

On the other hand, the check in the export from the western ports due to plague and famine resulted in a loss on the Great Indian Peninsula Railway (35,68) and the North-Western Railway (11,12). The increase under *Irrigation* occurred mainly in the direct receipts from canals in the North-Western Provinces and the Punjab due to the increased irrigation owing to scanty rainfall, and partly to development of irrigation from the Chenab canal. The large increase under *Army Service* was mainly due to the recovery of the entire cost of stores and animals sent to South Africa with troops.

10. The comparison of the expenditure side is given below :—

	1898-99.	1899-1900.	Difference, 1899-1900, Greater (+) or less(−).	Total.
	£	£	£	₹
Direct Demands on the Revenues . . .	7,101,0	7,424,1	+323,1	+48,46
Interest	2,017,6	1,948,1	—69,5	—10,42
Post Office, Telegraph, and Mint	1,910,2	1,965,0	+54,8	+8,22
Civil Departments . .	10,486,8	10,782,6	+295,8	+44,37
Miscellaneous . .	3,844,4	4,052,5	+208,1	+31,21
Famine	791,5	2,098,8	+1,307,3	+1,96,10
Construction of Railways .	1,0	2,3	+1,3	+19
Railways . . .	15,780,7	16,511,1	+730,4	+1,09,56
Irrigation . . .	2,128,9	2,263,5	+134,6	+20,19
Buildings and Roads .	3,912,3	4,134,6	+222,3	+33,35
Army Services . .	16,001,3	14,885,2	—1,116,1	—1,67,41
Special Defence Works .	1,0	9	—1	—2
	63,976,7	66,068,7	+2,092,0	+3,13,80

11. Under *Direct Demands on the Revenue* the largest increase was that of 21,75 under *Opium*, due to larger payments to cultivators in consequence of the outturn of the crop having exceeded that of the previous year. The net Opium Revenue was thus 66,02 better than that of 1898-99. There was an excess of 6,64 under *Assignments and Compensations*, chiefly in India and Bombay, owing to arrear payments ; of 6,85 under *Land Revenue* mainly in the charges for District Administration, and Land Records and Agriculture in Madras and Bombay, and of 10,46 under Forest, due to the famine grass operations in the Central Provinces and Bombay, and to extensive charcoal and fuel operations in the Punjab. The decrease under *Interest* was chiefly due to the transfer of a large portion (23,76) of the charges to the Railway accounts owing to increase in the capital expenditure, partly counterbalanced by increased payments on India Bills in England. The increase under *Post Office* and *Telegraph* was chiefly due to the normal development of these departments, and in the former, partly to the decentralising of the office of Account and Audit. Under *Mint* the increase was due mainly to the loss of metal in coinage in the large rupee coinage of the year. Under *Civil Departments* there was an increase under *General Administration* (11,60) chiefly in England on account of purchase of land. Under *Police* the increase (9,63) was due to the separation of the Rangoon City Police from, and the amalgamation of the Mandalay Municipal Police with, the District Force in Burma, the progress of reforms in the North-Western Provinces, the expenditure on account of plague and famine in the Punjab and Bombay and on account of the Tinnevelly riots in Madras. Under *Marine* (15,76), it arose from expenditure in connection with the fitting out of transports for South Africa; and under *Political* (17,97) to the payment of arrears of the subsidy to the Amir of Afghanistan, and to an increase in the charges on the North-West Frontier. There was a decrease under *Medical* of 19,97 chiefly in plague expenditure in Bombay. Under *Miscellaneous* the largest increase occurred under *Exchange* (12,14) and chiefly caused by the change introduced in the accounts of the year under report (see paragraph 3). There were increased payments in England under *Civil Furlough and Absentee Allowances* and *Superannuation*. Under the latter the payments in India also increased. There was an increase in the purchases of stationery, while the write-off of irrecoverable advances to cultivators in the North-Western Provinces, and large refunds of plague expenditure to Municipalities in Bengal led to an increase under *Miscellaneous*.

12. Under *Famine* the expenditure was incurred almost entirely for Famine Relief (3,10,68), there being besides only a small charge (3,59) for construction of Protective Irrigation Works. In the previous year the charges for famine relief and construction of Protective Irrigation Works were small, being, respectively, 4,00 and 1,17; but there was large expenditure on construction of Protective Railways (69,04) and a large adjustment (44,52) under Reduction or Avoidance of Debt, whereas in the year under report the charges on account of the former were transferred to 48—Expenditure not charged to Revenue (see paragraph 3), and in consequence of the actual famine charges having exceeded the grant under this head, no adjustment was made on account of Reduction or Avoidance of Debt. The famine charges were largest in the Central Provinces (1,54,49), and Bombay (1,16,41). Under *Railways* there was an increase of 73,64 under Working Expenses of State Railways, owing to increased mileage run and heavy repairs and renewals of rolling stock; of 27,32 under Interest in India and England; and of 11,69 under surplus profits of Guaranteed Railways due to increased earnings; while there was a decrease of 4,72 under Subsidised Railways owing to reduced land acquisition operations. The increase under *Irrigation* was due to increased working and maintenance charges, to large interest charges consequent on a large capital outlay, and partly to the charge to this head of expenditure on famine relief works (reckoned at ordinary rates) in connection with revenue-producing canals and tanks. Under *Buildings and Roads*, the increase was due to larger grants having been made available for expenditure. Under *Army Services* the large decrease was chiefly due to reduced charges on account of pay of British Troops and Exchange Compensation Allowance, owing to an improvement in the rate of exchange and the absence of troops in South Africa, to the credit afforded by Her Majesty's Imperial Government on account of local stores issued to the South African troops, to the stoppage of home reliefs, owing to the war in South Africa, and the curtailment of Indian reliefs in consequence of famine and plague. These decreases were partly counterbalanced by increased expenditure on account of messing allowance, by charges on account of certain Native troops, which in the previous year were charged to Her Majesty's Imperial Government, on account of service in Mombasa (East Africa), by a rise in the price of food supplies for men and animals, owing to scarcity, by more sea transport charges, by expenditure incurred in replacing a portion of the animals and stores sent to South Africa, and by increased expenditure on account of the Khyber Force and Moveable Column, and the Mishmi Expedition.

Comparison of Accounts with Budget Estimates of 1899-1900.

13. The following figures exhibit the differences in the net accounts between the Budget and the Actuals, those in India and England being shown in separate columns. A comparison of the gross figures has been given before in para. 4:—

Better + Worse —

	INDIA.		England.	Total.
	R	Equivalent in Sterling £	£	£
Principal Heads of Revenue	−1,11,67	−744,4	−1,9	−746,3
Interest	+2,07	+13,9	−10,8	+3,1
Post Office, Telegraph, and Mint	+68,03	+453,4	+9,4	+462,8
Civil Departments	+45,60	+304,0	−171,9	+132,1
Miscellaneous	+19,41	+129,3	−73,8	+55,5
Famine	−2,01,31	−1,342,0	−3,7	−1,345,7
Construction of Railways	+1	+1	...	+1
Railways	+82,02	+546,8	+22.7	+569 5
Irrigation	+8,94	+59,6	−7	+58.9
Buildings and Roads	+60,76	+405,1	−21,6	+383.5
Army Services	+81,32	+542,1	+448,4	+990 5
Special Defence Works	...	...	−9	−9
Combined Surplus Imperial and Provincial	+55,18	+367,9	+195,2	+563,1

14. To the saving due to Exchange (19,82) under *Miscellaneous* above, 7,12 must be added on account of savings under Exchange Compensation Allowance, of which 4,22 was under Army Services, and 3,88 under Civil Departments, the balance being distributed over all the other Departments. As explained in para. 3, differences arising from variations in exchange have been brought together under 31—Exchange, instead of being shown as hitherto under the various heads of Revenue and Expenditure.

15. The total loss due to famine, which was the most important feature of the year, has been brought together in the following table. It is not possible to state the exact loss due to this cause, but the table, which is based on local estimates framed by the most competent local authorities, may be accepted as giving approximately the loss of revenue assignable to famine. Suspensions of *Land Revenue* and *Provincial Rates*, which are not final loss, have been distinguished from remissions under those heads. The countervailing improvements under *Railway* and *Irrigation* have been taken account of. Some of the local estimates attribute to the famine improvements under such heads as *Stamps*, *Registration* and *Assessed Taxes*, and others gain, but following the course adopted in the Appropriation Report on the accounts of 1896-97, with reference to the loss by famine in that year, no account has been taken of gains or losses under such heads of Revenue. The total net loss of Revenue assigned to famine in 1899-1900 is thus 1,64,19 as shown below :—

	India.	Central Provinces.	Burma.	Bengal.	N.-W. Prov. and Oudh.	Punjab.	Madras.	Bombay.	Total.
Loss of Revenue.	R	R	R	R	R	R	R	R	R

* Details of remissions and Suspensions not obtainable.

16. The expenditure was chiefly upon actual relief of famine and distress, and the excess over the Budget Estimate under Famine is shown in the table in para. 13 as 2,01,31, after diverting to actual famine relief, the provision (49,00) made in the Budget for the construction of Protective Railways, the expenditure on this account having been transferred, as explained in para. 3, to 48—State Railways not charged to Revenue. But besides this the famine led to larger expenditure under several heads either in actual purchases of supplies for men and animals, or in the grant of compensation for dearness of provisions. There were also increased charges under several heads which arose indirectly out of the famine, such as increased payments of travelling allowances, and the entertainment of additional establishments not concerned with the direct administration of famine relief. These charges have been estimated by the local authorities. The following table brings together the expenditure

due to these various causes, and shows that the total loss on this account may be set down at about 3,51,56:—

	India.	Central Provinces.	Bengal.	N.-W. P. and Oudh.	Punjab.	Madras.	Bombay.	TOTAL.
	R	R	R	R	R	R	R	R
Famine Relief, including Public Works charges	15,10	1,54,49	14	70	23,51	33	1,16,41	3,10,68

17. The total loss of revenue and increase of expenditure due to famine may therefore be put down at about 5,15,75.

18. Under *Principal Heads of Revenue* the largest decreases occurred under *Land Revenue* (1,74,79) and *Provincial Rates* (19,60) due to the prevalence of famine. The decline in receipts under the former was largest in Bombay (90,14) where the scarcity was most severely felt. The Central Provinces (37,83), the Punjab (31,99), Madras (26,06), and the North-Western Provinces (20,37), come next in order, while the very prosperous Province of Burma showed an improvement of 21,11 and there were savings in expenditure amounting to 8,64 contributed chiefly by Burma, the North-Western Provinces and Madras. There was a decrease under *Registration* of 2,04 due to a decrease in sales and mortgages owing in Bengal to good harvests, in Bombay to famine and plague, and in the Central Provinces to the operation of the Tenancy Act of 1898. Under Tributes there was a decrease of 1,52 due mainly to suspensions sanctioned in consequence of the prevailing scarcity. These decreases were largely counterbalanced by improvements under the other heads, the principal being the increase of 66,57 under *Opium*, the revenue under which rose by 59,93 owing to the causes mentioned in para. 2, and the expenditure showed a saving of 6,64 as the crop fell short of the expectation. Under *Salt* there was a net improvement of 5,81, of which 1,85 was due to increase importations of salt in Bengal, while 3,96 was caused by a decrease in expenditure, owing to a smaller demand reducing charges on manufacture in India, to an over-estimate in Madras, and to the provision for the Orissa Preventive Establishment in Bengal having been only partially used. Under *Customs* revenue there was an improvement of 5,20, chiefly in Burma, Bengal and Madras, mainly from larger imports of cotton manufactures, manufactured articles, oils, articles of food and drink (including the countervailing duty on sugar), silver bullion, other metals and manufactures of metals, and spirits and liquors, partly counterbalanced by a decline in Bombay owing to a depression of trade, and to the diversion of the rice trade of Burma to Indian ports as stated in para. 7. The realizations on account of a countervailing duty on sugar were 18 in Burma, 2,17 in Bengal, and 1,00 in Bombay. Under *Forest* revenue there was an increase of 6,24 owing to large sales of timber, and the high prices obtained chiefly in Burma and Bengal, and an excess of expenditure of 2,76 due to the reasons given in para. 11. Under *Excise* there was an improvement of revenue of

1,17 due to agricultural prosperity in Burma and Bengal, and the North-Western Provinces, and a decrease of expenditure of 1,95 due to small payments of rewards in Burma, the lapse of certain provision in the North-Western Provinces, and an over-estimate in Madras. Under *Interest* there was a decrease of 7,89 in the receipts in India, due chiefly to the Bombay Port Trust having paid the interest on their capital debt in advance in the previous year, while there was an improvement in England of £39,3 or R5,89 due to the investment of a larger cash balance at a higher rate of interest for a portion of the year. The payment of interest on loans in India showed a saving of 4,68, and the transfer of interest to Railway increased by 5,37. These improvements were partly counterbalanced by larger payments in England (£50,2 or R7,53). There was an increase of 7,45 in the net receipts of the *Post Office*, due to the normal growth of the revenue, and to a decrease in the expenditure for the conveyance of mails, chiefly in payments to Railways and road establishments. Under *Telegraph* there was a net increase of 18,06 due chiefly to the large increase in message revenue caused by the war in South Africa, and by the famine. The improvement of 43,90 under *Mint* was due to the large silver coinage of a crore and thirty lakhs, and the large absorption of copper coin in consequence of the famine as stated in para. 8. Under *Civil Departments* the principal improvement occurred under *Medical* (28,08) and was due to the large provisions in India and Madras for plague preventive charges not having been required. There was an improvement of 4,96 under *Law and Justice—Jails*, due to small purchases of raw material, consequent on a reduced demand for Jail manufactured articles; of 4,69 under Education, contributed by all the Provinces except Madras; of 4,21 under *Scientific and Other Minor Departments*, due to a decrease in the charges of the Survey of India, other Scientific Departments and Veterinary and Stallion charges. Under *Law and Justice—Courts of Law* there was a decrease of 3,32 in the charges of the High Courts, and Civil and Sessions Courts, but on the other hand there was a falling off in the receipts of 1,50 chiefly under Magisterial fines. Under *Police* there was a decrease of 2,70 in the expenditure, due mainly to the slow progress made in the introduction of certain schemes of reform, and under *Ecclesiastical* there was an improvement of 1,47. These improvements were partly counterbalanced by a falling off under the other heads, chiefly under *General Administration* (11,70) which occurred almost entirely in England, and was due chiefly (£58,7 or R8,81) to the purchase of land under the India Office (Store Depôt) Act of 1898; but partly also to the installation of electric lights in the India Office, and to larger demands for stores. Under *Marine* there was a decline of 8,27, mainly in England (£101,5 or R15,22), due chiefly to the payment on account of the Indian Troopship "Hardinge," partly counterbalanced by savings in expenditure in India, due to large recoveries in connection with the fitting out of transports for South Africa, and larger receipts from hire of Indian Marine vessels employed on Imperial service, and under *Political* (6,69) due to the payment of arrears of the subsidy of the Amir of Afghanistan. Under *Miscellaneous* there was an increase of 5,34 in the receipts due mainly to recoveries of famine expenditure, and to large lapses of Suitors' Fund Deposits, and a decrease of 2,99 in the expenditure due to the saving under *Exchange* (19,82), partly counterbalanced by an excess of £57,0 or R8,55 under *Civil Furlough and Absentee Allowance* in England; of 4,82 under *Stationery and Printing*, due to large purchases in India for certain Railways, and Government presses, and to larger demands for stores from England than was anticipated, and of 3,64 under *Miscellaneous* both in India and in England, due in the former to the write-off of irrecoverable advances to cultivators, and in England to charges on account of the Plague Commission.

19. Under *Railways* the improvement was the result of an increase of revenue of 1,42,08, and an excess of expenditure of 56,65. The increase in revenue was due mainly to the causes stated in para. 9. The chief increases were on the—

East Indian Railway	58,05
Rajputana-Malwa Railway	42,81
Bengal-Nagpur „	25,43
Bombay, Baroda and Central India Railway	19,32
Indian Midland Railway	13,34
Oudh and Rohilkhand Railway	11,26

20. These improvements were partly counterbalanced by a decline of 39,38 on the Great Indian Peninsula Railway, and of 11,95 on the North-Western Railway due to the causes named in para. 9. The excess under expenditure occurred under working expenses (67,47), and Interest (2,50), partly counterbalanced by savings under Surplus Profits of Guaranteed Railways (8,84), Land for Subsidised Companies (6,77) and under Miscellaneous Railway Expenditure (1,61). The excess under Working Expenses was chiefly due to the causes stated in para. 12. The most important excesses were 34,54 on the East Indian Railway, 16,16 on the Bombay, Baroda and Central India Railway, 12,30 on the Rajputana-Malwa Railway, 6,94 on the Bengal and North-Western and Tirhoot and 4,10 on the Madras Railways. The most important decrease, which partly counterbalanced these excesses, was 7,58 on the Great Indian Peninsula Railway. The saving under Surplus Profits occurred chiefly on the Great Indian Peninsula Railway. The improvement under *Irrigation* was the result of an increase of Revenue of 14,87 due mainly to the irrigation of a larger area than was anticipated, and an excess of Expenditure of 6,04 due to the causes mentioned in para. 12. The improvement under Buildings and Roads was mainly due to the curtailment of expenditure to provide funds for famine works and other Provincial needs. Under Army Services the improvement was the result of an increase of 16,15 in the Receipts and a decrease of 1,32,42 in the Expenditure. Of the increase in the Receipts 13,73 occurred in India and was mainly due to the debit to Her Majesty's Imperial Government of the entire cost of European stores issued to the South African Force, as well as of horses, ponies and mules supplied in excess of the ordinary peace equipment to corps and batteries that formed part of the Force; and to larger issues than was anticipated, of Medical stores to famine and plague hospitals, and of arms to the Police, partly counterbalanced by reduced sales of malt liquor, regimental necessaries, and Commissariat provisions, owing to the absence of British troops on service in South Africa during the latter half of the year. The improvement in England (£16,2 or R2,43) was chiefly in the receipts on account of the Indian Troop Service, and in the proceeds of sales of unserviceable stores. Of the decrease in Expenditure 9,16 occurred under special services due chiefly to the withdrawal of the Khyber Force; to the Kohat Kurram Force having been maintained at reduced strength throughout the year, to the reduction of the garrison for the Occupation of Chitral and its Communications, to the permanent transport employed on the frontier having partly displaced hired transport in India, and to reduced charges on account of North-Western Frontier Field Operations, partly counterbalanced by charges on account of the Mishmi Expedition. In the ordinary charges there was a saving of 1,23,26, of which R64,83 or £432,2 occurred in England chiefly in the charges for Ordnance Stores owing to reduced demands and delay in payments, and to a decrease under Indian Troop Service, due to the dislocation of arrangements regarding Indian reliefs, owing to the despatch of troops to South Africa; partly counterbalanced by charges for the purchase of mules, and by an increase in the pay and expenses of Military Officers studying the Russian language and on special duty. Of the saving in India R48,90 was due to the absence of British troops on service in South Africa, which led to a saving under salaries and subsistence charges, and to the recovery from Her Majesty's Imperial Government, on account of stores sent to South Africa, reduced by the cost of the replacement of a portion of the stores and animals sent with the corps and batteries. There were also savings due to smaller payments of Exchange Compensation Allowance (4,22), to the deputation of officers and others to the Civil Department on plague duty (3,37), to reduced purchases of Commissariat-transport animals, and young stock, and the payment in England for mules purchased in Italy (3,80), to the entertainment of smaller cattle establishment (1,05), to low expenditure on medical supplies (3,42), and to the lapse of the whole or a portion of the special provisions made in the Budget for reserve of compressed fodder for mobilisation arrangements (3,76), for supply of camel saddles and trestles for the 3rd and 4th Divisions and extra units of the field army (1,84), for camps-of-exercise and instruction (1,42), for re-establishment of cantonment hospitals (1,14), and for mobilisation equipment (Barrack establishment, supplies and services) (1,13). These savings were partly counterbalanced by excesses of 8,00 due to increased payments for messing allowance, of 6,00 on account of rise in the price of food supplies of men and animals, and of 2,87 in sea transport charges.

21. The Budget provided for an increase of £2,005,3 or R3,00,80 of the revenue on the whole account, but a sum of £616,5 or R92,47 out of the Provincial and Local Expenditure, was payable from past accumulations of balances, leaving a net surplus in the Imperial accounts of £2,621,8 or R3,93,27. The accounts closed with a surplus on Imperial account of £2,774,6 or R4,16,19 and a deficit on Provincial and Local account of £206,2 or R30,93. The net Imperial revenue has therefore been better by £2,774,6—£2,621,8=£152,8 or R22,92, and the net Provincial and Local expenditure by £616,5—£206,2=£410,3 or R61,54.

22. The details of these fluctuations are given below, the sign + meaning better, and — worse, than the estimate:—

	Revenue Side.			Expenditure Side.		
	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.
Principal Heads of Revenue .	— 719,2	— 171,3	— 890,5	+ 68,0	+ 76,2	+ 144,2

Army	990,5	...
Minor Improvements under other heads . . .	53,0	...
	2,659,7	2,506,9
Net Better .	...	152,8

Appropriation Audit.

25. The Budget nts have been exceeded under several heads. The excesses, distinguishing those requiring sanction from those for which extra grants have already been made, have been noticed under each head of expenditure, and the detailed reasons for the excess have been also there stated. The following table brings together the excesses under each head still requiring sanction :—

Excess expenditure over Budget Estimate awaiting sanction of the Imperial Government.

Section A.—PRINCIPAL HEADS OF REVENUE.

1898-99. Accounts.	REVENUE :—	Budget.	1899-1900. Revised.	Accounts.
R		R	R	R
66,68,28	India (Rupee Figures) . .	66,81,72	65,59,35	65,48,15
£		£	£	£
44,455,2	Equivalent in Sterling . .	44,544,8	43,729,0	43,654,3

26. The revenue in this section fell short of the Budget Estimate by £890,5 or R1,33,57, and of the actuals of the previous year by £800,9 or R1,20,13. As compared with the Budget, there was a decrease of £1,222,8 or R1,83,43 under Land Revenue, and of £135,5 or R20,33 under Provincial Rates, due mainly, directly or indirectly, to the prevalence of famine. There was a decrease of £19,7 or R2,96 under Registration due to a decrease in the number of sales and mortgages owing, in Bengal, to good harvests, in Bombay to famine and plague, and in the Central Provinces to the operations of the Tenancy Act of 1898; and of £10,2 or R1,52 under Tributes from Native States due chiefly to suspensions sanctioned in consequence of the prevailing scarcity. These decreases were partly counterbalanced by improvements under the other heads, the most important being one of £399,5 or R59,93 under Opium, due to large sales of Bengal opium at high prices, reduced by a decrease in the exports of Malwa opium from Bombay. There was an increase of £12,3 or R1,85 under Salt, due to increased importations in Bengal; of £34,7 or R5,20 under Customs, due to large imports of cotton manufactures, manufactured articles, oils, articles of food and drink, silver bullion, other metals and manufactures of metals, and spirits and liquors, reduced by a decline in Bombay owing to famine and plague; of £41,6 or R6,24 under Forest due to increased sales of timber, and better prices chiefly in Burma and Bengal; and of £7,7 or R1,17 under Excise due to agricultural prosperity in Burma and Bengal, and in the first-half of the year in the North-Western Provinces, reduced by a decrease in Madras, owing to high prices and plague, and in Bombay, owing to famine and plague.

27. As compared with the actuals of the previous year, there was a decrease of £1,101,1 or R1,65,17 under Land Revenue; of £116,0 or R17,39 under Provincial Rates, and of £6,0 or R91 under Registration, owing to the reasons given above; of £216,2 or R32,42 under Salt, owing to drought in Rajputana having adversely affected the produce, to famine in Bombay, and to the unusually large realizations of the previous year in Madras; of £67,6 or R10,15 under Customs, due to the diversion of a large portion of the rice trade of Burma to non-dutiable ports in India, owing to the famine, and to smaller imports in Bombay, owing to the depression of trade, reduced by larger imports in Bengal, and of £4,5 or R68 under Forests. These decreases were partly counterbalanced by increases of £585,1 or R87,77 under Opium, and £31,0 or R4,65 under Excise, owing to the reasons given above, and of £67,1 or R10,06 under Stamps, due to increased litigation. There were also improvements of £18,8 or R2,83 and £8,5 or R1,28 under Assessed Taxes and Tributes from Native States, respectively.

28. The receipts fell short of the Budget Estimate by 1,83,43, and of the actuals of the previous year by 1,65,17. The decrease occurred almost entirely in the land revenue collections and was the result of the famine. The decline was largest in Bombay, where the unprecedented severity of the famine necessitated large suspensions and remissions of revenue. The Central Provinces, the Punjab, Madras, and the North-Western Provinces come next in order; the pressure was slight in India. In Burma there was a large increase, while Assam and Bengal show small improvements. The decrease, as compared with the previous year, was also due to the prevalence of famine.

29. Under *Ordinary Land Revenue* the fall in Bombay was 87,84 due to large suspensions and remissions chiefly in the Northern (about 37,00) and Central (about 40,00) Divisions where the famine was most severely felt; in the Central Provinces where the decrease was 38,10 the stress of the famine also necessitated large suspensions and remissions of revenue; in the North-Western Provinces the decrease of 20,02 was chiefly due to the failure of the kharif harvest of 1899, notwithstanding which 34,56 were collected on account of revenue suspended during the famine of 1896-97 and 1897-98. In the Punjab (29,80) the decreases due to suspensions and remissions were enhanced by smaller recoveries of arrears of previous years, and that in Madras (28,44) was increased by an adjustment of 1,16 to cover the deficit under Ryotwari Village Service Fund, sanctioned by the Government of India in Financial Department letter No. 1711 A., dated 11th April 1900. The decrease in India (2,61) was also due to the famine, and occurred chiefly in Ajmer (1,91) and Baluchistan (65). The improvement in Burma (14,4) was due to an increase in the area brought under cultivation, to the introduction of the revision settlement rates in some districts, and to the enhancement of rates prior to re-settlement in others, and to the assessment of non-State land to Land Revenue. These causes also explain the increase over the previous year. In Assam the Budget made too large an allowance for the abandonment of cultivation, in districts where large tracts of land were defertilized, owing to the sand thrown up by the earthquake of 1897. Under *Assessment of Alienated Lands less Quit Rents* the decrease in the Punjab (28) was due to suspensions on account of the scarcity, and in Bombay (61) to lapses of inams by death. Under *Sale of Proprietary Rights, etc.*, the decrease occurred mainly in the Punjab (3,21) and Madras (2,20) and was due, in the former, to small realisations from sales in certain districts, and to postponements of sales, and in the latter, to the stoppage of sale of waste lands in the Madura district. There was also a decrease of 19 in Assam owing to smaller sales. These decreases were largely counterbalanced

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

I.—Land Revenue—*continued.*

by improvements in the Central Provinces (33), Burma (13), Bengal (3,65), and the North-Western Provinces (17). The increase in Bengal was due to large sales of leases in the Sunderbunds under the new Waste Land lease rules. In the Central Provinces and Burma the receipts were special and were not foreseen in the Budget: in the former the Indian Midland Railway purchased certain waste lands, and in the North-Western Provinces the improvement was due to the sale of certain fee simple lands under the orders of the Local Government. Under *Capitation Tax, etc.*, the increase in Burma (4,69) was due to an over-estimate of the loss anticipated from the assessment of other than State land to revenue, and to the concurrent reduction of Thathameda in certain districts, and to an under-estimate of the growth of the revenue in districts not coming under the regular settlement. Under *Miscellaneous* the increase in Burma (1,89), was chiefly due to a rise in the rents realized for leased fisheries as an effect of the previous favourable season and the good prospects of the year (1,92), there was also an improvement in Petroleum Revenue receipts, and patta survey fees. On the other hand the rent of 2,00 due by the Ruby Mines Company was not realized. The improvement, as compared with the previous year occurred chiefly in Fishery and Petroleum Revenues. In the North-Western Provinces the increase was chiefly due to high receipts from quarries (7), and from rent of certain railway lands (5). The decrease in India (50) was due to a falling-off in cattle-grazing fees in Baluchistan, owing to the failure of the rains and scarcity of fodder, and that in Madras (36) to a fall in the Village Service Fund receipts consequent on the decrease under *Ordinary Revenue* (77); the fall would have been larger but for the adjustment on account of the Ryotwari Village Service Fund referred to above. This decrease was counterbalanced to the extent of 41, by an improvement under other items.

30. The explanation of the variations in the *Portion of Land Revenue due to Irrigation* is given in the Public Works portion of this Report under the head of Irrigation—*vide* paragraph 244.

31. The following tables A and B give the usual particulars regarding the distribution of the Land Revenue between Imperial and Provincial:—

A.—Transactions affecting the Distribution of Land Revenue in 1899-1900.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

I.—Land Revenue—*continued.*

32. From the details of the recurring and special transfers which are given in the Appendix to this Report on page 181 it will be seen that the Government of India, in consequence of the loss to Provincial Revenue and enhancement of Provincial Expenditure, owing to the agricultural distress and plague, was compelled to make grants to Bombay of 22,94, the Central Provinces 19,32 and the Punjab 95, to prevent those Governments from closing the year with debit balance. To meet the famine and plague expenditure in Madras and Bombay the Government of India made special contributions of 3,49 and 11,43 respectively.

II.—Opium.

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts.
4,16,38	Sale of Bengal Opium	4,48,80	5,09,15	5,09,15
1,32,89	Bombay Opium Pass Fees . . .	1,28,40	1,27,54	1,27,46
	Excise Opium—			
2,11	Central Provinces . . .	2,15	2,26

5,11	North-Western Provinces and Oudh	5,10	5,30	5,31
66	Punjab	75	60	61
22,30		22,57	22,57	22,60
96	Miscellaneous	60	1,31	1,09
5,72,53	TOTAL IN RUPEES .	6,00,37	6,60,57	6,60,30
3,816.9	EQUIVALENT IN STERLING . . .	£4,002,5	4,403,8	4,402,0

33. Under *Sale of Bengal Opium* the actuals exceeded the Budget Estimate by 60,35. The number of chests sold exceeded the Estimate (40,800) by 900 chests, and the average price realised was ₹1,221 per chest against an Estimate of ₹1,100 per chest. Under *Bombay Opium Pass Fees* there was a falling off of 94, due to decreased exports of Malwa opium. Under *Excise Opium* the nominal increase (3) was the net result of small variations in all the Provinces. Under *Miscellaneous* the increase (49) was mainly due to the sale-proceeds of Morphia in England not provided for in the Estimate.

34. The following table gives the usual statistics for the last ten years of the produce and sales in Bengal, and the exports from Bombay :—

YEAR.	BENGAL. Produce of season. For export.	For Excise.	Total.	Chests sold.	Average price per Chest.	Total price.	BOMBAY. Chests.	Rate.	Amount.
	Chests.	Chests.	Chests.		₹	₹		₹	₹

35. The actuals for the past ten years, during which no change in the rates of duty has occurred have been as follows :—

	India.	Burma.	Bengal.	Madras.	Bombay.	TOTAL.
	R	R	R	R	R	R
1890-91 . . .	1,93,05	15,88	2,31,95	1,95,18	2,16,28	8,52,34
1891-92 . . .	1,97,12	16,10	2,40,45	1,77,29	2,32,66	8,63,62
1892-93 . . .	2,11,81	16,22	2,41,01	1,72,12	2,24,45	8,65,61
1893-94 . . .	1,83,87	16,76	2,37,41	1,62,98	2,21,87	8,22,89
1894-95 . . .	1,89,43	11,90	2,45,82	1,79,54	2,39,88	8,66,57
1895-96 . . .	1,90,53	15,60	2,48,86	1,99,75	2,31,44	8,86,18
1896-97 . . .	1,84,87	14,09	2,50,01	1,69,42	2,23,78	8,42,17
1897-98 . . .	1,94,78	15,67	2,46,33	1,72,70	2,29,94	8,59,42
1898-99 . . .	2,04,07	15,82	2,51,24	1,99,84	2,39,02	9,09,99
1899-1900 . . .	1,94,66	15,37	2,57,94	1,85,50	2,24,10	8,77,57

36. The receipts under this head exceeded the Budget Estimate by 1,85, but fell short of the actuals of the preceding year by 32,42. The increase was entirely due to the improvement under *Duty on Imported Salt* (7,32), chiefly in Bengal (8,09), due to large importations resulting from the low prices, partly counterbalanced by a decrease in Burma (88) due to an over-estimate. The improvement under this head was reduced by decreases under the other heads. Under *Sale of Government Salt* the decrease (46) was chiefly due to a falling off in India (1,97) in the sales at the Sambhar Lake, owing to the inferior quality of the produce consequent on the drought in Rajputana, partly counterbalanced by an improvement in the sales at the Mines and Pachbudra (52), and an increase in Madras (1,12) due to a change in the policy by which regular sales, and the annual replenishment of stock are now carried out. Under *Excise on Local Manufacture* the decrease in India (4,09) was due chiefly to a falling off in Sambhar (19,82), owing to the inferior quality of the salt, and in Kohat (2,98), owing to the prohibition against export to Afghanistan, scarcity in the Punjab, and want of fodder on the trade routes, partly counterbalanced by an increase in the mines (6,25) and Pachbudra (13,77); in Bengal (43) to the increase anticipated, in consequence of the reduction in the cost price of salt, not having been realised; and in Bombay (4,28), partly to famine and partly to an unusually large quantity of salt having been removed under credit bonds during the year. On the other hand, there were increases in Burma (25) due to under-estimate, and Madras (5,13), due to larger cash sales. Under *Miscellaneous* the decrease (1,59) occurred chiefly in Bombay (1,71) due to the failure of the Salt Crop in Goa, owing to unseasonable rain, partly counterbalanced by an increase in Bengal (31) due to larger receipts from rents of warehouses.

37. The decrease, as compared with the actuals of the previous year, occurred in every Province except Bengal, where there was an increase (6,70), due to the large quantities of salt imported. The decline in India (9,41), Bombay (14,92) and in Burma (45) was due to the causes explained above, and in Madras (14,34) to the unusually large realization of credit sales and large cash sales of the previous year.

38. The receipts under this head exceeded the Budget Estimate and the actuals of the preceding year by 11 and 10,06, respectively. The trifling increase, as compared with the Estimate, was the net result of large variations under the three minor heads. Under *Court-fee Stamps* the improvement was contributed by Burma (1,13), Bengal (5,60), the North-Western Provinces (1,27) and Madras (39), and was attributed to increased litigation, due, in the North-Western Provinces, to creditors endeavouring to recover the loans advanced by them during the years of scarcity, and to the proposed change in the Rent Act. In Burma the improvement was partly due to the grant of letters of administration in several large estates, and in Bengal, to increased receipts from probate duty. The increase was partly counterbalanced by a decline in India (28), the Central Provinces (2.40), Assam (13), the Punjab (62) and Bombay (1,27), due to there being less litigation in consequence of famine and plague, and in India partly also to the failure of the coffee trade in Coorg. Under *Commercial and other Stamps* the decrease (5,71) was contributed to by all the Provinces except Burma and the Punjab, and was attributed generally to the depression of trade caused by famine and plague. In Assam it was due to the increased prosperity of the people having reduced the number of loans contracted, and in Madras to an over-estimate. The increase in Burma (75) was due to the development of the paddy and other trades and that in the Punjab (26) to mortgages, etc., of lands and the execution of bonds during the time of scarcity. Under *Fines and Penalties and Miscellaneous* the improvement occurred mainly in Bombay (1,35), due to a larger business done by Assurance Companies, and to special receipts on account of the composition of stamp duty. In Madras the increase (50) was due to large receipts of duty on impressing documents, and fines and forfeitures, and in Bengal (17) to increased receipts from composition of stamp duty.

39. The excess, as compared with the previous year, was due mainly to the causes stated above, and occurred chiefly in Burma (1,71), Bengal (8,98) and the North-Western Provinces (1,40). The largest falling off was in the Central Provinces (2,15) due to less litigation as a result of famine and plague.

40. The revenue under this head exceeded the Budget Estimate and the actuals of the previous year by 1,17 and 4,65, respectively. Under *License and distillery fees, etc.*, the improvement in Burma (5,59) and Bengal (5,59) was chiefly due to increased consumption of foreign and country liquors, and in the latter, also to the settlement of licenses at enhanced rates as a result of agricultural prosperity, and that in the North-Western Provinces (7,74) chiefly to favourable settlements, to larger consumption of liquor in the first-half of the year, owing to agricultural prosperity, and the enhancement of still-head duty from 1st October 1899. The increase would have been greater had not partial scarcity and high prices of food grains, checked the use of liquor to some extent in the latter half of the year. The improvement was partly counterbalanced by a decline in Madras (8,46), due to decreased consumption of country liquor owing to high prices, a bad season and plague, and the unsatisfactory auction sales of shops, and in Bombay (6,47), due chiefly to remissions of still-head duty owing to famine, and a falling-off in tree tax, and toddy shop licenses owing to plague, partly counterbalanced by duty on Shajahanpur rum imported by the Commissariat Department, and enhancement of license fees for Hotels and Refreshment Rooms. The variations in the other Provinces were slight. Under *Opium* the falling-off in Bombay (1,77) was due to famine, that in Burma (59) to an over-estimate, and that in Assam (55) to decreased consumption. The improvement in the Central Provinces (27), Bengal (22) and the North-Western Provinces (22) was due to increased consumption, and that in the Punjab (26) and Madras (31) to a larger importation of Malwa opium than was anticipated. Under *Duty on Ganja*, the decrease occurred chiefly in Bengal (1,22) due to less consumption of the better qualities of ganja on which higher rates of duty are levied, and partly to the diminished export of the duty-paid drug to the North-Western Provinces, owing to the introduction of the system of export in bond. The increase in Madras was due to larger issues of the drug from Store-houses consequent on the suppression of illicit cultivation. In the Central Provinces the estimate was taken low, while in Assam there was a fall, owing partly to the price of the drug having been raised, and partly to a large consumption of a poorer variety which pays less duty. The increase, as compared with the previous year, occurred chiefly under the first head and was due generally to the causes stated above.

41. The revenue under this head showed a decline of 20,33, as compared with the Budget Estimate, and of 17,39 as compared with the actuals of the preceding year. The decrease occurred chiefly in Bombay (6,40), the Punjab (5,93), the Central Provinces (3,99) and in Madras (2,35), due to suspensions and remissions of revenue on account of famine, and in the North-Western Provinces (3,40), to the current collections as well as those for famine arrears not being as large as anticipated, owing to the bad kharif harvest, and partly to an over-estimate of the receipts under the Oudh Local Rates Act V of 1894. These decreases were partly counterbalanced by increases in Burma (79), and Assam (14) due to large collections of land revenue, and by an increase in Bengal, under *District and Local Rates and Cesses* (1,15) due to large collections, reduced by a decrease, under *Rate on Wards' Estates* (28) due to the reduction of the rate from 2⅞ to 2½ per cent. on the gross income of estates. The decrease, as compared with the actuals of the previous year, was also due to the causes explained above.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

VII.—Customs—*continued.*

42. The revenue under this head showed an improvement of 5,20 over the Budget Estimate, but a failing off of 10,15 from the actuals of the preceding year. The improvement, as compared with the Budget, occurred chiefly under *Import Duties*, and was contributed by Bengal (11,60), Burma (2,30), and Madras (2,41). On the other hand, there was a large decrease in Bombay (9,30). The increase in Bengal was mainly under cotton manufactures (3,15), manufactured articles (2,32), oils (2,01), articles of food (1,64) and silver bullion (1,63); in Burma, chiefly under spirits and liquors (1,35), articles of food and drink (78) and other metals and manufactures of metals (41), partly counterbalanced by a decrease under cotton manufactures (49); and in Madras, to larger imports of petroleum, spirits and cotton manufactures. The decline in Bombay was due to famine and plague, and partly to a rise in the prices of copper and kerosine oil. It occurred chiefly under oils (4,23), raw materials and unmanufactured articles (3,97), other metals and manufactures of metals (3,81), silver bullion and coin (1,01), partly counterbalanced by increases under spirits and liquors (1,74), articles of food and drink (1,84) and manufactured articles (1,22). The receipts from the counterveiling duty on sugar amounted to 18 in Burma, 2,17 in Bengal, and 1,00 in Bombay. Under *Export Duties* the decrease in Burma (3,33) was due to the diversion, on account of the famine, of a portion of the rice trade to non-dutiable ports in India, and in Bombay (16) to a reduction in the exports of rice owing to deficient harvests, while the increase in Bengal and Madras was due to increased exports of rice. Under *Excise duty on cotton manufactures* the increase in Madras (18) was due to the efforts made by the local mills to push the sales of their goods. The decrease in Bombay, as compared with the previous year, was due to the partial or total closure of mills. Under *Land Customs and Miscellaneous* the increase occurred chiefly in Bombay (58), and was due to increased receipts from fees for overtime work by Customs officers, and from registry and amendment fees and sale of old stores. The increase in Bengal, as compared with the previous year, was due to the credit of overtime fees for the entire year against five months' receipts in 1898-99.

43. The large decrease, as compared with the actuals of the preceding year, occurred mainly in Burma (13,97) due chiefly, as stated above, to the diversion of a considerable portion of the rice trade to non-dutiable ports in India owing to the famine, and partly to a glut in the market in the early part of the year owing to accumulation of stocks, and in Bombay (11,53) chiefly under *Import Duties* owing to the depressed condition of trade, partly counterbalanced by increases in Bengal (12,60) and Madras (2,84), due in the former to large general imports as explained above, and in the latter to large imports of petroleum, spirits and cotton manufactures.

VIII.—Assessed Taxes.

1898-99. Accounts.		1899-1900. Budget.	1899-1900. Revised.	1899-1900. Accounts.
21,55	India	22,04	21,45	21,46
4,72	Central Provinces . .	4,91	4,70	4,60

44. The revenue under this head showed an improvement of 17 over the Budget Estimate, and of 2,83 over the actuals of the preceding year. The increase, as compared with the Estimate, was the net result of increases in Madras (89), Bengal (67), Burma (52), the North-Western Provinces (38) and Assam (7), and decreases in Bombay (1,38), India (58), the Central Provinces (31) and the Punjab (9). The increase in Madras and Bengal was due to sufficient allowance not having been made for the progressive increase in these receipts; in Burma, chiefly to the adjustment in the Civil Books of income-tax (44) realised from Railway employés, for which no provision was made in the estimate. The improvement would have been greater, had the reorganization of the Burma Commission not been delayed till January 1900 The improvement in the North-Western Provinces was due to the increased profits of grain dealers owing to famine in other parts of India. The decrease in Bombay was due chiefly to a large falling off in the earnings of the Bombay Mills, and to the unfavourable condition of trade generally in consequence of famine and plague, partly counterbalanced by an increase (45) under deductions from salaries, etc., owing to under-estimate; and in the Central Provinces, to the removal of the Head-Quarters of the Bengal-Nagpur Railway to Calcutta, and partly to famine. The increase, as compared with the actuals of the preceding year, occurred, chiefly, in Madras (1,41) and Bengal (1,26), due to the progressive growth

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

VIII.—Assessed Taxes—*continued.*

of this source of revenue, partly counterbalanced by a falling off in Bombay (71) owing to the cause explained above.

45. The *India* figures include, in addition to the collections made in the Districts directly administered by the Government of India, the recoveries by the non-Civil Departments from the salaries of Government officers. The details are given below :—

1898-99. Accounts.		1899-1900. Budget.	Revised.	Accounts.

46. The receipts showed an increase over the Budget Estimate of 6,24 and a falling off of 68, as compared with the actuals of the previous year. The improvement, as compared with the Budget, occurred mainly in Burma (12,45) and Bengal (1,79), and was due in the former chiefly to high market prices and large sales of timber, and to large extractions by consumers, and that in Bengal to increased sales of timber and poles and large sales of firewood and charcoal by Departmental Agency. These improvements were partly counterbalanced by a falling off, chiefly in the Central Provinces (1,81) and Bombay (6,50) due mainly to a slackness in the demand for forest produce, to low prices, and to the grant of grazing concessions in consequence of the famine, and in Bombay partly also to a decrease in the demand for sleepers and fuel by the Southern Mahratta Railway Company. As compared with the actuals of the previous year, the decrease was mainly the result of a falling off in the Central Provinces (1,76) and Burma (5,39), and improvements in Assam (1,70), Bengal (1,67) and Bombay (1,21). The decrease in the Central Provinces was solely due to the famine, and that in Burma to smaller extractions by consumers or purchasers. The improvement in Assam was due chiefly to extensive Departmental sleeper operations, that in Bengal to large sales of timber, poles and fuel, and that in Bombay to special famine gras operations, to large sales of timber in the early part of the year, and to the realization of the sale-proceeds of timber despatched for sale to Bombay in 1898-99.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

IX.—Forest—*continued.*

47. Under *Timber and other produce removed by Government Agency* the increase in Burma (2,75) was due chiefly to large sales and high prices; in Assam (29) to increased Departmental sleeper operations; in Bengal (35) to large sales, mainly owing to sales of sleepers, and of teak trees blown down in the cyclone of 1897 in the Chittagong Division, not anticipated in the Budget; and in the North-Western Provinces (32) and the Punjab (94) to large sales of firewood and charcoal. The decrease in the Central Provinces (51) was due to the famine; that in Madras (50) chiefly to over-estimate, and that in Bombay (1,40) to a want of demand, to low prices, and to small purchases of sleepers and fuel by the Southern Mahratta Railway.

48. Under *Timber and other produce removed by consumers or purchasers* the increase occurred in Burma and Bengal and was due to the causes mentioned above. There was a falling off in all the other Provinces, but mainly in Bombay (4,99), the Central Provinces (1,16), and the Punjab (1,07), due to the prevalence of famine in the first two cases, and in the Punjab to fodder famine caused by drought, and to non-realization and remissions of grazing dues.

49. Under *Other Receipts* the increase was contributed by all the Provinces except the Central Provinces and Bombay where there were small decreases due, in the former, to the famine and in the latter, chiefly to a falling off in the dues on foreign timber and other forest produce. The increase in Burma (91) was due to abnormally large drift collections, and to the salvage of an unusually large quantity of timber; in Assam (45) to the opening of the Manipur State forests, and in Madras (31) to the collections of current and arrear rents of coffee estates.

50. The revenue under this head fell short of the Budget Estimate by 2,96, and of the actuals of the preceding year by 91. Under *Fees for registering documents* the decline occurred in every Province, except Burma and the North-Western Provinces, and was due in the Central Provinces (44) to the operation of the Tenancy Act of 1898, which reduced the number of the transfers of land; in Bengal (1,08), to the decrease in the number of registrations owing to good harvests and low prices of food-grains; in Madras (61) to an over-estimate; and in Bombay (67) to famine and plague. The variations in the other Provinces were unimportant. Under *Fees for copies of registered documents* the only noteworthy variations were the decline in the Central Provinces (18) attributed to the famine and the increase in Bengal (10) due to the increased use of attested copies of deeds in Civil and Criminal Courts. Under *Other Receipts* the improvement in Madras (18) was due to the adjustment of fees for searches completed in the preceding year, and to the increase in searches owing to the grant of loans to ryots.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

XI.—Tributes from Native States—*continued.*

51. The receipts under this head are for the most part fixed The variations that occur arise generally from the non-payment of dues, or from advance or arrear collections. The receipts fell short of the Estimate by 1,52, but exceeded the actuals of the preceding year by 1,28. Under *Tributes* the decrease in Bombay was due to the suspension of part of the tributes from Kathiawar (63), the Baroda State (99) and from petty States (9), in consequence of the famine; and in Burma (51) and the Central Provinces (5), chiefly to remissions sanctioned by their respective Governments. The increase in India was due to the recovery of tributes, due in 1898-99, from the States of Udaipur (2,00), Sailana (5) and Ajaigarh (7) as well as to an advance payment (7) by the last-named State, partly counterbalanced by the non-recovery of tributes from Banswara (14) and Kilchipur (5), and a short recovery from Rutlam (10), owing to variations in the rate of exchange of the local currency in which the tributes were paid. There was a readjustment to the extent of 50 between the tributes payable by the Kotah and the Jhallawar Durbars in consequence of territorial adjustments. Under *Contributions* the decrease in India was due to the contributions payable by the Bhurtpur and Karauli States being now deducted from expenditure instead of being credited as receipts, under Comptroller General's letter No. 819 dated 16th August 1889, and partly, in the case of the Malwa Contingent (Dewas, Jowrah), to loss by exchange on local currency; in the North-Western Provinces, to the transfer of the tribute payable by the Dholepur Durbar to India (Comptroller General's letter No. 961, dated 10th August 1900) and in Bombay under Southern Mahratta Horse, to suspensions owing to famine. Under *Fees on Succession to Native States* the fall in Bombay (30) and the Central Provinces (16) was due to suspension of the nazarana payable by the Sunth and Gabat States in the former, and by the Kawardha State in the latter Province. The increase in India was due to an unforeseen payment by the Sarila State (8), and the receipt in the Punjab to the Nazarana paid by His Highness the Raja of Jhind on the occasion of his investiture with full powers.

Section A.—DIRECT DEMANDS ON THE REVENUE.

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts.

7,101,0	TOTAL .	7,568,3	7,467,5	7,424,1

52. The expenditure in this section showed a saving of £144,2 or R21,63 as compared with the Budget Estimate, and an excess of £323,1 or R48,46 as compared with the actuals of the previous year. Of the saving as compared with the Budget, £57,6 or R8,64 occurred under Land Revenue, owing to reduced expenditure on Survey and Settlement operations in Burma and Madras, to small payments in the North-Western Provinces to Kanangoos and Patwaris, and for Land Record Surveys, and to savings in Madras in the provision for the revision of village establishments. The saving under Opium (£44,3 or R6,64) arose from the outturn of the crop having fallen short of the Estimate. That under Salt, £26,4 or R3,96 was due to less manufacturing charges in India, to less expenditure on Preventive Establishment in Bengal, and to an over-estimate in Madras. Under Excise, £13,0 or R1,95, it was caused chiefly by small payments of rewards in Burma, by the lapse of the provisions for reform of distilleries in the North-Western Provinces, and by an over-estimate in Madras. There were also small savings under Refunds and Drawbacks (R1,18), Stamps (R73), Provincial Rates (R74), Customs (R13), and Registration (R92). The only excesses were R53 under Assignments and Compensations, and £18,4 or R2,76 under Forest, owing to famine grass operations in the Central Provinces and Bombay, and to large charcoal and fuel operations in the Punjab.

53. Of the excess as compared with the actuals of the previous year, £145,0 or R21,75 occurred under Opium, owing to small payments to cultivators, due to a smaller outturn of the crop; £44,3 or R6,64 under Assignments and Compensations owing to arrear payments of salt compensation in India, and of Land Revenue Compensations in Bombay; £45,7 or R6,85 under Land Revenue, owing to high expenditure on district administration, and Land Record and Agriculture, chiefly in Madras and Bombay, and to large payments to district and village officers in Madras; £21,3 or R3,20 under Salt, mainly in Madras and Bombay, £10,6 or R1,59 under Customs, chiefly in Bengal, due to large payments of overtime allowance to customs officers; and £ 69,7 or R10,46 under Forest, owing chiefly to the reasons given above. The principal decrease was £12,5 or R1,87 under Refunds and Drawbacks. Smaller decreases occurred under Excise, Provincial Rates (R25) and Registration (R28).

54. The expenditure under this head was less than the Budget Estimate by 1,18, and than the actuals of the preceding year by 1,87. The savings, as compared with the Estimate, occurred chiefly under *Customs* in Bombay (2,30), due to an over-estimate of exports, partly counterbalanced by excesses in Bengal (84) owing to exceptionally high payments, and in Madras (24), to a refund of duty on machinery for the distillation of spirits and to drawbacks. Under *Land Revenue* the savings were the net result of small variations in all the Provinces except India, the more important ones being a saving in Bombay (31), due to a falling off in the revenue, and an excess in Bengal (20), mainly due to the payment on account of the capitalised value of the Government revenue for the land taken up for the Hajipur-Katihar Extension of the Bengal, North-Western and Tirhoot State Railways. Under *Salt* the savings in Bengal (29) were due to the refunds being lower than in previous years; in Bombay (11), to the partial adjustment of claims for wastage allowance on salt exported to Calcutta under credit bonds; and in India (8), mainly to refund of half-duty on sales to the Bikanir State. The savings under *Assessed Taxes* were small. The savings under these heads were partly counterbalanced by excesses under *Stamps*, chiefly in Bombay (53), due to a special refund of probate duty, and under *Other Revenue Refunds* also in Bombay (50), due to remissions granted to Abkari Contractors, and in Madras (17) mainly under Local owing to large refunds in the Gódávari and Kistna Districts. Under the latter head there were small savings in the North-Western Provinces (15), due to the uncertain character of the receipts and in Bengal (13), of which 7 were under Opium and 8 under Provincial Rates.

2.—Assignments and Compensations.

55. The expenditure under this head exceeded the Budget Estimate and the actuals of the preceding year by 53 and 6,64, respectively. The excess, as compared with the Estimate, was the net result of excesses under *Salt* and *Customs Compensations* and savings under the other heads. The excess under *Salt Compensations* was due in India, to the payment to the Meywar Durbar (2,04) of the compensation for 1898-99, and in Madras, to an arrear payment to the Pudukkottai State (38) on account of the suppression of the earth-salt manufacture. Under *Land Revenue Compensations* the savings in Assam (30) and Bengal (17) were due to compensations not being fully claimed; in the North-Western Provinces (28), to the reduction in the amount payable to the ex-ubaridars of the Gursarai Estate; and in Madras (30), to undrawn claims. On the other hand, the excess in Bombay (26) was due to the payment of arrears to the Akalkote State, the Chief of Sángli and the Mahád Hakdárs, partly counterbalanced by lapses on account of the deaths of jághirdárs. Under *Excise Compensations* the saving in the Central Provinces (45), due to the payments to the Zamindars of Chhattisgarh being much less than was estimated, was partly counterbalanced by an excess in Bombay (19), owing to arrear payments. Under *Miscellaneous Compensations* the savings in the Punjab (82) were due to the compensation in connection with the *cho* torrents not having been paid during the year, while the excess in Bombay (17) was due to arrear payments, and that in India (9), to a new quit-rent paid to the Khan of Khelat for which no provision was made in the Estimate. The excess, as compared with the actuals of the preceding year, occurred chiefly in India under *Salt Compensations* and in Bombay under *Land Revenue Compensations*, due to the causes stated above.

56 The Indian expenditure fell short of the Budget Estimate by 85,9, but exceeded the actuals of the previous year by 6,95. The principal decrease as compared with the Budget were the following: 3,99 under *Survey and Settlement* due mainly to the provisions for settlement operations, and for a settlement Commissioner and necessary staff in Burma, not having been fully utilised (1,65) and to restriction of survey work for want of trained surveyors, unfilled vacancies, and the reduction of strength of some of the settlement survey parties in Madras (1,15); 1,95 under *Land Records and Agriculture* chiefly in the North-Western Provinces (1,58) in the provision for pay and allowances of Kanangoos and Patwaris, and for Land Record Surveys, and to the transfer to 26—Scientific and other Minor Depart-

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

3.—Land Revenue—*continued.*

ments of Traffic Registration charges, and in Burma (43) due to the provision for the reorganization of the Department having been only partially used; and 2,15 under *Allowances to District and Village Officers* in Madras owing to the provision for revision of village establishments having been used to a very small extent. The excess as compared with the previous year was contributed to by all the heads except *Survey and Settlement* under which there was a saving of 3,61 chiefly in Bengal. The principal increases occurred under *Charges of District Administration* (4,59), due in Burma (75) to the reorganization of the commission, and the further extension of the system of collecting revenue by village headmen, in Madras (1,59) to the reorganization of the Taluk establishments, and in Bombay (1,38) to expenditure connected with the famine; under *Land Records and Agriculture* (3,82), in all the Provinces, but chiefly in Burma (60), due to the extension of supplementary survey, in Madras (74), due to the enhanced rate of pay sanctioned for village accountants, and in Bombay (94) due to famine establishments, grain compensation and higher Village Cess Fund Charges; and under *Allowances to District and Village Officers* (1,42) in Madras owing to the revision of village establishments.

57. Under *Charges of District Administration* the difference in the aggregate is small, but the variation in the several Provinces considerable. The excess of 22 in the Central Provinces was due chiefly to the payment of grain compensation, and extra charges for temporary establishment and contingencies due to the famine. That in Bengal (74) was due chiefly to increased charges under establishment (33), salaries (13), and supplies and services (51), and partition establishment (20), partly counterbalanced by a saving of 31 under Record Room establishment. In Madras the increase (46) was due to higher expenditure on account of temporary establishments and Amin Divi Coir charges, to fees for searches in Registration Offices (*vide* explanation under X—Registration, para. 50), to high law charges arising from heavy payments of costs in civil suits decreed against Government, and to higher salary and establishment charges owing to the grant of privilege leave. In Bombay (53) it was due to the entertainment of temporary establishments in connection with the famine (16), payment of grain compensation (35), and an increase in contingencies (32), chiefly in postage and telegram charges in connection with the famine and plague, reduced by a saving of 38 under Salaries and Exchange Compensation Allowance. These excesses were nearly counterbalanced by savings in Burma (84) due to the provision for the reorganization of the Burma Commission having been only partly used (50) owing to the revised scale of pay not having been sanctioned till January 1900, to low charges under Revenue establishments (8), allowances (10) and contingencies (10), and to the provision for compensation for land acquired for public purposes not having been fully utilised (22), partly counterbalanced by an excess of 16 on account of Patta Survey establishments. In Assam (23) it was due to leave vacancies, to the provision for the reorganization of the Assam Commission not having been utilised, and to less Exchange Compensation Allowance. In the North-Western Provinces (55), it was due chiefly to the absence of a large number of officers on furlough (49), and to less expenditure on supplies and services (7), sub-divisional (25) and process serving (8) establishments, partly counterbalanced by increased expenditure for extra and temporary establishment (10) and contingencies (22) for purchase of furniture and tour and telegram charges; and in the Punjab (14), it was caused chiefly by the provision for the revision of pay of menial establishments not having been utilised (28), by lower salary (10) and Exchange Compensation Allowances (6) partly counterbalanced by excesses under allowances (9), contingencies (8), and sub-divisional establishments (14) in payment of grain compensation and higher travelling charges.

58. Under *Survey and Settlement* the principal savings in Burma (1,65) and Madras (1,15) have been explained above. The decrease in Burma included a saving of 50 in the Survey of India charges and that in Madras a recovery of 21 on account of survey of estates under Act IV of 1897. In the North-Western Provinces the saving (53) was due to an over-estimate. In the Punjab 24 of the saving was under Ssalaries and Exchange Compensation Allowance, and the remainder in the charges of survey and settlement parties; and in Bombay the decrease (7) was due chiefly to a saving of 18 in the provision for the Jamrao Canal Colonization charges, partly counterbalanced by an excess of 12 due to the non-recovery of contributions from the Talukdari Estates in Gujarat owing to the famine. The excess in Bengal (11) was due to increased expenditure on settlement operations, while the decrease as compared with the previous year was due to smaller expenditure on that account. Under *Land Record and Agriculture* the principal saving occurred in the North-Western Provinces (1,58) as stated above, of which 76 was in the pay and allowances of Kanangoos and Patwaris, 61 in Land Record Survey charges, and 20 on account of the transfer of Traffic Registration charges to 26—Scientific and other Minor Departments (para. 150). The saving in the Central Provinces (18) was chiefly due to the appointment of Commissioner of Settlement and Agriculture having been held by an officiating officer, to smaller charges on account of travelling allowances, and pay and allowances of Patwaris, and to certain officers not being paid up to the full scale; in Burma 36 of the saving was due, as stated above, to the provision for the reorganization of the Department not having been fully required, and (7) to the absence of the Director on furlough; the decrease as compared with the previous year has been explained above. In Assam the decrease was due to the transfer of the pay of the Superintendent of Land Records to the head *Survey and Settleement* and

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

3.—Land Revenue—*continued.*

to the appointment of the second Superintendent not having been filled; the excess over the previous year was due to the payment of arrears of mandals' pay, and to the gradual strengthening of the establishment. In the Punjab the saving (20) was due to an over-estimate of the local expenditure of the Patwaris Fees Fund; the expenditure on this account was, however, greater than that of the previous year. There was an excess in India (13) due chiefly to the revision of establishment in Baluchistan (4) and in Coorg (6), the latter being due to the formation of the Village Officers' Cess Fund in Coorg. In Madras the excess (23) was due chiefly to enhanced rates of pay allowed to village accountants in certain districts (14): the balance occurred in establishment charges; and in Bombay (21) to payment of grain compensation, and the entertainment of extra establishments for famine work, partly counterbalanced by a saving due to the provision for village estates in Sind not having been fully utilised. The excess over the previous year has been explained above. Under *Management of Government Estates* the saving in the North-Western Provinces (34) was chiefly due to reduced expenditure for improvements (18), collection establishment (9) and supplies and services (7), and partly also to the transfer of certain charges to the head *Allowances to District and Village Officers.* The excess in Bengal (9) was due mainly to an increase of 14 for collection establishment, and of 6 in the Local section, partly counterbalanced by a saving of 10 in outlay on improvements. The excess over the previous year was in outlay on improvements. Under *Commission on Collections* the saving in India (13) occurred chiefly in establishment charges in Baluchistan (5) and allowances in Ajmere (5): and in Burma (40) it was due to the commission on the collection of Land Revenue in March not having been fully paid during the year. The saving under *Allowances to District and Village Officers* in Madras has been explained above. The excess in the North-Western Provinces was due to the transfer noted above.

59. The Indian expenditure showed a saving of 6,62 as compared with the Budget Estimate, and an increase of 21,67 as compared with the actuals of the previous year. As usual these differences were mainly the result of the variations in the outturn of the crop, which in the year under review amounted to 92,422 maunds against 1,00,000 maunds in the estimate and 84,323 maunds, the actual production of the previous year. The *Payments to Cultivators*, which form the bulk of the charges, fell short of the Estimate by 24,72 in the Behar Agency, but exceeded the Estimate by 19,49 in the Benares Agency. The saving under *Opium Factory* in both Agencies was due to less freight and manufacturing charges, enhanced by 47 in the Behar Agency by smaller payments for timber, and reduced in the Benares Agency by 30 due to higher charges under salaries and establishment (14) and contingencies (16). Under *District Staff* the saving in the Behar Agency occurred under establishment (19) and allowances (9), partly counterbalanced by an excess of 11 under supplies and services. In the Benares Agency there was an excess of 33 mainly under allowances and supplies and services.

60. The Indian expenditure showed a saving of 3,97 as compared with the Budget Estimate, and an excess of 3,14 as compared with the previous year. The saving of 1,60 in India was chiefly due to smaller manufacturing charges in Sambhur (1,58) and Didwana (4), to saving in salaries (33), and to less outlay on petty construction and repairs (15), partly counterbalanced by an excess in manufacturing charges in Pachbudra (15) and in excavation charges in the mines (21). In Bengal the saving (1,39) was due to the provision for the Salt Preventive Establishment in Orissa having been only partially used; and in Madras (1,54) it was chiefly due to the Estimate having been pitched too high in view of the continued expansion of departmental operations. The excess in Bombay was due to payments of grain compensation, and overtime and Sunday allowances, which were not provided for, to an excess under salaries, and supplies and services, and to larger purchases of salt, partly to gather a good crop, and partly to give employment to the people usually employed on salt works.

61. Compared with the actuals of the previous year there was an excess of 93 in Bengal owing to the growth in the Salt Preventive Establishment in Orissa, which is being gradually organized; of 1,72 in Madras, chiefly in *purchase and freight*, and of 1,20 in Bombay, due chiefly to the payment of grain compensation, overtime allowance and Sunday fees. There was a saving of 74 in India due to lower expenditure on manufacture and excavation, and to savings under salaries and establishment. The excess of 1 in Burma was sanctioned by the Local Government, and that of 55 in Bombay was covered by additional grants sanctioned by the Government of India. The savings under Exchange Compensation Allowance were 1 in Bengal and 5 in Madras.

* Includes a lump deduction of 7 by Financial Department.

62. The Indian expenditure showed a saving of 53 as compared with the Budget Estimate, and an excess of 3 as compared with the actuals of the previous year. The saving of 58 under *Charges on sales of Stamps including discount* was due to a decline in the sale of general stamps. This was largest in Madras, Bombay and the Central Provinces, and was due to the prevalence of famine and plague. The excess of 8 under *Superintendence, etc.*, in Bengal was due to the grant of privilege leave to the Superintendent of Stamps, and to higher expenditure on landing, freight and packing charges. Under *Stamps supplied from Central Stores* the estimate was taken too high in all the Provinces.

63. The saving in the expenditure in England was due to demands being smaller than was anticipated in the Budget.

7.—Excise.

64. The Indian expenditure fell short of the Budget Estimate by 1,93, and the actuals of the previous year by 7. The decrease in the charges as compared with the Budget was contributed by all the Provinces except India, where there was an excess of a due to creation of the appointment of a Superintendent of Excise for Bangalore. The saving in the Central Provinces (6) was chiefly under Petty Construction and Repairs and rewards; that in Burma (58) was chiefly due to unusually low expenditure on account of rewards in Excise and Opium cases. In the North-Western Provinces (34) it was chiefly due to the provision for reforms in distilleries not having been required (20) and to savings under rewards (3),

[illegible] contributions recovered from opium farmers consequent on a revision of the arrangements for preventive

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

7.—Excise—*continued.*

and detective establishments. The increase, as compared with the previous year, was contributed to by all the Provinces except Burma, Madras and Bombay; the largest increases occurred in Bengal (17) and the North-Western Provinces (8), due in the former to higher charges under salaries and supplies and services under distilleries, and in the latter to an increase in establishment. The principal savings were in Burma (27) due to low charges for rewards, and in Bombay (9) to the reason stated above. The excess of 2 in India requires to be sanctioned. The saving under Exchange Compensation Allowance was 4 in Madras.

8.—Provincial Rates.

1898-99. Accounts.		1899-1900. Budget.	1899-1900. Revised.	Accounts.

5,57	Total in Rupees	6,06	5,94	5,32
£ 37,21	Equivalent in Sterling	£ 40,4	£ 39,6	£ 35,4

65. The charges show a decrease of 74 and 25 respectively as compared with the Budget Estimate and the actuals of the previous year. The saving occurred chiefly in Bengal (65), and was due to a change in the system of adjusting recoveries on account of cost of collection of the combined Road and Public Works cesses, by which one-third of the recoveries is taken in reduction of Provincial expenditure. There was also a saving of 7 in Bombay due to a falling off in collections. The decrease, as compared with the previous year, occurred in Bengal, and was due to less expenditure of valuation and re-valuation work.

9.—Customs.

66. The charges showed a saving of 15 as compared with the Budget Estimate and an excess of 1,58 as compared with the actuals of the previous year. There was a saving of 30 in Burma due to the payment of overtime and holiday fees having been restricted to three-fourths of the amount of fees realized. In Bengal the saving was chiefly under the first head, and the excess in Bombay (29) was due to the payment of overtime fees not provided for. The excess, as compared with the previous year in Bengal (1,32) and Bombay (38), was due to the payment of overtime allowances, while the decrease in Burma was due to the cause stated above. Of the excess in Bombay 24 has been covered by an aditional grant sanctioned by the Government of India and 5 still await sanction.

Savings under Exchange Compensation Allowance	1	...	4	...	1	2	1	4	4	17

68. The Indian expenditure exceeded the Budget Estimate by 2,23 and the actuals of the previous year by 9,94. As compared with the Budget the excess occurred under *Timber and other produce removed from the Forest by Government Agency* and was due to famine grass operations in the Central Provinces and Bombay, and in the Punjab to extraction of charcoal, arrear payments for fuel work and higher rates for extraction of timber. The increase over the actuals of the previous year was also chiefly contributed by these three Provinces, owing mainly to the same causes, but in the Punjab the excess was also partly due to the establishment of Government bamboo Depôts and a resin distillery.

69. Under *General Direction* the excess was chiefly due to the absence on privilege leave of the Inspector-General (7) and the deputation of officers on special duty (7), partly counterbalanced by a saving of (10) due to the charges on account of the Paris Exhibition having been adjusted under 26—Scientific and other Minor Departments. Under *Timber and other produce removed from the Forest by Government Agency* the excess was contributed by all the Provinces except India, where there was a saving of 20 due to less felling and extraction operations in Coorg and the Andamans, and to less expenditure on tapping of Gurjan Oil in the latter. The principal excesses occurred in the Central Provinces, the Punjab and Bombay, and have been explained above. The excess in Burma (57) was due to larger extraction of timber, in Assam (22) to extensive sleeper operations, in Bengal (19) to the introduction of Departmental sleeper works, and in Madras (23) the estimate proved to be too low, chiefly under fire-wood and charcoal. Under *Timber and other produce removed from the Forests by consumers or purchasers* the decrease occurred chiefly in the Central Provinces (24) and Bombay (21), due in former to the abolition of certain establishment, to the transfer of the charge for pay of range officers to the head *Establishment*, and to smaller payments of commission on the sale of Forest Stamps, owing to reduced sales on account of the famine, and that in Bombay to slackness of demand due to famine. The saving in the North-Western Provinces (7) was due to less expenditure on establishment for fuel operations. Under *Other Charges* the saving in the Central Provinces (26) was due to the curtailment of expenditure owing to the prevalence of famine. Those in Burma (49), Bengal (5) and the North-Western Provinces (43) were caused chiefly by works of construction and improvement not having been carried out to the extent anticipated in the estimates, and that in Madras (57) by less expenditure under communications and buildings, and under improvement and extension of forests. These savings were partly counterbalanced by excesses in India (17), Assam (7), the Punjab (30), and Bombay (63). The excess in India was due chiefly to survey charges which were included under establishment in the Budget; that in Assam, to the payments of a larger share of revenue to the Manipur State than was anticipated; that in the Punjab, to an under-estimate of the amount payable to the Chamba State, on account of its share of profits on the Chamba leased forests for the past five years, and to compensation paid to the lessees of certain forests, and that in Bombay to expenditure in connection with famine grass operations. Under *Establishment* the saving of 1,83 was spread over all the Provinces except Madras and was due chiefly to the absence of officers on leave, to savings in the pay of subordinate establishments, and to lower rates for Exchange Compensation Allowance. The excess in Madras was due to an under-estimate.

70. The excess in England was mainly due to the cost of a portable Railway for Port Blair not provided for.

	Revised	1899-1900										165,1
	Accounts	1899-1900										163,8

71. The charges were less than the Budget Estimate and the actuals of the previous year by 92 and 28 respectively. The savings, both as compared with the Budget and the actuals of the previous year, were due, in all the Provinces, to smaller payments on account of commission to Sub-Registrars, owing to a decrease in the number of registrations effected.

Section B.—INTEREST.

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts.
R	RECEIPTS:—	R	R	R
1,01,46	India (Rupee figures) . .	91,36	83,79	83,47
£		£	£	£
676,4	Equivalent in Sterling	609,0	558,6	556,5
29,9	England . .	10,0	46,0	49,3
706,3	TOTAL .	619,0	604,6	605,8

72. The receipts in this section fell below the Budget Estimate by £13,2 or R1,98 and the actuals of the previous year by £100,5 or R15,07. As compared with the Budget there was a decrease of R7,89 or £52,5 in India, due chiefly to the payment of interest in advance by the Bombay Port Trust on their capital debt in the previous year. This decrease was partly counterbalanced by increase in the interest on overdrawn capital of the Guaranteed Companies, owing to larger withdrawals of capital than was estimated for in the Budget. The falling off, in comparison with the actuals of the previous year, was chiefly due to the advance payment by the Bombay Port Trust mentioned above, and the decrease in the payment of interest on advances to cultivators, owing to the inability of agriculturists to meet their liabilities on account of the stress of famine.

73. The increase in England, as compared with the Budget and the actuals of the previous year, was due to the investment of larger amount of cash balances at a higher rate of interest than was expected for a portion of the year.

74. As explained in previous reports the receipts under this head in India arise from the Paper Currency Investment, and from loans granted by Government to Municipalities and other public bodies, Native States and cultivators No alteration was made in the amount of the first during the year.

75. The following statement shows the balances of the different kinds of loans during the last five years:—

	31st March 1896.	31st March 1897.	31st March 1898.	31st March 1899.	31st March 1900.

76. The interest paid in 1899-1900 by Local Governments to the Government of India on account of loans held on the Provincial account amounted to R15,43 or £102,8, while the actual sum realized and credited to Provincial Revenues amounted in the aggregate to R18,45 or £123,0.

77. The fluctuations under the different heads are explained below.

78. Under *Interest on Loans to Native States* the decrease in India was due to short payment by the Sultan of Muskat, and that in Bengal, to the payment of interest on the Kooch Behar State Railway Loan falling below the estimate, in consequence of payment of an instalment of the principal earlier than

Section B.—INTEREST—*continued.*

XII.—Interest—*continued.*

was anticipated. The difference between the actuals of the two years was chiefly due to the realization of arrear interest on Kooch Behar Railway Loan in 1898-99. On account of scarcity large advances were made to Native States but interest on them will not accrue till the following year.

79. Under *Presidency Corporation* the only difference between the Budget and the actuals occurred in Bombay, and was due to the payment by the Bombay Port Trust in March 1899, of the interest on their capital debt due on 1st April 1899, as explained in last year's report. This also accounts for the great difference in the actuals of the two years.

80. Under *Interest on Loans to Municipal and other Public Corporations* the increase of 16 in the North-Western Provinces and Oudh, in comparison with the Budget Estimate, was due chiefly to the payment by the Meerut Municipality in March 1900 of interest (14) falling due in April 1900. In Punjab the interest on loans to the Simla Municipality for the improvement of Simla Water Works was not paid till July 1900. The variations in other Provinces do not call for remarks.

81. Under *Interest on Loans to Landholders and other Notabilities* the increase occurred in Bengal, and was chiefly due to the realization of arrear interest from the Rajah of Hill Tipperah. The increase was partly counterbalanced by a falling off in Bombay, due to the payment by the Jath State in the previous year of interest due in the year under report.

82. Under *Interest on Advances to Cultivators* the receipts fell below the Budget and the actuals of the previous year by 56 and 1,95 respectively. The decrease occurred in all the Provinces except in the North-Western Provinces and Oudh, and was chiefly due to the prevailing scarcity in consequence of which agriculturists were unable to meet their liabilities. In Burma it was due to agricultural loans not having been taken up to the extent anticipated. The increase in North-Western Provinces was due to the large realization of advances made during the famine of 1896-97 and 1897-98.

83. The increase under *Interest on Securities of Provincial Funds* represents the interest on the further investments in Government securities in favour of the Railway Guarantee Fund of the District Board, Tanjore.

84. The increase under *Interest on Overdrawn capital of Railway Companies in India* was chiefly due to the Guaranteed Companies having overdrawn their capital to a larger extent than was estimated in the Budget. In Bengal the receipt under this head appears for the first time, and was not anticipated. It represents the realization of interest on the rolling stock lent to the Bengal North-Western Railway, and on the cost of sleepers issued to the Doab line. Under *Other Items* the increase in Bengal was due to the realization of interest on arrear collection of Public Works and Road Cess, and that in Bombay to the recovery from the Bombay Improvement Trust, of interest on advances made to it, and from the Karachi Municipality of interest on advances for plague expenditure.

85. In England the large increase was due to the investment for a portion of the year of a larger amount of the cash balance at higher rates of interest than was estimated.

Section B.—INTEREST.

1898-99, Accounts.		Budget.	1899-1900. Revised.	Accounts.
R		R	R	R

2,017,5	TOTAL .	1,964,4	1,954,5	1,948,1

86. The total charges in this section showed savings of £16,3 or R2,44 and £69,5 or R10,42 as compared with the Budget Estimate and the actuals of the previous year respectively. As compared with the Budget a saving of £66,4 or R9,96 occurred in India, due chiefly to a decrease in payment of interest on loans (£31,2 or R4,68), and an increased transfer (£35,8 or R5,37) to interest on Railways, etc., owing to increase in the capital expenditure on Railways. The increase in England was due to the large payment of interest on India Bills (60,2), counterbalanced by a saving of £10,0 in the interest on temporary loans from the Bank of England.

87. As compared with the previous year the decrease of £157,8 or R23,68 in India was chiefly due to the increased transfer of interest to Railway and Irrigation works consequent on the increase in the Capital expenditure on State Railways.

13.—Interest on Ordinary Debt.

88. The following figures give the particulars of loans raised or discharged during the years 1898-99 and 1899-1900 :—

Section B.—INTEREST—*continued.*

13.—Interest on Ordinary Debt—*continued.*

89. As announced in the Financial Statement no new loans were raised in India during the year, but according to the Notification No. 2710, dated 15th June 1899, issued in a Gazette Extraordinary of the same date, the small balance (₹2,23) of the 7*s* per cent. portion of the Transfer loan of 1879 was paid off. Of the balance of the loans previously advertised for discharge ₹3,64 were paid, consisting of ₹21, 1,62 and 1,81 on account of 4½, 4 and 3½ per cent. loans respectively. Besides these, 13 outstanding for more than 20 years from the date of the notice of discharge were written off, subject to payment on the establishment of claims. Of the loans bearing interest 12,00 was paid on account of the Gwalior loan in accordance with the terms of the agreement with the durbar under which the loan was originally taken.

90. In England no addition to the sterling debt was made by the Secretary of State during the year, but a provision was made in the Budget to replace a temporary loan of 4,500,0 issued in the previous year, by raising an equivalent amount on the security of India Bills. Owing to two millions of the loans being issued for six months instead of twelve months, a second issue for that amount had to be made within the year to replace the gross amount of 6,500,0.

91. The total Interest on debt paid in India and in England is shown below:—

Debt in India on 31st March 1899.

4,922,8	TOTAL .	5,045,4	5,080,9	5,081,2

93. The payment in India was less than the Budget Estimate by 4,68. The decrease occurred in payment of interest chiefly on the 3½ per cent loan (6,09) partly counterbalanced by the excess of 62, in payment of interest on loans in course of discharge, and 70 on account of discount on Loans. The former was chiefly due to the heavy payment on account of 4 per cent. loans of 1842-43 and 1865 towards the end of the year. The discharge of the 7*s* per cent. Loan of 1879, the balance of which was transferred to the head Expired Loans on the 15th September 1899, also contributed to the

Section B.—INTEREST—*continued.*

13.—Interest on Ordinary Debt—*continued.*

excess. The latter represents the excess payment in connection with the discharge of the 7s per cent. Transfer Loan of 1879. The excess in England in the interest on India Bills (£60,2) was partly owing to some of the Bills being issued for six months, and replaced within the year by Bills for twelve months, involving a charge of interest for 18 months, and partly to the rate of interest being much higher than was estimated. On the other hand there was a decrease of £10,0 on the interest on Temporary Loans from the Bank of England, no such Loans having been required during the year. The large reduction of 10,05 in India under *Ordinary Debt* was due to the saving of 4,68 in the payment of interest on loans, enhanced by the increased transfer (5,37) to interest on Railways and Irrigation Works, consequent on the increase of the capital expenditure on Railways. The payment of interest on India Bills explains the excess over the previous years. The excesses of 5 and 31 under interest chargeable to the Central Provinces and Bombay respectively have been sanctioned by the Local Governments.

94. The expenditure in India was more than the Budget Estimate and the actuals of the previous year by 9 and 1.53 respectively. The excess as compared with the Budget occurred chiefly under *Special Loans* on account of payment of arrear interest on the 8 per cent. Perpetual Loan, Madras (14), and payment of arrears of Wasika pensions (13), and under *Service Funds* due to an increase in the balances of the Bombay Uncovenanted Service Family Pension Fund, (7). These excesses were almost entirely counterbalanced by the saving under *Savings Bank Deposits* in the interest on Post Office Savings Bank (31), and Regimental Savings Bank deposits (8), due to larger withdrawals than were anticipated.

Section B.—INTEREST—*continued.*

14.—Interest on other Obligations—*continued.*

The difference between the actuals of the two years was mainly due to the increase under 8 per cent. Perpetual Loan (Madras), Uncovenanted Service Family Pension Fund, and Post Office Savings Bank deposits.

95. The usual details of the interest on Treasury Notes and Service Funds and Savings Bank Deposits are noted below :—

96. The net receipts in this section showed an improvement of £462,8 or R69,42 as compared with the Budget Estimate, and of £382,8 or R57,42, as compared with the actuals of the previous year. The greatest increase occurred under the head Mint, and was mainly due to the new silver coinage of a crore and thirty lakhs of rupees, and the large absorption of copper coins in consequence of the famine.

97. Under Post Office the improvement was due to a normal increase in the receipts from sales of Postage stamps, and a decrease in expenditure, chiefly, for the conveyance of mails, in payments to Railways and road establishments.

98. The gradual improvement in the net results of the transactions of the Postal Department for the last five years is shown by the following figures:—

	Net Receipts. R
1895-96	6,97
1896-97	8,04
1897-98	14,97
1898-99	18,90
1899-1900	18,91

99. The improvement in the Telegraph Department was due chiefly to the large increase in message revenue owing to famine and the war in South Africa.

100. The total revenue exceeded the Budget Estimate and the actuals of the previous year by 5,92 and 4,84, respectively. The improvement over the Budget Estimate occurred almost entirely under *Sale of Ordinary Stamps* (5,79), owing to the increase in the sales being much above that anticipated in the Budget. There were small improvements under *Parcel and other Postage collected in cash* (14) owing to under-estimate; under *Other Receipts* (29) due to large sales of over-printed stamps to Native States, and under *District Post Collections* (24), owing chiefly to collection in the Central Provinces of arrears of contributions on account of Postal Establishments in Feudatory States (15), and in the Punjab to Mail cart receipts in the Dera Ghazi Khan District (15) not anticipated in the Budget. These improvements, were, however, covered by a falling off (31) under *Mail Cart, Parcel Van, Passenger and Goods Service* on the Simla-Kalka line, and a larger deduction than was expected under *Payments to English, Colonial and other Foreign Post Offices* (19), owing to arrear payments.

101. The improvement, as compared with the previous year, was chiefly in the *Sale of Ordinary Stamps* (3,76), due chiefly to the normal growth of the revenue, but partly also to increased sales owing to the collection in stamps of the prepaid postage on registered newspapers, etc., and in *Money Order Receipts* (1,54) due to the development of the business of the department. There were smaller improvements under *Sale of Service Stamps* (89), *Other Receipts* (29), and *District Post Collections* (38), due to the causes explained above. These improvements were partly counterbalanced by a decrease under *Parcel and other Postage collected in cash* (1,46), due to realisations in stamps of the prepaid postage on privileged publications and trade circulars, and to a reduction in the rates of Inland and Foreign postage, and by a larger deduction under Payments to English, Colonial, and other Foreign Post Offices (49) due to large arrear payments.

Indian Telegraphs.

102. The receipts during 1899-1900 were better than those of the previous year by 14,75. The increase occurred chiefly under message revenue, and was due principally to famine and the war in South Africa. Owing mainly to these causes the number of State and private messages increased from 669,030 and 4,779,570 in 1898-99 to 713,724 and 5,523,577 respectively in 1899-1900. There was also an increase of 1,23 in the rent of wires and instruments leased to railways and canals due to the extension of railway and canal lines of telegraph, the wire mileage having increased from 55,833 in 1898-99 to 59,663 in 1899-1900. Of the increase of 11,47 over the Budget Estimate, 10,33 was due to an increase in message revenue and 88 to rent of wires and instruments as already explained.

Indo-European Telegraphs.

103. The receipts in India during 1899-1900 exceeded those of the previous year by 2,61, and the Budget Estimate by 2,96. The increases, as compared with the figures of the previous year and the Budget Estimate, were mainly due to a growth in the message traffic transferred from the Indian Telegraph Department.

XV.—Mint—*continued.*

104. The receipts under this head were better than the Budget and the actuals of the previous year by 45,71 and 43 97 respectively. Of this increase 34,22 as compared with the Budget Estimate and 32,69 as co n pared with the actuals of the previous year occurred under *Gain on Coinage Operations*, and were chiefly due to the coinage of one crore and thirty lakhs of new rupees. The large increase under *Fees for Coining Silver* was due to heavy dollar coinage, and that under *Gain on Copper Coinage* was on account of large absorption of copper coins in consequence of the famine. Under other receipts the decrease at the Calcutta Mint was due to diminished demands for copper coins from the Ceylon and the Straits Settlements Governments and the absence of orders for war medals. The increase in Bombay in comparison with the Budget was partly due to receipts on account of copper coins manufactured for the British East African Protectorate and partly to large fees received for melting silver.

105. The expenditure in India fell short of the Budget Estimate by 1,66 and exceeded the actuals of the previous year by 7,16.

106. The excess of 45 under *Chief Office, Calcutta*, was due chiefly to expenditure involved in decentralising the Office of Account and Audit, which necessitated an increase in the salary of the Deputy Comptroller, the entertainment of two new Deputy Comptrollers and one Assistant Comptroller (8), and the payment of travelling allowances and bonuses to clerks (71). This excess was partly counterbalanced by savings under establishment due to leave arrangements and vacancies (15), under Direction due to temporary vacancies, deputation of Officers and leave arrangements (12), to changes in the office of the Director General, and non-employment of the temporary establishment provided for (3), and to savings under travelling allowances and contingencies (5). The excess, as compared with the previous year, arose chiefly from the expenditure incurred in decentralising the Office of Account and Audit. Under *Presidency and District Offices* the saving of 19 was chiefly due to smaller charges under salaries, owing to leave arrangements and deputations (20), to the provision for revision of establishment not having been fully used (35), to gain in the working of Combined Offices (33), to less expenditure under travelling allowances (12), construction and repair (13), and Aligarh workshop supplies (5), partly counterbalanced by larger payments of salaries due to the entertainment of additional Inspectors and privilege leave arrangements (24), arrear payments of [illegible]ange Compensation Allowance (9), payment of grain compensation (30), and larger payments on account of feed of horses (4), supplies and services (17), and contingencies (16) The excess of 4,64, as compared with the actuals of the previous year, was due to higher charges under establishment and the several contingent heads owing to the expansion and development of the Department.

Section C.—POST OFFICE, TELEGRAPH, AND MINT—EXPENDITURE—*continued.*

15.—Post Office—*continued.*

Under *Road Establishment and Contingencies* the saving (32), as compared with the Budget Estimate, was due chiefly to the abolition of runners' lines in Bengal and Punjab, and to the provision for mail lines not having been fully utilised (37), and to small savings under rainy season and other miscellaneous heads (23), partly counterbalanced by payment of grain compensation (18), and overcharges for despatch of mails (5) and Aligarh workshop supplies (5). The saving of 1,05 under *Railway charges* occurred chiefly in the payments to the East Indian, North-Western, Madras, Great Indian Peninsula and Oudh and Rohilkund Railways. The excess of 44, as compared with the actuals of the previous year, occurred chiefly in the payments for special train service. The saving of 41 under *Mail Cart, Parcel Van, Passenger and Goods Service Establishment and charges*, as compared with the Budget Estimate, was due chiefly to an over-estimate for contingent charges (60), partly counterbalanced by payment of grain compensation (19). The excess (31), as compared with the actuals of the previous year, was due chiefly to the higher cost of maintaining transport animals on the Simla-Kalka line, and the payment of grain compensation. The savings under *Other charges* were mainly due to no payment having been made to the Peninsular and Oriental Company. Under *Subsidies* the excess of 23, as compared with the Budget Estimate, and of 38, as compared with the actuals of the previous year, were due to arrear payments to the Tigris and Euphrates Steam Navigation Company and the India General Steam Navigation Company, and an over-payment to the latter. Under *Stationery and Printing* the excess over the Budget and the actuals of the previous year was due to an unexpectedly large supply of stationery from Central Stores. The saving under *Miscellaneous*, both as compared with the Budget Estimate and the actuals of the previous year, occurred under compensation for lost articles, the provision for which was too high.

107. Under *District Post charges* the saving in the Central Provinces (6) was due partly to the withdrawal of District Post expenditure in Feudatory States, and partly to savings in monsoon charges, and charges on account of the Chief Commissioner's Camp Post Office. In Bengal the saving occurred chiefly in Zamindari Dâk charges; and in the North-Western Provinces and Oudh in establishment charges. The excess in the Punjab, both as compared with the Budget Estimate (18) and the actuals of the previous year (21), was due to the payment of grain compensation, and the charges in the Dera Ghazi Khan District, for which no provision was made in the Budget. The excess over the Budget Estimate has been covered by re-appropriation sanctioned by the Local Government. The excess of 5 in Burma, as compared with the actuals of the previous year, was due to the more extended operations of the District Post. The excess in Bombay (4), which was due to the payment of grain compensation, has been met by a re-appropriation sanctioned by the Local Government. The excess of 45 under *Chief Office, Calcutta*, has been met by re-appropriation, and those under *Discount on Sale of Stamps* (3), *Subsidies* (23), and *Stationery and Printing* (37) have been sanctioned by the Director General of Post Office.

108. The increase in the expenditure in England (7) was due to the detention in England of the Post Master General of Bengal on duty connected with the mail contract.

109. The expenditure in India and that in England during 1899-1900 were R4,50 and £3,0 respectively more than that of the previous year. The increase in the expenditure in India was due partly (1,48) to extensions of lines and additional wires, partly (1,29) to increased signalling charges, necessitated by the opening of new offices and an increase in the number of messages, and partly (2,22) to the maintenance of increased wire mileage and to heavier repairs and renewals being found necessary on some of the older lines. The increase in England was due to exceptional expenditure on stores required for works. The decrease of R1,57 in the expenditure in India, as compared with the Budget Estimate, was due to short outlay on railway telegraph lines. That of £6,3 in the expenditure in England was due to reduced payments by the Secretary of State on account of stores.

Indo-European Telegraphs.

110. The expenditure during 1899-1900 was £9,4 more than in the previous year. The increase occurred chiefly in England, and was mainly due to payments in England in respect of message revenue.

111. As compared with the Budget Estimate, there was a short outlay of £5 2, which was due chiefly (2,05) to savings in the outlay on purchase of stores in England for the proposed new line of telegraph through Central Persia. On the other hand there was an increase of 1,66 in the message out-payments in England, owing to an increase in the Homeward traffic and in the percentage of traffic carried by the Indo-European route. There was also a decrease of 40 in the expenditure in India due to savings under General charges and Signalling.

17.—Mint—*continued.*

112. The Indian charges under this head showed an excess of 1,61 over the Budget Estimate and a saving of 2,83 as compared with the actuals of the previous year. The increase was chiefly under *Loss of Weight in Coinage*, both in Calcutta and Bombay, in connection with the new silver coinage operations. Under Establishments the small saving in Calcutta was chiefly under Assay Master's establishment caused by the retirement of old incumbents and the appointment of new officers on the minimum pay. The increase of 19 in Bombay was due chiefly to dollar coinage which led to the entertainment of temporary establishments and to an increase of overtime allowance. The excess of 73 in Calcutta requires the sanction of the Government of India, and that of 88 in Bombay was covered by additional grants to the extent of 1,00 sanctioned by the Government of India in their letters Nos. 5520-A, and 1187-A, dated 6th December 1899 and 7th March 1900, respectively.

1,151,0	TOTAL .	1,183,7	1,175,3	1,185,0

113. The receipts in this Section showed an improvement of £1,3 or R20 as compared with the Budget Estimate, and of £34,0 or R5,10 as compared with the actuals of the preceding year. As compared with the Budget there was an improvement of R2,73 or £18,1 under Marine, due chiefly to large recoveries on account of hire of Indian Marine Vessels, employed in conveying troops on Imperial Service, and of Vessels employed on the Somali Coast; there were also smaller improvements under Medical (43), due to realization of arrear contributions in Bengal from the Calcutta Municipality, and to improved Hospital receipts in Bombay, and under Scientific and Other Minor Departments (76), due chiefly to large sales of Quinine in Madras and Bengal. These increases were partly counterbalanced by a falling off of R1,50 or £10,0 under Law and Justice—Courts of Law, chiefly in receipts from Magisterial fines, of R83 or £5,6 under Law and Justice—Jails, due mainly to a reduced demand for jail manufactures in Burma and the North-Western Provinces, and to a decrease of jail population in the Central Provinces, and of R1,45 or £9,7 under Police, due to a decline in Cattle Pound receipts.

114. As compared with the actuals of the previous year the principal increase occurred under Law and Justice—Jails (R3,18 or £21,2), due chiefly to large sales of jail manufactures. There was an increase of R1,40 under Marine, due to large recoveries for hire of vessels as stated above, of R1,57 under Scientific and Other Minor Departments, due partly to the reason given above, and partly to large sales of aluminium ware in Madras; there were also smaller improvements under Education (R66) and Medical (R75). These increases were partly counterbalanced by a decrease of R1,49 or £99 under Law and Justice—Courts of Law, due to the cause named above, and of R99 under Police, due chiefly to the Mandalay Municipality having been relieved of the cost of maintaining the police force from the beginning of the year.

115. The receipts under this head fell below the Budget Estimate by 1,50, and the actuals of the preceding year by 1,49. The decrease, as compared with the Estimate, occurred almost entirely under *General Fees, Fines and Forfeitures*, due in Madras (77), to a falling off mainly of receipts from magisterial fines and Printing and Translation executed by the High Court; in Bombay (48), to diminished receipts from magisterial fines, in consequence of famine and plague; in the Central Provinces (21), to prevailing distress; and in Burma (29), to less fines realised in excise and opium cases. These decreases were partly counterbalanced by an improvement in the North-Western Provinces (15), due to enhanced receipts from magisterial fines and fees and fines levied by the High Court, and in the Punjab (27), due chiefly to Political fines. The decline under *Sale-proceeds of Unclaimed and Escheated Property* (8) was the net result of small variations in most of the Provinces, due to the fluctuating character of the receipts. Under *Court-fees realised in cash* the decline was chiefly in the North-Western Provinces (7), due to low receipts from Process Servers' fees. Under *Other Receipts* the fall in Bengal (24), and Bombay (8), due to a decline in Pleadership Examination fees and Record Room receipts, respectively, was partly counterbalanced by an improvement in the Punjab (14), due chiefly to the transfer to this head of the balances of the Insolvency Court and Record Room Funds, and in Madras (7), due to large receipts from Petroleum licenses.

116. Under *Sale-proceeds of Jail Manufactures* the decrease of 1,47, as compared with the Budget Estimate, occurred chiefly in the Central Provinces (94), due to the number of prisoners having diminished, in the North-Western Provinces (68) and Burma (38), due to a smaller demand for jail-made articles, and in the former also partly to a large number of looms in three Central Prisons having been utilised for the

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

XVIB.—Law and Justice—Jails—*continued.*

manufacture of carpets and durries for the Government House at Naini Tal, for which the Jail Department was paid the cost price only of the raw materials, and in Madras (10) owing to manufacture having been restricted in consequence of building operations in some jails. These decreases were partly counterbalanced by an improvement in Bengal (53) due to an unusually high demand for jail-manufactured articles, and in the Punjab (14) due partly to an increase in the number of prisoners, and partly to the sale, by the Mooltan Central Jail, of bricks manufactured in previous years. The net receipts under this head, after deducting the corresponding charges under 19B, are given below:—

		India.	Central Provinces.	Burma.	Assam.	Bengal.	N.-W. P. and Oudh.	Punjab.	Madras.	Bombay	TOTAL.
Net Receipts from Jail Manufactures.	Accounts 1898-99	4	61	1,91	5	2,77	1,45	64	73	41	8,61
	Budget 1899-1900	7	61	1,61	3	2,10	1,55	—42	83	28	6,66
	Revised 1899-1900	5	66	1,40	3	4,28	1,39	28	74	46	9,29
	Accounts 1899-1900	5	88	1,83	2	3,24	1,71	49	1,09	42	9,73

117. The improvement under *Other Receipts* was contributed, chiefly, by the Punjab (33), due mainly to an increase in the number of the prisoners employed in excavating the New Jhelum Canal, and by Bombay (19) due to the employment of the Deccan and Nara Gangs of prisoners on remunerative works almost throughout the year. Under *Convict Receipts at Port Blair* the increase was due to an improvement under Tea Garden Receipts (11), owing to better sales of tea, under Jail Manufactures (5), due to a larger outturn of cocoanut oil and to heavier exports, and under sale-proceeds of unclaimed and intestate property (3), partly counterbalanced by a decrease under Hire of Convicts (8), due to a smaller demand for convict labour than was anticipated.

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

XVII.—Police—*continued.*

118. The receipts under this head fell below the Budget Estimate by 1,45, and the actuals of the preceding year by 99. The decline, as compared with the Estimate, occurred mainly under *Fees, Fines and Forfeitures*, due to the falling off of Cattle Pound Receipts in most of the Provinces, but chiefly in Bombay (81) owing to the famine; there were, however, slight improvements in Burma (22), due to large receipts from fines for gambling, and from slaughter-house license fees, and in the North-Western Provinces (11) due to an increase in Cattle Pound Receipts. Under *Other Receipts* the decrease in Bengal (52), was due to the adjustment of the recoveries from Municipalities and District Boards on account of Police supplied to them, in connection with the plague, being made under XXV—Miscellaneous and Contributions from Local to Provincial, respectively, instead of under this head; and that in Burma (20) was due to an over-estimate of the value of stores returned to the arsenal. The small increase in Madras (9) represented the value of stores returned by the Police into Arsenals, for which no provision was made in the Estimate. Under *Police supplied to Railways* the receipt represents the amount by which the recoveries from the Burma Railways Company on account of Police escorts exceeds the Government share of the cost of Railway Police. The improvement under *Presidency Police* (47) was due to a larger demand than was anticipated for Police supplied to private persons, and that under *Police supplied to Municipal, Cantonment, and Town Funds* occurred chiefly in the Punjab (14) due partly to the revision of the Police Force and partly to recoveries on account of compensation paid to the Police for dearness of provisions. The decrease in Burma (1,02), as compared with the previous year, was due to the Mandalay Municipality having been relieved of the cost of the police force from the 1st April 1899. Under *Police supplied to Public Departments, Private Companies and Persons* the improvement in Madras (82) and the Punjab (14) was due to larger recoveries than were anticipated on account of Punitive Police, that in Madras being in connection with the Tinnevelly riots, and in Bombay (16) to an under-estimate. These improvements were partly counterbalanced by a falling off in Burma (58), due partly to the recovery of the contribution from the Rangoon Port Trust towards the cost of the City Police (35), which was provided for under this head, having been adjusted by deduction from expenditure, and partly, to smaller contributions on account of punitive police, and in Bengal (27) due chiefly to the non-recovery of the amount payable by the Bengal-Nagpur Railway Company.

119. The receipts under this head exceeded the Budget Estimate and the actuals of the previous year by 2,73 and 1,40, respectively. The improvement, as compared with the Budget, was entirely in India and occurred under *Dockyard Services, etc.* (3,03), due chiefly to recoveries on account of hire of Indian Marine vessels employed in conveying troops to and from Mauritius, to Ceylon, and from Mauritius to Durban and Berbera, and of vessels employed on the Somali coast. The increase over the previous year was also due to these large recoveries. *Pilotage Receipts*, in Bengal, which are of a fluctuating character, fell below the Estimate by 8 ; in Bombay they are now credited to an Excluded Local Fund, under Government of India, Finance and Commerce Department No. 5195A., dated 28th November, 1898. Under *Sale-proceeds of vessels and stores* the increase in India was due to the sale of a large quantity of canvas, received from England in a damaged condition, and of stores of obsolete pattern ; in Burma, the decrease was due to certain steam launches not having been sold. Under *Coast Light Dues* in Burma the increase of revenue anticipated in the Budget was not realised.

120. The receipts under this head exceeded the Budget and the Actuals of the previous year by 6 and 66, respectively. Under *Fees from Schools and Colleges* the improvement, as compared with the Budget, occurred chiefly in Bengal (41), the North-Western Provinces and Oudh (17) and the Punjab (8), due mainly to increased receipts from School fees, partly counterbalanced by a fall of 35 in Madras due to a marked reduction in the strength of the Law classes, chiefly on account of certain restrictions imposed by the Local Government, and of 40 in Bombay due to the decrease in attendance at Schools as an effect of the famine and plague. The improvement of 3 under *Contribution*, in the North-Western Provinces and Oudh, due to large private subscriptions towards the support of educational institutions, and of 5 in Madras representing a special credit received by the District Board, Tinnevelly, for the Technical Institute, was nearly covered by a fall of 7 in Bengal. The improvement of 3 under *Other Receipts* was the result chiefly of a fall of 9 in Bengal and a rise of 11 in Madras, the latter being due to an adjustment made on account of value of saleable books in store by debit to the Debt Head, Incorporated Local Funds, Debt Deposits, etc.

121. The Indian receipts under this head exceeded the Budget Estimate by 43, and the actuals of the preceding year by 75. The improvement, as compared with the Estimate, occurred under *Contributions* in Bengal (40), due mainly to the realization of an arrear contribution from the Calcutta Municipality, under *Hospital Receipts* in Bombay (12), due to enhanced receipts from paying patients, under *Other Receipts* in the North-Western Provinces (8), due to the credit to this head of the sale of Government Promissory Notes belonging to a District Board Dispensary, and under *Medical College and School Fees* in Bombay (6) due to an increased attendance of students at the Grant College. These increases were partly counterbalanced by a fall under *Lunatic Asylum Receipts*, due in Bengal (15) to an over-estimate, and in the North-Western Provinces (11) to low receipts from the Dairy Farm attached to the Bareilly Lunatic Asylum, and under *Contributions* in the Central Provinces (11) due to an over-estimate.

122. The Indian receipts under this head were in excess of the Budget Estimate by 73, and of the actuals of the preceding year by 1,57. The improvement occurred, chiefly, under *Cinchona Plantations* in Madras (56) due to the supply of quinine to all Provinces except Bengal, the Punjab and Assam, and to increased receipts from the sales of quinine to Local Fund and Municipal Hospitals owing to a change in the system of collection; the sales in Bengal were also larger than was anticipated. There were minor improvements in India under *Veterinary and Stallion Receipts* (15) due to the sale-proceeds of six English stallions, and *Sale of Maps, Instruments, etc.* (11), due to high receipts on account of work done and maps supplied by the Surveyor General's office; and in Madras under *Other Receipts* (10) due to large sales of aluminium ware. These improvements were partly counterbalanced by decreases under *Receipts on account of Public Exhibitions and Fairs* in the North-Western Provinces (15) due to a falling off in the attendance of pilgrims at the Allahabad Magh Fair, and under *Labour and Emigration* in Assam (9) due to a fall in the number of labourers imported under the Act. The large increase in Madras, as compared with the actuals of the preceding year, was due to the causes explained above.

123. The expenditure in this section showed a saving of £130,8 or R19,62 as compared with the Budget Estimate, and an excess of £295,8 or R44,37 as compared with the actuals of the previous year. The principal saving occurred under Medical, where there was a decrease of £184,3 or R27,65 due to the large provisions in India and Madras for plague preventive charges not having been required. There was a saving of £22,1 or R3,32 under Law and Justice—Courts of Law, chiefly under High Courts, and Civil and Sessions Courts; of £38,6 or R5,79 under Law and Justice—Jails, due to small purchases of raw material consequent on reduced demands for jail manufacture; of £18,0 or R2,70 under Police, due partly to the absence of officers on leave, and partly to the slow progress made in the introduction of certain schemes of reform; of £30,9 or R4,63 under Education, contributed by all the Provinces except Madras, but chiefly by Bengal and the North-Western Provinces; of £9,8 or R1,47 under Ecclesiastical, and of £23,0 or R3,45 under Scientific and other Minor Departments, chiefly in the charges of the Survey of India, other Scientific Departments and Veterinary and Stallion charges. These decreases were partly counterbalaced by an excess of £78,0 or R11,70 under General Administration which occurred chiefly in England owing to the purchase of land under the India Office (Store Depôt) Act of 1898; of £73,3 or R11,00 under Marine, chiefly in the expenditure in England, due to payments on account of the Indian Troopship "Hardinge," partly counterbalanced by savings in India, mainly due to large recoveries in connection with the fitting of transports for South Africa, and of £44,6 or R6,69 under Political, due chiefly to the payment of arrears of subsidy to the Amir of Afghanistan.

124. The increase as compared with the actuals of the previous year occurred under all the heads except Law and Justice—Jails, and Medical; under the latter there was a decrease of £133,2 or R19,97 due to less expenditure in connection with the plague, chiefly in Bombay. There was an excess of £77,3 or R11,60 under General Administration, chiefly in the expenditure in England; of £32,1 or R4,81 under Law and Justice—Courts of Law, chiefly under Civil and Sessions, and Criminal Courts, due to the absence of officers, payment of grain compensation, and charges in Madras in connection with the Tinnevelly riots; of £64,2 or R9,63 under Police, due in Burma to the separation of the Rangoon City Police from, and the amalgamation of, the Mandalay Municipal Police, with the District Force, in the North-Western Provinces to the progress of reforms, in the Punjab and Bombay to expenditure on account of plague and famine, and in Madras to charges connected with the Tinnevelly riots; of £105,1 or R15,76 under Marine due to charges connected with the fitting of transports for South Africa; of £20,4 or R3,07 under Education chiefly in the North-Western Provinces and Bombay; of £119,8 or R17,97 under Political due partly to the cause stated above and partly to larger charges on the North-West Frontier, and of £11,6 or R1,74 under Scientific and other Minor Departments which occurred chiefly in England.

Savings under Exchange Compensation Allowance		6	2	3	1	3	6	3	2	4	30

125. The expenditure in India exceeded the Budget Estimate by 1,69 and the actuals of the previous year by 1,47. The excess over the Budget occurred chiefly in India; there were also an excess of 37 in Bengal and savings in all the other Provinces except Madras, where there was a small excess of 2. The excess in India was mainly due to larger payments under *Tour Charges* owing to the more extended tours of the Viceroy, to higher hill journey, telegram and establishment charges, under *Secretariats*, owing to an arrear payment, under *Allowances to Presidency Banks*, owing to high telegram and hill journey charges, under *Staff and Household*, and under *Durbar Fund* owing to additional expenditure authorised in Financial Department Nos. 2824 A., dated 23rd June 1899, and 4261 A., dated 15th March 1900.

126. Under *Salaries of Governor General, Governors, etc.*, the high charge of the previous year was due to the Lieutenant-Governor of the North-Western Provinces having drawn four months' full pay, as a famine concession, while on medical leave. Under *Staff and Household* the excess in India (33) was chiefly due to higher expenditure on telegrams (9 , and hill journey charges (26); the excess over the previous year also occurred in these charges. The excess in Burma (5) was due partly to the promotion in Army rank of the Private Secretary to the Lieutenant-Governor (2), and partly to the payment of the Municipal taxes on the Government House, Rangoon, not provided for in the Budget. In Bengal the excess (17) was due partly to the adjustment under this head of hill journey charges (11) provided for under *Tour Expenses*, and partly to high expenditure on supplies and services. The saving in the North-Western Provinces (16) was due chiefly to low expenditure on contingencies (11), and savings under salaries (6), owing to the appointment of a Military Officer on a lower rate of pay as Private Secretary to the Lieutenant-Governor. Under *Executive Council* the saving of 1 was the result of a decrease of 13 in India owing to the absence on leave of two Members of Council, and an excess of 11 in Bombay owing to the payment of the leave allowance of one of the Members of Council. Under *Legislative Council* the excess in India (6) was due to an under-estimate of the allowances of non-official members; that in Bengal (5) was due to the increased rate of salary sanctioned for the Secretary after the Budget was passed, and the excess in Bombay (3) was due to an additional Member of the Legislative Council of India having drawn his pay in Bombay. The saving in Madras (3) was chiefly due to the non-utilisation of the provision for Members of the Legislative Council of India.

127. The *Secretariat* charges exceeded the Budget Estimate by 76, of which 56 were in India, 8 in the Central Provinces, 11 in Bengal, 14 in the Punjab, 6 in Madras and 19 in Bombay, partly

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

18.—General Administration—*continued.*

counterbalanced by savings of 15 in Burma, 6 in Assam, and 17 in the North-Western Provinces and Oudh. The details of the India Secretariat charges are given below :—

1898-99. Accounts.	*Secretariat (India).*	Budget.	1899-1900. Revised.	Accounts.
3,06	Financial Department	2,90	2,95	2,91
66	Statistical Department	74	73	73
3,07	Home Department	2,79	2,90	2,92
1,61	Legislative Department	1,46	1,45	1,48
4,26	Foreign Department	4,38	4,31	4,36
1,87	Revenue and Agriculture	1,92	2,18	2,21
7	Translator's Department	7	7	7
2,77	Public Works Department	3,12	3 05	3,37
35	Government Record Department	40	36	36
4,65	Military Department	4,96	4,59	4,89
22,37	TOTAL	22,74	22,59	23,30

128. In the Financial Department there was an increase of 10 under salaries owing to the grant of leave and the creation of an Assistant Secretaryship, which was covered by a saving in establishment charges. The decrease, as compared with the previous year, was chiefly in establishment charges and allowances. The excess in the Home Department (13) was chiefly due to high expenditure on telegrams (16) in connection with the plague, partly counterbalanced by a saving of 4 under salaries, due mainly to the deputation of the Secretary with the Plague Commission. The decrease, as compared with the previous year (15), was chiefly due to savings under salaries. The high expenditure in the Legislative Department in the previous year (13) was due to the special charges for the revision of the Codes. In the Foreign Department there was a saving of 26 due chiefly to an over-estimate for telegram charges, which was almost covered by an excess of 15 due to charges connected with the revision of Mr. Macpherson's Lists of British Enactments in force in Native States, for which there was no provision, and of 5 under establishment, and 4 under contingencies. The excess over the actuals of the previous year is more than accounted for by the charges for the revision of Mr. Macpherson's Lists. Under Department of Revenue and Agriculture the excess (29) was chiefly due to the grant of privilege leave (17) and to special charges in connection with Famine (14); these causes also explain the increase over the actuals of the previous year. Under Public Works Department the excess both as compared with the Budget and the actuals of the previous year was due to the stoppage of the annual move of the Office to Calcutta in the preceding year, and the adjustment of charges, which would otherwise have been drawn in advance in March 1899, in the following month. The saving in the Military Department occurred chiefly under salaries owing to the appointment of officers of lower grades as Deputy and Assistant Secretaries. The excess over the actuals of the previous year was chiefly under salaries and establishments. In the Central Provinces the excess (8) was due to the local allowance drawn by the Famine Secretary, and to the entertainment of temporary establishments owing to the famine. The excess (11) in Bengal was chiefly due to salaries of officers on special duty and to privilege leave arrangements (20), partly counterbalanced by smaller hill journey charges (8). In the Punjab the excess (14) was partly due to leave arrangements (6), and partly to high contingent expenditure, owing to some extent to the prevalence of plague and famine. In Madras the excess (6) was chiefly due to the grant of privilege leave, and to higher charges in connection with the plague. In Bombay the excess (19) was mainly due to the appointment of an additional Chief Secretary, an Under-Secretary for one month, and extra establishment and other charges in connection with the famine. The saving in Burma (15) was due to absences on long leave and deputations (4), to savings under establishment (5), and to low hill journey charges and contingencies (7). In Assam the saving (6) occurred chiefly in establishment and contingent charges, and in the North-Western Provinces (17) it was chiefly due to the lump provision of 10 not having been utilised, and to small savings under establishments and allowances. Under *Tour Charges* the excess in India has been explained above; that in the North-Western Provinces (10) was due to the high tour expenses of the Lieutenant-Governor, and that in Bombay (4) to charges in connection with the visit of Lord Sandhurst to Calcutta. The saving in the Central Provinces (17) was chiefly due to low expenditure on the purchase and repair of tents and furniture, and hire of camels and carts. The saving in Bengal (5) is due to the adjustment of hill journey charges under *Staff and Household* as stated above. Under *Board of Revenue and Financial Commissioner*, the saving in Burma (11) was chiefly due to the increased rate of salary, provided for the Financial Commissioner, not having been sanctioned till January 1900, and to small decreases in allowances and contingencies. In Bengal the saving (7) occurred in establishment charges, and in the Punjab the saving (6) was due to the provision for a new edition of the Revenue Circulars, not having been utilised. Under *Commissioners* the saving in Burma (17) was due chiefly to the

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

18.—General Administration—*continued.*

increased rate of salary provided for Commissioners, not having been required till January 1900 (3), and to low expenditure under supplies and services (6), and contingencies (4), and that in the Punjab (17), chiefly to the provision for leave vacancies not having been utilised (9), and to short expenditure under allowances and contingencies. Under *Inspector General of Stamps, Registration, etc.*, the saving in the Central Provinces (4) was due to the fact that the Officiating Inspector General drew less pay than was estimated for, and that in the North-Western Provinces (4), to the provision for the revision of office establishment not having been utilised.

The total charges for [illegible] are shown below :—

		Civil Account and Offices.	Office of A. G., P. W. Dept.	TOTAL.
Accounts .	1898-99	[illegible]	2,14	27,11
Budget .	1899-1900	[illegible]	2,50	28,03
Revised .	1899-1900	[illegible]	2,41	[illegible]
Accounts .	1899-1900	25,73	2,45	28,18

129. The excess in the Civil Account offices was chiefly due to privilege leave absences, partly counterbalanced by savings in establishment charges due to absences and deputations. The saving n the Currency offices was due mainly to absences on leave and retirements. Under Public Works Office of Account, the saving of 5 was the result of a decrease of 6 under establishment, and 3 under ill journey allowances, due to vacancies in the grade of accountants, and an excess of 5 under salaries ue to the grant of privilege leave. The excess in India under *Allowances to Presidency Banks* was ainly due to an arrear payment. Under *General Establishment. of Local Fund Offices* the saving n Madras (15) was chiefly due to cost of stationery supplied from Central Stores to Local Boards, eing adjusted under 30 Stationery and Printing, instead of being paid for in cash by debit to this head, s formerly.

130. There was an excess of £66,7 or R10,00 in the expenditure in England, due chiefly to an excess f £58,7 for the purchase of land under the India Office (Store Depôt) Act of 1898, of £4,9 for installation f Electric Light in the India Office, and of £5,4 for stores owing to a large demand, partly counter-alanced by a decrease of £1,5, owing to smaller charges of the Store Department.

131. The expenditure in India fell short of the Budget Estimate by 3,36, but exceeded the actuals of the previous year by 4,86. The largest savings occurred under *High Courts, etc.* (1,13), and *Civil and Sessions Courts* (1,36). Under *High Courts, etc.*, the saving in Burma (61) was chiefly due to the higher rates of salary provided for the Recorder and for the Judicial Commissioners, Upper and Lower Burma, not having been required during the year. In Bengal the saving (33) was due chiefly to the appointment of one Judge having remained vacant (17) and to the provision for commission payable to the official Receiver not being utilised (5). The saving in the Punjab (10) was due to a Judge having been appointed as an Additional Member of the Council of the Governor General for a part of the year, and that in Madras (27) was due chiefly to less printing and translation work executed by the High Court on behalf of suitors (23), and to leave vacancies, partly counterbalanced by the increased rate of salary for Puisne Judges (4). The excesses in the North-Western Provinces (14) and Bombay (4) were due to the increased rate of salary for Puisne Judges; the excess due to this cause in Bombay (17) was reduced by savings due to absences on leave, a favourable rate of exchange, and the deduction of contribution on account of the establishment of the clerk of the Insolvent Debtor's Court from charges. Under *Civil and Sessions Courts* the saving in the Central Provinces (4) was due to the post of an Additional Judge having been vacant during the greater part of the year; in Assam it was chiefly due to the absence of a Judge (5), leave vacancies in establishment and small savings under contingencies (5), and to less payment of grain compensation to Process-serving establishment (5); in Bengal it was chiefly due to savings under salaries of District and Sessions Judges (18), Subordinate Judges (6) and Munsiffs (4), under establishment (19), under Process-serving (26) and under contingencies (21), partly counterbalanced by an excess of 21 under supplies and services; in the North-Western Provinces it was chiefly due on savings under salaries of Subordinate Judges and Munsiffs (13), under establishment (3), under diet and travelling allowances (6), and under Process-serving establishment (14); in Madras it was chiefly due to the provision (13) for a Civilian Sub-Judge not having been utilised, and that (37) for 4 new Munsiffs' Courts having been only partially required, and to vacancies in the grades of Subordinate Judges, partly counterbalanced by expenditure in connection with the Tinnevelly riots. The saving in Bombay was chiefly due to absentees and temporary vacancies, partly counterbalanced by payments of grain compensation for which no provision was made. The small excess of 3 in Burma was the result of an excess of 11 on account of privilege leave allowance of both the Additional Sessions Judges, and a saving of 8 in the provision for the salary for the Judge of Moulmein and the Civil Judge of Mandalay. The excess in the Punjab was chiefly due to the payment of grain compensation allowance. The increase, as compared with the previous year in the North-Western Provinces and the Punjab, was chiefly due to the absence of a large number of officers in 1898-99; the increase in Madras was chiefly due to expenditure in connection with the Tinnevelly riots, and that in Bombay to the payment of grain compensation charges. The increase under

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

19A.—Law and Justice—Courts of Law—*concluded.*

Law Officers was chiefly due to higher payments of pleaders' and barristers' fees in civil and criminal cases in India (10), Assam (4), the Punjab (10) and Madras (41), where it was mainly due to the payments in connection with the disturbances in the Tinnevally district, partly counterbalanced by smaller payments of fees in Burma (4), and the North-Western Provinces (13); and by savings in Bengal (10) and Bombay (12) due chiefly to the absence of officers on leave, in Burma the saving was also partly due to the absence of an officer on long leave. Under *Courts of Small Causes* the principal savings were in Bengal (9) and Madras (4) chiefly in salaries, owing to absences on leave, and deputation. Under *Criminal Courts* the variations occur chiefly under salaries; there were savings in Burma (66), Assam (20), the North-Western Provinces (51) and Bombay (28), and excesses in the Central Provinces (7), Bengal (42), the Punjab (49) and Madras (22); in Burma the saving was enhanced by savings under establishment (16), allowances and contingencies (13), partly counterbalanced by an excess of 14 under diet and travelling allowances of witnesses, and in Bombay the saving was reduced by excesses due to payment of grain compensation, and to larger payments on account of diet and road money of witnesses. The excess in the Central Provinces was chiefly due to the payment of grain compensation, and to temporary establishments for Additional Magistrates appointed on account of the famine; in Bengal the excess was distributed over salaries (9), establishment (21), allowances (9) and supplies and services and contingencies (8); in the Punjab the excess was chiefly under supplies and services (35) mainly in diet and road money to witnesses, there were also excesses of 9 under establishment, and 15 under allowances, counterbalanced to the extent of 18 by savings under salaries and Exchange Compensation Allowance; and the excess in Madras was chiefly under salaries, but partly on account of payment of batta to witnesses in connection with the Tinnevelly riot cases, and to payment of this charge to public servants from court contingencies, instead of departmentally, and also to charges due to plague. Under *Other Courts of Justice* the saving in Bombay was due to the absence of a Presidency Magistrate on long leave. Under *Other Charges* the excess in the North-Western Provinces was due to an increase in the number of candidates who appeared at the examination for Pleaderships. The charges under *Refunds* are of a fluctuating nature, the decrease in India was in refunds of lapsed estates in the hands of the Administrator General, Bengal, in Madras it occurred chiefly in Magisterial refunds, and in Bombay it was due to a falling-off in the receipts under Law and Justice.

132. The excess in England is due to the outfit allowance of a Judge not provided for in the Budget.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

19B.—Law and Justice—Jails—*continued.*

133. The expenditure in India was less than the Budget Estimate and the actuals of the previous year by 5,79 and 28 respectively. The saving occurred almost entirely under jail manufactures (4,54) and was due chiefly to smaller purchases of raw material consequent mainly on a falling-off in the demand for manufactured articles; in the Punjab the saving was enhanced by the provision (60) for a woollen factory at Montgomery not having been utilised and counterbalanced to the extent of 14 by an excess under contingencies. Under *Other Jail Charges* the saving in the Central Provinces both as compared with the Budget and the actuals of the previous year was due to a fall in jail population; in Burma the saving (1,40) was due to the non-completion of the Myaungmya Jail, and to a decrease in the jail population, which also explains the decrease as compared with the previous year, in the North-Western Provinces the decrease (1,35) was chiefly due to the low prices of food grains in the early part of the year, when purchases of grain were made for storage (83), but partly also to the savings in salaries (9), charges for moving prisoners (14), Warder's establishment (7) and extraordinary charges for live stock and Dairy expenses (8), and in Madras the decrease was chiefly in dietary charges. The excess in India and Bengal was chiefly in dietary charges and in the latter also partly due to an excess of 24 under clothing and bedding of prisoners, that in the Punjab and Bombay was chiefly due to the rise in the price of food grains and increase in jail population, the increase over the actuals of the previous year in the Punjab was partly due to the above causes, and partly to larger expenditure in connection with the Mung Rasul Jail established during December 1898. Under *Convict Charges at Port Blair, etc.*, the saving was chiefly due to smaller expenditure under Marine supplies (25), to less payment of passage money (28), and to less outlay on tools and implements (4), partly counterbalanced by excesses under Commissariat Supplies (25) owing to the high price of provisions, and under Medical and Forest Supplies (5). The excesses of 92 in Bombay and of 13 in Bengal have been sanctioned by the respective Local Governments.

134. The Indian expenditure was less than the Budget Estimate by 2,67, but exceeded the actuals of the previous year by 9,68. The saving, as compared with the Budget, occurred chiefly under *District Executive Force* (1,10) and *Village Police* (70); the former was mainly contributed by Burma (95), Bengal (1,04) and the North-Western Provinces (1,33). In the first of these Provinces it was chiefly due to the delay in the separation of the Rangoon City Police from the District Police, and to the adjustment by deduction from expenditure of the recovery of 21 from the Port Trust towards the cost of the City Police, estimated for as a receipt, and to the provision of 16 for the re-grading of the District Superintendents not having been used; in Bengal the saving was principally in salaries (31), supplies and services and contingencies (11), and pay of the Police Force (62), and in the North-Western Provinces it was chiefly due to the absence of officers on furlough (41) and to the delay in the introduction of the full scale under the reform scheme (1,25). These savings were partly counterbalanced by excesses, chiefly in the Punjab (1,54) and Bombay (92), in the former it was mainly due to payment of grain compensation (40), charges for petty construction and repairs transferred from the Public Works Department (33), and to excesses under pay of the Police Force (19), travelling allowance (16), carriage of constabulary, etc. (29), and Punitive Police (17), chiefly due to increase of police work in connection with the plague. In Bombay the excess was chiefly due to payment of grain compensation. The saving under *Village Police* occurred almost entirely in the North-Western Provinces, and was mainly due to the slow progress made in carrying out reforms in the Rural Police system. The excess, as compared with the actuals of the previous year, also occurred chiefly under *District Executive Police* (8,68) and *Village Police* (1,03), the latter entirely in the North-Western Provinces, due to the introduction of reforms in the Rural Police system. The forme occurred chiefly in Burma (1,41), the North-Western Provinces (1,96), the Punjab (1,68), Madras (1,54) and Bombay (1,62); in Burma the increase was chiefly due to separation of the Rangoon City Police from the District Police Force, and to the amalgamation of the Mandalay Municipal Police with the District Police; in the North-Western Provinces the increase was due to the further introduction of reforms in the Police Force; in the Punjab it was due to larger expenditure in connection with plague and famine; in Madras the excess was due chiefly to expenditure in connection with the riots in Tinnevelly, and the re-organization of the Government Railway Police; and in Bombay the increase was chiefly due to indirect charges in connection with the famine.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

20.—Police—*concluded.*

135. Under *Presidency Police* the saving in Bengal (24) is due to the provision for additional Police for Calcutta not having been fully utilised (33), partly counterbalanced by an excess due mainly to the grant of privilege leave; the decrease in Bombay was due to savings under Sanitary Police (12), under travelling allowances (8), and under charges connected with the plague (4), partly counterbalanced by excesses on account of grain compensation and private watchmen and ramoshis (12). The increase over the actuals of the previous year was due chiefly to the payment of grain compensation and to an increase in the establishment charges under Sanitary Police. The saving under *Superintendence* occurred under salaries due chiefly to leave and deputation vacancies. Under *District Executive Force* the principal causes of the variations have been explained above. The saving in the North-Western Provinces was partly counterbalanced by an excess under supplies and services chiefly under clothing (13), Police escorts (13), and rewards for meritorious services (10). There were also small savings in Assam (52) and Madras (23), and excesses in India (27), and the Central Provinces (24). In Assam the saving was chiefly due to the postponement of the re-organization of the Civil Police for which a provision of 55 was made, and in Madras it occurred mainly under salaries, supplies and services (clothing) and contingencies, and would have been greater but for the charges due to the Punitive Police in Tinnevelly, and in connection with the plague. The excess in India was chiefly under salaries (7) owing to privilege leave arrangements and to the creation of a new appointment in Indore in connection with the Central India Agency Police re-organization scheme under Police Force (8) due to precautionary measures against plague in Coorg and Bangalore, under Allowances (12) chiefly on account of grain compensation, and that in the Central Provinces was mainly due to the payment of grain compensation and to the entertainment of extra police in districts affected by famine for escorting treasure, etc., to relief camps. Under *Municipal and Cantonment Police* the decrease in Burma (50), as compared with the previous year, was due to the amalgamation of the Mandalay Municipal Police with the District Force as stated above. Under *Government Railway Police* the excess in the Central Provinces was due to the payment of grain compensation, that in the North-Western Provinces (25) was due to extra police entertained for plague preventive measures, that in the Punjab (36) was mainly due to the adjustment of 33 on account of rent of Railway quarters occupied by the North-Western Railway Police under orders of the Local Government, which also chiefly accounts for the excess over the previous year, and that in Madras (8) chiefly to the re-organization of the Force. The absence of expenditure in Burma was due to the recoveries from the Burma Railways on account of cost of Police escorts supplied exceeding the Government share of the cost of the Railway Police. The net credit has been shown under XVII.—Police. The saving in Bombay (19) was chiefly due to the non-payment during the year of the charges on the Great Indian Peninsula and Bombay, Baroda and Central India Railways for the last quarter. The saving under *Village Police* in the North-Western Provinces has been explained above. The excess in Bombay (35) was chiefly due to allowances to Heads of Village Police and watchmen being partly paid in advance of the usual dates, and to high adjustment on account of assessment of alienated lands. Under *Special Police* the saving in Burma (47) was due to the non-employment of the full complement of commandants and assistant commandants, and to the force having been below the sanctioned strength, to the employment of qualified sepoys in place of salaried Interpreters, to less expenditure on feed of baggage animals, and to smaller adjustments than anticipated for arms and accoutrements, partly counterbalanced by excess expenditure on clothing, purchase of ponies and transport of men and baggage. The decrease, as compared with the previous year, was due to a further reduction in the strength of the Military Police. The saving in Assam (46) was due chiefly to smaller payments of compensation for dearness of provisions owing to cheapness of food grains, partly counterbalanced by excesses due to purchase of arms for the Naga Hills Military Police Battalion (20), to larger outlay on clothing (8), to large issues of free rations (9), and to expenditure on the Mishmi expedition undertaken towards the close of the year (6). The decrease in Bengal, as compared with the previous year, was chiefly due to the transfer of the South Lushai Hills Police to Assam. The excess in the Punjab, both as compared with the Budget and the actuals of the previous year, was due to the revision of the Border Military Police; while in Bombay charges for grain compensation not provided for in the Estimate and increased travelling allowances account for the excess over the Budget and the actuals of the previous year. The saving under *Cattle Pounds* occurred chiefly in Madras (24) due to over-estimate, and in Bombay (16) where the charges were low in consequence of the famine. Under *Other charges* the excess in India (19) was due to special refunds under the orders of Government, of recoveries from the Mysore Durbar in previous years on account of the Bangalore Police. In Burma the increase (15) was due to large payments of fees to Inspectors of steam-boilers and to special refunds. In the North-Western Provinces the provision of 50 for extra police in connection with plague preventive measures was utilised to meet the extra expenditure under *Government Railway Police* in connection with the plague. In the Punjab the excess was due to an under-estimate, and that in Bombay to the repayment of the excess contributions recovered in previous years from the Aden Port Trust.

136. The expenditure in England on passages to India of Assistant Superintendents on appointment fell short of the estimate.

Savings under Exchange Compensation Allowance.

137. The Indian expenditure showed a saving of 4,23 as compared with the Budget Estimate, and of 2,72 as compared with the actuals of the previous year. The saving, as compared with the Budget, occurred chiefly under *Marine Stores and Coal for Building and Repair of Ships* (2,13) and *Other Charges* (1,16), the former was mainly due to large recoveries in connection with the fitting of transports for South Africa (4,08), partly counterbalanced by increased expenditure on account of purchase of stores and timber for fitting up transports for South Africa (1,77), and to large purchases of coal (63), and in Bengal (22) to less outlay than anticipated on building and repairs of Ships. Under *Other Charges* the saving in India was mainly due to smaller issues of coal to Her Majesty's ships of war in Indian Seas (39), to less expenditure than anticipated on repairs of Royal Indian Marine vessels and ships at outstations (14) and under miscellaneous. In Burma it was due chiefly to less expenditure on construction of launches, and on subsidies to the steam-boat companies, owing to the Kyaukphyu, Myebôn, and An service not having been taken up till November 1899, to the partial use of the provision for the clearance of the Irrawaddy-Chindwin river, and to that for the supply of water to the Mandalay workshop not having

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

21.—Marine—*continued.*

been required. The saving, as compared with the previous year, occurred chiefly under *Marine Stores and Coal for Building and Repairs of Ships*, and was due to the causes mentioned above.

138 Under *General Supervision and Accounts* the saving occurred chiefly in establishment and telegram charges. Under *Marine Survey Establishment* the saving in India (6) was chiefly due to the appointment of Surgeon and Naturalist having been vacant for a portion of the year; and that in Burma (5) was due to the higher rate of pay provided for the Assistant Port Officer, Rangoon, not having been sanctioned. Under *Dockyards* the saving was due to large recoveries, chiefly on account of work done in connection with the fitting of transports for South Africa in the Kidderpore (42), and Bombay (3,15), Dockyards which, however, was nearly covered by the increased expenditure on account of the work. Under *Salaries and Allowances and Victualling of Officers and men afloat* the saving in India (27) was due chiefly to low expenditure on purchase of provisions by vessels trooping outside of Indian waters (23), and to the deputation of certain officers as Marine Transport Officers, South Africa (7), partly counterbalanced by the grant of grain compensation allowance (2). The absence of expenditure in Bombay under *Pilotage, Pilot Establishment and Vessels* was due to the conversion of the Sea Pilotage Fund, Karachi, into an Excluded Local Fund.

139. The excess in England of £101,5 or R15,22 was chiefly due to the payment on account of the Indian Troop Ship *Hardinge* (£113,1 or R16,96), partly counterbalanced by a saving of £12,1 or R1,81 owing to no payment having been made for alterations to Indian Government Defence Vessels.

Savings under Exchange Compensation Allowance.		1	2	2	...	7	4	2	6	7	31

140. The expenditure in India showed a saving of 4,68 as compared with the Budget Estimate and an excess of 3,07 as compared with the actuals of the previous year. All the Provinces except Madras contributed to the saving, but chiefly Bengal (1,51), and the North-Western Provinces (1,15) The excess of 16 in Madras has been sanctioned by the Local Government.

141. The variations under *Direction* and *Inspection* occurred chiefly under salaries; in the Punjab two additional Assistant Inspectorships provided for were not filled till September. Under *Government Colleges* the saving in Bengal (88) was due partly to an under-estimate of probable savings under Art Colleges (60), and partly to savings under Civil Engineering College (30), distributed over several heads. The saving in the North-Western Provinces (19) was chiefly due to a delay in obtaining machinery from England (13), and to savings in the Thomason Civil Engineering College under salaries (4), establishment (8), and travelling allowance (4), counterbalanced to the extent of 10 by expenditure on a newly established Training College for teachers. The saving in Bombay (50) was mainly under salaries. These savings were partly counterbalanced by an excess of 22 in Madras due to an under-estimate under salaries. Under *Government Schools* the saving in the Central Provinces (32) occurred chiefly under training schools and petty construction and repairs; that in Bengal (31) was chiefly due to the lump provision of 20 not having been utilised. The increase over the actuals of the previous year was chiefly in the charges of the Kurseong Boarding School. The saving in the North-Western Provinces was chiefly in salaries and establishment and under Training Schools due to the transfer of a part of the establishment to the recently opened Training College, partly counterbalanced by an excess under supplies and services. In the Punjab the decrease occurred in Provincial expenditure under Secondary Schools (3), and Special Schools (6), and in Local expenditure (5), owing to over-estimate. In Madras the saving was mainly due to over-estimate in the Local section; and in Bombay the saving in the Provincial section (17) was due chiefly to leave arrangements, to smaller payments in support of Municipal Schools, and to the grant for work-shop establishment and contingencies under Special Schools not having been fully utilised, and that in the Local section (25), to over-estimates by Local Boards. These savings were partly counterbalanced by an excess of 59 in Burma due to the transfer to this head of 67 on account of contributions to schools in the Rangoon Municipality, provided for under *Grants-in-aid and Payments by results*. This transfer also accounts for more than half of the saving of 120 in Burma under the last-named head; the balance was due to over-estimate. The saving in the Central Provinces (12), and Assam (9), occurred chiefly in the Local section due to over-estimates. The excess in Bengal (12), was due to too large a deduction for probable savings. In the North-Western Provinces there was an excess of 14 in the Local section due to newly sanctioned grants to indigenous schools, which was nearly covered by a saving of 13 under Provincial in the outlay on buildings. In Madras the excess occurred wholly in the Provincial section under building grants, and payments by results; and that in Bombay (53) was due to large payments of grants-in-aid for building (85), partly counterbalanced by savings in grants to indigenous Local Schools (4), payments by results (8), grants for the education of Ex Amirs in Sind (8), and the non-payment of the contribution (14) to the Endowment fund of the Sind Madrassa. Under *Scholarships* the saving was contributed by all the Provinces except Madras. In the Central Provinces and Bengal the estimates were pitched too high. In the North-Western Provinces the saving occurred in the Provincial section, and in the Punjab it was almost equally divided between Provincial and Local, and was due to over-estimates. The excess in Madras was due to an increase in the number of scholarships awarded. Under *Other Charges* the saving occurred chiefly in Burma (6), Bengal (23), and Madras (24); in Burma it was due to an over-estimate, and in the other two Provinces to the provision for students' hostels not having been fully used. There was an excess of 32 in Bombay owing to extra charges on account of purchase and publication of books by the Government Central Book Depôt. The lump provision of 75 in the North-Western Provinces was mainly used in grants to indigenous schools in meeting increased expenditure in primary schools, and the expenditure in connection with the newly established Tr[illegible] College, and in strengthening the local inspecting staff.

142. The Indian expenditure was less than the Budget Estimate by 1,44, but exceeded the actuals of the previous year by 11 The fluctuations under this head are due mainly to variations in the number of Senior and Junior Chaplains on duty or on leave. The excesses in Assam (2), and the Punjab (2), require to be sanctioned.

143. The saving in England was due to only five chaplains having been provided with passages while eight were estimated for.

144. The Indian expenditure showed a saving of 27,87 as compared with the Budget Estimate, and of 20,18 as compared with the actuals of the previous year. The savings occurred chiefly under *Grants for Medical Purposes* and were due to smaller expenditure in connection with the plague chiefly in India and Madras where the large provisions made for this purpose were not required; the charges in Bengal, the North-Western Provinces, and the Punjab, however, were considerably in excess of the provision. The saving, as compared with the Budget, was enhanced by savings under *Medical Establishment* (2,50), *Government Hospitals and Dispensaries* (1,59), and *Vaccine Establishment*, etc., (3,38). As compared with the previous year, the saving was due to less expenditure in connection with the plague, chiefly in Bombay.

145. The saving under *Medical Establishment* was contributed to by all the Provinces except India, and was due chiefly to the deputation of officers on plague and famine duty, and to absences on leave out of India. In Burma the saving was enhanced by the appointment of the Deputy Inspector-General of Civil Hospitals not having been made till October, and to its having been replaced at the close of the year by that of an Inspector-General of Jails, which was charged to 19B—Law and Justice—Jails. In Bengal the saving was counterbalanced by an excess to the extent of 16 due to the amalgamation of the office of the Sanitary Commissioner with that of the Inspector-General of Civil Hospitals. In Madras the chief saving was due to the provision of 43 on account of plague establishment not having been utilised, while the saving under salaries was reduced by 9 owing to the provision for Reserve Medical Subordinates having proved

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

24.—Medical—*concluded.*

insufficient. Under *Government Hospitals and Dispensaries* the saving in the Central Provinces (14) was chiefly due to the deputation of officers on plague and famine duty. In Burma (28) it was due to the number of Hospital Assistants having been below the sanctioned strength, and to the provision for new hospitals not having been fully utilised, partly counterbalanced by increased contributions to Local hospitals and dispensaries. In Bengal the saving (88) occurred chiefly in salaries and supplies and services under Medical College Hospital (14), General Hospital (22,) Campbell Hospital (18) and mofussil hospitals and dispensaries (7), and in smaller grants to Local Hospitals and Dispensaries (25). That in the North-Western Provinces (35) was chiefly under salaries (22) and establishment (8) of local hospitals and dispensaries, due in some measure to the demand for Assistant Surgeons and Hospital Assistants for plague duty. In the Punjab the decrease (22) was mainly in grants to local hospitals and dispensaries, and that in Madras (83) was due partly (18) to low expenditure on diet and medicines in Presidency hospitals, and partly (64) under local hospitals chiefly in supplies and services. These savings were partly counterbalanced by an excess of 33 in India due chiefly to the transfer of the Bowring Hospital at Bangalore to Government from the Municipality, and of 76 in Bombay due chiefly to an increase in the dieting charges of the European General Hospital, Bombay, to heavy charges for medicines and instruments for famine relief hospitals, and to a special grant of 10 by the Karachi Local Board for the improvement of the nursing staff of the Civil Hospital, Karachi. Under *Vaccine Establishments and Sanitary Commissioner* the saving in the Central Provinces (42) was due chiefly to less expenditure on village sanitation owing to local contributions not being fully realised. That in Burma (7) occurred in local expenditure on establishment including allowances to municipal vaccinators. In Bengal the saving (38) was due to the amalgamation of the office of the Sanitary Commissioner with that of the Inspector-General of Civil Hospitals as stated above, and the transfer of the Sanitary Board's charges to the Public Works Department. In the North-Western Provinces (60) it was chiefly due to the transfer to the Public Works Department of the charges on account of the Sanitary Engineer and his establishment (27), to the grant (4) for the Bovine Lymph Depôt not having been used, to the absence of the Sanitary Commissioner on furlough (9), and to less expenditure on Village Sanitary improvements (19). In the Punjab (14) it was due to the absence on leave of the Sanitary Commissioner and to over-estimates by District Boards; and the savings in Madras (1,20), and Bombay (55) were due chiefly to the transfer of charges on account of the Sanitary Engineer and his establishment to the Public Works Department, and to absences on leave. In Madras the saving was enhanced by an over-estimate in the local section; while in Bombay it was reduced by 5 owing to the Local Boards' contributions to Sanitary Boards having been made on a higher scale than provided for. Under *Medical Schools and Colleges* the saving in Bengal (16) was due partly to absence of officers on leave, and partly to less expenditure under supplies and services. The excess in Madras (16) was chiefly due to additional honoraria for lectures on chemical and practical physiology and on mental diseases, and to large purchases of instruments and chemicals. Under *Lunatic Asylums* the saving in Burma (12) was due to the provision for increase of establishment and larger outlay on diet not having been required. That in Bengal (11) occurred under contingencies. In the North-Western Provinces (7) it occurred chiefly under diet (4) and purchase and feed of cattle for the dairy farm attached to the Bareilly Lunatic Asylum (2); and in Madras (8) it was wholly under diet.

146. The excess in England, £1,4 or R21 was chiefly due to larger payments on account of pay, passage, etc., of medical officers and Lady nurses in connection with the plague.

Savings under Exchange Compensation Allowance		11	...	2	1	...	...	2	...	3	19

147. The Indian expenditure exceeded the Budget Estimate by 6,65, and the actuals of the previous year by 18,07. The excess, as compared with the Budget, was almost entirely in India (8,82) and occurred almost wholly under *Political Subsidies*, due to large arrear payments to the Amir of Afghanistan (9,62), slightly reduced by the Muscat Subsidy (50) having been held in abeyance. This excess was partly counterbalanced by savings chiefly in Burma (91) and the Punjab (76). The former, which occurred mainly under *Other Charges*, was due chiefly to the provision for the exploration of the country north of N'Maikha not having been required, and that for miscellaneous political expenditure having been only partially used, and the latter which occurred under *Charges on the North-West Frontier*, was, chiefly due to the provision for the reconstitution of the Khyber Rifles not having been fully utilized. The excess, as compared with the previous year, was chiefly in India (16,26) and the Punjab (2,03). The former occurred under *Political Subsidies*, and was due chiefly to the causes stated above; and that in the Punjab, chiefly under *Charges on the North-West Frontier* due to large payments under allowances to Khyber Tribes (80), Chitral Frontier charges (43) and charges of the Khyber Rifles (55).

148. Under *Political Agents* the saving in India (65) was chiefly due to the contributions (44) from the Bharatpur, Dholepur, and Karauli States towards the cost of the Eastern States Agency in Rajputana, hitherto credited under XI—Tributes, having been adjusted by deduction under this head, but partly also to savings under Supplies and Services and Contingencies. The variations in the other Provinces occurred

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

25.—Political—*concluded.*

chiefly under salaries. In Burma the saving was enhanced by the provision of 8 for a moiety of the salary and allowances of the British Consul at Momein in Western Yunnan, and of 10 for an Assistant Commissioner for the Chin Hills Agency not having been required. In Assam the saving was mainly due to small payments for hire of boats and bullocks in the Lushai Agency, and in Bombay it was partly counterbalanced by extra expenditure on account of famine. Under *Charges on the North-Western Frontier* the saving occurred almost entirely in the Punjab (2,01), and was due chiefly, as stated above, to the provision for the reconstitution of the Khyber Rifles having been only partially used (1,52), to smaller charges under guarding hill passes (63), and to charges on account of entertainments and presents to Khans (14) provided for under this head, having been transferred to the fourth and fifth heads, partly counterbalanced by larger payments to Chitral Levies (18), and by an additional allowance to the Nawab of Dir (5), sanctioned by the Government of India. The excess, as compared with the previous year, has been explained above. Under *Entertainment of Envoys and Chiefs* the excess in India (86) was chiefly due to the visits of His Highness the Nizam and certain frontier Chiefs, for which an additional grant of 68 was sanctioned by the Government of India in Financial Department No. 632A., dated 6th February 1900, and the excess in the Punjab was due to the transfer referred to above. Under *Durbar Presents and Allowances to Vakeels* the estimates were pitched too high. The excess in the Punjab was due to the transfer mentioned above. Under *Refugees and State Prisoners* the saving in Bombay (9) was due to the lower rate of pay drawn by the Police officer with the Ex-king Theebaw, to lapses of allowances to Afghan refugees, and to the increased allowance granted to the Ex-king Theebaw not having been drawn. Under *Other Charges* the large saving in Burma (63) has been explained above. That in India (21) occurred chiefly in the charges for organizing Imperial Service Troops and was due to the absence of officers on furlough and deputation to South Africa. These savings were partly counterbalanced by an excess of 74 in the Punjab, due chiefly to additional expenditure in connection with the revision of the Kurram Militia sanctioned by the Government of India in December 1899 (31) and on account of compensation for losses sustained by the people in the Peshawar and Kohat Districts in connection with the Tirah Expedition (33), and 8 in telegram charges: The decrease of 47, as compared with the previous year, was due to the high charges of that year on account of the frontier disturbances.

Savings under Exchange Compensation Allowance. 14 17

149. The Indian expenditure showed a saving of 3,73 as compared with the Budget Estimate, and an excess of 59 as compared with the actuals of the previous year. The saving as compared with the Budget occurred chiefly under *Survey of India* (2,63), *Other Scientific Departments* (81) and *Veterinary and Stallion Charges* (51). The excess over the actuals of the previous year occurred chiefly under *Other Charges* (97) and *Miscellaneous* (55). Of the saving under *Survey of India* 3,37 was in the charges of Survey Parties, this was reduced by 46 in consequence of smaller recoveries from other Governments, and by 33 in the charges under Controlling and Administrative staff owing to the employment of higher paid officers at head-quarters. As compared with the previous year there was a decrease of 2,55 in the charges of Survey Parties, which however was partly counterbalanced by smaller recoveries from other Governments (44) and by higher charges under Head-Quarters offices (25).

150. Under *Geological and Other Surveys* there was an excess of 15 under Geological Survey chiefly in salaries and establishment, due to too large a deduction having been made for probable savings, which was more than covered by a saving of 16 under Archæological Department due to the provisions for the publication of Dr. Burgess' Reports (10), and for Archæological explorations in Turkistan (5), not having been used. There was also an excess of 6 in the travelling allowances of Geologists, which however was covered by savings under Supplies and Services, chiefly in the grants for special work in Europe. The excess over the actuals of the previous year occurred chiefly under Geological Survey in salaries, travelling allowances and Supplies and Services. The saving under *Other Scientific Departments* occurred chiefly in Madras (27) and Bombay (47), and was due wholly in the former, and partly (4) in the latter to the transfer of the charges connected with public observatories to the Imperial Meteorological Department from the 1st April 1899. The remaining 33 in Bombay was due to the non-payment of the grant to the Reay Industrial Museum, Poona There was also a saving of 7 in Bengal due to the donation to the Agri-Horticultural Society having been transferred to the head *Other Charges*. These savings were partly counterbalanced by an excess of 6 in India due chiefly to donations to Scientific Societies (1) and to charges on account of the Imperial Institute (4) which were met from the grant for experimental cultivation included under *Other Charges*. Under *Veterinary and Stallion charges* the saving occurred chiefly under salary and travelling allowance charges. In Burma it was due to the number of Veterinary Assistants being below the sanctioned scale. In the North-Western Provinces the saving was chiefly due to less expenditure on feed and keep of stallions. In the Punjab it was due to absence on leave, and in Madras partly to short expenditure on account of pony and mule breeding operations. In Bombay the grants for maintenance and stabling of stallions, and for purchase of stallions were not fully utilized. There was an excess in India (24) due chiefly to larger expenditure on purchase of stallions (22) and feed and keep (20), partly counterbalanced by savings under establishment (4), an

Section D.--SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*concluded.*

26.—Scientific and other Minor Departments—*continued.*

prizes at Horse fairs (6), and to certain appointments having been held by junior officers (7). Under *Other Charges* the saving in Burma (10) was chiefly due to the grant of 4 for Public Exhibitions and Fairs not having been utilized, and to less expenditure on experimental farms than was anticipated (6). The excess over the previous year was in the charges on account of experimental farms. In Bengal (24) it was due to smaller purchases of cinchona bark and Europe stores (14), and to an over-estimate in the Local section on account of Public Exhibitions and Fairs (16), partly counterbalanced by the transfer of certain charges from the head *Other Scientific Departments* as mentioned above. In the North-Western Provinces (10) it was chiefly due to less expenditure on Public Exhibitions and Fairs, though the expenditure on this account was higher than in the previous year; and in Bombay (7) chiefly to less expenditure for Horse Shows. The excess in India (10) was chiefly due to charges connected with the Paris Exhibition (36), partly counterbalanced by a saving of 27 under experimental cultivation owing to the appointment of the Agricultural Chemist having been vacant throughout the year. In the Punjab (9) it was chiefly due to an under-estimate in the Local Section for station gardens (5), and to expenditure on the new conservatory for the Agri-Horticultural Garden, Lahore, sanctioned by the Punjab Government in February 1900 (9), partly counterbalanced by a saving of 4 in the charges for the Bruceabad Farm. In Madras (32) it was chiefly due to the high price of cinchona bark, and increased outlay on manufacture and distribution of quinine (27), and to the grant to the Planters' Association of Southern India for the exhibition of coffee at the Paris Exhibition (5). Under *Labour and Emigration* the saving in Assam (5) was chiefly due to the favourable result of the transactions of the Inland Labour Transport Fund, but there was also a saving of (4) under fees for inspecting Tea Gardens which was covered by an excess of 4 on account of the new appointment of a Travelling Inspector of Immigrants. In Bengal (9) it was chiefly due to the appointment of Inspector of Factories having remained vacant for six months, and to the medical charges of the Inland Labour Transport Fund having been adjusted under 24—Medical, and in Bombay (5) it arose from smaller payments on account of medical fees to the Inspector of Factories. Under *Miscellaneous* the saving in India (11) was chiefly in the provision for the Linguistic Survey, due to Mr. Grierson's absence on furlough. The increase in Madras as compared with the previous year was due to larger outlay on the manufacture of aluminium ware. The excess in India under *Meteorological Department* was chiefly due to the re-organization of the Department and the transfer to the India books of the observatories at Madras, Kodaikanal and Colaba (21), to the entertainment of temporary establishments (6) and to larger expenditure on travelling and contingencies, chiefly telegram charges (16). Under *Statistics* the excess in India (20) was due to expenditure in connection with the Census Commissioner's Office; while in the North-Western Provinces (20) it was due to Traffic Registration charges transferred from 3—Land Revenue, and was covered by a re-appropriation sanctioned by the Local Government. The saving in Madras (7) was due to the transfer to the India books of charges incurred by the Meteorological Department for registration of rain gauges, and to 3—Land Revenue of those incurred on that account by collectors In Burma the high expenditure of the previous year was in connection with the compilation of the Upper Burma Gazetteer.

151. The excess in England £1,9 or R29 was due to an increase in the demand for stores (£1 3 or R20) and in the purchase of stallions (£6 or R9).

Section E.—MISCELLANEOUS.

679,3	TOTAL .	522,2	545,3	557,8

*Includes R4,29 or £28,6 on account of XXIV gain by Exchange.

152. The receipts in this section exceeded the Budget Estimate by £35,6 or R5,34, but fell below the actuals of the preceding year by £121,5 or R18,22. The improvement, as compared with the Budget, occurred chiefly under Miscellaneous (£35,3 or R5,30), due mainly to recoveries of famine expenditure and to special lapses of Suitors' Fund Deposits. There was also a small increase (£4,6 or R68) under Stationery and Printing. These improvements were partly counterbalanced by a decrease of £4,3 or R64 under Receipts in aid of Superannuation, Retired and Compassionate Allowances. Of the decrease, as compared with the actuals of the preceding year, £90,6 or R13,59 occurred under Miscellaneous, due to smaller recoveries of famine expenditure, and £28,6 or R4,29 under Exchange, owing to there being a loss instead of gain in the year under report.

Section E.—MISCELLANEOUS—*continued.*

XXII.—Receipts in aid of Superannuation, Retired, and Compassionate Allowances—*continued.*

153. The receipts in India under this head fell short of the Budget Estimate by 58, and of the actuals of the preceding year by 17. The falling off under *Subscriptions to the Civil Funds* was due to the retirement of old subscribers, the Funds being closed to new entrants. In the North-Western Provinces it was due partly to this cause and partly to the absence of officers on leave out of India. Under *Contributions for Pensions and Gratuities* the decrease in India was due to an over-estimate of Berar receipts, and in Bombay, to the reversion of officers to British service. Under *Subscriptions to the Military, etc., Funds* the increase in India was due to an under-estimate, and in Bengal, to less expenditure on construction and repairs of buildings in the Orphangunge Bazar at Kidderpur.

154. In England the decrease was due to a falling off in the receipts on account of the Military Funds, partly counterbalanced by an increase in the Subscriptions towards the Indian Civil Service Family Pensions.

155. The variations under this head were small. The increase under *Receipts from Sale of Stationery* was due to larger supplies of stationery to State Railways, while the decrease under *Sales of Gazettes and other Publications* in Bombay arose from the discontinuance of the publication and sale of High Court Judgments from the 1st January 1899.

156. The Indian revenue under this head exceeded the Budget Estimate by 5,41, but was less than the actuals of the preceding year by 10,50. The excess over the Budget was spread over all the heads except *Government Audit Fees*. The principal increase occurred under *Other Items* (2,83), and *Unclaimed Deposits* (1,58), the former occurring chiefly in Burma, due mainly to the adjustment of the balance of the cost of construction of the Meiktila-Myingyan Railway, which was undertaken by the Public Works Department as a famine relief work, and in Madras, due partly to the inclusion of the sale-proceeds of cloth manufactured at Government expense during the late famine, and partly to larger receipts from the sale of avenue clippings and from the Pearl Fisheries. The increase under *Unclaimed Deposits* was the result of large special lapses of Suitors' Fund Deposits in India.

157. Under *Contributions* the increase of 49 was mainly in Bengal, due chiefly to the receipt of 32 from the Howrah-Amta Tramway Company, for which provision was made under XXXII—Civil Works—Local. The high receipts in the previous year in Bengal were due to recoveries from municipalities on account of plague charges. Under *Premium on Bills* the increase of 28 in Bombay was due to a large demand for local bills, while in the Punjab there was a decrease in the demand for supply bills due to the famine. The improvement under *Rents* was chiefly due to sufficient allowance not having been made in Burma (33) for the steady advance of the revenue, and in the North-Western Provinces (11) to an under-estimate of receipts from nazul lands, partly counterbalanced by an over-estimate in Madras (15) chiefly under choultry rents. The improvement under *Extraordinary Items* occurred chiefly in the Punjab (12), due to larger receipts in connection with the administration of the Tochi valley. The high receipt in the previous year was due to fines realized from frontier tribes. The decrease of 15 under *Government Audit Fees* was due to over-estimates in India, Bengal and in the North-Western Provinces. The difference between the actuals of the two years was due to large recoveries of famine expenditure, in Burma and Madras, in the preceding year.

Section E.—MISCELLANEOUS.

1898-99. Accounts.	EXPENDITURE—	Budget.	1899-1900. Revised.	Accounts.

3,844,4	TOTAL .	4,072,4	4,051,9	4,052,5

158. The total expenditure in England and India was less than the Budget Estimate by £19,9 or ₹2,99, but exceeded the actuals of the preceding year by £208,1 or ₹31,21. Apart from Exchange to which the saving is chiefly due, the expenditure exceeded the Budget by £39,5 or ₹5,92, and the actuals of the preceding year by £57,8 or ₹8,68. Under Civil Furlough and Absentee Allowances the charges exceeded the Budget by £57,0 or ₹8,55 almost entirely in England; under Stationery and Printing there were excesses of ₹3,26 or £21,8 in India, due chiefly to large purchases of stationery for certain Railways and Government Presses, and of £10,4 or ₹1,56 in England; under Miscellaneous there was an excess in India (₹2,29 or £15,2) due chiefly to the remission of advances to cultivators, and in England £9,- or ₹1,35) due to charges on account of the Plague Commission and to refunds of fines and penalties.

159. The Indian expenditure was less than the Budget Estimate by 1,20, and than the actuals of the preceding year by 1,54. The saving was contributed to by every Province except India and the Punjab, and was due generally to lapses. In Madras (41), however, the decrease was, chiefly, due to pensions not having been drawn on due dates; in Bengal (32), partly to certain pensions of the Nizamut family having remained undrawn; and in Bombay (29) to the non-payment of the pension of the Angria family, owing to the question of succession not having been settled. The increase in the Punjab (18), was due to the payment of a new pension sanctioned for Tika Gagan Singh, and, together with the excess of 2 in India, requires to be sanctioned.

Section E.—MISCELLANEOUS—*continued.*

28.—Civil Furlough and Absentee Allowances.

1898-99. Accounts		Budget.	1899-1900. Revised.	Account
6	India	3	5	6
1	Bengal	1	1	...
1	Punjab	...	...	...
7	Madras	1	...	...
1	Bombay	2	4	4
16	TOTAL IN RUPEES	7	10	10
1,1	Equivalent in Sterling	5	7	6
259,0	England	226,0	284,5	282,0
260,1	TOTAL, INCLUDING ENGLAND .	226,5	285,2	283,5

160. The charges incurred in India depend on the number and grade of officers lent to foreign service, who happen to be on leave. The excess of 3 in India was due to the leave allowance of an officer of the Berar Commission acting as Minister of the Jaora State. In England the excess was due to the exceptionally large number of officers on furlough. The excesses of 3 in India and 2 in Bombay require to be sanctioned.

	Provincial	...	...	...	...	...	...	...	16	...	16

161. The Indian expenditure exceeded the Budget Grant by 1, 54. The excess for the most part occurred under *Superannuation and Retired Allowances*, and was due to sufficient allowance not having been made in the Estimate for the normal growth of expenditure, in most of the Provinces and in Bombay, partly also to arrear payments. The saving in Burma, Assam, Bengal and the North-Western Provinces was partly due to over-estimate and partly to lapses having been larger than was anticipated.

The following statement shows this growth during the last six years :—

	R
1894-95	89,91
1895-96	92,51
1896-97	96,32
1897-98	99,83
1898-99	1,01,87
1899-1900	1,06,24

162. Under *Other Charges* the increase in Madras was due chiefly to large refunds of contributions for pensions and gratuities on behalf of local fund servants in the Godavari district, while that in Bombay was due to a refund of contribution recovered from officers of the City Improvement Trust. Under *Compassionate Allowances* the savings in Bengal, the North-Western Provinces and Madras were due to over-estimates, and the excess in Bombay was due to extraordinary pensions and gratuities sanctioned in connection with the plague. The saving under *Pensions of the Military Fund* in the North-Western Provinces was due to an over-estimate.

163. In England the savings were due to a decrease in Civil Service Annuities and Civil and Military Funds, and to payments on account of Indian Civil Service Family Pensions not having increased so much as was expected, partly counterbalanced by an increase in the pensions of officers of the Uncovenanted Service.

164. The Indian expenditure under this head exceeded the Budget grant and the actuals of the preceding year by 3,26 and 3,74, respectively. The excess occurred, chiefly, under *Purchase of Stationery* in Bengal (2,91) and Bombay (85), in the former case it was due to supplies of stationery to the Oudh and Rohilkhand Railway, the Eastern Bengal State Railway and the East Coast Railway, and to an increased demand from Government Presses in Bengal, the North-Western Provinces, the Central Provinces and Burma; and in the latter, to large purchases, especially of typewriters, drawing materials and articles for anthropometrical purposes. The excess in Bengal was covered by the re-appropriation of 3,00 from the savings under 4—Opium sanctioned by the Government of India, in letter No. 877A., dated 16th February 1900, and that in Bombay by an additional grant sanctioned in Government of India, Finance and Commerce Department, No. 1480A, dated the 22nd March 1900. The excess, as compared with the previous year was also due to these larger purchases for Central Stores.

165. Under *Government Presses* there were small savings in the Central Provinces, Burma, the North-Western Provinces and Bombay, the most noticeable being that in Bombay (24), of which 21 occurred in the Provincial section, under the Government Central Press, due to the grant for compositors on piece-work and a lump provision of 30 for the printing of Abstracts of Proceedings for the Secretary of State having been only partially utilized. These savings were partly counterbalanced by excesses in the other Provinces, chiefly Bengal (13), where it was due to the entertainment, in the Presidency Jail Press, of piece-work establishment on a large scale and to overtime allowances. Under *Stationery supplied from Central Stores* the Budget was exceeded in all the Provinces except Bengal, where there was a saving of 23, due to the demands from the Jail Press for Printing forms not having been as large as was anticipated. The excess in Bombay (81) is attributed to a large consumption of stationery and other stores in the several departments of Government; it was covered by an additional grant of 1,00 sanctioned by the Local Government by re-appropriation from the grant for 45—Civil Works (Provincial). The excess in the North-Western Provinces (43) was due to increased demands from the Government Press and the Land Record Survey Department, and partly to an under-estimate; and in Madras (28), to

Section E.—MISCELLANEOUS—*continued.*

30.—Stationery and Printing—*continued.*

a very large supply of goose quills and special water-marked paper, and to the annual indents having been complied with in full during the year.

166. In England the increase was due to larger demands for stores than was anticipated and to an under-estimate, partly counterbalanced by a decrease in printing charges.

167. The system of adjusting sterling amounts at the rate of R15=£1 instead of at R10=£1 and of exhibiting the gain or loss arising out of the exchange on the net expenditure in England under the Revenue head "Exchange" instead of distributing it among the various heads of revenue and expenditure concerned, has for the first time been introduced in the accounts for 1899-1900. The Estimate for that year, which was compiled in the old form, has been recast in the new form for the sake of comparison with the accounts. The accounts of the year proved better by 19,82, the actual loss being 12,14 against 31,96 in the estimates. The results under this head vary according to the rise or fall in the average rate, and the increase or decrease o f the sterling transactions involved. The principal variations under the head are noted below :—

168. The rise in the average rate from 15·75*d.* in the Budget to 16·06766*d.* in the accounts contributed to an improvement of 49,05 (+10,19 against —38,86 in the Estimate) under Exchange on the net expenditure in England, while it adversely affected the recoveries on account of exchange on stores used on Revenue Account by 8,94. Exchange on Capital transactions of Guaranteed and Subsidised Railways proved worse by 7,15 and 2,37 respectively, and that on other Remittance transactions, including advances in England to Railway Companies working State Railways in India showed an excess debit of 11,07, of which 4,49 under East Indian Railway Advances was due to the adjustment at the official rate 1*s.* 4*d.* of a larger amount on account of debentures raised by the Company, while the average rate of the year was 16·06766*d.* to the rupee.

169. The actuals closely followed the Revised Estimate 1899-1900.

Section E—MISCELLANEOUS—*continued.*

32.—Miscellaneous—*continued.*

170. The Indian expenditure exceeded the Budget Estimate by 2,29 and the actuals of the previous year by 2,28. The excess as compared with the Budget occurred, chiefly, under *Irrecoverable Loans written off* in the North-Western Provinces (1,71), and was due to the remission under sanction of the Local Government, of advances to cultivators in the Allahabad Division; it was almost covered by reappropriation of grants sanctioned by the Local Government. The excess as compared with the previous year was partly due to these remissions in the North-Western Provinces, and partly to refunds, in Bengal, to municipalities of charges incurred by them on account of plague camps.

171. Under *Allowances and Rewards* the increase in Burma (25) was due to an unusually large number of officers having qualified for language rewards, and that in India (6), to the payment of arrear claims in Baluchistan. Under *Remittance Charges* the principal variations were excesses in Burma (16), the Punjab (12) and India (11), and a saving of 24 in Madras. The excess in Burma was due to an increase in the number of remittances, owing to treasuries having to work with low balances during a portion of the year, and to the withdrawal to Rangoon of all available surplus, of which a portion was remitted to Calcutta. That in the Punjab was due to exceptionally large remittances made to other Provinces; and that in India chiefly to heavy remittances from the Reserve Treasuries to Bombay and the Central Provinces; the excess in the last case was sanctioned in Government of India, Finance and Commerce Department, letter No. 1513A, dated the 27th March 1900. The saving in Madras was due to an over-estimate. Under *Charitable Donations* the saving in Bengal (15) was due to the grant of 10 for acquiring land for the Victoria Zenana Hospital not having been appropriated, and to smaller donations paid to the Calcutta Female Nurses' Institution. The excess in Bombay (9) was due to assistance rendered to refugees from the Transvaal, and to increased charges for burying paupers, and maintaining destitute persons. Under *Petty Establishments* nearly all the saving in Madras (23), and the whole of the excess in the Punjab (12) were in the Local section; in the former case under Choultries, Markets, etc., and in the latter, under the Copying Agency Account. The excess under *Special Commissions of Enquiry* in India (31) was due, chiefly, to charges on account of the Indian Plague Commission. The high expenditure in the previous year was due to the large number of commissions of enquiry. Under *Other Items* the increase in Bengal (97) was due to refunds to Municipalities of charges incurred by them, on account of plague camps, including 83 to the Calcutta Municipality contributed, in 1898-99, towards the cost of plague observation camps at Chausa and elsewhere. The saving in the Punjab (1,11) was due chiefly to the charges against the Provincial reserve under Miscellaneous and Unforeseen charges having been taken against the appropriate heads; and that in Madras (28), was partly in the Local section under Miscellaneous and Unforeseen charges, owing to the provision not having been utilized, and partly in the Provincial section, due to the adjustment by deduction from charges of the cost of hire of pearl-fishery vessels by the Presidency Port Officer in 1897 and 1899.

172. In England the increase was due to payments on account of the Indian Plague Commission £7,8 or R1,18 and to refunds of fines and penalties incurred by contractors in providing stores, £6,6 or R1,00, partly counterbalanced by very small payments for stores lost in transit to India.

173. In March 1899 when the Budget Estimate for 1899-1900 was framed there was no apprehension of scarcity and consequently the full amount of ₹1,50,00 or £1,000,0 of the Famine Insurance grant, including the net charge on the revenues (shown under the Railway Revenue Account) on account of the Protective Railways constructed through the Agency of the Companies, was estimated for. As the year was expected to close with a surplus, the Budget set apart 60,39 of the grant for Reduction or Avoidance of debt, but during the latter part of the year the country was again afflicted by famine, which was in many respects of unprecedented in intensity, and relief works had to be opened in many provinces. To meet this heavy expenditure provision was made in the Revised Estimate for 3,07,43, and as this amount far exceeded the Famine Insurance grant, the entries in the Budget under 34—Construction of Protective Railways and 36—Reduction or Avoidance of Debt were omitted. As explained in paras. 7 and 73 of the Financial Statement for 1900-1901, the provision under 34—Construction of Protective Railways was transferred to the head 48—State Railways.

174. The following statement shows the total amount chargeable to this grant, and its distribution :—

Famine Relief and Insurance.

...	England	...	5,3	3.7
26,7	TOTAL	3,8	2,054,8	2,074.9

175. In the Budget Estimate only 57 was provided under this head, of which 50 was allotted to the Punjab for expected relief works, but, on account of unprecedented agricultural distress, the Government of India, on a consideration of estimates of expenditure of the Local Governments concerned, provided ₹3,07,43 or £2,049.5 in the Revised Estimate.

176. The actuals show an excess of 3,25 over the Revised Estimate which was the net result of excesses in Central Provinces (49), Punjab (1,76) and Bombay (0,41), counterbalanced by savings in the other Provinces chiefly in India (2,38) and Madras (1,84). Of the excesses 8,03 occurred in the Public Works portion, but the amount was reduced by savings of 4,78 in the Civil Department. The variations are chiefly due to the fact that an accurate forecast of the expenditure was not possible, owing to the absence of any reliable data regarding the extent to which the relief operations would be necessary in the different Provinces.

177. The following table shows the grants made to cover the expenditure and the amount still requiring formal sanction.

		India.	Central Provinces.	Burma.	Bengal.	N.-W. Provinces and Oudh.	Punjab.	Madras.	Bombay.	TOTAL.

179. The actual expenditure during 1899-1900 exceeded that of the previous year by 2,42. The increase was due partly to the outlay incurred in raising the Paricha weir of the Betwa canal and in completing the Nowshera Minor of the Swat River canal, and partly to the transfer to this head of the normal expenditure on famine relief work done on the Shetphal and Maladevi tanks in Bombay. The excess over the Budget Estimate was mainly due to this latter cause. The excesses of 17 in the North-Western Provinces, 11 in Madras, and 33 in Bombay require to be sanctioned.

182. The decrease on the Jorhat Railway, as compared with the Budget and Revised Estimates is mainly due to no expenditure having been incurred on Ballast and Permanent-way and on Stations and Buildings, for which a provision of R12 was made in the Estimates. The excess of 5 in Madras has received the sanction of the Local Government, and that of 5 in Bombay requires to be sanctioned.

Section H.—RAILWAYS.

183. The following is a general statement of the Revenue Account, taking the gross figures for Guaranteed Railways instead of the net figures shown in the Finance and Revenue Accounts:—

1896-97 . . .	—1,09,67	—1,43,84	—6,10	— 6,39	—2,66,00
1895-96 . . .	— 49,39	—1,06,18	+ 70	— 7,16	—1,62,03

184. These figures show that for *State Railways* the net result was better than in 1898-99 by £912,5 or R1,36,88. Under Receipts there was an increase of 2,36,59, due generally to the additional mileage open and to the heavy traffic in food stuffs consequent on Famine. The total charges were more by 99,71. There was an increase of 63,57 in working expenses due to the increased mileage run, and to heavier repairs and renewals of rolling stock, and an increase of 26,07 under *Interest* and *Annuities*, also an increase of 10,07 in the surplus profits paid to Companies consequent on increased earnings. The working of the Guaranteed Railways resulted in a loss of £617,1 or R92,56, which was more by 35,37 than the loss of the preceding year. There was a decrease of 22,19 in the *Net Traffic Receipts*, and under *Surplus Profits* and *Land and Supervision* there were increases of 5,86 and 1,10 respectively.

(*a*) Includes interest on Rolling Stock and shares of the Godra-Rutlam-Nagda Railway (R70,000) which in the Finance and Revenue Accounts are included under Working Expenses.

Section H.—RAILWAYS—*continued.*

185. The net result to Government of the Revenue Account of Railways, as shown above, has been considerably affected by the fluctuations in the rate of exchange, which are eliminated in the following figures, showing in each year the net loss or gain for State and Guaranteed Railways if the rate of exchange had not varied from that of 1886-87 :—

	State Railways.	Guaranteed Railways.	TOTAL.
	₹	₹	₹
1899-1900	+1,58,46	—65,65	+ 92,81
1898-99	+ 21,19	—29,95	— 8,76
1897-98	+ 67,40	—89,88	— 22,48
1896-97	— 6,31	—82,30	— 88,61
1895-96	+ 88,22	—23,24	+ 64,98
1894-95	+ 89,67	—55,34	+ 34,33
1893-94	+ 31,66	—18,89	+ 12,77
1892-93	— 23,41	—32,17	— 55,58
1891-92	+ 31,55	—21,02	+ 10,53
1890-91	— 55,25	—26,20	— 81,45
1889-90	— 74,60	—52,96	—1,27,56
1888-89	— 99,11	—68,21	—1,67,32
1887-88	—1,00,20	—81,14	—1,81,34
1886-87	— 37,51	—67,56	—1,05,07

186. The figures show that the net results, apart from variations in Exchange, improved steadily year by year from 1887-88 to 1895-96, with the single exception of 1892-93, when there was a serious falling off in the wheat export traffic. In 1896-97 traffic receipts were injuriously affected by famine and plague. In 1897-98, however, owing to a revival of traffic after the famine and to the Frontier expedition, there was an improvement, apart from Exchange, of 66,13 under State and Guaranteed Railways. In 1898-99, again, owing chiefly to the removal of the stringent plague quarantine measures, and to a return of normal conditions, especially on the guaranteed lines, there was a further improvement apart from Exchange of 13,72 under State and Guaranteed Railways. In the past year the improvement, apart from Exchange, was 1,01,57, but this was due to a large extent to the abnormal conditions brought about by the existence of famine.

188. *State Railways.*—The gross receipts in India were better by 2,36,59 than those of the previous year. There was an improvement in the earnings of all the more important Railway systems with the exception of the North Western Railway, on which there was a decrease of 11,12, chiefly under Goods Traffic, due to the falling off in the export trade in wheat, *vid* Karáchi, consequent on the prevalence of famine. The principal increases occurred on the East Indian (56,97), Rajputana-Malwa (49,20), and Bengal-Nagpur (33,62) Railways.

189. On the East Indian Railway the increase was due chiefly to Military Traffic consequent on the war in South Africa and to the large movement of food stuffs to districts affected by famine. On the Rajputana-Malwa and the Bengal-Nagpur Railways the increases were mainly attributable to the very large traffic worked in consequence of the continuance of famine, and to the increased mileage open on the latter Railway.

190. Compared with the Budget Estimate, there was a net increase in India of 1,74,24. The chief increases were 58,05 on the East Indian Railway, 42,81 on the Rajputana-Malwa Railway, and 25,43 on the Bengal-Nagpur Railway, due generally to the same causes which led to the increases on these lines as compared with the actuals of the previous year. The only important decrease was that of 11,95 on the North Western Railway, due to less train mileage worked in consequence of the decline in the export trade in wheat.

191. *Guaranteed Railways.*—The net receipts were 22,19 less than those of the previous year. The decrease occurred mainly on the Great Indian Peninsula Railway, due to the failure of the grain and cotton crops. There was, however, an improvement in traffic on the Madras Railway, consequent on the removal of the restrictions imposed on the travelling public in connection with plague and the movement of food-grains to famine-stricken districts.

192. Compared with the Budget Estimate, the net receipts show a decrease of 33,17, due chiefly to the falling off in goods traffic on the Great Indian Peninsula Railway.

STATE RAILWAYS—IMPERIAL.

East Indian Railway.

1898-99. Accounts. R		Budget. R	1899-1900. Revised. R	Accounts. R
	EARNINGS—			
1,79,92	Coaching	1,78,00	1,85,00	1,84,95
4,11,45	Goods	4,11,71	4,63 50	4,63,56
9,74	Miscellaneous and Suspense	10,32	11,53	9,57
6,01,11	TOTAL	6,00,03	6,60,03	6,58,08

193. Compared with the [illegible] the increase under *Coaching* was due mainly to military traffic owing to the [illegible] under *Goods* to the large movement of food stuffs to districts affected [illegible] in the [illegible]al traffic. Compared with the Budget Estimate, there was an in[illegible] caused.

Eastern Bengal Railway.

1898-99. Accounts. R		Budget. R	1899-1900. Revised. R	Accounts. R
	EARNINGS—			
49,65	Coaching	50,37	51,50	53,62
82,17	Goods	96,44	95,15	96,05
9,67	Miscellaneous and Suspense	8,19	11,35	11,56
1,41,49	TOTAL	1,55,00	1,58,00	1,61,23

194. The receipts were better than those of the previous year by 19,74, an improvement having occurred under all heads of earnings, due chiefly to the opening of the Brahmaputra-Sultanpur and Mymensing-Jagannathganj Branch Railways and the Rajbari-Faridpur and Cooch Behar-Santrabari Extensions, and in some measure to the establishment of through-booking with the Assam-Bengal Railway, and to heavy exports of food-grains from the eastern and northern districts of Bengal to Calcutta, owing to the prevalence of famine. Compared with the Budget Estimate, the receipts were better by 6,23, due to unexpected development of traffic during the latter part of the year.

Rajputana-Malwa Railway.

1898-99. Accounts. R		Budget R	1899-1900. Revised. R	Accounts. R
	EARNINGS—			
67,40	[illegible]	67,00	64,75	65,09

—91	[illegible]	4,25	4,75	1,50
2,28,61	TOTAL	2,35,00	2,75,00	2,77,81

195. Contrasted with [illegible] years, the receipts show a net increase of 49,20. der *Coaching* these was [illegible] to the prevalence of famine. The increase of 10 under *Goods* was d[illegible] chiefly in grain and pulse. The same causes ount for the differences as compared with the Budget Estimate.

Section H.—RAILWAYS—RECEIPTS—*continued.*

North Western Railway.

1898-99. Accounts. R		1899-1900. Budget. R	Revised. R	Accounts. R
	EARNINGS—			
1,13,92	Coaching . . .	1,10,00	1,17,67	1,18,74
2,37,80	Goods . . .	2,46,65	2,24,53	2,24,16
12,45	Miscellaneous and Suspense	8,35	9,80	10,15
3,64,17			3,52,00	3,53,05

196. The receipts, as compared with the actuals of the previous year, show a net decrease of 11,12. Under *Coaching* there was an increase of [illegible] due to the lines being open and to normal development of traffic. The decrease of 13,04 [illegible] falling off in the export trade in wheat. Under *Miscellaneous and Suspense* [illegible] chiefly due to the fact that in the previous year the receipts under this [illegible] favorably by the adjustment of large outstandings at close of 1897-98 [illegible] expedition. The same causes account for the variations as compared with

Oudh and Rohilkhand Railway.

1898-99. Accounts. R		1899-1900. Budget. R	Revised. R	Accounts R
	EARNINGS—			
41,60	Coaching	41,50	42,75	42,92
51,52	Goods	52,75	60,25	59,85
7,76	Miscellaneous and Suspense . . .	7 75	11,00	10,49
1,00,88	TOTAL .	1,02,00	1,14,00	1,13,26

197. Compared with the actuals of the previous year, there was an increase of 12,38. The increases under *Coaching* and *Goods* were due to larger attendance at fairs, the ordinary development of traffic over the Rae Bareli-Benares chord, and to the traffic in food-grains to the Punjab and Rajputana. The increase of 2,73 under *Miscellaneous and Suspense* was due mainly to the Oudh and Rohilkhand Railway's share of the earnings of the Cawnpore-Lucknow metre gauge link being accounted for under this head. The variations, as compared with the Budget Estimate, were attributable to the same causes.

Bengal-Nagpur Railway.

1898-99. Accounts. R		1899-1900. Budget. R	Revised. R	Accounts. R
	EARNINGS—

73,81			[illegible]	1,07,43

198. The receipts were better than those of [illegible] chiefly to the flow of food-grains from Bengal and Burma [illegible] with the Budget Estimate, the increase was due to the famine [illegible]

Section H.—RAILWAYS—RECEIPTS—*continued.*

Bengal and North-Western and Tirhoot Railways.

1898-99. Accounts. R		1899-1900. Budget. R	1899-1900. Revised. R	1899-1900. Accounts. R
	EARNINGS—			
24,71	Coaching	28,20	28,20	28,28
33,46	Goods	36,50	42,20	43,82
8,17	Miscellaneous and Suspense	9,30	8,60	9,59
66,34	TOTAL	74,00	79,00	81,69

199. The receipts, compared with the actuals of the previous year, show an increase of 15,35, of which 3,57 occurred under *Coaching*, 10,86 under *Goods*, and 1,42 under *Miscellaneous and Suspense*, due chiefly to increased mileage open and to heavy movements of food-grains. The increase under *Goods*, as compared with the Budget Estimate, was due to traffic in grains having been larger than was expected when the estimate was framed.

Indian Midland Railway.

1898-99. Accounts. R		1899-1900. Budget. R	1899-1900. Revised. R	1899-1900. Accounts. R
	EARNINGS—			
22,89	Coaching	23,00	24,38	24,21
39,48	Goods	41,15	52,44	54,72
87	Miscellaneous and Suspense	1,85	1,18	98
63,24	TOTAL	66,00	78,00	79,91
6,10	*Deduct*—Bhe Railway earnings	*6,00*	*6,50*	*6,57*
57,14	Total Indian Midland Railway proper	60,00	71,50	73,34

200. The receipts were better than those of the previous year by 16,20. This improvement was due some measure to additional mileage opened on the Damoh-Katni Section, but chiefly to the heavy ffic in grain, grass, and fodder in consequence of famine, and to the return traffic in hides and skins n Guzerat, where cattle were dying in great numbers owing to scarcity. The increase, as compared h the Budget Estimate, was due to the same causes.

Southern Mahratta Railway.

1898-99. Accounts. R		1899-1900. Budget. R	1899-1900. Revised. R	1899-1900. Accounts. R
	EARNINGS—			
13,31	Coaching	16,68	14,70	15,04
36,54	Goods	37,17	43,65	46,30
9	Miscellaneous and Suspense	1,15	2,15	1,59
49,94		55,00	60,50	62,93

201. Compared with the actuals of the previous year, the receipts show an increase of 12,99, due tly to improved coaching traffic following on the relaxation and subsequent removal of plague restrictive sures, and to heavy traffic in grain. These causes also account for the increase over Budget expecta- s.

South Indian Railway.

1898-99. Accounts. R		1899-1900. Budget. R	1899-1900. Revised. R	1899-1900. Accounts. R
	EARNINGS—			
42,64	Coaching	45,00	43,52	44,68
39,41	Goods	39,00	40,13	40,22
2,31	Miscellaneous and Suspense	2,00	1,35	1,68
84,36	TOTAL	86,00	85,00	86,58

202. The net receipts were better than the actuals of the previous year by 2,22. The increase under *hing* was due chiefly to relaxation of plague restrictions on the travelling public and to the large rant traffic owing to scarcity. Under *Goods* the improvement was due partially to a large export of i to the Tinnevelly district, where the crops failed, and partially to the carriage of heavy consignments tton to the sea ports for shipment to Colombo.

Section H.—RAILWAYS—RECEIPTS—*continued.*

Burma Railway.

1898-99. Accounts. R		1899-1900. Budget. R	Revised. R	Accounts. R
	EARNINGS—			
44,60	Coaching	44,50	44,00	43,64
40,48	Goods	44,00	47,15	49,47
1,70	Miscellaneous and Suspense	1,50	1,85	1,59
86,78	TOTAL	90,00	93,00	94,70

203. The decrease under *Coaching* was due to a decline in the 3rd class passenger traffic, owing to the promise of good crops in Upper Burma having stopped the flow of labour to Lower Burma, while the increase under *Goods* was due chiefly to the heavy traffic in paddy consequent on famine in India. The variations, as compared with the Budget Estimate, were due to the same causes.

Other State Railways—Imperial.

1898-99. Accounts. R	1899-1900. Budget. R	Revised. R	Accounts. R
1,01,01	1,13,55	1,17,96	1,22,32

204. Compared with the actuals of the previous year, there was a net increase of 21,31 made up of total increases of 27,60 and decreases of 6,29. The principal increases were 21,03 on the East Coast Railway, due to increased mileage worked (including the Madras-Ennur Section) and to increased traffic in food-grains, 2,65 on the Lucknow-Bareilly Railway due to a general improvement of traffic under all heads of earnings, 1,83 on the Assam-Bengal Railway, due chiefly to the opening throughout of the Gauhati Section, and 1,12 on the Bengal Central Railway, chiefly in goods traffic, due to good crops and a brisk demand for the export of food-grains. The principal decreases were 4,64 on the Umaria colliery, which ceased to be a State undertaking from 1st April 1899, and 86 on the Mysore Railway, attributed to the disturbance of business by plague and its preventive measures, which latter were not relaxed till March 1900. The other increases and decreases were small, and do not call for special remark.

205. The actuals exceeded the Budget Estimate by 8,77. There were increases aggregating 14,31, of which the principal were 10,21 on the East Coast Railway and 2,59 on the Lucknow-Bareilly Railway, due, generally, to the same causes which accounted for the increases on these Railways over the actuals of the previous year, whilst the decreases amounted to 5,54, of which the principal were 3,76 on the Mysore Railway, due to the same causes which contributed to the decrease as compared with the actuals of the previous year, and 95 on the Guntakal-Mysore Railway, due to the Budget Estimate having been based on the assumption that plague restrictive measures would have been removed in the Mysore State earlier than was actually the case.

STATE RAILWAYS—PROVINCIAL.

£	£	£		£	£	£	£	£	£	£	£	£	£	
4,254,0	2,198,9	2,055,1	Equivalent in Sterling.	4,310,0	2,181,6	2,128,4	4,196,7	2,226,7	1,970,0	4,173,4	2,266,2	1,907,2	2,180,8	

Gross Receipts.

207. The actual receipts during the year under review were less than those of the previous year by 12,09. On the Great Indian Peninsula Railway there was a decrease of 35,68 due to the failure of the grain and cotton crops, while on the Bombay, Baroda and Central India and Madras Railways there were increases of 16,87 and 6,72, respectively, owing to the removal of the restrictions imposed on the travelling public in connection with plague and to improved goods traffic, chiefly in grain from Burma and Southern India for famine-stricken districts.

The gross receipts were less than the Budget Estimate by 20,49 as under:—

Bombay, Baroda and Central India Railway	+19,32
Great Indian Peninsula Railway	—39 38
„ „ „ „ Extensions	—50
Madras Railway	+7

The decrease on the Great Indian Peninsula Railway and the increase on the Bombay, Baroda and Central India Railway were due to the same causes as affected the comparison with previous year's actuals.

Working Expenses.

208. The total working expenses exceeded those of the previous year by 10,10. The increase of 17,65 on the Bombay, Baroda and Central India Railway was due to more extensive repairs and renewals of vehicles consequent on the heavier traffic worked, and to the actual expenditure of the previous year having been reduced by a special credit on account of contributions from the Fire Insurance Fund towards the cost of renewal of Warren girders. The increase of 5,21 on the Madras Railway was due chiefly to the renewal of 8 Locomotive engines and the decrease of 12,76 on the Great Indian Peninsula Railway to smaller outlay on the renewal of Cammell's axles.

The actual expenses exceeded the provision in the Budget Estimate by 12,68 as under:—

Bombay, Baroda and Central India Railway	+16,16
Great Indian Peninsula Railway	—7,33
„ „ „ „ Extensions	—25
Madras Railway	+4,10

209. The increase on the Bombay, Baroda and Central India Railway was due to heavier expenditure during the year than anticipated on the Narbada Bridge, to larger consumption of coal on account of increased train mileage, and to heavier renewals of coaching and goods vehicles. The decrease on the Great Indian Peninsula Railway and the increase on the Madras Railway were due to the same causes as affected the comparison with the previous year's actuals.

R		R	R	R
9,98,53	EXPENDITURE . .	10,04,70	10,63,94	10,72,17

213. The details of these amounts by individual railways are given on page 98. An explanation of the variations, compared with the actuals of the previous year and the figures of the Budget Estimate, is given below.

214. Under Imperial there was an excess of 67,40, which requires to be sanctioned. Under Provincial there was an excess of 38 in Assam, and 29 in Madras, which, together with 26 of the excess in Assam, was covered by re-appropriation sanctioned by the Local Governments, and the balance of 12 in Assam requires to be sanctioned.

STATE RAILWAYS—IMPERIAL.

East Indian Railway.

1898-99. Accounts		Budget.	1899-1900. Revised.	Accounts.
R	WORKING EXPENSES—	R	R	R
49,26	Maintenance	41,75	54,60	60,97
61,06	Locomotive	55,00	64,14	63,82

38,01	Traffic	37,95	41,33	40,91
31,56	General, Miscellaneous and Suspense	31,32	33,66	32,23
2,02,66	TOTAL WORKING EXPENSES .	1,86,00	2,15,60	2,16,13
30,73	Share of surplus profits paid to the Company, and contribution to Provident Fund	30,00	34,40	34,41
2,33,39	TOTAL .	2,16,00	2,50,00	2,50,54

215. The increase of 17,15, as compared with the actuals of the previous year, may be attributed generally to the increased traffic worked, to extensive renewals of permanent-way, to payments of rebate to the South Behar Railway, and to the increased share of profits paid to the East Indian Railway Company consequent on improved net earnings. The same causes account for the excess of the actuals over the Budget Estimate.

Eastern Bengal Railway.

5,74	Carriage and Wagon . . .	7,75	6,56	5,26
15,80	Traffic	15,89	16,81	16,91
12,39	General, Miscellaneous and Suspense	13,78	14,50	14,57
66,44	TOTAL .	70,00	71,50	72,73

216. The increase under *Maintenance* was due to renewing sleepers, increased expenditure on ballasting, renewing and strengthening girders and carrying out special repairs on the Ichamutty Bridge and the station at Calcutta. The increases under *Locomotive*, *Traffic*, and *General, Miscellaneous and Suspense* were due to the general development of traffic consequent on the opening of the Brahmaputra-Sultanpur and Mymensing-Jagannathganj branch lines, and the Rajbari-Faridpur and Cooch Behar-Santrabari Extensions of the main line. Under *Carriage and Wagon* the decrease of 48 was due to less expenditure having been incurred on repairs to vehicles.

22,17	General, Miscellaneous and Suspense	12,65	12,88	12,87
1,10,35	TOTAL WORKING EXPENSES	1,05,00	1,12,00	1,13,47
10,94	Share of surplus profits paid to the Bombay, Baroda and Central India Railway Company, and contribution to Provident Fund	12,00	15,00	15,83(*a*)
1,21,29	TOTAL	1,17,00	1,27,00	1,29,30

(*a*) Includes interest on Rolling Stock and Shares of the Godra-Rutlam-Nagda Railway shown here for the purpose of comparison.

217. As compared with the actuals of the previous year, the increase of 9,42 under *Locomotive* expenses was due to increased train mileage run and to heavy debits for the carriage of Revenue Stores, especially coal. Under *Carriage and Wagon* the increase of 1,28 was due to heavy outlay on repairs and renewals of vehicles. The decrease of 9,30 under *General, Miscellaneous,* and *Suspense* was due almost entirely to reduced expenditure on the conversion of the line from Ferozepore to Kotkapura and to credits received by the disposal of stores set free from this work. The increase of 4,89 in *Share of Surplus Profits, etc.,* was due to improvement in the result of the year's working. The variations, as compared with the Budget Estimate, were due to the same causes.

North Western Railway.

1898-99. Accounts. R		Budget. R	1899-1900. Revised. R	Accounts R
	WORKING EXPENSES—			
54,92	Maintenance	56,17	45,83	46,47
70,70	Locomotive	70,56	83,08	81,79

28,67	Traffic	30,32	29,19	29,07
17,60	General, Miscellaneous and Suspense	21,02	21,04	20,63
1,91,55	TOTAL	1,91,00	1,91,00	1,90,27

218. Compared with the actuals of the previous year, the decrease of 8,45 under *Maintenance* was due to low expenditure on renewals of permanent-way and repairs to bridges. The increase of 11,09 under *Locomotive* expenses was due to increased mileage run, large outlay on the repairs and renewals of engines, and to the increased cost of coal consequent on the adjustment of loss on the working of the Bhaganwala colliery. The decrease of 7,35 under *Carriage and Wagon* was due to the expenditure on renewals of vehicles during the previous year having been abnormally high. Under *General, Miscellaneous, and Suspense* the increase of 3,03 was due to large payments having been made to the East Indian Railway for use of the line between Ghaziabad and Delhi, and to large bonus and arrears having been credited to the Provident Fund Institution under the new rules. The same causes account for the variations as compared with the Budget Estimate.

Oudh and Rohilkhand Railway.

1898-99. Accounts.		Budget. R	1899-1900. Revised. R	Accounts. R

Section H.—RAILWAYS—EXPENSES—*continued.*

Oudh and Rohilkhand Railway—*continued.*

219. The increase under *Maintenance* was due chiefly to expenditure on the re-modelling of the Lucknow station, while that under *Locomotive* expenses was due to increased train mileage run. The decrease of 66 under *Carriage and Wagon* was due to less outlay on renewal of vehicles, and the increase of 69 under *Traffic* to increased traffic worked during the year. The variations from the Budget Estimate were due to the same causes.

Bengal-Nagpur Railway.

1898-99. Accounts.		1899-1900. Budget.	1899-1900. Revised.	1899-1900. Accounts.
R		R	R	R
	WORKING EXPENSES—			
10,31	Maintenance	12,50	12,75	12,77
10,40	Locomotive	13,50	12,90	13,59
2,66	Carriage and Wagon . . .	3,25	3,00	3,10
6,12	Traffic	7,25	7,65	7,88
6,68	General, Miscellaneous and Suspense	8,50	8,70	8,47
36,17	TOTAL .	45,00	45,00	45,81

220. Contrasted with the actuals of the previous year, increases occurred under all heads of expenditure and aggregated 9,64. This increase was due chiefly to the extra traffic worked and increased mileage open, and in some measure to failure of the watering arrangements at several stations owing to drought and to an increased charge for additional *sal* sleepers on the main line.

Bengal and North-Western and Tirhoot Railways.

1898-99. Accounts.		1899-1900. Budget.	1899-1900. Revised.	1899-1900. Accounts.
R		R	R	R
	WORKING EXPENSES—			
8,05	Maintenance	8,40	9,85	10,61
6,19	Locomotive	6,75	8,10	9,18
1,52	Carriage and Wagon	2,10	2,10	2,27
4,96	Traffic	5,50	5,50	6,00
7,93	General, Miscellaneous and Suspense	8,75	9,70	9,69
19,59	Share of net earnings paid to the Company, and contribution to Provident Fund	25,50	27,75	26,19
48.24	TOTAL .	57,00	63,00	63,94

221. Compared with the actuals of the previous year, the increase of 2,56 under *Maintenance* was due to abnormal expenditure on bridges and to the write-off of cost of bridges washed away by floods. The increases under *Locomotive, Carriage and Wagon*, and *Traffic* were due to the additional mileage worked, while the charges on account of the Tari Ghât ferry, hire of rolling-stock for the extensions and hire of the S.S. *Benares* accounted for the increase under *General, Miscellaneous, and Suspense.* Under *Share of net earnings, etc.*, the increase was due to the improved earnings consequent on additional mileage opened and the heavy traffic in grain. The excesses over Budget provision were due generally to the same causes.

Section H.—RAILWAYS—EXPENSES—*continued.*

Indian Midland Railway.

1898-99. Accounts. R		1899-1900. Budget. R	1899-1900. Revised. R	1899-1900. Accounts. R
	WORKING EXPENSES—			
6,97	Maintenance	8,co	8,84	9 49
13,78	Locomotive	12 5 ɔ	16,11	15,62
3,47	Carriage and Wagon	3,00	3,25	3,37
5,02	Traffic	5,co	5 58	5,67
6,81	General, Miscellaneous and Suspense	8,00	7,72	7,79

3,59	*Deduct*—Working expenses of Bhopal State Railway	*3,30*	*4,00*	*3,93*
32,46	Total Indian Midland Railway	33,20	37.50	38,01

222. The increases under *Maintenance, Locomotive, Traffic,* and *General, Miscellaneous* and *Suspense* were due to longer length of line maintained, heavy extraordinary expenditure on permanent-way renewals, increased engine mileage run, and the heavy traffic worked in consequence of famine. Compared with the Budget Estimate, there was a net excess of 4,81, due to the traffic on account of famine having exceeded expectations.

Southern Mahratta Railway.

1898-99. Accounts. R		1899-1900. Budget. R	1899-1900. Revised. R	1899-1900. Accounts. R
	WORKING EXPENSES—			
8,46	Maintenance	8,40	9.30	9,52
10,77	Locomotive	11,20	13.10	13,67
3,23	Carriage and Wagon	3,25	3,70	3,81
5,93	Traffic	6,50	6,40	6,68
7,05	General, Miscellaneous and Suspense	6,65	7,50	7,50
35,44	TOTAL WORKING EXPENSES	36,00	40,00	41,18
4,03	Share of net earnings paid to the Company, and contribution to Provident Fund	4,75	5,00	4,76
39,47	TOTAL	40,75	45,00	45,94

223. The increases over the actuals of the previous year and the Budget Estimate were due chiefly to the large replacement of sleepers, heavy traffic worked, enhanced price of coal, and to stronger wheels and axles being supplied to the goods stock. The payment of arrears of Exchange Compensation Allowance under the revised rules and the re-organization of the superior and subordinate supervising staff contributed largely to the increase under *Traffic* expenses.

South Indian Railway.

1898-99. Accounts. R		1899 1900. Budget. R	1899 1900. Revised. R	1899 1900. Accounts. R
	WORKING EXPENSES—			
8,52	Maintenance	9,35	8,10	8,24
18,28	Locomotive	18,17	16,28	15,76
4,76	Carriage and Wagon	4,71	5,10	5,11
7,88	Traffic	8,14	7,76	7,62
7,26	General, Miscellaneous and Suspense	7.63	7,26	7,05
46,70	TOTAL WORKING EXPENSES	48,00	44,50	43,79
2,89	Share of Surplus profits paid to the Company, and contribution to Provident Fund	3,00	3,50	3,46
49,59	TOTAL	51,00	48,00	47,25

224. The decrease under *Maintenance* was due to the enhanced rates at which rails were returned to stock. Under *Locomotive* the decrease is accounted for by the fact that in the previous year the expenditure under this head was unusually large owing to the replacement of 5 condemned engines by new ones. The increases under *Carriage and Wagon* and *Share of surplus profits, etc.*, were due, respectively, to the replacement of axles by those of a stronger type, and to the increased net earnings of the line. Compared with the Budget Estimate, there was a lapse of 3,75, due chiefly to ordinary repairs not having been carried out to the extent intended, and to the postponement of the renewal of engines and tenders.

Section H.—RAILWAYS—EXPENSES—*continued.*

Burma Railways.

1898-99 Accounts. R		Budget. R	1899-1900. Revised. R	Accounts. R
	WORKING EXPENSES—			
12,65	Maintenance	12,71	12,17	12,37
17,13	Locomotive	16,11	18,55	19,11
4,28	Carriage and Wagon	4,02	4,22	4,54
9,52	Traffic	10,13	9,13	9,33
7,55	General, Miscellaneous and Suspense	8,43	8,68	8,91
51,13	TOTAL WORKING EXPENSES .	51,40	52,75	54,26
1,58	Share of surplus profits, etc.	1,60	1,25	1,28
52,71	TOTAL .	53,00	54,00	55,54

225. The increase under *Locomotive* was due chiefly to the enhanced cost of coal and wood fuel and to extra repairs to locomotive stock. Under *General, Miscellaneous, and Suspense*, the increase was due chiefly to increased supervision charges consequent on the opening of the Meiktila-Myingyan branch and to heavy repairs to the Paddle Steamer *Rangoon*. The same causes, generally, account for the variations as compared with the Budget Estimate. Under *Traffic* expenses the lapse, as compared with the Budget Estimate, was due chiefly to savings on the charge for establishment.

Other State Railways—Imperial.

1898-99. Accounts. R		Budget. R	1899-1900. Revised. R	Accounts. R
71,39	Working Expenses	72,45	73,59	74,92
2,72	Share of Surplus profits, etc. . . .	3,10	3,23	3,22
74,11	TOTAL .	75,55	76,82	78,14

226. Compared with the actuals of the previous year, there was a net increase of 4,03. The increases aggregated 11,04, of which 9,27 occurred on the East Coast Railway, due to increased mileage open and heavy traffic worked, and 1,11 on the Lucknow-Bareilly Railway, due chiefly to heavy renewals of sleepers and repairs to engines and to increased train mileage run. The decreases amounted to 7,51, of which the most important (4,34) occurred on the Umaria colliery in consequence of its having ceased to be a State undertaking from 1st April 1899. The other principal decreases were 1,44 on the Assam-Bengal Railway, due to the abnormal charges in the previous year on account of damages caused by earthquake, and 1,13 on the Mysore Railway, due to less train mileage run consequent on the decline in the traffic. The other increases and decreases were not important. Compared with the Budget Estimate, there was a net increase of 2,47. The more important increases were 3,61 on the East Coast Railway, due chiefly to heavy traffic carried and more train-miles run, 1,11 on the Lucknow-Bareilly Railway, due to the same causes which contributed to the excess over the actuals of the previous year, and 65 on the Bengal Central Railway, due mainly to large expenditure on maintenance and renewal of permanent-way and Locomotive stock. The principal decreases were 2,22 on the Mysore Railway and 62 on the Guntakal-Mysore Railway, due to the anticipated improvement in the earnings, involving an increased share of working expenses chargeable to these Railways, not having been realized.

State Railways—Provincial.

1898-99. Accounts. R	Budget. R	1899-1900. Revised. R	Accounts. R
5.19	4,20	3,79	3,97

227. The principal variation was a decrease of 63 on the Cherra-Companyganj Railway, due to this Railway having been closed to traffic for the greater portion of the year owing to damage caused by heavy floods. On the Mayavaram-Mutupet Railway, classed as Local from 1st January 1900, there was a decrease of 31 due to a decline in earnings and consequent reduction of the ratio of working expenses chargeable to this line.

State Railways—Local.

£ 265,5	Equivalent in Sterling	£ 375,7	£ 348,4	£ 343,4

39.—Guaranteed Companies—Surplus Profits, Land and Supervision—*concluded.*

Surplus Profits.

233. The increase, as compared with the actuals of the previous year, was due chiefly to the shares of surplus profits earned by the Great Indian Peninsula Railway during the 1st half of 1899, and by the Bombay, Baroda and Central India Railway during the 2nd half of 1899, having been larger than those for the corresponding halves of 1898 consequent on improved net earnings. Contrasted with the Budget Estimate, the decrease was due to the falling off in traffic on the Great Indian Peninsula Railway and to the contribution to the Provident Fund of the Madras Railway having been charged to working expenses.

Land and Supervision.

234. The increase, as compared with the actuals of the previous year, was due to more extensive acquisition of land for the Madras and Great Indian Peninsula Railway Extensions and to increased charges for supervision in Madras, Bombay and the North-Western Provinces and Oudh owing to changes in and additions to the staff.

40.—Subsidised Companies—Land, Subsidy, and Interest—*concluded.*

236. Compared with the actuals of the previous year, there was a net decrease of 4,72, made up ncreases aggregating 1,10, of which 72 occurred on the Bengal-Dooars Railway, and decreases amoun- ng to 5,82, the chief of which were 2,58 on the South Behar Railway, 90 on the Brahmaputra-Sultanpur Railway, and 77 on the Hardwar-Dehra Railway, due to land acquisition operations on all these lines aving been practically completed. Compared with the Budget Estimate, the lapse was due chiefly to mounts set aside for the Bhagulpur-Bausi-Baidyanath, Chandipur-Taki, Gogri-Baptiahi, Amritsar-Tarn- Taran-Sarhali, Kurnool Branch, Nariad-Kapadvang, and Jullunder-Hoshiarpur Railways not having been itilized, and to less land having been acquired on the Bengal-Dooars, Brahmaputra-Sultanpur, Sabarmati- Dholka, Mymensingh-Jamalpur and Tapti Valley Railways than was provided for. The decrease of 62 n the subsidy paid to the Dibru-Sadiya Railway was due to a considerable improvement in the arnings of the Railway attributable to a larger traffic in coal and rice.

237. The total outlay under *Imperial* is more than that of the previous year by 86. No useful comparison can be made between the outlay of the two years by individual projects, as Surveys are being completed and new Surveys are being started every year. Under Provincial the excess of 4 in Bombay has been sanctioned by the Imperial Government, and the excess of 1 in the North-Western Provinces requires to be sanctioned.

Section J.—IRRIGATION.

238. The following is a general summary of the results under the head Irrigation :—

26,97	Net Revenue (Irrigation) . .	11,63	26,02	20,47

239. The figures in the above summary equivalent in £ sterling including England are shown below :—

1898-99. Accounts.		Budget.	1899-1900 Revised.	Accounts.
	Major Works—			
£		£	£	£
1,475,3	Direct Receipts . . .	1,447,8	1,587,1	1,578,5
672,5	Land Revenue due to Irrigation .	695,4	676,9	670,2
2,147,8	TOTAL RECEIPTS .	2,143,2	2,264,0	2,248,7
626,9	Working Expenses . . .	638,7	674,7	664,8
875,1	Interest	897,2	896.6	896,7
1,502,0	TOTAL EXPENDITURE .	1,535,9	1,571,3	1,561,5
645,8	Net Receipts (Major Works) .	607,3	692,7	687,2
	Minor Works and Navigation—			
160,9	Receipts (excluding Land Revenue)	157,5	151,2	151,2
626,9	Expenditure	687,2	670,5	702,0
466,0	Net Expenditure (Minor Works) .	529,7	519,3	550,8
179,8	Net Revenue (Irrigation) . .	77,6	173,4	136,4

240. Although there was an increase of revenue from Major Works owing to the seasons having been favourable for canal irrigation in the North-Western Provinces and Oudh and the Punjab on account of scanty rainfall, yet the increased working expenses and interest charges added to the debits, to Minor Works and Navigation, of the outlay on famine relief works, reckoned at ordinary rates, caused the net result to be worse than that of the previous year by R6,50 or £43,4 The improvement, R8,84 or £58,8 as compared with the Budget Estimate, was mainly due to the irrigation of a larger area than was anticipated. The worse result, R5,55 or £37,0 as compared with the Revised Estimate, was due to the adjustment of the normal outlay on famine relief works at the close of the year.

Section J.—IRRIGATION—RECEIPTS.

1898-99. Accounts.	RECEIPTS.	Budget.	1899-1900. Revised.	Accounts.
₹		₹	₹	₹
3,46,31	India (Rupee figures) . .	3,45,11	3,62,28	3,59,98
£		£	£	£
2,308,7	Equivalent in Sterling . . .	2,300,7	2,415,2	2,399,9

241. The actual receipts in 1899-1900 exceeded those of the previous year by ₹13,67 or £91,2 and the Budget Estimate by ₹14,87 or £99,2. The increase was due chiefly to the irrigation of a larger area in the Punjab and North-Western Provinces and Oudh owing to scanty rainfall, and partly to the further development of irrigation from the Chenab canal.

Section J.—IRRIGATION—RECEIPTS—*continued.*

Direct Receipts—Imperial Works.

242. The gross revenue in 1899-1900 exceeded that of the previous year by R12,51, and the Budget Estimate by 14,37. The increase was due chiefly to a larger area having been irrigated during both the *rabi* and *kharif* seasons owing to short rainfall in the districts served by the canals, and partly to the development of irrigation from the Chenab canal. The decrease of 2,21, as compared with the Revised Estimate, was mainly due to large outstanding balances on the Western Jumna, Sirhind, and Chenab canals, owing to famine.

Direct Receipts—Provincial Works.

243. The gross revenue in 1899-1900 was better than that of the previous year by 2,98. The increase was due to a larger area having been irrigated by the canals in the North-Western Provinces and Oudh during the *kharif* season of 1899 than in the previous year, owing chiefly to scanty rainfall. Of the increase of 5,23, as compared with the Budget Estimate, 1,29 was contributed by Bengal and 3,94 by the North-Western Provinces and Oudh. The increase in Bengal was attributed to an increased demand for irrigation for *rabi* crops in the Sone canals. In the North-Western Provinces and Oudh the increase was due to a larger area having been irrigated, both in the *rabi* and *kharif* seasons, than was anticipated

XXIX.—Major Works—Indirect Receipts.

Portion of Land Revenue due to Irrigation.

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts.

£		£	£	£
672,5	„ „ EQUIVALENT IN STERLING	695,4	676,9	670,2

244. The actuals for 1899-1900 fell short of those of the previous year by 35. The decrease is the net result of an improvement of 3,85 in the North-Western Provinces and Oudh, Punjab and Bombay and of a falling off of 4,20 in Madras. The increase in the Punjab was due to the development of irrigation from the Chenab canal, and that in Bombay to a better supply of water in the canals in Sind. The decrease in Madras was due to remissions under the Godavari and Cauvery delta systems and the Pennar River canals owing to the unfavourable character of seasons. As compared with the Budget and Revised Estimates, the actuals show a decrease of 3,78 and 1,00 respectively. The decrease occurred chiefly in Madras and was due to the cause explained above. In the Punjab the revenue from the Chenab canal was over-estimated. The increase in Bombay was due to a better supply of water in the canals in Sind.

Section J.—IRRIGATION—RECEIPTS—*concluded.*

Imperial Works.

245. The actual receipts in 1899-1900 fell short of those of the previous year by 1,10, and the Budget Estimate by 70. The decrease was due partly to insufficient supply of water in the tanks in Baluchistan and the canals in Sind, and partly to outstanding balances on the canals in the Deccan and Gujarat, owing to famine.

Provincial and Local Works.

246. The actual collections of the year 1899-1900 were less than those of the previous year by 37. The decrease is made up chiefly of an increase of 39 in Bengal, and of short realizations of 27 and 38 in the North-Western Provinces and Oudh and the Punjab respectively. The increase in Bengal was mainly due to a rise in the navigation receipts from the Calcutta and Eastern canals. The decrease in the North-Western Provinces and Oudh was due to smaller water-rate collections from the Dun and Rohilkhand canals. In the Punjab the receipts from the minor canals in charge of Civil Officers fell from 1,73 in 1898-99 to 1,33 in 1899-1900. The increase in the actual receipts in Burma, as compared with the Budget and Revised Estimates, was due to the transfer to Public Works revenue, after the Revised Estimate had been fixed, of a sum of 68, the cash balance on 31st March 1899 of the Sagu and Salin Canal Fund in the Minbu district, which was previously accounted for in the Civil Department.

247. The increase of R20,19 or £134,6 in the expenditure during 1899-1900 over that of the previous year was due partly to the increased cost of working and maintenance, partly to the interest charges on the capital outlay of the year, and partly to the charge to this head of expenditure on famine relief works at normal rates in connection with revenue-producing canals and tanks. As compared with the Budget Estimate, the excess expenditure was R6,04 or £40,3, due to the same causes as affected the comparison with the outlay of the previous year. Owing to the adjustment of famine outlay against this head the Revised Estimate was also exceeded by R3,25 or £21,7.

Imperial Works.

248. The expenditure in 1899-1900 exceeded that of the previous year by 5,75, and the Budget Estimate by 3,56. The increase occurred in the Punjab, and was mainly due to heavy maintenance charges of the Chenab canal owing to extension of irrigation and to larger payments on account of Lambardars' fees. The excess was covered by additional grants amounting to R4,50 sanctioned by the Government of India.

Provincial Works.

249. The short outlay in Bengal, as compared with the Budget Estimate, was mainly due to savings in the charges for establishment and to a smaller expenditure on repairs. The increase of 1,06 in the expenditure in the North-Western Provinces and Oudh over the Budget Estimate was due to the construction of certain unforeseen urgent works in connection with the remodelling of distributaries, and to extra collection charges on the increased revenue, of this excess 1,04 were covered by sanction of the Local Government and 2 still require to be sanctioned.

A. Imperial. B. Provincial and Local.

Imperial Works.

251. The increase in the expenditure during 1899-1900, as compared with that of the previous year and the Budget Estimate, was due chiefly to the transfer to this head of the expenditure on famine relief works in Rajputana, Punjab, and Bombay, reckoned at ordinary rates, and partly to the construction of certain important works in connection with the canals in the Punjab and Sind to keep them in good working order. The excess of 6,43 over the Budget requires to be sanctioned.

Provincial Works.

252. The expenditure in 1899-1900 exceeded that of the previous year by 1,89. The increase was due to a larger programme of expenditure in Burma and the North-Western Provinces and Oudh. The decrease of 2,19 in Bengal was due chiefly to a number of works having been nearly completed in the previous year. Heavy expenditure was also incurred in Bengal in 1898-99 on land charges for famine relief works, whereas in 1899-1900 very little expenditure was incurred on this account. The increase of 1,16 in Madras was mainly due to large expenditure having been incurred for the up-keep of minor works, for which neither Capital nor Revenue accounts are kept. The actual expenditure of the year fell short of the Budget and Revised Estimates by 4,32 and 2,05, respectively. The decrease occurred chiefly in Bengal, and was due partly to a sum of 1,65 having been transferred to 45—Civil Works, for expenditure on special repairs to buildings at Darjeeling, partly (about 87) to a smaller share of establishment charges having been borne by this head, and partly to an unforeseen reduction of the suspense balances by 39. The expenditure in the other Provinces was somewhat over-estimated.

Section K.—BUILDINGS AND ROADS—RECEIPTS.

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts.

30,5	England . .	29,6	29,0	29,1
470,0	TOTAL .	458,8	441,8	440,9

253. The receipts in 1899-1900 fell short of those of the previous year by ₹4,35 or £ 29,1. The decrease under Civil Works was chiefly due to the falling off under road tolls, and contributions for Public Works and Ferry receipts, consequent on the prevalence of plague and famine. The falling off from the Budget Estimate was also attributable to this cause.

XXXI.—Military Works.

254. The receipts for the year 1899-1900 fell short of those of the previous year by 20. The decrease was due to the special credit of 35 obtained in 1898-99 by the sale to His Highness the Nizam's State Railway of barracks and other buildings in the old Lancer lines at Secunderabad. The variations between the actuals and the Budget Estimate were unimportant.

A.—Public Works in charge of Departmental Officers. B.—Public Works in charge of Civil Officers.

255. The differences under this head are unimportant.

Provincial Works.

256. The receipts by Departmental Officers during 1899-1900 were less than those of the previous year by 93, and the Budget Estimate by 1,00 The decrease occurred chiefly in Bombay, and was due to the receipts from tolls on roads having fallen off owing to the prevalence of famine and plague. The increase of 34 over the Budget Estimate in Bengal was mainly due to larger profits from the Darjeeling-Himalayan Railway.

257. The difference of 93 between the actuals and the Budget Estimate in the Punjab was mainly due to the postponement of the sale of the building occupied by the Punjab Secretariat at Simla.

258. The revenue realized by Civil Officers in 1899-1900 fell short of that of the previous year by 1,33. The decrease occurred chiefly in Bengal, (28), the North-Western Provinces and Oudh, (67), and the Punjab (31). The decrease in Bengal was due to a falling off in the receipts from ferry tolls. The receipts for 1898-99 in the North-Western Provinces and Oudh included a special credit on account of sale-proceeds of the steamer and plant of the Ghazipore Steam Ferry. The decrease in the Punjab was due to the receipts from the sale of lands and buildings not being so large as in the previous year. The decrease, as compared with the Budget Estimate, was due to a falling off in the realizations from ferry tolls.

Local Works.

259. The decrease (49) in the revenue realized by Departmental Officers during 1899-1900, as compared with that of the previous year, was due to a sum of 53 having been included in the receipts for 1898-99, representing the recovery from the Assam-Bengal Railway on account of compensation for the district road from Gauhati to Kalang river, taken over by that Railway.

260. The revenue realized by Civil Officers in 1899-1900 was less than that of the previous year by 1,31, and the Budget Estimate by 1,43. The decrease was mainly due to a falling off under road tolls, contributions for Public Works and Ferry receipts, consequent on the prevalence of famine and plague.

3,912,3	TOTAL . .	4,536,0	4,130,8	4,134,6

261. In consequence of increased grants the expenditure during 1899-1900 exceeded that of the previous year by ₹33,35 or £222,3. The decrease of ₹60,20 or £401,4, as compared with the Budget relief Estimate, was due chiefly to the curtailment of expenditure to provide funds for famine works and other Provincial needs, and partly to requirements having been over-estimated.

44.—Military Works.

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts.

52,5	England	14,9	34,0	31,8
807,6	GRAND TOTAL .	881,3	855,7	836,6

262. The actual expenditure in India during 1899-1900 exceeded that of the previous year by 7,45 and there was a decrease of £20,7 in the expenditure in England. The increase in the expenditure in India was due chiefly to large expenditure having been incurred on Military Works in the North-West Frontier Districts. The decrease in Burma was due to the approaching completion of the scheme for providing accommodation at Maymyo for the 1st Burma Gurkha Rifles. The decrease in Assam was due to the practical completion of the buildings for the permanent garrison of Native Infantry at Manipur. The decrease in the Punjab was due chiefly to several important works having been completed in the previous year, and partly to the transfer of Military Works in the Kurram Valley to Military Works Services. In Bombay the requirements of the year 1899-1900 were fewer than those of the previous year.

263. The actuals fell short of the Budget Estimate by 9,24, and the Revised Estimate by 2,54. The decrease was due chiefly to the grants allotted for works in the North-West Frontier Districts not having been fully utilized, and partly to modifications of the Budget programme, which were sanctioned by the Government of India during the course of the year.

Imperial Works.

264. *Departmental Officers.*—The expenditure in 1899-1900 was less than that of the previous year by 6,09. The decrease was due chiefly to the completion of the Bangalore water-works in 1898-99 and the approaching completion of certain churches and other buiidings on which large expenditure was incurred in the previous year, and partly to the share of establishment charges debited to 45—Civil Works, in Rajputana, having been smaller than usual. The decrease of 1,07 in Assam was due chiefly to no expenditure having been incurred from Imperial Funds on the Nichuguard-Manipur road, and partly to reduced expenditure on the reconstruction of postal and telegraph buildings destroyed by the earthquake of 1897. In Bengal, the North-Western Provinces and Oudh and the Punjab the programme of expenditure for 1899-1900, sanctioned by the Government of India, was larger than in the previous year.

265. In the Budget Estimate a sum of 1,16 was over-allotted for works in Baluchistan through a misapprehension, and was subsequently withdrawn. Exclusive of this sum the actuals fell short of the Budget Estimate by 3,14, and the Revised Estimate by 2,80. The decrease was due to a smaller debit on account of Establishment charges in Rajputana, to the grants for certain works in Bengal and the Punjab not having been fully utilized, to the site for the Baghdad Residency not having been acquired before the close of the year, and to the transfers of grants from India to England.

266. *Civil Officers.*—The decrease of 10 as compared with previous year was due to a smaller programme of works in 1899-1900.

Provincial Works.

267. *Departmental Officers.*—The expenditure in 1899-1900 exceeded that of the previous year by 28,23. The increase was due to larger grants having been made available for expenditure during the year 1899-1900. Although the grants for all Provinces were larger than those of the previous year, the expenditure in the Central Provinces and Bombay was less by 1,84, and 1,06 respectively owing to the restriction of expenditure under this head to provide funds for famine relief works. The decrease of 65 in Assam was due to less expenditure having been incurred in 1899-1900 on the restoration of earthquake damages than in the previous year.

268. Compared with the Budget Estimate, Assam is the only Province which shows an increase (75) in the expenditure on Civil Works. It was due to the continuation of the extensive repairs to the roads and bridges in the Khasi and Jaintia hills which suffered most from the earthquake of 1897, and was covered by a reappropriation sanctioned by the Local Administration. The short outlay 4,94 in the Central Provinces, Punjab 5,49 and Bombay 14,99 was the result of the efforts of the Local Governments to reduce ordinary expenditure to provide funds for famine relief works. In the North-Western Provinces and Oudh the expenditure fell short of the Budget Estimate by 9,12 due to the curtailment of expenditure by the Local Government to provide for other provincial needs. In Burma the expenditure on new buildings and roads was somewhat over-estimated. The decrease of 8,56 and 3,57 in Bengal and Madras respectively was mainly due to the withdrawal by the Local Governments for Provincial needs of a large portion of the special grants sanctioned by the Government of India to supplement Provincial resources which had been depleted by the heavy expenditure in previous years on works in connection with famine, plague, and earthquake.

Section K.—BUILDINGS AND ROADS—EXPENDITURE—*concluded.*

Provincial Works—*concluded.*

269. *Civil Officers.*—The expenditure in 1899-1900 exceeded that of the previous year by 3,58, and the Budget Estimate by 2,52. The increase was due to larger contributions having been granted to Municipalities for water-supply projects and other works.

Local Works.

270. *Departmental Officers.*—The expenditure in 1899-1900 was less than that of the previous year by 1,49, and the Budget Estimate by 5,01. As compared with the previous year the decrease was mainly due to the restriction of ordinary outlay in the Central Provinces, Punjab, and Bombay to provide funds for famine relief works.

271. *Civil Officers.*—The expenditure in 1899-1900 exceeded that of the previous year by 5,98. The increase was mainly due to large outlay having been incurred at the close of the year in Bengal and Madras on the construction and repairs of Civil buildings and roads. On the whole the actuals fell short of the Budget Estimate by 1,32. The decrease in the Central Provinces and Bombay was due to the restriction of expenditure owing to famine. In Burma and the North-Western Provinces and Oudh the expenditure was over-estimated by District Boards. The excess of 2 in India requires to be sanctioned.

273. The receipts in India exceeded the Budget Estimate and the actuals of the preceding year by R13,73 or £91,5 and R11,52, or £76,7 respectively. The improvement, as compared with the Budget, was chiefly due to Her Majesty's Imperial Government having been debited with the entire cost of European stores issued to the South African Force, as well as of horses, ponies and mules supplied, in excess of the ordinary peace equipment, to corps and batteries that formed part of the Force; and to a larger issue than was anticipated of medical stores to famine and plague hospitals, and of arms to the Police. The improvement would have been greater but for the decrease in sales of malt liquor, regimental necessaries, and commissariat provisions and stores, owing chiefly to the absence of a large number of British troops on service in South Africa during the second half of the year. The improvement, as compared with the actuals of the preceding year, was also due to the above causes.

274. The receipts in England exceeded the Budget Estimate by 16,2, chiefly in those on account of the Indian Troops Service and in the proceeds of sales of unserviceable stores.

Section L.—ARMY SERVICES—*continued.*

275. The following statement shows separately the ordinary and special charges included under expenditure in India :—

1898-99. Accounts.		1899-1900. Budget.	1899-1900. Revised.	1899-1900. Accounts.
R		R	R	R
	SPECIAL ITEMS :—			
1,05,75	Military operations on the N.-W. Frontier . .	3,89	(a)	(a)
49,20	Other special services .	62,52	60,00	57,25
1,54,95		66,41	60,00	57,25
15,93,96	Other Charges . .	16,24,82	15,79,18	15,66,39
17,48,91	TOTAL .	16,91,23	16,39,18	16,23,64

276. The total Budget provision and actual expenditure for Other Special Services are shown in detail below :—

	1899-1900. Budget.	1899-1900. Accounts.
Charges for—		
Occupation of Chitral and its Communications	22,29	20,80
Wano Garrison	2,53	2,25
Tochi Garrison	7,92	7,08
Gilgit Agency	2,55	2,30
Kajuri Kach and Jondola Garrisons . .	89	99
Kengtung Garrison	1,44	1,08
Kohat-Kurrum Force	9,86	6,61
Burma-China Boundary Commission Escort .	93	65
Khyber Force and Moveable Column . .	14,11	10,72
Mishmi Expedition	...	2,29
North-West Frontier Field operations . .	3,89	2,48
	66,41	57,25

277. The principal savings were under Khyber Force and Moveable Column (3,39), due to the withdrawal of the Khyber Force; under Kohat-Kurrum Force (3,25), due to the maintenance of the Force at a reduced strength throughout the year; under Occupation of Chitral and its Communications (1,49), due to the reduction of the garrison, to the permanent transport employed on the Frontier having partly displaced hired transport in India, and to reduced demands for warm clothing; under Tochi Garrison (84), due to the maintenance of fewer hired camels, to the more extensive use of Government transport for the conveyance of stores, and to less expenditure for warm clothing; and under Kengtung Garrison (36), due to the reduction of the garrison, to favourable rates for food stuffs, and to the employment of Government transport. The charges on account of North-West Frontier Field Operations, under which there was a saving of 1,41, are not shown separately, as they are very small. These savings were partly counterbalanced by the charges under Mishmi Expedition, for which no provision was made in the Budget.

(a) Included under other special services.

Section L.—ARMY SERVICES—*continued.*

278. The details of the reduction of 58,43 in the ordinary expenditure, as compared with the Budget, are shown by the following figures:—

	Budget.	1899-1900. Accounts.	Excess + Reduction—
Army and Garrison Staff	53,27	52,45	—82
Regimental Pay	8,07,73	7,82,80	—24,93
Commissariat	3,55,79	3,46,61	—9,18
Remount	35,54	35,22	—32
Clothing	28,53	22,71	—5,82
Medical	76,97	68,02	—8,95
Ordnance	82,30	74,25	—8,05
Miscellaneous	10,30	11,17	+87
Other heads	1,74,39	1,73,16	—1,23
TOTAL	16,24,82	15,66,39	—58,43

279. The principal causes of the above savings are given below:—

(1) Absence of British troops on service in South Africa, which caused a saving under salaries and subsistence charges, owing to the entire cost of the Force having been borne by Her Majesty's Imperial Government. There were also savings due to credits afforded by that Government on account of stores sent to South Africa, reduced by the cost of the replacement of a portion of the stores and animals sent with the corps and batteries 48,90

(2) Smaller payments of Exchange Compensation Allowance, owing to the actual rates of payment being more favourable than that adopted in the Budget 4,22

(3) The pay and allowances of officers and others, who were transferred to the Civil Department on plague duty, having been charged to that Department 3,37

(4) The purchase of fewer Commissariat-transport animals and young stock, and the payment in England for mules purchased in Italy 3,80

(5) The entertainment of smaller cattle establishments . . 1,05

(6) Low expenditure on medical supplies 3,42

(7) Lapse of the whole or a portion of the special provisions made in the Budget on account of:—

Reserve of compressed fodder for mobilisation arrangements	3,76	
Supply of camel saddles and trestles for the 3rd and 4th Divisions and extra units of the field army	1,84	
Camps-of-exercise and instruction	1,42	
Re-establishment of cantonment hospitals	1,14	
Mobilisation equipment (Barrack Establishment, Supplies and Services)	1,13	
		9,29
		74,05

The more important excesses are:—

Large payments of messing allowance	8,00
Rise in prices of food supplies for men and animals, owing to scarcity	6,00
More Sea Transport charges	2,87
	16,87

Section L.—ARMY SERVICES—*continued.*

280. As compared with the preceding year, there was a saving of 27,57 under Other Charges, and an increase of 8,05 under Other Special Services. The saving was due chiefly to less charges on account of pay of British troops and of Exchange Compensation Allowance, owing to an improvement in the rate of exchange, and the absence of troops in South Africa; to credit afforded by Her Majesty's Imperial Government on account of the cost of local stores issued to the South African Force; to the stoppage of home reliefs, owing to the war in South Africa, and the curtailment of Indian reliefs in consequence of famine and plague; and to fewer medals having been struck than in 1898-99. These savings were partly counterbalanced by large payments of messing allowance, by charges on account of the 27th Bombay Infantry and Head-Quarters Wing, 4th Bombay Rifles, who were on service in Mombassa (East Africa) in 1898-99, during which period all charges on their account were debited to Her Majesty's Imperial Government; by a rise in prices of food supplies for men and animals, owing to scarcity; by more sea transport charges; and by the expenditure incurred in replacing a portion of the animals and stores sent to South Africa. The increase under Other Special Services was due to the formation of the Khyber Force and Moveable Column, and to the Mishmi Expedition, partly counterbalanced by savings under Occupation of Chitral and its Communications, Tochi Garrison and Kohat Kurram Force, due chiefly to the reduction of the garrisons at these places. The charges under this head include 2,48 on account of North-West Frontier Field Operations, as shewn above.

281. The expenditure in England showed a saving, as compared with the Budget, chiefly under Effective charges. The saving was mainly due to a smaller demand for Ordnance Stores than was expected, and to payments not having been made so early as was anticipated, and to a decrease under Indian Troop Service, due to the dislocation of arrangements regarding Indian reliefs, owing to the despatch of Troops to South Africa; partly counterbalanced by charges for the purchase of mules, and by an increase in the pay and expenses of Military Officers studying the Russian language and on special duty.

616,3	GRAND TOTAL	611,8	690,6	719.5

282. There was an improvement of 13,73 in the receipts in India, as compared with the Budget. This occurred, chiefly, under *Remount and Veterinary* (5,68), *Ordnance* (4,26), *Clothing* (2,16) and *Medical Establishments* (97), and was due to the adjustment, by debit to Her Majesty's Imperial Government, of the price of horses and ponies supplied, in excess of the ordinary peace equipment, to the corps and batteries that formed part of the South African Force, and of the value of European stores issued to that Force; the increase under *Medical* was also due partly to recoveries on account of Medical stores issued to famine and plague hospitals. The increase under *Miscellaneous Services* (23) was, chiefly, due to the transfer to this head of the receipts on account of the North-West Frontier Field operations (56) partly counterbalanced by less receipts on account of the Khyber Force and Moveable Column (25), and that under *Widows' Pensions and Compassionate Allowances* (48), to more subscribers having been present in India, and to an increase in the number of donations.

283. The fall of 5 under *Regimental Pay* was mainly due to discharges of soldiers having been discontinued in consequence of the war in South Africa. The decrease (8) under *Commissariat Establishments* was due to smaller sales of Malt Liquor (2,78), and of provisions and stores (78) owing to the absence of British troops on service in South Africa during the latter half of the year; to smaller receipts than were anticipated from the sale of rum (41) and from the new dairy farms at Belgaum and Quetta (35); and on account of the Kheddas (17), due to fewer elephants having been sold; partly counterbalanced by the credit afforded, by debit to Her Majesty's Imperial Government, for the price (2,19) of mules supplied, in excess of the ordinary peace equipment, to corps and batteries that formed

Section L.—ARMY SERVICES—RECEIPTS—*continued.*

XXXIII.—Army—*contd.*

part of the South African Force, as well as for stores (1,15) and departmental charges (77) connected with their issue to that Force; and by the recovery (22) from the Central India Horse on account of advances for the purchase of grain.

284. The receipts in England exceeded the Budget by £14,1 or R2,12 under *Effective Services*, due to increased receipts on account of the Indian Troop Service (£10,6 or R1,59) and from sales of unserviceable stores (£3,5 or R53); and by £2,1 or R32 under *Non-Effective Services*, due to sufficient provision not having been made for the growth of the receipts under Indian Military Service Family Pensions.

2,57	Hill Sanitaria	2,85	2,83	2,72
1,00	Miscellaneous Depôts	1,07	94	92
82	Staff of Local Forces	91	90	90
3	Staff Miscellaneous	3	3	3
86	Special Services	86	85	93
52,75	TOTAL	54,13	53,89	53,38

285. The saving of 75 under this head, as compared with the Budget, was due to less payments of salaries (47), owing to the absence of officers on furlough and on field service in South Africa, to vacancies and to savings in clerical establishments; to less payment of Exchange Compensation Allowance (29); and to less Tour expenses (47) of the Commander-in-Chief and the Lieutenant-Generals commanding the Forces, partly counterbalanced by an excess under *District Commands*, due, chiefly, to too large a deduction having been made in the Budget for probable savings.

Administrative Staff.

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts.
1,59	Personal Staff of the Governor-General, Governors, and Lieutenant-Governors	1,68	1,61	1,59
1,72	Accountant General, Military Department	1,77	1,77	1,82
	Controller of Military Accounts—			
2,71	Central Branch	2,69	2,67	2,70
1,37	Accounts Branch	1,43	1,54	1,51
4,57	Pay Branch	4,54	4,50	4,50
3,41	Commissariat Branch,	3,40	3,41	3,45
79	Commissariat Branch, Rangoon	75	78	74
...	Examiner of Ordnance Factory Accounts in India	50	57	57
2,06	Ordnance and Clothing Branches	1,33	1,39	1,40
1,39	Circle, Field and Pension Pay Officers	1,38	1,40	1,40
75	Inspections, Special Duties, and Probationers	90	70	71
14	Special Services	18	19	20
20,50	TOTAL	20,55	20,53	20,59

286. The small increase under this head was due, chiefly, to law charges incurred in connection with the prosecution of two assistants in the office of the Controller of Military Accounts, Madras Command, for receiving an illegal gratification, partly counterbalanced by a decrease owing to the deduction for probable savings having proved insufficient. The excess of 4 requires to be sanctioned.

Regimental Pay.

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts.
3,85,27	European Army	3,80,38	3,55,14	3,57,38
4,24,73	Native Army	4,27,35	4,21,02	4,25,42
3,00	Special Services	2,76	2,78	2,70
8,13,00	TOTAL	8,10,49	7,78,94	7,85,50

287. The saving of 24,99 under this head, as compared with the Budget, was due, chiefly, to a decrease of 23,96 under salaries and pay, owing to the absence of British troops in South Africa and of three Madras Native Infantry Regiments in the Colonies during the latter part of the year; to the

Regimental Pay—*contd.*

deputation of officers to the Civil Department for plague duty; to the debit to Her Majesty's Imperial Government of deferred pay advanced in India to soldiers extending their colour service, and of the pay of Native infantry detachments serving on the Somali coast and to fewer recipients of Colonels' Allowances; and of 3,14 under Exchange Compensation Allowance. These decreases were partly counterbalanced by increases due to the deduction for short strength of Native Army having proved too high (1,53); to more charges for messing allowance (1,34); and to the grant of a bonus to the men of the 42nd Gurkhas on the transfer of that Regiment from Assam to Abbotabad (43). The saving of 27,50, as compared with the actuals of the preceding year, was due, chiefly, to the adoption of a more favourable rate of exchange for the payment of British troops; to the absence of British troops on service in South Africa; to less payments of Exchange Compensation Allowance; and to more deputations to the Civil Department for plague duty; partly counterbalanced by the charges incurred on account of No. 9 Native Mountain Battery, which was formed in December, 1898, and on account of the 27th Bombay Infantry and Head-Quarters Wing, 4th Bombay Rifles, these troops having been on service in Mombassa, East Africa, in 1898-99 for which period their cost was borne by Her Majesty's Imperial Government.

288. The details of the principal sub-heads of the European Army are given below :—

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts.
97,46	Artillery	95,69	92,54	92,13
39,06	Cavalry	38,09	30,15	30,17
36	Engineers	22	14	15
2,38,00	Infantry	2,37,17	2,22,48	2,25,31
31	Invalid and Veteran Establishment	33	32	32
4,85	Staff Corps, General List of Officers, Unattached and Unemployed Officers	4,55	5,38	5,25
59	Colonel's Allowances	58	37	36
4,64	Other Charges	3,75	3,76	3,69
3,85,27	TOTAL	3,00,30	3,55,[illegible]	3,[illegible]

Under *Artillery* the saving (3,56) ,as compared with the Bugdet Estimate, arose chiefly from reduced charges for pay (2,65) owing to the absence of certain batteries on service in South Africa, to less command, staff and horse allowances (78), to less Exchange Compensation Allowance (35), to short strength of coast defence lascars (45), and to savings in regimental educational establishments (18), partly counterbalanced by increased charges for messing allowances (46) and an increase (40) owing to too large a deduction having been made for probable savings. Under *Cavalry* there was a saving of 5,98 under pay, due to the cause stated under *Artillery*, of 30 under Exchange Compensation Allowance, of 1,60 under command, staff and horse allowances, of 50 under pay of native artificers and followers, of 16 under contract and family allowances, and of 15 under regimental educational establishments and prizes for skill-at-arms, partly counterbalanced by increased charges for messing allowance (78). Under *Infantry* there was a saving of 9,97 under pay. due to the cause stated under *Artillery*, of 1,04 under Exchange Compensation Allowance, of 2,37 owing to the deduction for probable savings having proved insufficient, of 73 under command, staff and horse allowances, of 33 on account of deferred pay, advanced in India to soldiers extending their colour service, having been charged to Her Majesty's Imperial Government, of 18 under contract and family allowances and prizes for skill-at-arms, and of 13 owing to no gratuities having been paid on discharge or on transfer to the army reserve, partly counterbalanced by increased charges for messing allowance, reduced by too large a deduction on account of saving under warrant, non-commissioned officers, rank and file, (2,67) and good conduct pay (20). Under *Colonels' Allowances* the saving of 22 was due to fewer officers having drawn the allowance in India. Under *Staff Corps, etc*, the excess of 70 occurred, chiefly, under Staff Corps, due to a larger number of unemployed and unattached list officers having been present. The decrease, as compared with the actuals of the preceding year, has been explained above.

289. The details of the principal sub-heads under the Native Army are as follows:—

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts.
5,69	Artillery	6,39	6,12	6,25
1,54	Body-Guard	1,60	1,50	1,49
1,27,31	Cavalry	1,26,95	1,26,78	1,26,64
13,25	Sappers and Miners	13,64	13,13	13,12
2,52,38	Infantry	2,55,12	2,50,28	2,53,03
5,52	Annual grant-in-aid of half-mounting	5,43	5,35	5,68
3,70	Kit-money for Recruits	3,12	3,22	3,53
2,57	Hutting-money	3,16	3,16	3,09
8,67	Reserve Forces	7,78	7,41	8,19
4,10	Other Charges	4,16	4,07	4,40
4,24,73	TOTAL	4,27,35	4,21,02	4,25,42

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Regimental Pay—*contd.*

290. The saving under this head, as compared with the Budget Estimate, occurred chiefly under *Infantry*, (2,09), and was due mainly to the absence of three Regiments of Madras Infantry in the Colonies for a part of the year and to short strength (5,04), to deputation of officers on plague duty (1,54), and to less payment of Exchange Compensation allowance (1,05), partly counterbalanced by an increase owing to too large a deduction having been made for probable savings (4,16), and to increased payments on account of command, staff and horse allowance (68) and good conduct pay (63). The saving under *Sappers and Miners* (52) was chiefly due to short strength (22), to insufficient deduction for probable savings (34), and to reduced payment of command, staff and horse allowance (13), partly counterbalanced by increased expenditure on pay of native officers rank and file (19); under *Cavalry* the saving (31) was chiefly due to deputation of officers on plague duty (44), to less Exchange Compensation Allowance (35), and to absence of officers in South Africa (12), partly counterbalanced by an increase due to too large a deduction on account of probable savings (65). The increase of 41 under *Kit-money for recruits* was due to the enlistment of more recruits than was anticipated; that under *Reserve Forces* (41) was due, chiefly, to an increase in the number of reservists, partly counterbalanced by savings owing to the grant of reserve pay, instead of full pay for the month of training, to reservists not called out for training on account of the plague; and that under *Other Charges* (24) was due, chiefly, to the grant of a bonus to men of the 42nd Gurkhas on the transfer of that Regiment from Assam to Abbotabad.

291. Under *Special Services* the small saving of 6 was the net result of reduced charges on account of Chitral and its Communications and an increase on account of the Tochi, Kajuri Koch and Jandola garrisons.

Commissariat Charges.

1898-99. Accounts.		1899-1900. Budget.	1899-1900. Revised.	Accounts.
49,68	Establishment	[illegible]	[illegible]	[illegible]
1,66,87	Supplies .	,77,91	,80,18	72,53
87,28	Services .	91,08	86,57	87,84
28,09	Transport Branch	33,87	36,84	35,38
30,24	Special Services	28,98	29,49	26,45
3,62,16	TOTAL .	3,04,77	3,03,08	3,73,06

292. The saving of 11,71 under this head was the result of savings under all the heads except *Transport*, under which there was an excess of 1,51, due chiefly to a larger outlay on the feed of animals owing to scarcity in the Punjab and Bombay. The saving under *Establishment* was due to the provision for additional officers of the Commissariat Transport Department not having been fully utilised; to the absence of officers on furlough and on service in South Africa; and to the entertainment of smaller cattle establishments. The saving under *Supplies* was due, chiefly, to the credit given to this head by debit to Her Majesty's Imperial Government for the cost of stores supplied to the South African Force, and to reduced charges for rations owing to the absence of British troops in South Africa, partly counterbalanced by higher charges for messing allowance of European soldiers and compensation to Native Cavalry for dearness of forage. The saving under *Services* was, chiefly, in Railway charges, due to less expenditure for conveyance of European troops owing to the suspension of home reliefs in consequence of the war in South Africa; and of native troops, due to the curtailment of reliefs owing to famine and plague; and that under *Special Services* was due, chiefly, to the reduction of the garrison of Chitral and its Communications, and to the maintenance of fewer camels and to Government transport having been largely employed for the conveyance of stores on account of the Tochi garrison.

293. The details of the expenditure under *Establishment* are given below:—

1898-99. Accounts.		1899-1900. Budget.	1899-1900. Revised.	Accounts.
4,73	Supervising Staff	4,94	4,91	4,89
23,63	Executive Establishment	24,77	22,92	23,04
4,14	Ambulance Transport	4,25	4,08	4,20
15,97	Subordinate Establishment	17,77	17,11	17,28
89	Khedda Establishment	81	1,11	1,05
32	Other Heads	39	41	40
49,68	TOTAL .	52,93	50,54	50,86

Section I.—ARMY SERVICES—EXPENDITURE—*continued.*

Commissariat Charges—*contd.*

294. Under *Supervising Staff* the decrease was due, chiefly, to savings in the salaries of officers (13) owing to absence on furlough and to a lower rate of pay drawn, and in Exchange Compensation Allowance (3), partly counterbalanced by higher charges (7) on account of office rent for the Commissary General-in-Chief while at Calcutta, purchase of furniture and telegrams; that under *Executive Establishment* was due to savings in salaries (1,70) owing to the provision for additional officers of the Commissariat-Transport Department having been only partially utilised, to the absence of officers on furlough and on service in South Africa, and to vacancies, and in Exchange Compensation Allowance (15), partly counterbalanced by increased charges for travelling (12) and telegrams (12); and that under *Subordinate Establishment* was due to smaller cattle establishments (1,05) having been entertained owing to a deficiency in the strength of animals, partly counterbalanced by the cost of replacement of water gear stores sent to South Africa (42) and by increased charges for the supply of water (8). The excess of 24 under *Khedda Establishment* was due, chiefly, to the grant of compensation to Karaibari zemindars for relinquishing their right to hunt elephants in their estates in the Garo Hills (30), partly counterbalanced by less expenditure on hunting operations. The increase, as compared with the actuals of the preceding year, was due to the employment of larger cattle establishments, partly counterbalanced by savings in salaries due to the absence of officers and others on field service in South Africa, and to fewer officers having been present on duty.

295. Under *Supplies* the details are as follows :—

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts.
84,87	Provisions for Europeans	92,93	95,46	91,24
15,43	Provisions for Natives	15,82	16,82	15,44
	Compensation to Natives—			
29,67	(*a*) for dearness of provisions . . .	29,72	29,47	29,65
5,51	(*b*) for dearness of forage . . .	5,78	10,19	9,88
1,45	Purchase of Reserve Stock	1,44	1,74	1,61
29,05	Malt Liquor purchased locally	30,77	27,06	29,43
46	Rum	57	71	75
74	Dairy Farms	1,21	1,21	82
...	Contingent Expenses	2	1	...
3,1	*Deduct*—Value of Supplies to other Departments .	*35*	*2,49*	*6,29*
1,66,87	TOTAL .	1,77,91	1,80,18	1,72,53

296. The saving under *Provisions for Europeans* was due, chiefly, to a reduced supply of bread (3,54) and ration articles (3,56), other than bread and meat, due to the absence of British troops in South Africa, to short strength of British troops, to more favourable rates in the Bengal and Madras Commands, and to a reduction of the mobilisation wheat reserve in the Bombay Command, partly counterbalanced by increased charges for messing allowance (4,76), due to Army Order No. 78 of 1899, regarding the date of election of the messing allowance rules having been extended to India, to the arrival of drafts from England, who were already in receipt of the allowance, and to arrear payments; and for supply of meat (12), due to higher contract rates, and to a rise in the prices of food for slaughter cattle.

297. The saving under *Provisions for Natives* (38) was due to more favourable rates in the Bengal and Madras Commands, and to the debit to Her Majesty's Imperial Government for rations supplied to Native troops serving on the Somali Coast, partly counterbalanced by higher rates in the Bombay Command owing to scarcity, and by extra charges on account of Native Infantry detachments at Jask and Charbar, and by larger payments in lieu of rations to native troops and followers in the Quetta District owing to scarcity; that under *Malt Liquor* (1,34) was due, chiefly, to the absence of British troops on service in South Africa; and that under *Dairy Farms* (39) was due to the partial lapse of the special provision for the establishment of three dairies in the Bengal Command, of one at Belgaum and one at Quetta. The increase under *Compensation for dearness of forage* (4,10) was due, chiefly, to scarcity. The large deduction on account of *Supplies to other Departments* was due to the credit to this head by debit to Her Majesty's Imperial Government of the cost of stores supplied to the South African Force. The increase, as compared with the actuals of the preceding year, was due to larger payments of messing allowance and of compensation for dearness of forage.

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Commissariat Charges—*contd.*

298. Under *Services* the following details are supplied:—

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts
3,78	Hire of Transport	3,77	3,37	4,13
2,52	Sea and Inland Water Charges . . .	2,45	2,57	3,22
39,03	Railway Charges	40,70	37,72	36,05
8,18	Grass Cultivation	9,28	8,40	7,95
25,53	Feed of Horses, Battery Mules, Yaboos, Bullocks and Elephants	23,28	24,70	27,22
81	Regimental Equipment and Camp Contingencies .	94	78	91
2,87	Implements, Godown Furniture, etc. . . .	2,51	3,44	3,45
4,56	Other Heads	8,15	5,59	4,91
87,28	TOTAL .	91,08	86,57	87,84

299. The saving under *Railway charges* was due to the suspension of home reliefs of European troops owing to the war in South Africa (3,73), to the curtailment of Indian reliefs of European and Native troops owing to famine and plague (1,28), and to smaller consignments of clothing and Miscellaneous stores (16), partly counterbalanced by larger consignments of ordnance and medical stores (1,00); that under *Grass Cultivation* (1,33), occurred, chiefly, under contingencies due to less harvesting and grass operations, owing to the amalgamation of the Native Cavalry grass farms at Lucknow and Cawnpore with those of the British Mounted Corps. The saving under *Other Heads* was due, chiefly, to the lapse of the special provision under reserves of fodder (3,76), partly counterbalanced by the replacement of fodder issued to the South African Force (32), and by the cost of a large stock laid in at Quetta. The excess under *Feed of horses, Battery mules, etc.*, (3,94), was due to increased charges for the feed of horses, mules and yaboos, owing to scarcity; to replacement of stores sent to South Africa; to smaller supplies from grass farms; and to the feed of horses of the Jodhpur Lancers at Muttra; partly counterbalanced by savings owing to the despatch of a large number of horses to South Africa in connection with the Boer War, and by more favourable rates in the Madras Command. The excess under *Hire of Transport* was due to charges for the conveyance of troops (33), and Commissariat stores (13), owing, respectively, to the use of transport other than Government transport and to larger consignments of stores, partly counterbalanced by smaller consignments of miscellaneous and ordnance stores (6); that under *Sea and Inland water charges* was due, chiefly, to larger consignments of ordnance stores (69), and to more movements by water of native troops (20), partly counterbalanced by smaller consignments of Commissariat and Miscellaneous stores (13), and that under *Implements, Godown Furniture etc.*, (94), was due, chiefly, to the replacement of godown furniture issued to the South African Force, and to increased purchases from Jails. The increase, as compared with the actuals of the preceding year occurred chiefly under *Feed of horses, Battery mules, etc.*, owing, chiefly, to scarcity; under *Sea and Inland water charges* due to larger movements of Native troops and to larger consignments of ordnance stores, by water; and under *Reserves of fodder* due to a large stock having been laid in at Quetta and to larger issues from the reserve; partly counterbalanced by savings under *Railway charges*, due to the causes mentioned above.

300. The details of the charges in the *Transport Branch* are as follows:—

27,51	Depôt and Regimental	33,05	36,04	34,99
58	Ambulance Transport	82	80	39
28,09	TOTAL .	33,87	36,84	35,38

301. The excess under *Depôt and Regimental* was due to feed of animals, owing to scarcity in the Punjab and Bombay Commands; to the cost of animals and stores purchased to replace those sent to South Africa (1,74); to more charges for uniform clothing and transport corps equipment (52); and to an advance of 50 for purchase of mules in Persia; partly counterbalanced by savings owing to short strength of animals, to more favourable rates in the Madras Command, to the lapse of the special provision (1,84) for supply of camel saddles and trestles for the 3rd and 4th Divisions and extra units of the field army, and to Government transport having been employed to a large extent, in place of hired transport. The excess, as compared with the previous year, was due to higher prices of grain and fodder owing to scarcity, and to purchase of articles of gear for the South African Force.

302. Under *Special Services* the saving of 2,53 was due, chiefly, to the reduction of the garrison of Chitral and its Communications, to permanent transport on the frontier having partly displaced hired transport in India (1,00); to the maintenance of fewer camels, and to the employment of Government

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Commissariat Charges—*contd.*

transport for the Tochi garrison (1,01) ; and to less outlay on warm clothing for the Wano Garrison (28) partly counterbalanced by more charges on account of Kajuri Kach and Jandola garrison. The decrease, as compared with the previous year, was due, chiefly, to the reduction of the Chitral, Malakand and Tochi garrisons.

Remount and Veterinary.

303. The details are given below :—

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts
35	Supervising Staff	34	35	36
3,05	Depôt Establishments	3,35	3,07	3,04
86	Veterinary Inspection	87	78	78
2,98	Station Veterinary Hospitals	3,28	2,85	2,75
4	Veterinary Schools	5	5	4
24	Remount Depôt, Garden Reach	25	19	20
13,81	Purchase of Remounts	16,96	21,06	19,08
4,53	Feed of Cattle and Remounts	6,02	5,43	4,36
3,89	Miscellaneous	4,42	4,39	4,61
1	Special Services	...	...	...
29,76	TOTAL	35,54	38,17	35,22

304. The saving under this head was due, chiefly, to less feeding charges (1,66) owing to fewer animals having been maintained at the depôts ; to mules purchased in Italy not having been paid for in India (1,37) ; to the purchase of fewer young stock (98) ; to short strength, absence on furlough and on service in South Africa, and variations in army ranks and departmental grades of veterinary officers (51) ; to the employment of smaller establishments at the depôts (35) ; and to Australian horses having been purchased at favourable rates of exchange (37) ; partly counterbalanced by increased expenditure on the purchase of remounts (4,78) and ponies (9) to replace those sent to South Africa. The increase, as compared with the preceding year, was due, chiefly, to the replacement of horses and ponies sent to South Africa, to more mules having been purchased, and to frequent movement of cattle and remounts.

Clothing Establishments.

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts.
1,08	Superintending Establishments	1,12	1,11	1,08
60	Manufacturing and Store Establishments	71	66	66
	Supplies and Services—			
14,85	Factories	16,22	20,11	14 41
3,65	Regimental	3,68	3,59	3,42
6,30	Compensation in lieu of clothing	6,81	6,78	6,70
23	Special Services	...	...	6
...	*Deduct.*—Value of stores supplied to other Departments	1	5,50	3,56
26,71	TOTAL	28,53	26,75	22,77

305. The saving under this head occurred chiefly under *Factories*, and was due to the non-supply of boots, due in April 1900, to the troops that proceeded to South Africa (45), to the charges on account of the mobilisation equipment of the additional corps included among the extra units of the field army having been partly compiled under *Commissariat Establishment. Miscellaneous* (59) to the absence of troops in South Africa (45), and to the stoppage of home reliefs in consequence of the South African war (32). The saving of 26 under *Supplies and Services, Regimental*, was due to savings in making clothing at head-quarters of regiments, owing to the suspension of home reliefs (46) ; partly counterbalanced by an increased supply of clothing for reserve forces, owing to a large number of men having been transferred to the reserve, and to more kits having been replaced than was anticipated (21) ; that under *Compensation in lieu of Clothing* (11) was due to the absence of troops in South Africa partly counterbalanced by more payments of compensation than was anticipated. The charge under *Special Services* (6) was chiefly on

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Clothing Establishment.—*contd.*

account of the Chitral and Tochi garrisons, for which no provision was made in the Estimate. The large deduction on account of stores supplied to other Departments was due to the credit given to this head, by debit to Her Majesty's Imperial Government, for the cost of local stores issued to the South African Force.

Barrack Establishments.

1898-99. Accounts.		1899-190. Budget.	Revised.	Accounts.
5,24	Subordinate Establishments	5,49	5,40	5,27
2,97	Sanitation of Cantonments	2,20	2,66	2,90
5,11	Barrack Bedding .	5,15	4,56	3,74
3,70	Lighting Charges .	3,78	3,36	3,24
6,12	Miscellaneous . .	7,53	7,26	6,74
43	Special Services .	51	41	36
23,57	TOTAL .	24,66	23,65	22,25

306. The saving of 22 under *Subordinate Establishments* was due to the employment of smaller conservancy, punkha-pulling and tattie-watering establishments, owing chiefly to the absence of troops in South Africa (11), and to no establishment having been employed for the pail depôt at Fort William (9), of 1,41 under *Barrack Bedding*, to smaller purchases than was anticipated; of 54 under *Lighting charges*; to less expenditure on account of oil owing to the absence of troops in South Africa; of 79 under *Miscellaneous*, to the lapse of the special provision for mobilisation equipment, and to smaller miscellaneous supplies to barracks and hospitals, partly counterbalanced by the replacement of stores sent to South Africa, and the cost of laying in a large stock of firewood at Quetta, and of 15 under *Special Services*, to less charges on account of the Chitral and Wano Garrison. These savings were partly counterbalanced by an increase under *Sanitation of Cantonments* (70) due, chiefly, to larger grants-in-aid to cantonment funds, in the Madras and Bombay Commands, on account of plague operations. The saving, as compared with the preceding year, was due to smaller purchases of barrack bedding, partly counterbalanced by larger expenditure on firewood.

Administration of Martial Law.

1898-99. Accounts.		1899-1900. Budget.	Revised.	Accounts.
	Judge Advocate-General's Department—			
61	Head-Quarters	59	58	58
1,42	Commands	1,63	1,46	1,44
1,95	Miscellaneous	2,07	1,98	1,89
	TOTAL .	4,29	4,02	3,91

307. The saving under this head was due chiefly to the absence of officers on furlough, to refund of home advances, to variations in army ranks of officers, and to less prison charges.

Medical Establishments.

308. The charges are classified under the following heads :—

1898-99. Accounts.			Budget.		1899-1900. Revised.		Accounts.
		Medical Establishment—					
2,48		Head-Quarters and Commands	2,64		2,58		2,55
43,38		Districts . .	44,06		41,40		41,54
1,10		Nursing Service . .	1,20		1,00		1,08
2,96		Army Hospital Corps . .	2,88		2,92		2,93

73,40		TOTAL .		77,66		70,14	68,56

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Medical Establishments—*contd.*

309. The savings under the first three and the fifth heads occurred chiefly under salaries and Exchange Compensation Allowance, and were due to the absence of officers and subordinates on field service in South Africa (1,17), on deputation to the Civil Department on plague duty (58) and on furlough, and to short strength of the establishment of nursing sisters. The saving under *Miscellaneous* was due chiefly to the lapse of a portion of the special provision for the establishment of cantonment hospitals (1,14), to fewer military pupils under tuition at medical colleges and schools (9) and to less extra duty pay of nursing orderlies (5); that under *Medical Supplies* was due to smaller demands for medical and surgical stores from Civil hospitals and dispensaries (50), and to less charges for Medical comforts (1,42), dieting sick (1,30) and hospital equipment (46), owing to the absence of troops in South Africa, to smaller issues of extras and to fewer patients having been in hospital; and that under *Special Services* (15) was on account of the Occupation of Chitral and its Communications, due to the withdrawal of two sections of a native field hospital from the garrison. The increased deduction under *Issues to other Departments* (99)was due to the credit given to this head, by debit to Her Majesty's Imperial Government for the cost of local stores issued to the South African Force and to famine and plague hospitals. The decrease, as compared with the actuals of the preceding year, was due to the absence of troops in South Africa, to less payments of Exchange Compensation Allowance and travelling allowances, and to a larger deduction on account of supplies to the South African Force and to famine and plague hospitals, and to the Local Fund and Municipal institutions in the Madras Command owing to their having been supplied from the Medical Store Depôt, with all their stores instead of tinctures and spirituous preparations only, as in 1898-99, partly counterbalanced by more charges on account of the re-establishment of cantonment hospitals.

Ordnance.

310. The charges are sub-divided below:—

1898-99. Accounts.		Budget.	1899-1900. Revised.	Accounts.
	ESTABLISHMENTS—			
3,99	Supervising Staff	4,03	4,02	3,98
18,69	Arsenals and Depôts	18,51	19,23	19,56
24,09	Factories	25,20	24,92	24,97
1,04	Fort Armaments	1,25	1,18	1,15
	STORES—			
14,77	For Arsenals and Depôts	12,84	13,22	13,16
15,21	For Factories	16,97	16,31	16,66
55	Freight	66	56	55
3,46	Other Charges	3,51	3,57	3,68
3,61	Camp Equipage	3,97	5,14	5,16
1,29	Line Gear	1,31	1,22	1,26
	Deduct—			
4,10	Supplies to other Departments	*4,29*	*15,65*	*15,88*
...	Excess Provision on account of Ordnance Stores	*1,66*		
82,60		82,30	73,72	74,25
12	Special Services	6	10	8
82,72	TOTAL	82,36	73,82	74,33

311. The saving under this head was chiefly due to the deduction on account of *Supplies to Other Departments* having been larger than was anticipated, owing to the cost of local stores issued to the South African Force (10,67) and the colonies (92) having been debited to H. M.'s Imperial Government by credit to this head, partly counterbalanced by the special deduction of 1,66 in the Budget to adjust an excess provision made in the Home Estimates on account of Ordnance Stores. The saving under *Establishment-Factories* (23) was due to the deduction for probable savings on account of salaries having proved insufficient; that under *Fort Armaments* (10) was due to savings in Native Establishments, to the charge on account of pay of the armament artificer at Roorkee, provided for under this head, having been compiled under *Pay and Allowances*, and to the absences on leave; that under *Stores for Factories* to smaller supplies of hides and other stores to Harness and Saddlery Factories (1,00), and to smaller local supplies to gunpowder Factories owing to the more extended use of cordite, to less purchase of stores in anticipation of the closing of the factory at Kirkee on 1st April, 1900 (23) and to the smaller purchase of timber for Gun Carriage Factories, partly counterbalanced by larger supplies of copper to the Foundry and Shell Factory for the manufacture of ·303-inch ammunition, owing to the re-armament of the Native army (92); and that under *Freight* (11) was due to smaller consignments of stores having been

Ordnance—*contd.*

made. These savings were partly counterbalanced by excesses under *Arsenals and Depôts* (1,05) due to the employment of extra temporary artificers in arsenals, to the pay for February, 1899, of extra artificers employed in the Bombay and Quetta arsenals having been paid and compiled in 1899-1900 instead of in 1898-99 and to the deduction made in the Budget for probable savings under salaries having proved too high, partly counterbalanced by the absence of commissioned, warrant and non-commissioned officers on service in South Africa; under *Stores for Arsenals and Depots* (32), due to the replacement of stores issued to the South African Force; and under *Other Charges* (17) and *Camp Equipage* (1,19) due to more charges than was anticipated. The decrease, as compared with the preceding year, was due to the larger deduction on account of *Supplies to other Departments*, explained above, and to smaller demands for local stores, partly counterbalanced by increased charges on account of extra temporary artificers owing to more work in arsenals and factories.

Other Effective Charges.

312. There was a saving of 23 under *Ecclesiastical*, due to the pay of a Senior Presbyterian chaplain not having been drawn (10), to the absence of a chaplain on leave (3), to less allowances paid to Roman Catholic chaplains owing to vacancies and variations in rates of pay (8), and to payment of less Exchage Compensation Allowance. The decrease of 14 under *Education* occurred mainly in the charges of the Lawrence Military Asylum. The excess of 2,87 under *Sea Transport Charges* was due to larger payments of passage-money to soldiers and others sent to Paris for treatment at the Pasteur Institute, to officers travelling to Europe by private steamers, owing to the suspension of the Indian Transport Service on account of the war in South Africa (86), and to officers and men moved between Indian ports (20); and to payment for vessels hired for conveyance of troops to England (3,35), partly counterbalanced by savings due to the suspension of the Indian Transport Service owing to the war in South Africa, and to the credit to this head, by debit to H. M.'s Imperial Government, of the value of local stores issued to the South African Force. The saving under *Volunteer Corps* occurred under salaries, due to lower rates of pay of certain adjutants, to vacancies, and to an insufficient deduction in the Budget for probable savings (21); under Exchange Compensation Allowance (5), Camps of Exercise (10), and Grants-in-aid for constructing rifle ranges (4); partly counterbalanced by more charges for travelling due to more frequent inspections (32). The excess of 2,87 under *Sea Transport Charges* requires to be sanctioned.

313. The figures under *Miscellaneous Services* may be sub-divided as follows :—

1898-99. Accounts.		1899-1900. Budget.	1899-1900. Revised.	Accounts.
13,48	Special charges	32,36	25,53	25,91
9,72	Other Items	10,30	10,90	11,17
23,20		42,66	36,43	37,08

314. Under *Special Charges* the variations are chiefly due to the causes stated in para. 277. Under *Other Items* the principal differences, which are mainly due to ordinary fluctuations, are savings under Camps of Exercise and Instruction, owing to several concentrations of troops having to be abandoned on account of famine and plague (1,42), under Contingencies (27), Extra Staff and Command Allowances (10), and cart-hire to Madras native troops during relief (9), and excesses under telegram charges (1,10), under purchase and rent of lands and buildings, owing chiefly to the acquisition of land for the construction of lines for the native infantry regiment at Vakola and of land at Dinapore for military purposes (51), under munshi allowance, owing to more officers and men having passed the test in native languages (16), and under travelling allowances (11). The excess under *Special Services*, as compared with the previous year, was due chiefly to charges on account of the Khyber Force and Moveable Column and the Mishmi Expedition, partly counterbalanced by less charges for the Kengtung Garrison Kohat-Kurram Force, and Occupation of Chitral and its Communications; and that under *Other Items* to more charges for telegrams.

Non-Effective Charges.

315. The saving under *Rewards for Military Services* (2) was chiefly due to a smaller number of medals having been struck than was anticipated, pary counterbalanced by larger payments of allowances for the order of British India; and that under *Military Pensions to Europeans* (4), to less payments of wound gratuities, partly counterbalanced by more charges for wound pensions. The ex-

Section L.—ARMY SERVICES—EXPENDITURE—*concluded.*

Non-effective Charges—*contd.*

cess under *Military Pensions to Natives* (9) was due chiefly to larger payments of pensions to native commissioned, non-commissioned officers and men (44), of gratuities to men of the active reserve and of the regular army and to regimental followers owing to more men having been invalided and discharged with gratuities (29), and of family pensions, owing to an increase in the number of pensioners and to arrear payments (8); partly counterbalanced by less payments of compensation for dearness of provisions to Madras pensioners owing to casualties, to a larger number of pensioners having been employed in Government service, and to the cheaper price of rice during the first-half of the year (66), and of pensions to regimental followers (5). Under *Widows' Pensions and Compassionate Allowances* the saving was due chiefly to casualties (12) and to fewer recipients of Indian Military Service Family Pensions (4). The excess of 4 under *Departmental Pensions* was due to ordinary fluctuations. The excesses of 9 under *Military Pensions to Natives* and of 4 under *Departmental Pensions* require to be sanctioned.

Expenditure in England.

316. The saving in the effective charges in England (357,6) was due to fewer officers having taken furlough to Europe than was anticipated (27,1), to decreases under *Indian Troop Service* (129,8), and *Passage of officers and others not charged to Indian Troop Service* (3.0), owing to the despatch of troops to South Africa, and the consequent dislocation of the arrangements regarding Indian reliefs, and under *Stores for India* (230,1), owing to a decrease in the payments for Ordnance Stores (162,3), partly due to the demands having been smaller than was indicated in the Estimates, and partly to payments not having been made so early as was expected; there was also a decrease in the charges for European Clothing Stores (50,6), mainly owing to reduction of the supply in consequence of the pressure on the War Office through the war in South Africa; partly counterbalanced by increases under *Payments to War Office in respect of British Forces serving in India* (9,4), due to arrear payments, and under *Miscellaneous* (23,3) due to the purchase of mules, and to an increase in the pay and expenses of Military officers studying the Russian language and of those on special duty. Under Non-effective charges there was a saving of 74,6, due chiefly to over-estimates under *Pay and Pensions of Non-effective and Retired Officers of the Indian Service* (74,8), and *Miscellaneous Pensions* (2,6), partly counterbalanced by an excess under *Payments to War Office for Retired Pay, etc., of British Forces for Service in India* (2,9) due to arrear payments,

318. The figures shown under this head represent the surplus or deficit of each Provincial Government in respect of the revenues and charges assigned to it, including Incorporated Local Funds. The differences between the Estimates and Accounts under the various Revenue and Expenditure heads have been explained in detail in the foregoing pages, and the share of these pertaining to the Provincial and Local sections of the accounts for the several groups is given below separately for each province. The Budget provided for an expenditure from Provincial bala[illegible]s, of R 74.59 or £497,3 and from Local balances, R17.83

Section M.—PROVINCIAL ADJUSTMENT—*continued.*

or £119,2, but the accounts show the net Provincial and Local Expenditures less by R56,75 or £378,3 and R4,79 or £31,9 respectively. The actual decrease in the balances in the course of the year therefore amounted to R17,84 or £118,9 and R13,09 or £87,3 in the Provincial and Local sections of the account respectively. Consequently the Provincial and the Local balances being taken together the actual decrease was R30,93 or £206,2. These figures do not, however, give a true idea of the actual transactions of the year, for, in order to produce this result, R3,06,23 or £ 2,041,5 of the total Famine Relief Charges in India amounting to R3,10,68 or £2,071,2, for which Provincial and Local Revenues are in the first instance responsible, was directly charged to Imperial Revenue. Imperial Revenues had also to make special assignments in aid of Provincial Resources amounting to R43,21, to the Central Provinces (19,32), Punjab (95) and Bombay (22,94). It will be seen that even with these grants these three Local Governments closed the year without any Provincial balances. The Imperial Government also made special contribution for direct famine and plague expenditure in Madras and Bombay of R3,49 and 11,43 respectively.

319. The prevalence of scarcity over a large part of India was the chief cause of this unfavourable result. The drawings on Provincial balances exceeded the Budget Estimate in the case of all the provinces except Burma, Assam, Bengal and the North-Western Provinces the famine having had the effect of reducing the revenue. In Burma and Bengal there were improvements under almost all the heads of revenue and expenditure. The former was particularly prosperous during the year. The improvement in Assam was in the receipts under revenue including an assignment of 5 from Imperial Revenues, on account of the allotment of certain elephant mahals in Assam to the Khedda Department, and to savings in expenditure, chiefly under Civil Departments. In the North-Western Provinces a deficit of 8,00 was assumed in the original estimate, but the transactions of the year resulted in a surplus of 8,65 composed of 7,54 under Provincial and 1,11 under Local. This was the result of a saving of 19,45 in expenditure chiefly under Buildings and Roads and Civil Departments, and a decrease of 2,80 under Receipts.

320. As compared with the actuals of the previous year the falling off was mainly due to the short collection of revenue owing to agricultural distress.

435,7	49.—Irrigation Works	566,6	598,2	598,0
—2,7	50.—Miscellaneous Public Improvements .	...	...	...
3,747,4		3,223,4	3,060,8	3,059,6

323. The net lapse under heads 34 and 48 as compared with the Budget Estimate, was £199,1 o ₹29,84, due chiefly to the East Indian Railway Company having raised by debentures £507,9 more tha was provided for in the Budget Estimate. But for this the total expenditure would have exceeded th Budget Estimate by £358,5 or ₹53,78, made up of excesses of £325,5 or ₹48,82 and £ 153,1 or ₹22,9 n the East Indian and Assam-Bengal Railways, respectively, and of less important fluctuations on othe nes. The action of the East Indian and Assam-Bengal Railway Companies in incurring liabilities s argely in excess of the Budget grants allotted was specially brought to the notice of the Secretary (State.

3,306,6	TOTAL	2,636,8	2,444,5	2,437,7

324. As regards *Lines under Construction*, the lapse on the Assam-Bengal Railway, Part I, was due to the estimates by Land Acquisition Officers having been in excess of actual requirements. The excess on the Assam-Bengal Railway, Part II, Construction, was due to a more vigorous prosecution of work than was intended when the estimates were framed. The lapse on the Rungpur-Dhubri line and the Teesta Bridge was due chiefly to delay in starting work and to the slow progress made for want of permanent-way material. The lapse on the Indus Bridge was due to provision having been made for the unspent balance of the Project Estimate, while the works on this railway were completed for a smaller sum. The excess on the Lyallpur-Khanewal Railway was due to works having been pushed on to completion in order to expedite the opening of the line. The excess on the Hajipur-Katihar extensions of the Tirhoot Railway was due to inadequate provision having been made in the Budget Estimate

for the due prosecution of works. The excess on the Ghaziabad-Moradabad Railway was due to an increase in the balance of Stores Suspense Accounts, owing chiefly to under-estimation of local purchases and of stores from England, and to the adjustment of 1,32 on account of sleepers purchased and erroneously accounted for in the previous year. The lapse on the Nowshera-Dargai Railway was due chiefly to inability to get out all the permanent-way material from England in time to be laid on the line before the close of the year. The lapses on the Madura-Paumben and Tinnevelly-Quilon Branches were due to postponement of some of the works on these lines for which provision had been made and also to short outlay on English stores.

325. As regards *Open Lines*, the lapse on the East Indian Railway was entirely due to the Company having raised by debentures 83,62 more than was provided for in the Budget Estimate. The excess on the Rajputana-Malwa Railway was due chiefly to fluctuations in suspense. The lapse on the Eastern Bengal Railway was due mainly to the failure of the Bengal Iron and Steel Co., Barakar, to carry out their contract for the supply of material which necessitated changes in the programme of work involving the restriction of expenditure in India in order to provide funds to cover indents sent to England for the stores required. The excess on the Oudh and Rohilkhand Railway occurred under Stores Suspense Accounts, and was due chiefly to wagon materials from England having been received too late for issue to Revenue before the close of the year, and also to large purchases of coal, timber, and pot sleepers which were not issued to Revenue till after the close of the year. The lapse on the North-Western Railway was chiefly due to less expenditure having been incurred on Ballast and Permanent-way and on Stations and Buildings than was originally intended. The excess on the East Coast Railway was due to the inadequacy of the provision made in the Budget Estimate for works on the Bezwada-Madras Railway which has now been amalgamated with the East Coast Railway system. Under *Other Railways* the net excess of 1,10 was made up of excesses aggregating 2,55 and of lapses amounting to 1,45. The chief excesses were 1,72 on the Cooch Behar-Santrabari Railway and 62 on the Umaria Colliery, the latter being due to an over-estimate of the amount at which the Colliery was eventually taken over by the Rewah Durbar. The principal lapses were 56 on the Dhond-Manmad Railway due to the funds for Bridgework, Fencing, and the construction of plate-layers huts not having been utilized to the extent provided, and 50 on the Bhopal Railway due to work not having been undertaken on the extension of the station yard at Bhopal, and the erection of staff quarters, for which provision was made in the Budget Estimate.

432,4	India	565.5	588,2	587,5
3,3	England	1,1	10,0	10,5

326. The increase in the expenditure during 1899-1900 over that of the previous year was due to a larger grant having been made available for expenditure during 1899-1900, mainly for the vigorous prosecution of works on the Jhelum canal. The excess in India was covered by additional grants amounting to 5,00 sanctioned by the Government of India.

Section P.—UNFUNDED DEBT.

	1899-1900. Budget. R	Budget. Equivalent in Sterling. £	Revised. R	Revised. Equivalent in Sterling. £	Accounts. R	Accounts. Equivalent in Sterling. £
Special Loans	...	...	...	...	—4	—3
Deposits of Service Funds	+3,15	+21,0	+2,44	+16,3	+2,94	+19,6
Savings Bank Deposits	+49,04	+326,9	+36,77	+245,1	+38,21	+254,8
TOTAL	+52,19	+347,9	+39,21	+261,4	+41,11	+274,1

328. Under *Special Loans* the debit of 4 represents the commutation value of Wasika pensions lapsed to Government. The decrease of 21 under *Deposits of Service Funds* was due chiefly to an over-estimate of the receipts of the Bengal Uncovenanted Service Family Pension Fund. The details of *Savings Bank Deposits* transactions are as follows :—

	1899-1900. Budget. R	Revised. R	Accounts. R
Post Office Savings Banks	+36,42	+20,81	+21,84
State Railway Provident Institutions	+7,37	+8,14	+8,36
Civil Engineers' Provident Fund	+3,70	+3,02	+2,87
Forest Officers' Provident Fund	+1,06	+1,23	+97
Police Officers' Provident Fund	...	+34	+50
Financial Department Provident Fund	...	+3	+6
Regimental Savings Banks	—2,24	—15	+29
Special accounts	+2,73	+3,35	+3,32
TOTAL	+49,04	+36,77	+38,21
	£	£	£
Equivalent in sterling	+326,9	+245,1	+254,8

329. The large falling off under *Post Office Savings Banks* (14,58) was due chiefly to larger withdrawals than were anticipated. The variations under *Regimental Savings Banks* depend to a great extent on the transfers of British Regiments between India and England and therefore no accurate estimate can be framed. The *Police Officers' Provident Fund* and *Financial Department Provident Fund* are new funds formed during the year, with the sanction of the Government of India, Finance and Commerce Department. The variations under the other heads were due to the withdrawals being more or less than was anticipated.

ENGLAND	...	...	...	...	25	— 2,5	...	2,6	— 2,6
TOTAL .			— 90,4			+ 17,5			— 455,3

330. The net debit to *Provincial Balances* has been explained in paragraph 318.

331. There were no actuals under *Appropriation for Reduction or Avoidance of Debt*, because the expenditure on Famine Relief exceeded the Budget Grant. The net credit against *Excluded Local Funds* was contributed by India, Bengal, North-Western Provinces, Punjab and Madras. The net credit against *Railway Funds* was due chiefly to the receipts of the Provident Fund having been larger than was anticipated in the Estimate. The character and magnitude of the transactions under *Departmental and Judicial Deposits* render an accurate forecast impossible. The net credit was contri- ed chiefly by India in Public Works Deposits (Railway Revenue), by the Central Provinces in sonal Deposits, by Burma in Revenue Deposits, by Bengal in Civil Court and Personal Deposits in Incorporated Local Funds Debt, Deposits and Advances, by the North-Western Provinces l the Punjab in Public Works Deposits (Railway Revenue) and Municipal Funds, and by Madras Civil Court Deposits and Municipal Funds. There were large payments in India under Military posits, Public Works Deposits (Railway Capital) and Foreign Money Orders, in Assam under Revenue posits, in the Punjab under Revenue Deposits, in Madras under Personal Deposits, and in Bombay er Personal Deposits. The other variations are not sufficiently important to require special explan- on.

332. The net figures entered against the head *Advances* may be divided as follows :—

	Budget.		Revised.		Accounts.	
	₹	£	₹	£	₹	£
Coinage Accounts	+10,00	+ 66,7	+79,60	+530,7	—39,76	—265,1
Other Advances	+ 64	+ 4,2	—45,52	—303,5	— 3,48	— 23,2
	+10,64	+ 70,9	+34,08	+227,2	—43,24	—288,3

333. The increase of ₹49,76 or £331,8, as compared with the Budget Estimate, under Coinage ounts, was chiefly due to a net debit of 92,52 under Bullion Advances owing to an increase in the ince of bullion, including Jodhpur and Baroda coins, at the Calcutta Mint. There was also a net it of 6,09 under Copper Coinage Account made up of a debit of 7,33 owing to a decrease in the ince at credit of the Mint Profit Account, in consequence of the adjustment of the profit on coin sed into circulation during the year. The debit was reduced by a credit of 1,24, being the amount by ch the stock of copper coins and copper at the Mints was diminished during the year. These debits e partly counterbalanced by credits under Mint Certificates of 11,72 and 8,76 against the Calcutta and nbay Mints, respectively, on account of certificates issued for bullion delivered at the Mints for nage, but remaining unpaid on the 31st March 1900, and under Small Coin Depôt Balances (28,37) : to the issue of small silver and copper coins from the several small coin depôts for famine re- rements.

Section Q.—DEPOSITS AND ADVANCES—*continued.*

334. The net debit under *Other Advances* is the final outcome of a number of transactions; the cause of the net debit of R3,48 or £23,2 is however brought out by the following figures:—

	Equivalent in Sterling. R	£
Special Advances	+3,63	+24,2
Permanent Advances	—4,92	—32,8
Account with Foreign States	+5,32	+35,5
Other Advances	—7,51	—50,1
TOTAL	—3,48	—23,2

335. The credit under *Special Advances* was due to the recovery, in Bengal, of Survey and Settlement charges from Wards' estates, and, in Bombay, of advances made to the City Improvement Trust. The debit under *Permanent Advances* was due to the extensive grant of these advances on account of famine operations in the Central Provinces, and that under *Other Advances* occurred chiefly in Bombay under Civil Advances, in India under Advances Recoverable, Marine, in Burma under Forest Advances, and in Madras under Revenue Advances. The credit of R5,32 or £35,5 under Accounts with Foreign States was due chiefly to a net credit in India (9,34), owing to the adjustment of transactions with Berar, partly counterbalanced by a net debit in the Punjab (3,34) owing to the withdrawal of the balance at credit of the Kashmir State, and in Bengal (3,10).

336. Under *Suspense Account* the variations are chiefly on account of fluctuations in the balances in the hands of departmental officers. The main differences were the increase in the balances of the Public Works officers (63,8), and decreases in the balances of the Civil Departmental (25,5), Postal (8,8) and Military officers (2,3).

337. The gross credits and debits working up to the net figures under *Exchange on Remittance Accounts* are as follows:—

Budget, 1899-1900. Sterling Amount.	Exchange. Cr.	Exchange. Dr.		Accounts, 1899-1900. Sterling Amount.	Exchange. Cr.	Exchange. Dr.
			Permanent Debt—			
...	...	...	Other Loans			
...	...	...	Deposit and Advances			
—688,7	...	10,9	Net payments to or receipts from Guaranteed and Subsidized Railways, including remittances to India	—897,7	3,8	
	...	...	Difference between the amounts of miscellaneous remittances recorded in the Home and Indian Accounts respectively	+308,2	...	1,3
			Cash Balance—			
+1,487,1	23,6	...	Increase (—), Decrease (+)	—185,2	8	
	23,6	10,9	TOTAL		4,6	1,3
	12,7		NET		3,3	

338. The following is a statement of the adjustments in the accounts by which the above result was obtained:—

1899-1900. Budget. Sterling.	Exchange.		1899-1900. Accounts. Sterling.	Exchange.
17,000,0	—269,8	Bills drawn by the Secretary of State	19,067,0	+80,3
213,0	—3,4	Net remittances of Railway Capital to India	111,6	—5
—958,1	+16,0	Miscellaneous remittances	1,431,7	—6,0
		Deduct—		
17,006,6	+269,9	Net expenditure in England	16,745,1	—70,5
	12,7	Difference, being exchange brought to account in excess of that involved in the Remittances from India during the year		3,3

339. The difference under *Miscellaneous* was due chiefly to exchange on withdrawals of Rupee advances by subsidised Railways and to the change in the method of adjusting exchange on the Bills drawn by the Secretary of State.

Section R.—IMPERIAL LOANS AND ADVANCES.

	1899-1900. Budget.		1899-1900. Accounts.	
	£	£	£	£
IMPERIAL LOANS AND ADVANCES.	77,4	—85,3	138,8	—845.0

340. The following are the details :—

1899-1900. Budget. Amount advanced. R	Amount repaid. R		1899-1900. Accounts. Amount advanced. R	Amount repaid. R
10,00	1,01	Loans to Native States	1,22,12	1,41
2,00	8,46	„ Presidency Corporations and Port Trusts	...	8,60
...	21	„ Mofussil Municipalities	1,61	2,92
...	1	„ Landholders and Notabilities	82	7,29
...	26	„ District and other Local Committees	...	26

79	1,06	Advances to Cultivators	1,63	52
12,79	11,61	TOTAL	1,26,75	20,82
85,3	77,4	EQUIVALENT IN STERLING £ AS ABOVE	845,0	138,8

341. Under *Loans to Native States* the amount repaid by the Sultan of Muscat was 9 against an estimate of 22 while the Cooch Behar State repaid 81 on account of the Railway Loan against an estimate of 77. There was also a recovery from the Bhavanagar State of 49 which was not anticipated. The Budget provided for a loan of 10,00 to the Rewah State on account of the transfer of the Umaria Colliery; but 9,38 was actually advanced. Owing to the famine the Government of India granted from time to time loans to several Native States, amounting to 1,22,74; the more important advances were (16,50) to Marwar, (55,37) to Berar, and (21,66) to Kathiawar. Part of the advances were paid in cash and part by conversion of the tributes due during the year. Under *Loans to Presidency Corporations and Port Trust* the increase in the receipts was due to the repayment of 13 by the Bombay Port Trust on account of the original debt, not expected in the estimate. The loan of 2,00 to the Madras Harbour Trust provided for in the Estimate was not taken up. Under *Loans to Mofussil Municipalities* the increase under receipts was due to the repayment of 1,00 by the Karachi Municipality and of 71 by the Hyderabad Municipality not foreseen when the Estimate was framed. The payments represent loans taken by the Bangalore Civil and Military Station Municipality (1,00) and the Hyderabad Municipality (61) not provided for. Under *Loans to Landholders and Notabilities* the Budget anticipated a repayment of 1 in India but the recoveries amounted to 4. In Bengal the repayment of the loan to the Prince Ferokh Shah (7,25) by the sale of the mortgaged landed property was anticipated in the Revised Estimate. The charge under this head represents new loans granted to the Thakur of Sawa (20) and Malik Nador of Baluchistan (2). Under *Regimental and Other Loans, Military*, 1,17 was advanced in the Military Department against a provision of 60 in the Estimate; there were on the other hand recoveries to the extent of 82 which were not foreseen in the Estimate. Under *Advances to Cultivators* the decrease in the receipts and the increase in advances were due to the famine. The excess advances were covered by additional grants sanctioned by the Government of India.

Section RR.—PROVINCIAL LOANS AND ADVANCES.

	1899-1900. Budget. £	£	Accounts. £	£
PROVINCIAL LOANS AND ADVANCES .	416,5	—574,5	430,7	—584,3

342. The following are the details :—

1899-1900. BUDGET. Amount advanced.	Amount repaid.		1899-1900. ACCOUNTS. Amount advanced.	Amount repaid.
32,98	6,34	Loans to Mofussil Municipalities	4,21	8,62
...	85	Port Funds	...	60
5,79	79	District Committees	2,63	94
...	66	Landholders, etc.	63	56
83	2,11	Advances under Special Laws	1,92	2,56
46,57	51,72	to Cultivators	78,26	51,32
86,17	62,47	TOTAL .	87,65	64,60
574,5	416,5	EQUIVALENT IN STERLING £ AS ABOVE .	584,3	430,7

343. The most noticeable features in this table are the reduction in the advances to Municipalities the increase in those to Cultivators, and the increase in the repayments by the former.

344. Under *Loans to Mofussil Municipalities* the following are the details by Provinces of advances and repayments during the year :—

	Budget, 1899-1900.		Accounts, 1899-1900.		Excess (+) Deficiency (—)	
	Advanced.	Repaid.	Advanced.	Repaid.	Advanced.	Repaid.
Central Provinces	1,15	46	...	47	—1,15	+1
Burma	1,10	30	...	29	—1,10	—1
Assam	50	1	14	10	—36	+9
Bengal	3,41	98	1,49	1,12	—1,92	+14
North-Western Provinces and Oudh .	4,75	1,98	49	3,16	—4,26	+1,18
Punjab	11,55	1,47	1,28	1,19	—10,27	—8
Madras	5,52	51	52	57	—5,00	+6
Bombay	5,00	83	29	1,72	—4,71	+89
TOTAL .	32,98	6,34	4,21	8,62	—28,77	+2,28

345. The large savings in advances, in all the Provinces, were due to loans provided for in the Estimates not having been taken up. The increase in the repayments occurred chiefly in the North-Western Provinces and Bombay; in the former it was due to the payment of a part of its loan by the Naini Tal Municipality and the latter to a payment by the Karachi Municipality. Under *Loans to Part Funds* the fall in the receipts occurred in Bengal in the payment by the Chittagong Port Fund.

346. The smaller outlay under *Loans to District Committees* occurred in Bengal, due to advances anticipated in the Budget not having been drawn during the year. In Burma a loan of 27 not anticipated was made to the Taunggyi Improvement Fund for the construction of a bazaar. The increased receipts also occurred mainly in Bengal due to larger payments than were provided for by the Durbhanga District Board. Under *Loans to Landholders and Notabilities* the debit includes advances of 18 in Bengal and 44 in Bombay; the latter was granted in consequence of the famine. The decrease in the receipts occurred in Bombay and was due to the Jath State having paid in 1898-99 the instalment due in the year under report Under *Advances under Special Loans* the increase in the receipts occurred in Bengal and was due to large recoveries of drainage and embankment advances. The increase in payments occurred in Bombay and was due to advances made to several Thakoors in Gujarat in connection with the famine.

Under advances to cultivators the following are the details :—

	Budget, 1899-1900.		Accounts, 1899-1900.		Difference Advanced.	Difference Repaid.
	Advanced.	Repaid.	Advanced.	Repaid.		
Central Provinces	4,53	7,25	8,36	6,26	+3,83	—99
Burma	3,00	2,40	2,65	2,66	—35	+26
Assam	34	3	1	3	—33	...
Bengal	2,60	4,81	1,68	5,38	—92	+57
North-Western Provinces and Oudh .	5,45	9,34	7,40	10,46	+1,95	+1,12
Punjab	13,50	5,38	14,00	5,95	+50	+57
Madras	4,90	7,20	3,42	7,44	—1,48	+24
Bombay	12,25	15,31	40,74	13,14	+28,49	—2,17
TOTAL .	46,57	51,72	78,26	51,32	+31,69	—40

347. The larger outgoings in the Central Provinces and Bombay were due to grants of takavi advances in consequence of famine, which also reduced the recoveries; in the North-Western Provinces the failure of the Kharif harvest rendered larger advances necessary, but on the other hand large recoveries of advances made during the famine of 1896-97 and 1897-98 were effected; in the Punjab both the advances and recoveries were larger than those anticipated in the Estimate; in the other Provinces advances were not required to the extent estimated for, while the conditions of the year enabled the agricultural classes to make larger repayments. The advances in excess over the estimate are covered by additional grants sanctioned by the Government of India.

348. As explained in former reports, these are all net sums. The Indian figures represent the difference between the advances taken by the Railway Companies and the credits given to them, chiefly on account of stores used on Revenue account. The English figures represent the difference between the Capital deposited by the Companies with the Secretary of State and the withdrawals for expenditure on Stores, Establishment charges, etc. These figures are necessarily liable to great fluctuations, but the following general explanations are furnished:—Under *Guaranteed Companies*, the differences under India on the Bombay, Baroda and Central India and Great Indian Peninsula Railways were due chiefly to larger issues of stores to Revenue and larger credits from foreign Railways for work done and stores supplied than anticipated. The lapse on the Great Indian Peninsula Railway Extensions was due to work in progress on the Girna Bridge having been impeded owing to delay in the arrival of English stores. Under Madras Railway there was no appreciable difference on the total account in England and India. The increase in expenditure in India was only nominal, being due to an arbitrary reduction in the grant for outlay in India consequent on an over-estimate by the India Office of the expenditure to be incurred in England. The increase on the Madras Railway Extensions was due to more vigorous prosecution of work. Under England there was a lapse of 208,8 in payments on account of establishment and purchase of stores, etc. on all the lines, while receipts on account of subscribed Capital were 752,7 less than anticipated.

349. In India under *Assisted Companies* the lapse on the Bengal Central Railway was due to delay in starting work on the Dum-Dum-Pattipookur siding and to the transfer to the Capital books of the balance standing on the Revenue books at credit of the Rolling Stock Depreciation and Renewal Fund. The excess on the Bengal-Nagpur Railway was chiefly due to heavy payments for earthwork and land in the Calcutta district where work was pushed on with a view to the early opening of the line into Howrah. The provision for the Burma Railway was not worked up to owing to interruptions of work on the Gokteik viaduct and to work on the Bassein-Henzada line having been taken up later. The excess on the Indian Midland Railway was due chiefly to a more vigorous prosecution of the earthwork on the Saugor Katni extension and to the commencement of new works for which sufficient pro-

Section S.—CAPITAL OF RAILWAY COMPANIES—*concluded.*

vision was not made in the estimate. The lapse on the Lucknow-Bareilly Railway may be attributed to the fact that some of the works which were expected to be completed during the year were thrown forward for completion to the following year and in some measure also to the over-estimate of expenditure on sleeper manufacturing operations. The lapse on the Southern Mahratta and Mysore State Railways was due chiefly to small purchases of fuel, to less outlay on Rolling Stock, owing to scarcity of labour due to the prevalence of plague, and to a credit received from Revenue on account of the replacement of existing Roof lamps by Pintch's system of gas lighting.

350. The Branch Line Companies deposit capital in Government Treasuries, and draw against these deposits for expenditure on construction according to requirements. During the year 273,9 were deposited and 339,1 withdrawn as against 350,4 and 358,3, respectlively, provided in the Budget. On the South Behar Railway no capital was deposited against 43,7 provided in the Budget, while the withdrawals exceeded the Estimate by 13,8, owing chiefly to credits from transfer of plant and Surplus Stores not having been realized to the extent anticipated.

Section T.—REMITTANCES.

Special assignments in aid of Plague expenditure	11,42,859	
		34,36,715

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, the 2nd March, 1901.

Fine weather has prevailed generally over the whole country, except on Saturday when light to moderate showers were reported from Berar and the Central Provinces.

The barometer fell slightly to briskly in Kathiawar on Sunday and pressure was relatively low over the north-east of the Arabian Sea, but this low pressure area failed to develop into a depression and disappeared entirely during a general decrease of pressure in North West India on Monday and Tuesday. On Wednesday a shallow depression was shown lying over Sind which remained in the same position during the remainder of the week giving south-easterly winds and light cloud in parts of Upper India. Unusually high temperature was the probable cause of a depression which lay over Central Burma on Sunday, Monday and Tuesday and which gave a few light showers, but temperature fell rapidly in Burma on Wednesday and the depression in this area then filled up. The only depression during the week that was of any importance as a rain-giving disturbance was one that commenced forming in Khandesh on Thursday and remaining practically unchanged in position and character on Friday, advanced eastwards into the Central Provinces on Saturday and partly filling up was shown as a shallow residual depression in the eastern districts of the Central Provinces at the close of the week. It was the cause of numerous thunder and dust storms (in some cases accompanied with hail) in Berar and the Central Provinces, the most important falls reported being 1·29 inches at Chanda, ·83 inch at Seoni, ·82 inch at Pachmarhi and ·80 inch at Akola.

A few scattered showers have been received during the week in the south of the Peninsula and in Ceylon.

Temperature has been unusually low over the greater part of Northern India and of the north of the Peninsula and during the latter half of the week in Burma. The defect has been very large in the central parts of the country and in the north-east of the Peninsula.

Rain.—Light rain has fallen during the week in Lower Burma, the North-Western Provinces Hills, the South and North Punjab, the Central Provinces, Berar, the Bombay Deccan and the south of the Peninsula. The amounts received are all below half an inch, except in South Madras, but have been in excess of the small normal fall of the week in Lower Burma, Berar, the Central Provinces, Malabar, Mysore, Coorg, the Bombay Deccan, South and South Central Madras and the north and central divisions of the East Coast.

The following gives the stations at which more than 2 inches have been received during the week :—

Burma—Pegu	3·00	inches.
Berar—Wun	2·23	„
Madras—Srivilliputtur (Tinnevelly)	2·88	„

This week completes the rainfall period which commenced on 30th December last and which thus consists of the first two months of the year. The rainfall of this period has been excessive over by far the greater part of the country and has been in defect in the divisions of Eastern Bengal, Assam (Surma), Assam (Hills) in the East; and of the West Punjab, Gujarat, Kathiawar and West Rajputana in the west. Rain has not been in defect in any of the divisions of the Peninsula or Burma. The rainfall of the period has been less than 20 per cent. in excess or defect of the normal and hence practically normal in the Brahmaputra Valley, North Bengal and the Baluchistan Hills; and has been more or less in excess in all the remaining divisions of Northern India, the whole

of the Peninsula and of Burma. The actual excess has been largest in the following divisions :—

Punjab Hills . . .	8·13 inches.
Chota Nagpur . . .	4·69 "
Central Provinces (East) .	4·64 "
North-West Provinces (East) .	4·04 "
" (Hills)	3·54 "
East Coast (Central) . .	3·79 "

W. A. BION,
for *Meteorological Reporter to the Government of India and Director General of Indian Observatories.*

SIMLA, *7th March, 1901.*

T. W. HOLDERNESS,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, the 9th March, 1901.

Madras.—The rainfall was fair in parts of Tinnevelly and light in parts of Ganjam, Malabar and the Nilgiris. Water supplies are insufficient in parts of the Deccan, the Central, the Madura and the West Coast districts. Ploughing, sowing and transplanting continue in parts Standing crops generally are in good condition, but paddy is withering or suffering from drought in parts of the Carnatic and North Arcot, and cotton has been damaged by insects or recent rain in parts of Kistna, Kurnool and Tinnevelly. Paddy and *ragi* have been harvested on large areas with moderate outturn. Fodder generally is available, but pasture is scanty in parts of the Deccan, the Central and the West Coast districts. The condition of cattle generally is good. Prices are almost stationary and continue above the warning rates throughout, while those of some of the dry grains are above the scarcity rates in parts of the Deccan, South Arcot, North Arcot and Salem. Prospects generally are fair, but not satisfactory in Salem. Numbers on relief—test workers—Cuddapah, men, 409; women, 478; children, 30; total 917. Weavers relieved—men, 1,682; women, 1,327.

Bombay.—Very slight rain fell during the week in parts of Ahmedabad, Khandesh and Poona. Agricultural prospects are good in Sindh, fair to good in the Konkan and parts of Kaira, Broach, Surat, Khandesh, Nasik, Poona, Satara and Dharwar, and moderate to poor elsewhere. Threshing of autumn crops is nearly over in the Upper Sindh frontier. Standing spring crops have been damaged by locusts or other insects in parts of Sindh and Nasik, and by recent rainfall in parts of Ahmedabad, and are generally suffering from want of moisture except in irrigated lands. Harvesting of spring crops is nearly over in Satara, Bijapur and Belgaum, and is progressing in other districts. Threshing has been commenced in parts of Nasik and Ahmednagar. Cotton picking continues in parts of Broach, Surat, the Karnatak and Baroda. Preparation of lands for next season continues in the Konkan, the Karnatak and the Deccan. The fodder supply generally is sufficient, but is scanty in Bijapur and Belgaum. Agricultural stock are in good condition except in parts of Bijapur. The water supply is getting scanty in parts of Ahmednagar, Poona, Sholapur and the Karnatak. Prices have fallen in eight districts, risen in two districts, and are stationary elsewhere. The price of rice is over normal, but easier than in 1900. The price of *bajri* is below normal in Gujarat, and is considerably over the normal in the Deccan, the Konkan and the Karnatak, and, compared with 1900, is about the same in the Konkan, and considerably easier elsewhere. The price of *juar* is slightly below normal in Gujarat and considerably over normal in the Deccan, the Konkan and the Karnatak and, compared with 1900, about the same in the Konkan, and considerably easier elsewhere. The price of wheat is considerably over normal and about the same as in 1900.

Daily average numbers on relief—British districts—on test works, 764; on relief works, 114,168; dependants, 22,724; total on works, 137,656. In poor houses, 3,591; on village relief, 35,165; total on gratuitous relief, 38,756. Figures for Ahmedabad and Nasik are incomplete. Native States—on relief works, 11,461; dependants, 4,257; total on works, 15,718. In poor houses, 957; on village relief, 720; total on gratuitous relief, 1,677. Figures for Kathiawar are incomplete. Grand total, 193,807.

Bengal.—Rain fell in small quantities in every district except in Howrah, Jessore, Khulna, Backergunge, Noakhali, Chittagong and Palamau. The rain and the cloudy state of the weather has affected the standing crops to some extent in a few districts. The harvesting of the spring crops is proceeding

rapidly. Spring rice is being transplanted and doing well. Cultivation of lands for *bhadoi* rice and jute is in progress. Fodder and water are generally sufficient. The price of common rice has risen in 12 districts, fallen in 10, and is stationary in the rest (24).

North-Western Provinces and Oudh.—General rain accompanied by hail in some districts fell during the week. Spring crops are ripening and are being gathered. Slight injury to standing crops by rain and hail is reported from parts of fourteen districts, by rust from parts of five districts, and considerable damage by hail from two parganas of Cawnpore, one of Banda and two tahsils of Basti. Sowings of extra crops and sugarcane continue. Prospects are favourable. Poppy is flourishing and opium is being collected. Fodder is abundant and markets are well stocked. Prices are almost stationary with a slightly rising tendency.

Punjab.—Rain has fallen in all districts except Mooltan. Ploughings and sowings of extra spring crops are in progress. Sugarcane pressing is still going on in Lahore and is nearly completed in Amritsar. Sowings of sugarcane and cotton and ploughings for other autumn crops continue. Reaping of the rapeseed crop has commenced in Hissar. The condition and prospects of standing crops are generally good, but sunshine is badly needed in Umballa and more rain in Shahpur. Crops have been much benefited by the recent rain in Dera Ismail Khan, and the outturn is expected to be better in Peshawar. The wheat and gram crops have suffered from heavy rain in parts of Umballa; wheat has also been attacked by rust in most districts. The standing crops have been damaged by locusts in parts of Mooltan and by hail-stones in parts of Sialkot. Locusts laid eggs in parts of Dera Ismail Khan, but they are being destroyed. Hail fell in Delhi, but no damage is reported. Cattle are generally in good condition. Pasturage fodder is said to be sufficient in all districts except in parts of Mooltan. Prices are generally unsettled. The price of wheat is rising in Umballa, Amritsar, Shahpur, Rawalpindi, Peshawar and Dera Ismail Khan, falling in Delhi, and is unchanged elsewhere. Wheat is selling from 10 to 12, gram 10 to 13, maize 16 to 23, and bulrush millet 16½ to 25 seers per rupee.

Burma.—LOWER BURMA.—Threshing and winnowing are everywhere completed except in Henzada and Myaungmya, where they continue. Only four districts report damage to exposed paddy by recent rain, *viz*, Pegu 20 per cent., Hanthawaddy 7 per cent., Bassein 5 per cent., and Myaungmya 12 per cent., of the total outturn. The crop estimate of the year will thus be slightly affected. UPPER BURMA.—Cultivation of dry weather paddy continues. Clearing on hill sides in Katha has commenced. Prospects generally are favourable. The price of paddy has risen slightly in Tharrawaddy, Thongwa and Minbu, and fallen slightly in Prome and Rangoon. Elsewhere there is no change.

Central Provinces.—The weather generally was clear and warm in the early part of the week. A little rain fell in Raipur, Sambalpur and Bilaspur and in parts of the Nagpur district. Bilaspur measured one and a half inches. Heavy hail-storms have damaged both the standing crops and the crops on the threshing floor in parts of the Nagpur, Hoshangabad and Bilaspur districts. The prospects of wheat are fair in Damoh, Chhindwara and Bhandara, and the crops may yield a normal outturn in Mandla, while in Bilaspur an outturn below 60 per cent. is expected. The cloudy weather which followed the recent rain in Raipur has produced rust over a wide area under wheat in that district. In Saugor, however, the rain has washed away the rust spores, and the plants will recover with the clear weather that has supervened over the province generally. Reaping of wheat, gram and other spring crops is in progress. Preparation of land for autumn sowings continues in Nimar and Sambalpur. Fodder and water are ample. Prices are generally easier except in Betul, Narsinghpur and Chhindwara. The price of wheat is still high in Chhindwara and Chanda. The cheapest prices are—wheat 10¾, gram 12, rice 13½, and *juar* 20, seers per rupee. The dearest prices are—wheat 6½, gram 8, rice 8, and *juar* 13, seers per rupee. There are still 7 persons on relief in the Saugor poor-house, and 645 are on village relief in Balaghat.

Assam.—Slight rain fell in all districts except in Cachar and the Khasi and Jaintia hills. Gathering of mustard is nearly finished. Pressing of sugarcane is in progress. The outturn of sugarcane is good in Lakhimpur and fair in other districts, and of mustard good in Lakhimpur, fair in Sibsagar and bad in other districts. Pruning of tea is nearly finished. Land is being ploughed for early and late rice. The condition of cattle is generally good. Fodder is insufficient in the Khasi and Jaintia hills and in parts of the Surma Valley. Water is insufficient in those places and in parts of Nowgong. Prices—common rice, Silchar 9 to 10, Dhubri, Sylhet and Dibrugarh 10, Gauhati 12½, Tezpur 10$\frac{10}{16}$ and Nowgong and Sibsagar 12, seers per rupee.

Mysore.—No rain fell in the Civil and Military Station. Standing crops are in good condition throughout except in parts of Shimoga. Paddy, *ragi*, Bengal gram and wheat have been harvested in some parts and in other parts paddy is being sown. Prospects are good in Bangalore, Mysore, Kolar, Kadur and Chittaldrug, and are fair in Hassan. Prices are stationary at Bangalore and Mysore, have risen in Chittaldrug and parts of Kadur, and have fallen throughout other districts. Cattle are healthy except in parts of Mysore. Water and fodder are available except in some parts of Shimoga and in Mysore, and the Hansur Taluks where scarcity of water is being felt, and in Chittaldrug where water is gradually getting scarce.

Coorg.—Threshing of rice has been completed. Unusual rain in February has caused some of the coffee to blossom rather early. Prices of food grains are normal. Water and fodder are sufficient.

Berar.—The days are warm and the nights cool. Harvesting of winter crops continues. Breaking up of land for monsoon crops is in progress. Fodder and water are adequate to wants. Prices are fluctuating.

Hyderabad.—The rainfall during the week amounted to 4 cents, the total from 1st January is 1 inch 81 cents. Harvesting of spring crops continues. Winter rice is in good condition. Grain prices are steady. Total number of persons on relief works, including dependants, 1,632; gratuitously relieved, 766. Prices—wheat 5½, coarse rice 7⅛ and *juar* 13½ seers per *halli* rupee.

Rajputana.—The average rainfall in cents was in Bikaner 20, Kherwara 17, Deoli 32, Tonk 17, Bundi 83, Kotah 31, Jaipur 9, Kishengarh 34, Karauli 8, Ajmer 14. Agricultural operations are satisfactory. Standing crops are generally in good condition, but some damage has been done by hail and insects in Kotah and Jhallawar and by rats in the hilly tracts of Mewar. Cattle are in good condition. Fodder is ample. Cheapest prices range between 12 to 32½ seers per rupee. Number on gratuitous relief—Native States, 298.

Central India.—The rainfall was 22 cents in Bundelkhand and none elsewhere. Agricultural operations are in progress everywhere. The standing crops and the probable outturn are fair in Bundelkhand, Baghelkhand and Malwa, and good elsewhere. Crops have been damaged slightly by insects in Gwalior and Bhopawar, by hail in Bhopal, by rust in Baghelkhand and by drought in Malwa. Agricultural stock are in bad condition in parts of Malwa, but good elsewhere. The condition of opium is good in Gwalior, Bhopal, Malwa and Bhopawar. Prices of food grains are steady in Gwalior and Bhopal, normal in Bundelkhand, above average in Baghelkhand and high in Malwa. Average prices—in Gwalior 16-12 to 27, in Bundelkhand 11 to 15, in Malwa 17-9, in Bhopawar 16, seers per rupee. Numbers on gratuitous relief—Jaora, 40. Number on Jobat and Alirajpur relief work, 2,266. The report from Indore has not been received.

Baroda.—The standing spring crops are in fair condition, but the outturn is estimated to be below normal. Agricultural stock are in fair condition. Prices—*Bajri* 32, juar 32, wheat 16, rice superior 13, inferior 21, pounds per

rupee. Number of persons on relief works—Baroda territory—12,593 and gratuitous relief, 4,446.

Kashmir.—The weather was chiefly rainy during the greater part of the week, but it has been bright and sunny for the last two days. Prices are normal, rice being 24 seers the rupee.

Jammu Province.—No rain fell. Prices of wheat are stationary, and that of maize falling slightly. Wheat is selling from 11½ to 17½ and maize from
of standing crops is good. Fodder is

snow and hail on the higher peaks
he price of rice is 8½ seers per rupee.

lief during the preceding and present
weeks in each province is shown in the following table :—

T. W. HOLDERNESS,
Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

(FAMINE.)

Return of the number of persons in receipt of relief in districts affected by scarcity.

NOTE.—The figures are compiled from returns obtained from Local Governments and Political Officers, and give the corrected District details of th vincial totals published weekly in the Crop and Weather Summary of the *Gazette of India*.

Non-labouring children and other dependants of relief workers are classed as on relief works when distinguished in the local returns from person: uitously relieved in poor-houses or at their homes. Weavers relieved in their own trade are shown under "Gratuitous Relief."

The dates at the head of the table are the dates of the *Gazette of India* in which the Provincial [illegible] published. The [illegible], however, actuall w the numbers on relief in each preceding week.

FAMINE WORKS AND PROGRAMMES.

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture, No. $\frac{3}{61-1}$, dated Calcutta, the 13th March 1901.

READ—

Resolution of the Government of India, No. 11—294-3 Famine, dated 20th December 1900, regarding the appointment of a Famine Commission.

RESOLUTION.

In the orders concerning the appointment of the present Famine Commission the Governor General in Council stated that he had decided to reserve for separate inquiry the question, in its technical aspect, of the relief programmes of public works existing in the several provinces at the outbreak of the famine and utilised for the employment of famine labour. This question, it was stated, had been carefully considered by the Famine Commission of 1898, and had been made by that body the subject of several valuable recommendations. "In pursuance of these recommendations", it was explained, "an inquiry is necessary as to the utility of the public works which have been undertaken in the late famine, and as to the measures which should be taken to complete and maintain such of them as are found to be of permanent advantage. And inquiry will also be necessary as to what additional irrigation and water-storage projects of a protective nature can be devised in each province for inclusion in the relief programmes and for eventual execution either in times of famine or at other times by funds allotted from the annual famine grant. The investigation and preparation of such projects require to be placed on a more systematic and permanent basis and to be more closely and unremittingly pursued. The inquiries which the Governor General in Council has in view under this head are, however, of a technical character, and he considers that it will be more convenient, instead of remitting them to the Commission, to make special arrangements in the Public Works Department for their prosecution."

2. The Governor General in Council has further considered these subjects and is deeply impressed with their importance. He regards it a matter of pressing necessity to secure that famine labour shall be put to the best possible use: and he regards it as even more imperative to see that the country is protected, so far as may be practicable, from the desolating effects of drought by the intelligent utilisation to the fullest extent of every potential means of irrigation. He observes that from the great Southern India famine down to the present day the maintenance in each district and province of a programme of relief works of permanent utility has been continuously advocated, and all the provincial Codes contain rules intended to secure this. Yet each successive famine has found these programmes imperfect and unreliable. The Government of India do not overlook or underrate the very great difficulties which are encountered in finding in districts most exposed to drought a sufficient number of useful works which will satisfy the requirements of famine relief, and they are aware that to this circumstance must to a great extent be ascribed the failure of the rules of the Codes to effect their object. But the very existence of these difficulties, and the prominence which has been given to them in recent famines, make it all the more necessary that the whole subject of famine relief programmes should be more fully investigated. It is unfortunately the case that in past famines money has been expended on works of little utility, undertaken on the spur of the moment on scanty and doubtful data, because no properly-prepared projects were ready, and because no systematic effort had been made beforehand to ascertain the needs and the

natural capabilities of the tract, more particularly in the matter of protective irrigation works. The suitability of such works for the employment of famine labour is universally recognised, but they require slow and careful investigation, and cannot be rapidly planned like a road or a railway track to meet a sudden demand for work. If they are not made ready beforehand, they will be insufficiently utilised in times of famine, or else, if they are utilised, they are not unlikely to be found on completion to have been based on erroneous or imperfect information. There is a general consensus of opinion, to which the Famine Commission of 1898 gave expression, that despite the difficulties which surround the question, famine labour might be turned to better advantage, if more systematic endeavour were made in ordinary times to plan out works of this kind which, though they may not be strictly remunerative, would at least be of some permanent utility.

3. As regards the better protection of the country from drought the Governor General in Council is not insensible to the progress which has been effected since the Famine Commission of 1878 made an exhaustive survey of the subject, in perfecting the great irrigation works then in operation and in completing others of equal, if not greater, magnitude. Much has also been done to restore less important works and to add to their number. The Famine Commission of 1898 were able to state that in the 20 years' interval the area irrigated in British India from major and minor State irrigation works had risen from 32 million acres to 46 million acres, and that the principal recommendations of the earlier Famine Commission under this head had been carried out In a valuable survey of the work still remaining to be done according to the latest information the Commission of 1898 reported that projects for other large irrigation canals—chiefly in the Punjab and Sindh—of the productive class of an aggregate estimated cost of Rs. 12 crores and calculated to irrigate nearly 4,000,000 acres were awaiting execution. These will be prosecuted as rapidly as circumstances permit. The Commission came to the conclusion that within the districts which are most liable to famine or in which the pressure of population is most severe, no large works of a productive character remained to be carried out. They, however, advised that for the greater security of these areas as many suitable protective works as could be found should be gradually constructed from the annual Famine grant. They expressed their inability to specify particular works suitable for the purpose, but they recommended that investigations should be undertaken in all provinces, and that the Famine grant should bear the cost of the survey and preparation of such projects. In pursuance of this recommendation lists of possible projects have been called for and obtained from Local Governments, and two or three schemes have been definitely taken up. But speaking generally, this most important subject remains very much in the position in which the Commission found it, and no proper steps have yet been taken to give effect to the Commission's recommendation.

4. The facts here summarised have satisfied the Government of India that the two questions of relief works programmes and the better protection of the country by irrigation outside the great canal systems of the "productive" class require immediate attention, and that they necessitate the institution of special inquiries in the several provinces. The Governor General in Council will hereafter determine by what agency the inquiry should be made, but he has decided that it shall be instituted during the next cold weather season, and he wishes that in each province measures be at once taken to prepare materials for it. In provinces where relief works have lately been in progress, the inquiry will embrace the character and utility of these works, and will decide what works deserve to be completed or maintained, and what works are of little or no permanent value. In all provinces the inquiry will be concerned with the character and utility of the existing programmes of relief works, and with the arrangements permanently required for reconstituting these programmes, and for maintaining them in the most efficient manner. The inquiry will further extend to the larger question of protective irrigation in each province, and will bring under critical examination, which will be supplemented, so far as may be practicable and advisable, by local inspections, any projects or schemes (other than large sanctioned works of the productive class) which have been

prepared or suggested in the Public Works Department or by Revenue officers. The Governor General in Council is convinced that many opportunities exist in various parts of India, which are at present not utilised or are very imperfectly utilised, for minor canals, storage reservoirs, and other irrigational works on a comparatively small scale, which may or may not be "productive" in the technical sense of the term, but which will afford material protection from drought. The utilisation of hill streams, or the formation of storage reservoirs, in such districts as Gurgaon, Shahpur or Jhelum in the Punjab, Champaran and Durbhunga in Bengal, British Bundelkund in the North-Western Provinces has, for instance, been intermittently considered from time to time, but on no methodical system and without appreciable result. If these matters were to receive the continuous and systematic attention which they deserve, instead of being dependent on the personal interest taken in them by individual officers, much more in all probability would be accomplished. Again, there would seem to be scope for improvement in the matter of well-irrigation, and inquiry is required as to whether the Government might not give more assistance to owners and occupiers in this respect by means of loans and of expert advice, or by grants-in-aid from the annual Famine grant.

5. The inquiry which the Governor General in Council contemplates should prove of real use and value with regard to these comparatively humble kinds of irrigation-works, and it is more especially in respect of such works that material ought now to be collected in each province before October next. Fully worked out schemes are not necessary nor could they be prepared within the time available. But sufficient information should be collected to enable a judgment to be formed as to how far the irrigation possibilities of the various provinces have so far been utilised and with what results, and what the future possibilities are. To some extent preliminary projects might be prepared. The main duty of the inquiry will not be to pass a final professional judgment on particular projects, but to deal with the irrigation problem of each tract in its broader aspects, with reference historically to what has actually been done and to recorded results, with reference next to such completed or half completed or conceived projects as may exist, and with reference, lastly, to the need of and scope for irrigation considered in connection with the physical and climatic peculiarities of the region. Even if the inquiry should prove that the possibilities are less than enthusiasm may be inclined to believe, it will enable an exact opinion to be formed as to the foundation for the charges, not unfrequently heard, that the Indian Government is indifferent to a proper utilisation of the gifts of nature. The Governor General in Council, however, believes that more positive results than this will be attained, and that a path of progress may be marked out which it should be possible prudently and consistently to pursue.

6 To prepare for the inquiry the following steps should be at once taken :—

(1) A return for each province should be prepared by October next of all irrigation works completed, begun and proposed, with a report as to the efficiency of the works in operation, and as to the probable results, so far as information is available, of works not in operation. With regard to suggested works which have not been commenced, it should be stated regarding each how far the information is complete or incomplete, and, if incomplete, whether further investigation seems desirable.

(2) An officer of the standing of a Superintending Engineer, or a senior Executive Engineer who would be temporarily given that rank, with possibly one or more Engineers of lower standing to assist him, and with a suitable establishment, should be placed on special duty at once in each province to examine localities where protective irrigation works have been proposed on apparently reasonable grounds, and to collect and report all available information regarding them. Such reports would not be conclusive in any way, but would serve to ascertain and bring together all projects which are on the information at hand sufficiently promising

to merit a detailed examination based on proper surveys and detailed inquiries.

(3) Such progress as is possible should be made between now and October in carrying out the necessary surveys and preliminary estimates for any of the more promising projects of a protective nature regarding which the Local Governments may have information.

(4) In tracts where drainage or flood embankment is more required than irrigation, information should be collected as to any projects of the kind which would be suitable for entry in the relief work programmes.

7. The Governor General in Council agrees to the whole cost of these reliminary investigations being charged to Head 35.—Famine Protective Vorks—in the accounts. Local Governments will be at liberty to make the est arrangements possible in each province for the necessary staff. Engineers and Subordinates temporarily entertained for the purpose may be mployed either on the inquiries themselves or in the place of officers of the ermanent staff detached for this duty. An estimate of the expenditure to e incurred should be submitted for sanction, but in the meantime steps should e taken without delay to depute the staff necessary for the inquiry.

ORDER.—Ordered that a copy of the foregoing Resolution be forwarded to all local Governments and Administrations for information and necessary action, and to the Finance, Public Works and Foreign Departments of the Government of India for information.

Ordered also that it be published in the Supplement to the *Gazette of India* for general information.

T. W. HOLDERNESS,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

CENSUS OF INDIA, 1901.

No. 34—51.

Extract from the Proceedings of the Government of India in the Home Department (Census),—under date Calcutta, the 15th March 1901.

RESOLUTION.

THE third general Census of India was taken on the night of the 1st March 1901. The selection of the particular date was determined by several considerations. The moon was at the full on the 5th March, so that there was light enough on the 1st to enable the Census officers to complete the work of checking the schedules before midnight. It was also necessary to avoid the anniversaries of great religious festivals and fairs, and the nights regarded as auspicious for marriage ceremonies or for bathing in the sacred rivers. On these occasions large numbers of people spend the night away from their homes, and the accuracy of a census carried out under such conditions would be open to much doubt. As it was, a fair irregularly organised at Ajodhia in Oudh shortly before the Census promised to give some trouble and to vitiate the statistics for the neighbouring districts; but the difficulty was got over by judicious arrangements made by the Local Government in consultation with the Census Commissioner, and successfully carried out by the Deputy Commissioners of Fyzabad, Gonda and Basti.

2. The operations of the present Census embraced for the first time the Shan States, the Chin Hills, the frontier of Upper Burma in the districts of Bhamo and Katha, the Himalayan State of Sikkim, the Kurram Valley, the troops stationed in Swat, Chitral, Drosh, Dir, Wano and the Tochi valley, the Bhil country in Rajputana, the scattered island settlements of the wild Nicobarese and Andamanese, and the whole of the Baluchistan Agency including the country of the Marri and Bugti tribes and the territory of the Khan of Kelat and the Jam of Las Beyla. They extended in fact to the whole of the Indian Empire with the exception of West Manglün and the trans-Salween Northern Shan States, which were affected by the outbreak of the Wa tribe, and certain tracts in the Baluchistan Agency, where tribal disputes and the possibility of disturbances rendered it inexpedient to attempt to take a census.

3. In the greater part of the country now enumerated for the first time and in certain forest and desert tracts where counting by night must always be impracticable, the regular procedure was modified to a varying extent. In some places the enumeration was conducted by the standard schedule, but was finally tested on the afternoon of the 1st or the morning of the 2nd March, so that it was not, strictly speaking, synchronous with the enumeration of the rest of India. In other places the Census officers recorded the ordinary resident population on the system followed until recently in some European countries, and a final check was either dispensed with altogether or was carried out with special precautions against the danger of counting people twice over. In most of these tracts the full schedule was used, but in the administered districts and tribal areas of the Baluchistan Agency and in the Andaman and Nicobar Islands, the standard form was modified to suit the simpler conditions of tribal life. Lastly, in the hills to the east of Manipur, in Karenni, in the Kachin Districts of the Northern Shan States, in certain Kachin villages of the Myitkyina District, and in the Pakokku Chin Hills, the number of inhabited houses was ascertained or counted for the whole tract and the population of a certain number of typical villages was enumerated carefully with the object of determining the average number of persons per inhabited house. The population of the entire tract was then estimated by applying this average to the number of houses.

4. Subject to the minor local variations explained in the last paragraph, it may be said that for Census purposes the whole of India was divided into blocks, each of which contained from 30 to 50 houses and was in charge of an enumerator. Above the block came the circle, a compact group of from 10 to

15 blocks, or about 500 houses, under a supervisor, who was responsible for the work of all the enumerators in his circle. Circles were grouped, according to thanas, taluks or other recognized administrative divisions, into charges under charge superintendents, who exercised general supervision over the Census operations and tested a large proportion of the work of their subordinates.

During January and February—the precise period varied with circumstances—the enumerator wrote up the Census schedules for all the persons in his block ; and this record was checked and corrected by the supervisors and superintendents and by officers of the district staff. On the night of the 1st March the enumerator went round his block, and brought the Census up to date by striking out the names of people who had died or left the block, and filling up the papers for fresh arrivals and newly-born infants.

On the morning of the 2nd March the enumerators of the various blocks met the circle supervisor at a place previously arranged, and prepared the first totals of their blocks so as to show the number of occupied houses, males, females, and total population for each block. The supervisor combined the block totals into a circle total and sent this on to the charge superintendent, who did the same for his charge and reported the charge totals to the District Officer. The charge totals were then combined under the supervision of a Gazetted Officer, specially deputed for the purpose, into the district total which was telegraphed to the Provincial Superintendent of Census and the Census Commissioner for India. The State of Rampur in the North-Western Provinces reported its total population on the morning of the 2nd March ; and all the returns for the Central Provinces were sent in by the 7th March.

At every stage the figures were added up by two persons working independently, and special precautions were taken against the omission of circles or blocks. In 1891 the first totals, which were completed within five weeks from the date of the Census, differed from the finally corrected returns by only ½ per cent., or five persons in every thousand of population.

5. The general results thus reported are set out by Provinces and States in the table attached to this Resolution, which shows that the population of India including the Native States has risen since 1891 from 287,317,048 to 294,266,701, or by 2·42 per cent. By deducting for the purpose of comparison the population of tracts now enumerated for the first time, the proportionate increase for the ten years is brought down to 4,283,069, or 1·49 per cent., as compared with 11·2, the actual rate of increase between 1881 and 1891. This result is in the main due to the figures in the Native States, which have fallen from 66,050,479 in 1891 to 63,181,569 in 1901, or a decrease of 4·34 per cent. The figures in British India in the corresponding period show an almost equivalent rate of increase, having risen from 221,236,569 in 1891 to 231,085,132 in 1901, or an increase of 4·44 per cent. The statistics reflect the vicissitudes of the period to which they relate, but it would be premature to conjecture how far the decline in particular tracts is due to enhanced mortality and impaired fertility, or to emigration induced by high prices and the pressure of population on the land.

6. The Governor General in Council desires to acknowledge the services rendered on this occasion by the Census Commissioner, the Superintendents of Census Operations, the district officers, and the various grades of local and village officials both under the British Government and in the Native States. His thanks are also more especially due to the large number of private individuals, belonging to all classes of society, whose diligent co-operation with the officers of Government in a matter of public interest has rendered it possible to declare, within a fortnight of their completion, the results of census operations extending over nearly sixteen hundred thousand square miles of country and relating to nearly three hundred millions of people.

ORDER.— Ordered that a copy of the Resolution be forwarded to all Local Governments and Administrations, to the Departments of the Government of India, and to the Census Commissioner for India, and that it be published in the Supplement to the *Gazette of India*.

FINANCIAL STATEMENT FOR 1901-1902.

PART I.

INTRODUCTION.

1. IT is my duty to lay before the Legislative Council statements showing the actual financial results of the year 1899-1900: the results according to Revised Estimates for the year 1900-1901; and the Budget Estimates for the coming financial year 1901-1902.

2. In their briefest form and leaving out Capital, Debt, and Remittance transactions, the figures are as follows:—

	1899-1900 (Accounts).
	£
Revenue	68,637,164
Expenditure (charged against Revenue)	65,862,541
Surplus	2,774,623

	1900-1901 (Revised Estimate).
	£
Revenue	75,166,000
Expenditure (charged against Revenue)	73,525,600
Surplus	1,640,400

	1901-1902 (Budget Estimate).
	£
Revenue	72,191,900
Expenditure (charged against Revenue)	71,501,000
Surplus	690,900

3. Before proceeding to the detailed consideration of the figures composing the above totals, I think it would be well to explain a slight modification of system which we have decided to adopt in our Accounts.

Changes in the form of Accounts.

4. We have had under consideration the advisability of some simplification in the General Statement of Accounts and Estimates of Revenue and Expenditure, and Receipts and Disbursements.

5. It has appeared to us that by submitting this Statement under two heads, separating Ordinary Revenue and Expenditure, from Receipts and Expenditure on Capital Account and Debt and Remittance transactions, the general result will be made clearer to the public.

6. We have therefore, with the consent of the Secretary of State, adopted a form showing, first, all purely Revenue Receipts, and Expenditure charged against the same, and indicating differences between the respective totals as 'surplus' or 'deficit' according to circumstances. We then show separately Capital Receipts and Expenditure, the Debt and Remittance transactions, and the opening and closing cash balances, including in the proper columns, the surplus or deficit resulting from the difference between Ordinary Revenue and Expenditure.

7. This change is not in itself of great importance, but I think that it offers the advantage of presenting the Accounts, in a more readily intelligible form, and, moreover, that it is technically correct.

8. It would seem expedient to strike a balance at the end of the first section of the Statement, to show the difference between Ordinary Revenue, and Ordinary Expenditure charged against that Revenue, as Surplus or Deficit, in the body of the account, and to make a very marked distinction between the two main heads of the Statement, (1) Ordinary Revenue and Expenditure charged against Revenue and (2) Capital, Debt, and Remittance transactions. The final result of the second section of the Statement is the closing cash balance in hand at the end of the financial year.

9. We have at the same time adopted certain minor changes which I will proceed to indicate.

10. There seems no reason why the comparatively unimportant expenditure on "Construction of Railways charged against Revenue, in addition to that under Famine Insurance", should be shown separately in the General Statement, which is designed to exhibit only the leading and important figures. The expenditure under this head is now insignificant in amount and is either "Provincial" or "Local." We have therefore combined it with that under Buildings and Roads, giving to the group the title of "Other Public Works."

11. In view of the importance of the heads Post Office, and Telegraph, the figures for which are specially watched by many observers interested in the general and economic progress of a country, we think there will be an advantage in giving a separate line to each of them, even in the General Statement, and, in view of the decision to treat the profits of coinage specially, we think it desirable also to show the Mint figures separately.

12. Further, with the object of bringing together all the entries connected with capital expenditure on Railways and Irrigation Works, we have adopted another change which will, in our opinion, be a distinct improvement. It is to group together under the heading "Railway and Irrigation Capital not charged to Revenue," the figures relating to the Capital of Railway Companies, which are at present shown under "Debt, Deposits and Advances," and those for the similar direct capital transactions of the Government, which are now shown under the heading "Expenditure not charged to Revenue." We shall thus have a perfectly distinct Capital account, with the advantage of showing in one place, the whole capital outlay on railways, whether by Government, or through Companies.

13. Being convinced of the value and improving position of the Government property in railways, we are anxious that the Railway Accounts should be readily understood by the investing public, and we consider the changes relating to railway accounting, now proposed as a step in the direction of attaining desired simplici[illegible]n a somewhat complicated technical question of accounting.

Accounts, 1899-1900.

14. The closing of the Accounts of the financial year 1899-1900 shows an improvement in Actual Receipts of £712,164 over the Original Estimates and £104,764 over the Revised Estimate, as submitted by my predecessor last year.

15. The differences between the Original and Revised Estimates were explained by Mr. Dawkins last March, and the differences between the items of Revenue in the Revised Estimate and those of the final Accounts are insignificant and call for no special remarks. I need only mention that the final Accounts show an improvement of £123,545 in Railway Receipts, with the result that Railway Revenue Accounts brought out a net profit of £76,756.

16. In Expenditure charged against Revenue the final Accounts show an increase of £559,341 as compared with the Original Estimate, and a decrease of £117,059 as compared with the Revised Estimate, the largest item in the latter being a decrease of £144,374 under 'Army.'

Revised Estimate, 1900-1901.

17. The difference between the original and the revised Estimate of Receipts is very considerable, the increase amounting to £5,010,200; but, of this increase, a sum of approximately £2,900,000 comes under the head of Mint, and is balanced by a correspondingly large increase under the same head in Expenditure. These considerable differences are due to the large coinage of rupees, which could not be foreseen; but, deducting the sum due to this cause, we still have to account for an increase of Revenue exceeding £2,100,000.

18. It is certainly very gratifying to note that, in spite of all the troubles of the past year, every main head of Receipts except Land Revenue shows a more or less important increase.

19. The most notable augmentations are:—under Opium, about £572,000, due to the high price of opium; £106,000 in Salt, due to increasing consumption, although under this head we have cause to be dissatisfied with the Burma returns; £138,000 in Excise; £190,000 in Customs, a certain sign of consuming capacity and therefore of progressive well-being; £86,000 from Telegraphs, partly due to exceptional circumstances connected with Famine and partly to the increasing demand for news owing to the wars in South Africa and China, and the fatal illness of the late Queen-Empress; £965,000 in Railway Receipts, partly due to the large movement of food-stuffs for famine requirements and partly to increased mileage and general development; £208,000 under Irrigation; and finally an increase of £130,000 under Military Department Receipts, which is purely fortuitous, and represents the value of Military Stores sent abroad and debited to the Home Government. The totals of the items I have mentioned account for an increase in Receipts of about £2,395,000.

20. Against this satisfactory increase in the great majority of items of Revenue we have to record a heavy deficiency, as between the Revised and original Estimates of Land Revenue, amounting to £382,900. This is the only main heading of Revenue which shows a falling-off, and the unfortunate result tabulated is sufficiently accounted for by the severity and prolongation of famine in some of the western and central districts.

21. When we turn to Expenditure, we find that the total of the Revised Estimate exceeds that of the original Budget Estimate by about £3,530,000. But here again we must make a reduction of about £2,900,000 under 'Mint,' the amount of the net profit on coinage to be credited to the Gold Reserve Fund, and consequently we have only to account for between £600,000 and £700,000 of increased Expenditure, above the original Estimate.

22. The most important item of increase in Expenditure is under the group "Famine Relief and Insurance," which amounts to about £876,000. This unfortunately needs no explanation. The next in importance is an increase of £323,000 under "Railway Revenue Account," but this augmentation was due to, and more than compensated for, by increased traffic yielding the larger Revenue already indicated. The charge under 'Interest' also exceeds the Budget Estimate by about £200,000.

23. On the other hand, "Other Public Works" decreased by about £118,000, out of which about £42,000 is to be attributed to reduced expenditure on Military Works, and "Army Services" cost less than anticipated by about £1,185,000, the saving being chiefly due to the absence of troops in China and South Africa. There was also a decrease of £124,000 under Salaries and Expenses of Civil Departments, and finally, the differences in the Accounts under Provincial Deficits and Surpluses increased the expenditure as shown in the Statement by £576,400.

24. The grand result indicated by the Revised as compared with the Original Estimate for 1900-1901 is to increase the originally estimated surplus of £160,300 to a fairly assured surplus of £1,640,400.

Budget Estimate, 1901-1902.

25. We may now turn to the consideration of the Budget for the coming financial year.

26. It will be observed that, if the abnormal receipt under 'Mint,' included in last year's Estimates, is omitted, the difference between the totals of Receipts, according to the Revised Estimates of the closing year, and the Estimates for 1901-1902, now presented, is very small, and amounts only to an anticipated increase of Revenue of £71,900 in the coming year.

27. Under certain heads, however, the differences are considerable and demand attention.

28. Land Revenue is estimated to produce £474,800 more than last year, and in view of improved prospects throughout the greater part of India, this Estimate is unlikely to prove too sanguine, although, until we are sure of a favourable monsoon, the most moderate Estimates may be suddenly and hopelessly falsified.

29. The only other main heading of Revenue which is expected to yield an important increase is 'Railways,' where Receipts are expected to exceed those of last year by £331,400. The anticipated increase is chiefly due to the inclusion of gross instead of net Receipts from the Great Indian Peninsula Railway for 12 months in the coming

year, as against 9 months only in the closing year, and also, to some extent, to increased mileage opened to traffic.

30. Besides the above-noted increases, variations in the items included under 'Other Heads' are estimated to produce, on balance, an additional £183,400, the more important improvements being £160,800 in Provincial Rates, and £62,600 in Tributes from Native States.

31. Other minor improvements make up the total increase of Revenue, as compared with the Revised Estimate for 1900-1901, to £1,086,500.

32. Against these improvements we have, however, (always excluding Mint) to note a considerable reduction under various important heads. Opium is estimated to yield £589,300 less than last year, since it would not be prudent to count on the continuation of the abnormally high prices which have lately prevailed. Customs are estimated at £136,100 less, the most important variation in detail being a lower Estimate for imports of Sugar, the duties on the extraordinarily large importation of which have abnormally swelled our Receipts during the past year. Irrigation Receipts necessarily fluctuate with the increase or decrease of the demands of agriculturists for water, and are higher in bad seasons; we therefore anticipate for next year a smaller return by £127,400.

33. The above are the more important heads of decrease, and other minor variations account for, approximately, a further £161,800, making up the total of items of decrease to £1,014,600.

34. I now turn to Expenditure, which as a total, and again excluding 'Mint,' shows an increase of £1,131,900 reduced to £923,500 by the differences under the Provincial Deficits and Surpluses.

35. The total increase under various heads is £4,446,900, of which £2,062,100 is for Army Services, £728,400 for 'Other Public Works,' and £652,400 for Railway Revenue Account. Concerning these three items I shall have some remarks to make when I deal specially with Military and Public Works Expenditure. Other heads including 'Direct Demands on Revenue,' £161,600, 'Salaries and Expenses of Civil Departments,' £493,200, and Miscellaneous Civil Charges, £123,900, make up the total figure of increase above indicated.

36. Expenditure in all directions has been so greatly and necessarily restricted during the period of financial distress that, now that we may fairly estimate for an improvement in Revenue and a very important diminution of Charges for Famine Relief, we have been glad to show some comparative liberality in meeting urgent administrative demands. The Famine Charges, including £250,100 for Reduction or Avoidance of Debt, are taken at £3,245,000 less than for the past financial year.

37. We have examined the more important figures of the Budget, I will now endeavour to sum up the situation.

38. Our estimate of Revenue and Expenditure chargeable against Revenue closes with a surplus of £690,900. This surplus we carry forward to the second part of our Statement dealing with Capital Account and including Deposits, Remittances and Advances.

39. Our total Estimate for Capital Expenditure (not chargeable to Revenue) on Railways and Irrigation amounts to £5,395,600, of which sum £2,019,400 is for State Railways and £2,709,500 for the Account of Railway Companies, the balance being for Irrigation Works. In addition to the above, we have to find £301,900 for discharging Temporary Debt, and also to provide for other minor Capital Expenditure, including an over-payment in India of £330,200 on account of Secretary of State's Bills, and we finally arrive at a gross total of Capital requirements amounting to £6,642,000.

40. To meet this outlay, we have, in addition to our surplus of £690,900, a sum of £1,663,400 raised by Railway Companies. We further anticipate procuring £2,240,000 by addition to our Permanent Debt, of which sum we contemplate raising two crores of rupees in India, £502,500 from addition to the Unfunded Debt, and £111,200 from repayment of Loans and Advances.

41. These sums amount in the aggregate to £5,208,000, and the balance required to meet the total Capital Expenditure of £6,642,000 is found by a reduction of £1,434,000 in our Closing Balances in India and England.

The final result will be a Closing Balance on March 31, 1902, of £10,500,327 in India and £2,605,943 in England.

42. The present intention of the Secretary of State is to draw bills amounting to £16,500,000 during the course of the coming year. I have omitted this figure from both sides of the account I have summarised.

43. There is a point in connection with our Treasury operations which is perhaps likely to be the object of remark, or question, and on which I think it may be well to give some explanation beforehand. I refer to the fact that, whilst our Estimates show a comparatively large cash balance in hand in India, at the end of the coming financial year, we nevertheless announce our intention of adding to our permanent indebtedness by raising a loan in India during the course of the year.

44. The necessity obliging us to take this course arises from the fact that during the earlier part of the financial year our Revenue collections are very small, as compared with monthly expenditure, and our balances gradually diminish, until in November, they fall so low that we have to calculate our ways and means and assure our supplies with great care, so as to tide over the critical period till the last four months of the financial year, when Revenue Receipts begin to pour in.

45. It will be understood then, that it is the anticipated condition of our resources in the month of November which necessarily fixes the amount of our borrowings without regard to the possibility of a relative plethora of cash in our Treasuries, three or four months later.

46. The Government of India is at a great disadvantage in this respect, owing to the non-existence of any financial institution sufficiently strong to be able at all times to provide such funds, for short terms, as may be required to satisfy the temporary needs of the Treasury.

47. It has, I believe, often been urged that the relatively high rates of discount prevailing in the busy winter season from December to the end of March are due to the low figures of Government balances with the Presidency Banks, during those months.

48. I give below the figures showing these balances during the last four years. They are as follows :—

	1897.	1898.	1899.	1900.	1901.
	R	R	R	R	R
January	2,84,69,815	3,10,74,779	3,22,88,586	2,83,49,286	3,31,13,363
February	3,00,23,776	3,22,51,227	3,30,81,480	3,01,62,613	
March	3,77,40,338	3,27,96,275	3,16,44,816	2,64,87,648	
December	2,88,20,840	2,92,33,557	2,73,30,372	2,74,96,162	

49. I think that, although special circumstances reduced these balances last year, the above quoted figures show that the Government of India is not unmindful of the advantage to the business community of placing comparatively large balances at their disposal, during the busy season.

50. In my general summary which includes under various main heads, the different items of Provincial Finance, I have not discussed any details of this branch of accounts, as I have nothing to add to, or to explain in, the very clear statement on this head, prepared by Mr. Finlay with his usual ability and industry and to which I would specially invite attention. This statement is to be found in Section VI, Part II of this Financial Statement.

Expenditure on the Army and Public Works.

51. In all countries in the world, the greatest drain on financial resources and in some respects the most difficult to justify, is that caused by the combined heavy demands for military requirements and for public works.

52. But our whole existence depends on proper provision for the defence of our frontiers, and without continual expenditure on public works, the development of communications so absolutely necessary for economic progress, could never be realised, whilst the large sums spent on irrigation are more than justified by the magnificent results obtained from this class of expenditure, yielding, as a rule, not only direct and immediate profit, but also providing for the sustenance of millions, who would otherwise be included among the sufferers from recurring droughts.

53. As regards military expenditure, although we have granted very large sums for the improvement of our military position as regards defence, every additional item which has been agreed to, has not only been most jealously scrutinised in the Finance Department, but has also been submitted to the close examination of the Governor General in Council.

54. The lessons derived from the war in South Africa could not be neglected. It was our responsible duty to take them to heart, and we have done our best under the guidance of the military advisers to Government to profit by them.

55. Fortunately, the savings realised in our general military expenditure owing to the temporary absence of our troops in South Africa and China have enabled us to provide for a portion of the urgent needs of the army without adding to our general burdens; for the rest, we have done what is for the moment in our power, but we cannot yet say that our task is completed.

56. The following figures show the Net Military Expenditure during the last few years :—

	£
1898-99, Accounts	15,385,042
1899-1900 „	14,165,743
1900-1901, Revised	14,239,100
1901-1902, Budget	16,345,500

57. The increase in the estimates for the coming year is very considerable. Items classed as new expenditure amount to about 142 lakhs charged under Army in addition to about 18 lakhs connected therewith, charged to Military Works. Of this total, amounting to, approximately, 160 lakhs, about 127 lakhs are non-recurring, and 33 lakhs recurring. It includes, among other heads, provision for the expenditure of 94 lakhs on artillery, rifles, ammunition and ordnance stores; approximately 8¼ lakhs for the establishment of the gun-carriage factory at Jubbulpore and the cordite factory in the Neilgherries; and 21½ lakhs for the establishment of an efficient transport service, including the purchase of animals.

58. The expenditure on factories for manufacturing munitions of war in India, will not only have the effect of increasing our military independence, but also the highly satisfactory result, from the economic point of view, of substituting expenditure in India for expenditure abroad, of increasing the productive power of the country, and of training a large body of mechanics and other skilled artisans.

59. As regards expenditure on public works, we have given our special attention to rendering existing railways more efficient, by the provision of additional rolling stock and other requirements for their satisfactory and profitable working. We have also set aside a large sum for expenditure on irrigation works as a protection from famine. The grant under this head for the coming year amounts to one crore and is the same as that sanctioned last year, whilst in considerable excess of the sums allotted in the immediately preceding years for the same purpose. But we are convinced that the money will be well spent.

60. The following figures show the comparative capital expenditure on public works, during the last few years, classed under the more important heads, and the programme for expenditure in 1901-1902 :—

	R
1898-99—	
Railways	8,84,21,189
Irrigation	65,35,482
	9,49,56,671
1899-1900—	
Railways	8,96,77,803
Irrigation	89,69,400
	9,86,47,203
1900-1901 (Revised Estimate)—	
Railways	8,30,75,000
Irrigation	90,08,000
	9,20,83,000
Programme, 1901-1902—	
Capital expenditure on open lines	4,59,97,000
Ditto lines under construction	4,59,47,000
Ditto new lines only recently commenced	1,13,00,000
Ditto Irrigation	1,00,00,000
TOTAL	11,32,44,000
Classification.	
Capital expenditure for Railway Construction—	
To be raised by Government :—	2,22,86,000
Ditto Companies	8,09,58,000
TOTAL	10,32,44,000

61. I think that after consideration of the above figures showing comparative capital expenditure, I should invite special attention to the comparative net results of the working of our railway system. The following figures give the net deficit or surplus since 1897-98:—

1897-98.	1898-99.	1899-1900.	1900-1901 (Revised Estimate).	1901-1902 (Budget Estimate).
£	£	£	£	£
—709,304	—620,165	+76,756	+156,200	—164,800

62. In noting the relatively unsatisfactory estimate of net results for the coming year, it must be borne in mind that the traffic of last year, due to transport of famine supplies, was exceptionally large, and that we have now made specially large provision for repairs, renewals of rolling stock, and other improvements to be charged against next year's revenue.

63. Further, I must point out that, if we take only the figures of traffic receipts, £18,427,600—and those of working expenses £8,655,300,—the results anticipated for the coming year, are somewhat better than those for the year 1900-1901, and show a net profit (thus calculated) of £9,772,300 as against £9,701,600 last year. The final estimated falling-off is due to an increase of expenditure under the heads of Interest and Annuities, in connection with new construction and the purchase of the Great Indian Peninsula Railway. These are temporary drawbacks, and the decrease in net revenue is temporary as the lines under construction will add to revenue when opened for traffic.

64. It is unnecessary for me to enter into further details concerning expenditure under the two heads I have now been discussing, since it is the main principles guiding such expenditure, and the possibility of satisfying recognised requirements, which alone concern the Finance Department. Questions of detail lie outside the province of that Department and are the immediate concern of the Honourable Members of Council at the head of the Military and Public Works Departments.

Results of the Famine.

65. During the past financial year this great Indian Empire has been suffering from an appalling calamity, quite unprecedented, I think, in the recent history of any country on the globe's surface. Not only have we been the victims of a famine of extraordinary severity, the inevitable outcome of the early cessation of the rains in the year 1899, but to the consternation of all men, responsible for, or interested in, the welfare of the millions of agricultural population, the coming of the periodical rains, required to refresh the thirsty soil and restore the fecundity of mother-earth, was so delayed last season, that the trials of the long suffering populations were prolonged in the most distressing and unexpected manner. But this was not all. In addition to the calamity of famine, the plague pestilence is still with us, and the terrible list of its victims is daily to be counted in the official returns from the plague-stricken districts. And this too weighs heavily on the resources of the country.

66. The Government of India has followed with the keenest anxiety the course and results of these awful afflictions, so entirely beyond its control, and it has recognised with profound admiration the splendid spirit with which millions of sufferers have faced the calamities from which they were powerless to escape.

67. The suffering condition of our fellow-subjects has been brought home in the most incisive manner, through the continued and heart-rending appeals for assistance which have reached the Government of India. It is however my duty, and a happy duty, to state that, under the instructions of the Secretary of State and the Government of India, all such appeals have been considered by the Departments concerned, in a most liberal spirit, and no single appeal examined in that spirit by the competent authorities, has remained unsatisfied. The national purse and national credit have been freely placed at the disposal of all whose genuine distress might, it was hoped, be relieved by the prompt expenditure of money.

68. Such has been the spirit guiding our action, and it now falls to my duty to state the cost of our gigantic undertaking.

69. To count it with any approximation to accuracy is impossible, for it is not the direct expenditure of money which alone is involved: there has been an expenditure of life, health and energy of the numerous Government servants, both European and Native, who have nobly done their duty in facing the storm: in addition to the direct cost, of gratuitous famine relief and relief works, of remissions of taxation, of agricultural

loans, of loans to assist afflicted Native States, of provision of medical assistance, and of special payments to famine officers, there has also been the indirect cost of loss of revenue, both as regards land revenue and miscellaneous taxes, and the incalculable, but probably still greater future cost of checked economic development.

70. We can fairly count the direct cost; the indirect cost must necessarily escape accurate calculation.

The following are the principal items of direct loss and expenditure:—

	R
Famine relief	6,33,76,000
Remissions and Suspensions of Land Revenue and Provincial Rates	1,47,16,000
Compensations for dearness of provisions and other charges	66,03,000
TOTAL	8,46,95,000

In addition to the above, we have provided:—

	R
Loans to Native States	4,11,00,000
Special Agricultural Advances	1,42,00,000
TOTAL	5,53,00,000

This is an appalling total, but the calamity was also appalling. And the tale is not yet told. Expenditure will continue in the coming year. Already we have been called upon to provide approximately a crore for direct famine expenditure in the coming year, chiefly in Bombay, and we have been obliged to allot 164½ lakhs as grants-in-aid to Provincial Revenues, to restore financial equilibrium, thrown out of balance by famine and plague requirements.

71. It has been a serious and responsible task to meet all these heavy demands, but, thanks to the recuperative power of the country, directly due to the frugal habits and industry of the people, the task has been accomplished, and the Government of India can say with no inconsiderable satisfaction, that, with the aid of the ruled, the Rulers have done their duty, and the results have been such as to leave a memorable record in the history of mankind.

Countervailing Duties.

72. The countervailing duties on bounty-fed sugar came into practical effect in May 1899, and consequently we have not yet had two years' experience of their working. Two years is too short a period to permit of the formation of a definite opinion as to the effect of these duties, and considering also the abnormal conditions of plague and famine which have prevailed during the whole time, I think that it would be very premature to draw definite conclusions from the statistics of recent imports of sugar.

73. The general question of the sugar trade and industry is, however, one of such wide-spread interest, that it may be useful to invite attention to the figures showing the imports of sugar into India, during the last four years, classified according to the countries of origin.

74. I may call attention to the fact that the United Kingdom, and the interested British Colonies, the Straits Settlements, Hongkong and Mauritius, appear to have had their full proportionate share in the remarkable increase of importation into India, during the expiring financial year. It is also interesting to note that the greatest relative advance in the supply of sugar has been made by Germany, although that country is far from having recovered the predominant position which she occupied at the beginning of the period under review. Among foreign countries Austria-Hungary still keeps the lead, as an exporter of sugar to India, but does not come within measurable distance of Mauritius.

75. I may mention that the net receipts from the countervailing duties amounted to R8,17,555 in the eleven months of the last financial year, during which the extra duties were in force, and to R15,29,552 during the first ten months of the current financial year. We may reasonably hope to encash 17 or 18 lakhs from this source before the close of this year, and it is perhaps not an unsatisfactory reflection that this addition to our Revenue has been realised at the expense of the European tax-payers, taxed by their respective Governments to provide the bounties which enable foreign sugar refiners to sell their sugar in India, at prices below the cost of production.

76. The fact is that the Government of India has added 17 lakhs to its resources by taking for Revenue purposes, the approximate difference between cost price, and the

artificially maintained selling price of bounty-fed imported sugars, whilst the Indian consumer pays no more for his sugar than he would have to pay if the bounty system were abolished.

Imports of Sugar into British India by sea from other Countries.

* The imports from Mauritius classed under unrefined sugar are molasses.

Exchange and Coinage.

77. The course of exchange throughout the financial year, ending on the 31st of this month, has been remarkably steady, and I may with satisfaction repeat the statement made by my predecessor, on this question, last March, namely, that the object of Government, the maintenance of a stable exchange, has been realised during the past year; and I may add that this stability has been maintained by following lines already laid down and without involving the necessity of any further special measures or serious effort on our part:—

The average rate for Council Drafts, throughout the twelve months now drawing to a close, has been 15.979*d.*
The maximum, reached in the month of December, was 16·037*d.*
The minimum, in the month of August was 15 933*d.*

78. What has been done as regards the sale of Council Drafts and the coinage of rupees (and to the latter question I will return more particularly) has been done in accordance with a general policy of limiting, as far as possible, the action of Government, in exchange matters, to following and satisfying the demands of the market. I believe this to be the proper safe policy. It has been suggested that such a policy should be firmly established by legislative enactment, but I am not convinced that any enactment would give greater security than now exists for continuity of guiding principle. I fear that any possible form of enactment would bind our hands in an undesirable manner, in questions of detail, and on general grounds, it is desirable to avoid frequent recourse to legislation on exchange and currency questions.

79. During the past year there has been no hesitation to sell Council Drafts and Telegraphic Transfers to meet demands, although during the slack season of trade sales were shorter, whilst later on the Secretary of State found himself obliged to increase his offers of Bills so as to compete with the export of sovereigns which were being largely despatched to India, by parcel post, for conversion into rupees at our mints and treasuries.

80. We have, without legislation, established a Gold Reserve Fund into which will be paid all profits of coinage accruing since the beginning of the closing financial year, and that Fund will serve as a guarantee for the conversion into gold, if required, of the rupee token coinage with which, to meet positive requirements, we have supplied the public so largely.

81. The great strain on our resources, due to disastrous famine, forced us to use for current requirements, the profits of coinage during the past calendar year, but since January 1, 1901, we have commenced paying our further profits directly into the Gold Reserve Fund, and the amount thus paid in, already amounts to £800,000, to which a further sum of £400,000 will almost immediately be added, on account of coinage profits in March.

82. As regards the profits from April 1 to December 31, 1900, amounting to about £1,730,000, these will be paid into the Gold Reserve Fund as our resources may permit, and it is our earnest desire to expedite such payments as much as possible. A special source will become available for these payments, by the reimbursement of the large advances to Native States and takavi loans provided by Government, in connection with famine necessities. The advances made to Native States alone amount to over four crores of rupees.

83. I may here state that it is the intention of Government to invest, from time to time, in British Consols or other Sterling Securities, the sums which may be accumulated in the Gold Reserve Fund.

84. With regard to the control of coinage operations, I think that a practical rule of conduct is to be found in maintaining as closely as possible, a sufficient sum in rupees in the Currency Reserve, to meet all demands which experience shows may reasonably be anticipated, and, for the present, we may hold in sovereigns, the balance of our Currency Reserve exclusive of the ten crores invested in Rupee Paper.

85. This is what we have resolved to do, and although we have not yet been able to accumulate in our Currency Reserve the full sum in rupees which it is in our opinion desirable to maintain, the failure to secure this accumulation is due solely to the limited capacity of our mints and to their inability to turn out rupees as quickly as they have been required to meet an extraordinary and unprecedented demand.

86. I submit a statement showing the results of our rupee coinage operations during the past financial year :—

Amount of Rupees, coined 1900-1901.

1900.									1901.		TOTAL FOR 11 MONTHS.
April.	May.	June.	July.	August.	September.	October.	November.	December.	January.	February.	
67,70,538	86,95,312	1,26,47,856	74,38,228	88,28,057	1,45,95,261	1,59,72,707	1,54,65,446	1,60,30,063	2,44,35,608	1,99,01,678	15,07,80,754

Of the above total coinage exceeding 15 crores, 3 crores and 23 lakhs were coined for, and issued to, Native States.

The monthly outturn for account of the Government of India varies considerably, but this variation must not be taken as an index of the opinion of Government as regards requirements, for the coinage of rupees for our own requirements has been hampered by the fact that our mints have been under obligations to coin, besides rupees for our own needs, both dollars for the Colonies, and rupees for Native States, and, as regards the latter operation, no one will dispute the great advantages from every point of view of having a uniform currency circulation throughout the Indian Empire. This desirable end we now appear to be in a fair way of attaining, and apart from the advantages of securing a uniform currency, we were bound, at no matter what inconvenience to ourselves, to fulfil our contracts to Native States. We have, however, taken such measures as were possible to increase the capacity of our mints, with the result of reaching an average monthly outturn exceeding two crores of rupees in the last two months for which we have the returns.

The figures of the Table submitted, show a total coinage for 11 months (the figures for March are not yet available) exceeding 15 crores, and for the 12 months of the financial year we shall presumably reach approximately 17 crores, of which between 13 and 14 crores constitute an addition to the rupee currency of British India. This is an enormous and surprising addition, but we have not allowed ourselves to be tempted by the large possible profits of the operation. We have not gone beyond supplying possible demands, and we have taken adequate precautions to insure the realizable value of this extraordinary addition to our token currency. I believe that what we have done has been both necessary and safe.

87. On this question I may point out that the figures of outturn show conclusively that there has been no hesitation on the part of Government to take every possible measure to provide all the necessary circulating medium which current demand has indicated as required for the business of the country.

88. To sum up, I may say that we have endeavoured, and will endeavour, to regulate the sale of Council Drafts in accordance with trade demands; that we have endeavoured, and will endeavour, to maintain a stock of rupees in our Currency Reserve sufficient to satisfy all reasonably to-be-anticipated demands, and even if such demands continue beyond reasonable anticipation, we still hope to maintain and improve our position. Finally, we shall accumulate from coinage profits a substantial gold reserve, independent of the Currency Reserve, and we shall from time to time invest the gold accumulated in Sterling Securities.

89. I venture to hold that this system which we have adopted in accordance with a deliberate policy, is as nearly automatic as any that could be devised, and I think that there are practical difficulties in the way of any attempt to stereotype such a system by legislative enactment.

90. First, I may observe that the effects of legislation are necessarily so restrictive that, though they may enforce automatic action under one set of conditions, they inevitably limit automatic action if those conditions are changed. Thus, under existing conditions, and with due regard to the present average circulation of notes, we may think that we ought to keep a certain amount of rupees in the Currency Reserve, and that we can afford to hold a certain number of sovereigns in the same fund. But the circulation of currency notes may increase or diminish (I hope and anticipate the former) and the general requirements for rupee currency may also increase or diminish; if such changes of condition occurred, what would be our position if the proportion of rupees to sovereigns in the Currency Reserve were fixed by law?

91. We have fixed this proportion in our own minds, but, if the conditions on which our estimate is based should change, we are quite prepared to change the proportion which we have temporarily accepted as our guide. This, as we now stand, can be done immediately without recourse to legislative enactment, and without that undesirable disturbance of the public mind, which legislation on such delicate questions is liable to produce.

92. In concluding my remarks on this subject, I think it will be of interest to state what is our position to-day as regards note circulation, rupees and silver bullion in the Currency Reserve, gold in the Currency Reserve, and gold in the Gold Reserve Fund.

The figures on March 7, were as follows:—

Rupees in the Currency Reserve . . .	R 5,87,12,865
Value of silver bullion in the Currency Reserve	„ 1,78,48,764
Gold in the Currency Reserve	£ 6,956,946
Notes in circulation . .	R28,09,15,765
Gold in the Gold Reserve Fund	£ 800,000
Total silver . . .	R7,65,61,629
Total gold	£ 7,756,946

Circulation of Currency Notes.

93. The Government of India some time ago addressed inquiries to the Local Governments, Presidency Banks, and Chambers of Commerce, soliciting their opinion as to the best method of increasing the circulation of currency notes.

94. I think that this is a very important question, and that the entire banking and commercial community will admit that it is desirable, if possible, to increase the circulation of notes. But the problem how best to do so, without incurring undesirable risks and expenditure, bristles with difficulties.

95. I cannot say that the numerous valuable communications, which we have received from the authorities whom we have consulted, have gone very far towards furnishing a definite solution of the problem, for the divergency of the opinions offered is remarkable. Difficulties, of which we were already aware, are emphasised, and the only general conclusion to be drawn is, that it is practically impossible to take any heroic measures; that we can only safely venture on some very limited experiment; and that it will take a very long time for important results to be achieved.

96. With reference to this question, I may perhaps say a word regarding the criticisms on the circular of inquiry issued by the Government of India which have appeared freely in the press. It has been stated more than once that it is evident from

the terms of the circular that the Government of India did not know its own mind on the question propounded. I am very willing to admit that, when making the inquiry, the Government of India had arrived at no definite decision as to how best to arrive at a desirable end. But I cannot admit that this is fair ground for hostile criticism.

97. The business public undoubtedly desire that Government should take them into their confidence, and ask their opinions on such important questions. But it seems to me that it would be rather late in the day to ask opinions when we had definitely made up our own minds. I am not deprecating press criticism; on the contrary, if intelligently conducted, as it very frequently is, it is most valuable. But I think that it is not quite logical, both to blame Government for autocratic decisions, as is sometimes done, and also to accuse Government of indecision, when it is seeking the solution of a difficult problem, and asks the opinion of competent advisers.

98. It is unnecessary to recapitulate all the difficulties of this particular question, for they are well known to all who have studied the subject. I will only say that Government recognize as the most serious difficulty to be met, the probable use of notes for large remittances, and the expense of maintaining at out-treasuries a sufficient stock of rupees to cash notes when suddenly presented for large sums. Even with the existing circulation, under existing conditions and limitations as regards encashment, we are not always able to supply rupees to those who present notes and ask for them. I am, however, strongly of opinion that if the use of currency notes became more general, and larger amounts were held in circulation, the percentage of rupees required to meet demands for encashment, would be considerably less than that which is required to-day, when, unfortunately, the circulation of notes is still hampered by the fact, that the holder of the note cannot be assured of converting it into rupees at the Treasury, and is therefore willing, and sometimes obliged, to dispose of his note in the bazar, at a discount. I hope, however, that considerable improvement may gradually be made in this respect, and that before long we may go even further and find ourselves able to adopt some limited measure in the direction of encouraging and increasing the circulation.

99. Before quitting this subject, it may be of interest if I quote some figures showing the tendency to increase in the circulation of notes during the last few years.

I.—Statement showing the gross circulation of paper currency for all India.

	1897-98.	1898-99.	1899-1900.	1900-1901.*
	₹	₹	₹	₹
Average	24,24,00,000	25,63,00,000	27,96,00,000	28,79,00,000
Maximum	24,76,00,000	28,20,00,000	29,27,00,000	30,78,00,000
Minimum	22,86,00,000	23,25,00,000	26,26,00,000	27,90,00,000

* Eleven months only.

II.—Statement showing in lakhs the circulation of paper currency excluding amounts held by the Government Reserve Treasuries and by the Presidency Banks at their head offices.

	1897-98.	1898-99.	1899-1900.	1900-1901.†
	₹	₹	₹	₹
Average	20,35,00,000	20,79,00,000	23,09,00,000	23,84,00,000
Maximum	21,20,00,000	22,49,00,000	24,41,00,000	25,02,00,000
Minimum	19,44,00,000	19,43,00,000	21,94,00,000	22,85,00,000

† Eleven months only.

100. The above tables show a decided and satisfactory increase in the average note circulation in the hands of the public during the last four years, and I think that the indication thus given by facts, is a sufficient encouragement to persevere in the policy of seeking to augment our note circulation.

Economic Progress.

101. We have reviewed the financial situation in its more important features. We may now turn to the consideration of the economic situation.

102. In my opinion, the question of economic development is one in which those responsible for the financial situation must take the keenest interest. It has always appeared to me that it is comparatively easy for a Government, to take money out of the pockets of the public, provided that those pockets are sufficiently well-filled. Hence, I think that we are specially interested in doing all that is in our power to promote economic progress.

103. I pass to the consideration of certain facts and figures indicative of the economic situation.

104. In dealing with the great question of meeting famine requirements, I have already alluded to the recuperative power of India. The fact that we have been able to meet the extraordinary demands on our resources, due to famine and plague, and that we are to-day able to present a budget showing, notwithstanding the simultaneous serious depression in three such important industries as cotton, tea, and indigo, a distinct and satisfactory increase of revenue obtained without increase of taxation, is in itself the strongest evidence of that recuperative power. But I think that close examination of certain material facts will afford further proof that our belief in this recuperative power is not an idle assumption.

105. We may first consider the more important indications of the figures of revenue returns during the last four years.

106. It was natural and inevitable, that the land revenue in certain provinces should suffer and diminish through the direct influence of the calamities which have befallen us, but, whilst land revenue has necessarily fallen off in some afflicted provinces, in others, more favoured by Providence, the collections have increased with the prosperity of the people. Fortunately too we are not dependent on land revenue alone, and I observe, with some satisfaction, that on the whole, over a series of years, the proportion of land revenue to the total of our resources shows a diminishing tendency.

107. In 1897-98 the proportion of land revenue to general revenue was 26·63 per cent, in 1898-99 27·08 per cent, in 1899-1900 25·07 per cent, in 1900-1901 it will be 23·54 per cent, and the estimates for 1901-1902 result in a proportion of 25·17 per cent.

108. There are certain other sources of revenue, which I trust will, year by year, assume greater importance, and in the returns from which we may find indications of general economic progress. In particular I think that such indications may be noted in the increasing revenue derived from Salt, Customs, and Post Office. The following are the figures under these respective heads :—

	Accounts, 1897-98.	Accounts, 1898-99.	Accounts, 1899-1900.	Revised, 1900-1901.
	R	R	R	R
Salt Revenue . .	8,59,42,250	9,09,98,713	8,77,56,944	8,92,66,000

Import duties .	3,73,51,650	3,59,25,090	3,61,39,583	3,89,65,000
Excise duty on cotton goods .	11,61,880	13,72,910	13,36,623	10,88,000
Export duty . .	72,48,190	1,01,12,130	87,63,905	90,09,000
Land Customs and Miscellaneous .	6,51,230	6,11,490	7,66,751	8,00,000
TOTAL .	4,64,12,950	4,80,21,620	4,70,06,862	4,98,62,000
	1,87,91,630	1,91,40,671	1,96,24,722	2,03,04,000

I think that the Salt revenue returns are particularly encouraging as indicating not only a steadily increasing tendency, but in particular, as showing that even in the past disastrous year of famine and pestilence, the general consuming power of the population, as a whole, not only suffered no diminution, but, on the contrary, showed an improvement over the preceding year.

109. The same considerations apply to the figures of Customs Revenue, though even in a more remarkable manner, for whilst we find a diminution of about 2½ lakhs in the yield of Excise duty on cotton goods, a diminution due to an industrial crisis

and having no connection with the general condition of the country, under all other heads, there was a marked increase, resulting in a total improvement, over the previous year, of nearly 29 lakhs, and producing the highest total figure of revenue recorded by the Customs Department, since the duties on cotton yarns were abolished in 1896.

110. As regards Post Office revenue, the same absolute conclusions cannot be drawn from the fluctuations of revenue as may be fairly assumed in the case of Salt and Customs. Post Office profits are necessarily seriously affected by arbitrary reductions of postage rates, which, however necessary and profitable in the long run, must cause an immediate, though temporary, falling off in receipts.

111. I think, however, that when, as in the case of the Indian Post Office returns, a steady progress of revenue is observable, we are entitled to consider such progress as strong evidence of satisfactory economic development, a development which has not only material, pecuniary results, but is important, as evidence of general moral progress.

112. I have already alluded to the growth of Railway revenues, and, although the task of drawing conclusions from the figures of railway receipts is complicated by the difficulty of distinguishing increase due to increased mileage, from increase due to increased traffic, nevertheless, the actual increase of gross railway receipts affords positive proof of greater movement on the railways, and, in so far, of general development.

113. The most important industry in India and the one directly interesting the innumerably larger proportion of the population is agriculture.

114. The prosperity of the agricultural population, the deepest concern of the Government of India, has, in the last five years, received apparently crushing blows through the unprecedented recurrence of famine. The effect of repeated droughts is indeed far reaching, and the terrible loss of cattle is a most distressing incident of the late famine, which will long make itself felt in Gujarat and other similarly affected districts, but the figures of Land Revenue, which I have quoted, conclusively show that, whilst some unfortunate territories have suffered most severely, others have prospered, with the general result that, as a whole, the agricultural population in the Indian Empire is somewhat better off to-day than it was a year ago.

115. *Primâ facie*, this is certainly an astonishing conclusion, but if the whole situation be examined it is perfectly natural and logical. Bengal, the Punjab and Madras show by the land revenue returns that they have been doing well, Assam has held its own, and Burma, favoured with a magnificent rice crop, was able to export its staple produce, on the most profitable terms, to feed the famished peoples of Western and Central India, and is in a condition of remarkable prosperity. Further it may here be mentioned that the unprecedented transport of food-stuffs on the railways, swelled Railway Receipts, and contributed a useful addition of Revenue wherewith to meet the demands of famine sufferers.

116. Two special branches of agricultural industry, indigo and tea, are unfortunately now passing through a serious crisis. Indigo is being hard pushed by the competition of a foreign chemical product and the easily made profits of former days have become a thing of the past. But, when the first stages of consideration and research have already revealed that there has been room for economy in administration, that superior crops can be raised by manuring, scientific rotation and selection of seed, and that the actual product of the vats can be increased up to 30 per cent, by the use of the 'blower' there would appear to be reasonable hope for a return to more prosperous days.

117. The history of the tea industry in India has been a very chequered one, alternating between periods of great prosperity and the deepest depression, and it may, therefore, be hoped that the present crisis which seems to be generally attributed to over-production, may in its turn be succeeded by a renewed period of prosperity.

118. Manufacturing industries still hold but a very small proportionate place in the economy of India, but their importance is increasing and there is every reason to desire that it should increase. The cotton industry, the most important hitherto, is unfortunately passing through a period of considerable depression and in some quarters it is held that the introduction of spinning high numbers will be necessary to secure a full revival.

119. Cotton is, however, the only manufacturing industry which appears to be in even temporary difficulties, and the rapid increase in the number of important factories and workshops during the last few years is really remarkable and most encouraging.

120. I may cite a few examples of industrial development.

121. In the year 1895 there were 350 cotton factories including spinning and weaving mills, and there were 586 such factories in 1899. The number of engineering

workshops and foundries, including railway workshops, rose from 72 in 1895 to 82 in 1899, and jute mills and presses from 62 to 82. Rice mills numbered 65 in 1895 as against 84 in 1899, and sugar factories 9 in 1895 as against 14 in 1899.

122. The imports of machinery and mill-work and of iron and steel, also afford important indications of progress. These have, as might have been expected, been recently adversely affected by the serious depression in the cotton industry, by far the most important manufacturing interest in the country. Nevertheless, if we take into consideration the natural effects of this special depression during the last two years, it is most satisfactory to find that the average value of imports of machinery and mill-work during the last five years, has surpassed that of the previous quinquennial period, by, approximately, 75 lakhs, equivalent to an increase of nearly 30 per cent.

123. Perhaps, however, the most satisfactory statistics are those showing the production and export of coal during the last few years. The exports of coal which only amounted to 222,380 tons in the year 1897 reached 490,490 tons in 1900, and there appears every reason to anticipate further progressive development in this direction.

124. As regards the total output of coal in 1897 it was 4,063,127 tons, whilst in 1899 it reached 5,089,392 tons, showing an increase in two years of about 25 per cent, and the figures so far available for the subsequent period, show that progress is being well maintained.

125. Other interesting figures bearing on the question of economic welfare are to be found in the statistics of the Savings Banks and Provident Institutions.

126. Between 1895-96 and 1899-1900 the balance at the credit of depositors increased by R1,88,111 notwithstanding the two disastrous periods of famine with which the country was afflicted during this short term of years.

127. As regards the condition of trade, as apart from industry, it is rather difficult to fix on any special figures from which to generalise or draw sound conclusions. I give, however, below, a table showing the value of exports and imports, exclusive of treasure and Government stores, during the last four financial years, and for ten months of the current year. This table shows a slight falling off in exports during the year 1899-1900 amounting, however, to less than 4 per cent, but taking all the figures of both export and import together, the total value of trade is only about 1 per cent less than for 1898-99, and considerably in excess of the preceding years tabulated. Considering the numerous disadvantages under which the export trade has been labouring since the recommencement of famine, I think that on the whole these figures indicate commercial strength, and a generally satisfactory situation.

	1896-97.	1897-98.	1898-99.	1899-1900.	1900-1901. Ten months, 1st April to 31st January.
	R	R	R	R	R
Total Imports . .	71,79,38,293	69,26,66,625	68,38,03,412	70,71,18,634	62,06,92,778
„ Exports (including re-exports) .	1,03,91,42,972	97,53,72,730	1,12,72,14,730	1,08,97,61,873	86,98,70,628
Total Exports and Imports . . .	1,75,70,81,265	1,66,80,39,355	1,81,10,18,142	1,79,68,80,507	1,49,05,63,406
Excess Exports over Imports . . .	32,12,04,679	28,27,06,105	44,34,11,318	38,26,43,239	24,91,77,850

128. Another point connected with the question of the general trade situation, and which affects traders very closely, is the bank rate for the use of money.

129. The annexed Table shows the rate of the Bank of Bengal month by month, since January 1897, and it will be observed that since August 1898, a fairly uniform tendency has prevailed, and that a maximum rate of 8 per cent has rarely been reached and never passed. I think that an 8 per cent rate during the busiest season of the year is no serious hindrance to business in India, although, if we could reduce our normal maximum to 6 per cent, it would be an advantage. But we must remember that if the rate of interest in India were brought down to the low averages prevailing in Western Europe, there would no longer be any temptation to capital to seek investment so far afield.

130. In connection with this question I may point out that, according to the figures tabulated, there is much less relation, in India, between the volume of trade and the rate of interest than would naturally be supposed.

131. It will be observed from the subjoined Table that, whilst a 7 per cent rate existed concurrently with the comparatively small exports during October and November 1897, no higher rate was induced by the comparatively large exports in the first three

months of 1899; and that, whilst a 10 per cent rate was maintained in April 1897, when the value of exports was below average, a 5 per cent rate sufficed for the large exports of October 1900.

132. These figures would seem to indicate that the rate of discount, and therefore the demand for loanable capital, has been at times, more dependent on speculation and the nervous apprehensions of traders, than on the real requirements of trade.

133. The consideration of these figures leads me to hope, that provided our money markets do not become the victims of speculators, (and to avoid this we must rely on the prudence and good sense of the banking community) we are now reaching a more permanently stable monetary condition, than that which existed three or four years ago.

134. A factor tending in this direction is, I think, to be found in the development of communications and increasing facilities of credit, which must tend to prolong the seasons for export of such staples as rice, jute, cotton and seeds, and thus facilitate the financing of the trade.

Statement showing the value of Merchandise exported from India during the years 1897, 1898, 1899 and 1900 with the Bengal Bank's maximum published rate of interest and the rate of Council Bills for the same period.

(1) No bills were drawn in these months on account of the famine. * Average rate. † Approximate.

Conclusion.

135. I may now endeavour to sum up the general situation.

136. It has been shown that our economic situation, on which our financial situation depends, is, notwithstanding checks in certain directions where it has been prejudicially affected by known causes, on the whole good: that, wherever not prejudiced by such special, and it may be anticipated, temporary difficulties, it is progressive, and that the evidences of general recuperative power are many and satisfactory.

137. At the same time, in a country where the returns of Revenue depend so largely upon meteorological conditions impossible to foresee or to control, it behoves us to frame our Estimates with great caution. This we have done, and still our Estimates of Revenue Receipts show an increase of over £2,000,000 above those framed by my predecessor for the closing financial year, and if we remove from the Account the purely fortuitous receipt of, approximately, £3,000,000 on account of Mint operations, they are slightly in excess of the realisations of 1900-1901.

138. It is indeed fortunate that we are able to present such satisfactory figures, for, as already stated, we are not yet free from the charges and consequences of famine.

139. It has been our first care to afford relief from the financial prostration affecting so many Provinces, where not only necessary Balances have been exhausted, but where also, stern need for the strictest economy has most unduly curtailed expenditure necessary to meet many primary needs of society, such as public works, education, medical

requirements, and administrative improvements. We have been as liberal in this direction as prudence permitted, and have made grants-in-aid to Provincial Revenues amounting in the aggregate to 164½ lakhs.

140. In addition to this abnormal charge on our Revenues, we must devote one crore of rupees from the Famine Insurance Grant to direct famine expenditure in the still afflicted districts, and to this again, as a consequence of the lessons of the South African War, is added a large sum for Army Services, increasing the estimated charge on this account by £876,500 above the sum sanctioned for 1900-1901.

141. These large extraordinary charges amounting together to over £2,600,000 are, however, more than balanced by an estimated reduction, as compared with last year, of £3,245,000 in general famine expenditure, and by the exercise of strict economy where permissible, we are finally able to show a surplus of £690,900 to be carried forward to Capital Account and to reduce by so much the amount which we shall be obliged to borrow for railway construction and irrigation works, on the prosecution of which we are so largely dependent both for general economic progress and for protection from the direct and indirect effects of recurring famine.

142. In conclusion I may say that the Estimates for 1901-1902 are of good promise, and that, unless our reasonable anticipations are falsified by an unprecedented recurrence of serious disasters, we are entitled to look forward with some confidence to the future, and to hope for the early dawn of a period of considerable prosperity.

March 20, 1901. E. FG. LAW.

PART II.

BEING A MEMORANDUM BY THE FINANCIAL SECRETARY EXAMINING THE DETAILS OF THE ACCOUNTS AND ESTIMATES.

Section I.—The Accounts of 1899-1900.

1899-1900 General.

143. The surplus of the year in the Accounts was £2,774,623, being larger by £221,823 than that anticipated when the Revised Estimate was framed in March last.

144. The variations between the figures finally entering into the Accounts and those taken in the Budget and Revised Estimates of the year are fully explained in the Appropriation Report published in the *Gazette of India* of the 16th instant.

1899-1900 Statemen gross figu

145. The following is a general comparison of the Revised Estimates with the Accounts of the year:—

	Revised.	Accounts.	Accounts, better.	Accounts, worse.
Revenue.	£	£	£	£
India	68,284,700	68,373,621	88,921	...
England	247,700	263,543	15,843	...
Total	68,532,400	68,637,164	104,764	...
Expenditure.				
India—				
Imperial, Provincial, and Local	49,681,200	49,675,915	5,285	...
Adjustment of Provincial and Local Surplus or Deficit	—199,000	—206,220	7,220	...
Net	49,482,200	49,469,695	12,505	...
England	16,497,400	16,392,846	104,554	...
Total	65,979,600	65,862,541	117,059	...
Surplus	2,552,800	2,774,623	221,823	...

1899-1900 Revenue i

146. The increase in the Revenue in India occurred under Railway Revenue, which improved to the extent of £123,492, and Stamps, under which the increase was £33,776, distributed over all the Provinces. The other heads yielded rather less than the Revised Estimate, the larger decreases being, Land Revenue £35,744—in Madras, Bombay, and the Central Provinces—, Salt £28,637—in Madras and Bombay—, Customs £19,509, Provincial Rates £15,717, Irrigation £15,338—chiefly in the Punjab—, Forest £8,275, and Interest £2,119.

1899-1900 Expenditu India.

147. The actual expenditure in India was, on the whole, very slightly less than the Revised Estimate. The largest decrease was one of £103,617 under Army, and the largest increase of £31,438 in Minor Irrigation Works, and of £21,701 in Famine Relief.

1899-1900 Revenue a Expenditu England.

148. The increase in Sterling Revenue occurred under Interest and Army. The decrease in Sterling Expenditure occurred chiefly under Army Stores, £24,474; Marine Subsidy to the Admiralty, £14,600, owing to the postponement of a payment to the Admiralty pending settlement of a doubtful point; Sundry Marine items, £15,339; Telegraph stores, £6,108; Interest, £11,314; Pension Fund payments, £7,981; Military furlough allowances and pay of British Forces during the voyage to India, £10,355; Indian Troop Service, £5,006.

Section II.—The Revised Estimate of 1900-1901.

1901. ment of the figures.

149. The following is a general comparison of the Budget Estimate with the Revised Estimate of 1900-1901 ;—

	Budget.	Revised.	Revised, better.	Revised, worse.
Revenue.	£	£	£	£

Net	52,746,500	56,350,100	...	3,603,600
England	17,249,000	17,175,500	73,500	...
Total	69,995,500	73,525,600	...	3,530,100
Surplus	160,300	1,640,400	1,480,100	...

1901. ral features.

150. An entirely novel feature of this year is to be noticed in the enormous receipts and charges under Mint. The new receipts are the profits on the very large coinage of rupees which has been undertaken this year, and the new charges represent the transfer of the net profit to the Gold Reserve Fund, the Government, as is explained elsewhere in this Statement, having decided to hold the profit on any coinage of rupees which occurs in any year in the Reserve Fund, instead of allowing it to swell the surplus of the year. For comparison of the figures of this year with those of previous years, a deduction of about 4½ crores of rupees, or £3,000,000, has to be made from both sides of the account.

The Estimates were framed on the assumption that the monsoon would be normal, and would bring its priceless rain at the normal date. It was somewhat late throughout India; and in Bombay the quantity of rain and the dates on which it fell were so unsuitable that the continuance of famine relief till the next monsoon is necessary in that Province. In consequence, the Estimate of the Expenditure on Famine Relief—a very liberal one on the assumption made—has proved insufficient and has had to be increased by nearly £880,000, and the collections of Land Revenue and Provincial Rates, and of Tributes from Native States affected by famine will fall short of the Estimate by £474,000. On the other hand, there are savings in connection with the despatch of troops to China and the continued absence of the troops in Africa, which including the reductions connected with that absence in payments in England may be taken at about £900,000, as well as other savings on the Military Estimates. The high prices of Opium have increased the Opium receipts by over £500,000. The net Railway earnings yield another increase of about the same amount: this being largely due to special famine traffic. Irrigation shows an increase of about £180,000. And other heads of Revenue have also improved considerably in spite of the famine. The net result is an improvement of nearly a million-and-a-half sterling, which raises the surplus of the year from the nominal amount taken in the Budget Estimate to the substantial amount of £1,640,400.

151. The Mint receipts and charges being omitted, there is an increase in Revenue in India of R3,25,19,000 or £2,167,900, and an increase in Expenditure in India of R10,54,000 or £70,200. Of this net improvement of R3,14,65,000 or £2,097,700, the sum of R2,28,19,000 or £1,521,300 is in the Imperial Section of the Accounts, and R86,46,000 or £576,400 in the Provincial-Local Section. In England the Revenue exceeds the Budget Estimate by £36,600, while the Expenditure is less by £73,500, the whole sterling improvement being £110,100. This sum being added to the improvement in the Imperial Section in India

gives an increase in the surplus of £1,631,400. The deduction of £151,300, which is the increase in the net expenditure of the Mints, yields the improvement in the surplus of £1,480,100 shown in the table in paragraph 149.

1900-1901. Decreases of Revenue.

152. The important decreases of Revenue in India are :—

	R
Land Revenue	57,43,000
Provincial Rates	7,69,000
Tributes	6,02,000

These are all caused by the intensification of the famine in consequence of the delay in the monsoon.

1900-1901. Land Rev. Provincia.

153. Larger suspensions and remissions are expected to reduce the collections to the following extents :—

	Land Revenue. R	Provincial Rates. R
In Bombay	49,28,000	4,18,000
„ the Punjab	10,65,000	1,95,000
„ the Central Provinces	12,75,000	2,83,000

There are also small decreases in Madras, the North-Western Provinces, and Assam, and a small increase in Bengal: these are ordinary variations, the reduction in Assam being, however, caused by floods in September last. Burma, as usual, yields a large increase, amounting this year to R19,55,000 under Land Revenue, and R50,000 under Provincial Rates.

1900-1901. Tributes.

154. The present famine affected not only districts of British India, but also many important Native States. The States have, with the assistance of Government officers, combated the famine in a most creditable way, and have borne the expenditure. To enable them to do this, however, very many have required help in the shape of loans, which have been freely granted as will be seen from a reference to the figures in paragraph 242. In some cases also the payment of tribute by the States has been suspended, and the receipts under this head of Revenue have accordingly fallen short of the Budget Estimate.

1900-1901. Increases of Revenue in India.

155. The important increases of Revenue in India are :—

	R
Opium	85,82,000
Salt	15,90,000
Stamps	11,45,000
Excise	20,65,000
Customs	28,49,000
Forest	13,62,000
Post Office	4,96,000
Telegraph	12,00,000
Mint	4,20,85,000
Marine	5,89,000
State Railways, Gross Receipts 1,43,32,000 Guaranteed Railways, Net Receipts 1,62,000	1,44,94,000
Irrigation, Major Works	26,84,000
Army	20,71,000

1900-1901. Opium Receipts.

156. The receipts from the pass-duty on the exports of Malwa Opium in Bombay are expected to yield a small increase of R2,00,000 above the Budget Estimate. But almost the whole of the increase in Opium Revenue occurs in Bengal, R83,75,000. The chief cause is that the average price realised at the monthly sales has been R1,361 a chest, whereas the price assumed in the Budget Estimate was R1,200: on the 44,400 chests taken as for sale in the Estimate, this rise in price yields an improvement of R71,48,400. The sales in the last three months of the year were also increased by 900 chests, the receipts from which at the actual average rate of the year amount to R12,24,900.

1900-1901. Salt Reve.

157. Salt is the one head of Revenue in Burma which fails to give indications of the great prosperity of that Province; and the Burma Salt Revenue is expected this year to fall short of the Budget Estimate by R2,27,000. The Government of India has for some years been in correspondence with the Local Government in the hope of removing the causes which so strangely cause this exception to the general rule in Burma; but the results have not as yet produced any effect visible in figures.

In all other Provinces the Salt Revenue shows a satisfactory improvement over the Budget Estimate: the increases being —

	R
Bombay	7,30,000
Northern India Salt Department	3,92,000
Bengal	3,77,000
Madras	3,18,000

901. Revenue. 158. The Stamp Revenue has declined appreciably in the Punjab and the Central Provinces, and to a small extent in Assam and Bombay, but has developed to a remarkable extent in the other Provinces, the increases being —

	R
North-Western Provinces and Oudh	6,50,000
Madras	3,16,000
Bengal	3,00,000
Burma	2,00,000

901. Revenue. 159. The improvement in Excise Revenue has been still greater, and it is distributed over all the Provinces except Bombay—where the decline which began last year has continued with the result of a fall of R5,85,000 below the Budget Estimate—and in the Punjab—where the moderate increase over the previous year which the Budget Estimate anticipated will not be quite reached. The decline which began three years ago in Madras has now ceased. The larger increases are :—

	R
Bengal	7,00,000
Madras	7,64,000
Burma	5,00,000
North-Western Provinces and Oudh	5,50,000

or. s Revenue. 160. The Customs Revenue shows a small decline in Madras, but a large improvement in the other three Maritime Provinces, the improvement on the whole amounting to the very large sum of R28,49,000.

The duties on silver are declining. They yielded in 1899-1900 over 24 lakhs: the Budget Estimate took for them 20½ lakhs: they are now expected to yield this year only 14½ lakhs. The duties on Arms, on Liquors, on Chemicals and Drugs, and on Cotton Goods also show decreases, of smaller amounts. Those on Metals, on Oils, on Manufactured Articles and on Raw Materials and Unmanufactured Articles and the Rice Export Duties show substantial increases. But the most remarkable figures are those connected with the large imports of sugar: there are increases in the Countervailing Sugar Duties of 11½ lakhs, and in the Duties on Articles of Food and Drink (including, and mainly in, the ordinary duty on Sugar) of 12 lakhs.

r. evenue. 161. The increase under Forest occurs in Burma, R9,57,000; Bombay, R3,31,000; Bengal, R1,51,000; the North-Western Provinces and Oudh, R90,000; Madras, R1,31,000; and Assam, R35,000. There are decreases of R2,83,000 in the Punjab and of R72,000 in the Central Provinces.

r. e 162. The Post Office Receipts increase every year with the development of the Department: the increase this year is rather above the normal.

h 163. As explained in paragraphs 51 and 88 of Part II of the last Financial Statement, the increase of Telegraph Receipts in 1899-1900 was abnormally large in consequence of the use of telegrams connected with war and famine, and it was anticipated that the high level reached in that year would not be maintained. But similar causes have continued to act and the receipts are expected to exceed the Budget Estimate by 12 lakhs.

ipts. 164. As mentioned in paragraph 150 above, the enormous increase in the Mint Receipts is one which does not affect the surplus of the year as it is counterbalanced by a corresponding entry on the Expenditure side. The need for further coinage of rupees arose towards the end of last financial year: about a crore of rupees were coined in the last two months of it, and when the last Financial Statement issued it had been decided to coin another crore in the opening months of 1900-1901. The profits on the coinage of these two sums amounted to about 32 lakhs in each year. The Indian Currency Committee had

recommended that any profit on the coinage of rupees should not be credited as Revenue, but should be kept in gold as a special reserve entirely apart from the Paper Currency Reserve and the ordinary Treasury balances. When the Government of India considered the report in August 1899, it did not seem probable that the need for the coinage of additional rupees would occur for some time, and a decision on that recommendation was deferred. When the need for coinage arose somewhat suddenly in consequence of the very large imports of gold in the latter part of 1899-1900, the necessary communications with the Secretary of State regarding the recommendation and the method of giving effect to it had not been made. The profits on the coinage of the amounts above mentioned were accordingly treated in March last in ordinary course as Revenue. The orders of the Secretary of State have since been obtained: the principle of the recommendation has been accepted ; and it has been decided to continue to show the profits as Mint Revenue, but to show the net profits as Expenditure, crediting the amount to the Gold Reserve Fund, for remittance to England for investment in sterling securities: the remittance will be made either by actual shipment of the gold, or, if there is a sufficient demand, by the sale of Council Bills in excess of the amount required for the regular disbursements in London. This decision has effect from April 1900, the small credit to Revenue in the Accounts of 1899-1900 being left undisturbed. The coinage in the current year has far exceeded the crore mentioned in the last Financial Statement : the profits on the coinage of the year, shown as Mint Receipts, are expected to amount to R4,58,30,000 and the net profits, shown as Mint Expenditure and transferred to the credit of the Gold Reserve Fund for ultimate remittance to England, to R4,39,50,000.* The difference between the two amounts is due to the fact that in calculating the net profits the cost of remittance of gold to London and silver to India, the cost of coinage, and incidental expenses connected with the transactions are taken into account. The whole of the last-named amount is not immediately available for remittance and investment in sterling securities. The enormous demands on the Treasury balances in the earlier part of the year caused by the famine in the way of direct expenditure on famine relief, of indirect expenditure and reduction of revenue, of agricultural advances, and of loans to Native States affected by famine, compelled the Government of India to use the profits on the coinage up to the end of December in aid of the general balances in order to keep the borrowing of the year within the amount which there was a prospect of raising on reasonable terms. The profits on the coinage from January 1901 are being transferred in sovereigns to the Gold Reserve Fund month by month as the coinage proceeds: the amount for the three months, January to March, is estimated at 180 lakhs or £1,200,000; and that sum is held in gold in India pending remittance for investment. The net profit on the coinage of the year transferred to the credit of the Gold Reserve Fund being R4,39,50,000, and the portion held in gold ready for remittance being R1,80,00,000, there will remain on March 31, 1901, a balance of R2,59,50,000 or £1,730,000 not yet converted into gold: that balance will be converted into gold for remittance gradually as the Government of India is able to provide the money out of surplus receipts. It is hoped that this may be possible in February or March 1902 in respect of the larger part of the balance. The profits on all coinage in 1901-1902 and future years will be transferred in sovereigns to the Gold Reserve Fund month by month according to the coinage of the month.

1900-1901. Marine Receipts.

165. The bulk of the increase in the Marine Receipts represents recoveries in connection with the employment of Royal Indian Marine vessels on the service of His Majesty's Imperial Government. The Pilotage Receipts in Bengal and the Coast Light Receipts in Burma have also increased.

1900-1901. Railway Earnings.

166. The Railway Revenue in 1899-1900 showed an exceptionally large improvement, so much so that in the Budget Estimate of 1900-1901 it was considered prudent to assume that the high figure of the previous year would not be maintained. The results have been much more favourable than that cautious anticipation, and the Budget Estimate will be exceeded by the very large amount shown in paragraph 155. To this improvement practically every railway in the country contributes, with the one exception of the North Western Railway, the receipts of which are expected to fall short by 41 lakhs. The

causes are general development and exceptionally heavy traffic connected with the famine.

00-1901. rigation venue.

167. The increase in Irrigation Revenue occurs mainly in the North-Western Provinces and the Punjab, larger areas having been irrigated during both the *rabi* and *kharif* seasons, and the development of irrigation from the Chenab Canal having been rapid.

00-1901. my Receipts.

168. The increase in Army Receipts represents recoveries from His Majesty's Government of the cost of stores and animals sent to China.

00-1901. crease of penditure India.

169. The important increases of Expenditure in India are :—

	R
Mint	4,43,55,000
Jails	9,06,000
Miscellaneous	8,31,000
Famine Relief	1,32,33,000
State Railways	60,91,000
Irrigation Major Works	5,36,000

00-1901. int Charges.

170. The reason for the very large increase in the Mint charges has been explained in paragraph 164 above.

00-1901. il Expenditure.

171. With the exception of Burma, the Central Provinces (in which the estimate was specially high), and Assam, all the Provinces show considerable excesses over the Budget Estimate for expenditure in Jails. The Bengal Government increased its expenditure on Jail manufactures; and the Superintendent of Port Blair had to make an exceptional purchase of provisions; but the general causes of the excesses are that the Jail population was larger and the prices of food higher than anticipated, both being connected with the famine.

00-1901. iscellaneous xpenditure.

172. The charges for the remittance of coin have been very high in every Province, the lowness of the rupee balances having necessitated frequent remittances: the excess of these charges over the Budget Estimate amounts to R2,49,000.

The cost, R59,000, of the Famine Commission and another Commission of Inquiry was not provided for in the Budget Estimate.

But more than half of the increase in the Miscellaneous Expenditure is connected with the famine. As explained in paragraph 241, very large allotments for agricultural advances in the famine-stricken Provinces were sanctioned. Among other concessions connected therewith the Government of India gave the Local Governments authority to write off as irrecoverable half the amounts of some of the advances in cases in which they thought that desirable. The Bombay Government estimates that R2,70,000 and the Central Provinces Government that R2,60,000 will be so written off this year. These charges appear under this head.

00-1901. amine Relief xpenditure.

173. The causes for the increase in Famine Relief Expenditure are those mentioned in paragraph 150 above.

00-1901. ailway xpenditure.

174. The increase in the Working Expenses of Railways was necessitated by the larger traffic, which earned the still larger increase in Revenue mentioned above.

00-1901. rrigation xpenditure.

175. The larger part, R4,04,000, of the increase in the Working Expenses of Irrigation Major Works occurs in the Punjab. It was required to repair damages caused by floods and to meet larger collection charges for the increased Revenue. Special repairs of flood damages caused smaller increases in Madras and the North-Western Provinces.

00-1901. ecreases of xpenditure in ndia.

176. The important decreases of Expenditure in India are :—

	R
3.—Land Revenue	6,41,000
Education	5,29,000
Political	19,82,000
Scientific and Minor Departments	6,29,000
Construction of Railways charged to Provincial and Local Revenues	10,05,000
Subsidized Railways, Land	8,85,000
Military Works	10,09,000
Army	1,25,98,000

177. The diminution in the charges under 3.—Land Revenue is distributed over all the Provinces except Bombay, in which there is an increase of R94,000 caused by sanctions during the year to schemes for the division and demarcation of waste land in Sind. The decrease may be said to be generally due to the tendency of Local Governments to make fuller provision in the Budget Estimate for payment of salaries and other charges than is actually required. *1900-1901. Land Revenue Charges.*

178. The same general explanation applies to the decrease under Education, which is distributed over all the Provinces except Madras. *1900-1901. Education Expenditure.*

179. The main decreases in Political Expenditure are the following:— *1900-1901. Political Expenditure.*

A provision of two lakhs was made in the Estimate for the purchase of Hastings House, Calcutta, which was then in contemplation. The purchase has since been completed: the payment will be made as soon as the legal formalities have been complied with: it is doubtful whether it will be made before or after April 1, but, when made, it will be charged to the head 45.—Civil Works.

The expenditure this year on the Tochi Militia will be less than the Estimate by nearly two lakhs.

The charges on the Punjab Frontier,—the Khyber, Kohat, Chitral and Gilgit,—will be less than the Estimate by over a lakh.

His Highness the Amir of Afghanistan draws his subsidy at irregular intervals, and this year it is expected that there will be on March 31 undrawn arrears of about 20 lakhs, and that the payments to him will be less than the Budget Estimate by about 15 lakhs.

180. The reduction under Scientific and Minor Departments is distributed over all the Provinces. A large part of it is due to the general cause mentioned in paragraph 177 in regard to Land Revenue Expenditure. Only two items need be mentioned; a decrease of over a lakh in Survey Expenditure and a decrease of three quarters of a lakh in the expenditure on aluminium manufactures in the Madras School of Arts, the last being more than counterbalanced by decreased receipts from the sale of the ware. *1900-1901. Expenditure on Scientific and Minor Departments.*

181. The decrease under Construction of Railways charged to Provincial and Local Revenues is due to a change in the programme for the construction of the extension of the Mayaveram-Mutupet Railway, a local charge of the Tanjore District Board. The construction is to be spread over three years instead of two, and the expenditure is consequently less than in the Budget Estimate by about 10 lakhs. *1900-1901. Construction of Railways charged to Provincial and Local Revenues.*

182. Provision to the extent of 5½ lakhs was made in the Estimate for the purchase of land for the Tilgaon-Sylhet, Akhaura-Bhairab Bazaar, the Chandipur Taki and the Bezwada-Masulipatam Branch Railways. The schemes have not yet arrived at the stage requiring the purchase of land, and nothing has been spent on them this year. The expenditure on land for other branch railways has also been less than the provision made. *1900-1901. Subsidized Railways—Land.*

183. The reduction in the Expenditure in India on Military Works represents partly a transfer of Expenditure from India to England and partly the usual lapses which always occur under this head. *1900-1901. Military Works Expenditure.*

184. There are, as usual, a large number of variations between the Budget and the Revised Estimates of Military Expenditure. But the large decrease, of a crore-and-a-quarter, is mainly due to the absence of troops in China and the prolonged absence of troops in South Africa: the saving caused by the absence of the China Contingent till the end of this year is estimated at 40 lakhs, the additional saving caused by the absence of Indian troops in Africa after September last, at 39½ lakhs, and the expenditure on the purchase of local stores to replace those issued to the absent contingents will be less by 21 lakhs than the credits for the issues. In addition, the cost of food supplies has been less than the Estimate by nearly 15 lakhs; and the grants under several heads have proved higher than the actual requirements by over 40 lakhs. The savings would have been much larger had it not been decided, in consideration of the savings from the absence of troops, to sanction new Military Expenditure, aggregating 64 lakhs, of which 12 lakhs will be spent in India: it was also necessary to incur expenditure exceeding 13 lakhs in chartering transports to carry troops to England. *1900-1901. Army Expenditure.*

1900-1901. Revenue in England.

185. There is an increase in the Revenue in England of £36,600 due to larger temporary investments of the cash balances and higher rates of interest which raised the Interest receipts above the Budget Estimate by £41,000.

1900-1901. Expenditure in England.

186. The expenditure in England is expected to be less than the Budget Estimate by £73,500. The Interest charges are increased by £143,000, the discount on the issue of £3,000,000 stock, and by £78,000, the increased interest payable in the year in consequence of that issue and on India Bills. Some of the India Bills were issued for six months and replaced within the year by Bills for twelve months, involving an interest charge for eighteen months; and the rates payable on the Bills were also higher than anticipated. On the other hand, the payment on account of the annuities in purchase of the Great Indian Peninsula Railway will be £53,200 less than estimated, and the Army Expenditure less by £345,700, due chiefly to the dislocation of the arrangements for the Indian Reliefs owing to the despatch of troops to South Africa, which caused reductions in the cost of the Troop Service and in the furlough allowances and pay during voyage of British Forces serving in India.

Section III.—The Budget Estimate of 1901-1902.

1901-1902. Statement of the gross figures.

187. The following is a general comparison of the Budget Estimate of 1901-1902 with that of 1900-1901:—

	1900-1901.	1901-1902.	1901-1902, better.	1901-1902, worse.
	£	£	£	£
REVENUE.				
India	69,978,300	71,795,300	1,817,000	...
England	177,500	396,600	219,100	...
TOTAL	70,155,800	72,191,900	2,036,100	...
EXPENDITURE.				
India—				
Imperial, Provincial and Local	53,297,100	53,539,700	...	242,600
Adjustment of Provincial, and Local Surplus or Deficit	—550,600	—182,600	...	368,000
NET	52,746,500	53,357,100	...	610,600
England	17,249,000	18,143,900	...	894,900
TOTAL	69,995,500	71,501,000	...	1,505,500
SURPLUS	160,300	690,900	530,600	...

1901-1902. General features.

188. Though famine expenditure unhappily will not cease next year, it is expected to amount to only about one crore of rupees, as compared with the Budget Estimate for 1900-1901 of over five crores: the Famine Insurance Grant will, however, be maintained at the fixed sum of one crore-and-a-half: so that the saving on this account affecting the surplus will amount to only 3½ crores. The Revenue next year is estimated to exceed the Budget Estimate of 1900-1901 by about two crores, the Railway earnings being taken net. On the other hand, the Expenditure Grants for next year have been largely increased. New expenditure to improve the efficiency of the Army has been sanctioned to the extent of over a crore-and-a-half: large increases of Imperial expenditure under other heads have been sanctioned; and grants-in-aid of Provincial Revenues, aggregating 164½ lakhs, have been made to Local Governments to enable them to incur expenditure from Provincial Revenues.

A surplus of a little over a crore of rupees has been retained and devoted to increasing the capital expenditure on the construction of Railways and Irrigation Works.

189. In India an increase in total Revenue of ₹2,72,54,000 or £1,817,000, and an increase in total Expenditure of ₹36,40,000 or £242,600, are estimated. The improvement of ₹2,36,14,000 or £1,574,400 is divided thus, after the transfer from Imperial to Provincial of the grants-in-aid of ₹1,64,43,000 or £1,096,200, explained in paragraph 266: in the Imperial Sections of the Accounts ₹1,80,95,000 or £1,206,400, and in the Provincial-Local Section ₹55,19,000 or £368,000. The Revenues in England are estimated to exceed the last Budget Estimate by £219,100, and the Expenditure in England to exceed by £894,900, being an increase in net Sterling Expenditure of £675,800. The net improvement in the Imperial Section is, therefore, £530,600, which raises the surplus to £690,900.

190. The only important decreases in Revenue in India are:— *1901-1902. Decreases in Revenue in India.*

	R
Mint	36,05,000
Army	20,66,000

and both of these are for the most part nominal rather than real.

191. The larger part of the decrease under Mint is due to the omission of any provision for profits on coinage next year, whereas a sum of 32 lakhs was entered in the last Budget Estimate. This omission does not mean that the Government of India expects that there will be no coinage of rupees in the coming year. On the contrary, it is certain that there will be some; but the Government is unable now to form any reliable estimate of the amount; and, as under the decision explained in paragraph 164, the item will not affect the surplus of the year, it has been thought best to make no entry either for the receipts or for the charge on the transfer of the net profits to the Gold Reserve Fund. *1901-1902. Mint Receipts.*

The issues of copper coin during the famine having been large, it is expected that there will be no net issue in the coming year. This causes a decrease on the "Gain on copper coinage" of 4 lakhs, the amount taken for the head in the Budget Estimate of 1900-1901.

192. The decrease in Army Receipts is due to the absence of any provision for recoveries from His Majesty's Government of the value of horses sent to South Africa. *1901-1902. Army Receip*

193. The following are the more important increases of Revenue in India:— *1901-1902. Increases of Revenue in I*

	R
Land Revenue	13,79,000
„ due to Irrigation	6,62,000
Salt	13,92,000
Stamps	11,98,000
Excise	22,16,000
Provincial Rates	16,43,000
Customs	8,08,000
Forest	9,84,000
Interest	8,25,000
Telegraph	4,50,000
Railway Earnings—	
State +2,24,48,000	
Guaranteed —30,99,000	1,93,49,000

194. The restriction of the famine to the one Province of Bombay accounts for the increases in Land Revenue and Provincial Rates. *1901-1902. Land Revenu*

In Bombay we have to face a further decline, and the Estimates allow for a falling-off in the collections of ₹47,00,000 under Land Revenue including that due to Irrigation.

In the North-Western Provinces and Oudh a decrease of ₹11,44,000 is expected: there were considerable arrear collections from the earlier famine to be collected this year. In Madras also a smaller diminution of ₹2,10,000 has been taken.

In all other Provinces there are substantial increases.

It may be mentioned that in Bombay, the Central Provinces and the Punjab, the Government of India substantially reduced the estimates proposed by the Local Governments. The Estimates of other Local Governments were accepted.

1901-1902. Salt Revenue.

195. The progress of the Revenue in the present year fully justifies the increase anticipated in Salt Revenue. The Estimate is for a total somewhat less than the probable collections this year.

1901-1902. Customs Revenue.

196. The same remarks apply to Customs Revenue. In this case the reduction below the probable collections of this year is substantial, as it was not considered prudent to assume that the very high level of the duties on some articles of the import tariff will be maintained next year. In particular the duties on sugar (ordinary duty and additional countervailing duty) are taken more than 15 lakhs lower than the probable collections this year.

1901-1902. Stamps and Excise Revenues

197. Under Stamps and Excise, the Estimates assume that the improvement attained this year will be maintained next year, with a further improvement under Excise in the two Provinces—Bombay and the Central Provinces—where the receipts this year are abnormally low.

1901-1902. Forest Revenue.

198. The increase in Forest Revenue represents the usual increase under the head.

1901-1902. Interest Receipts.

199 The interest on the very large loans made to Native States this year accounts for ₹7,38,000 of the increase in Interest Receipts; and an increase in the overdrawn Capital of Railway Companies for the remainder.

1901-1902. Telegraph Receipts.

200. The increase in Telegraph Receipts represents the normal progress of the Department moderately estimated.

1901-1902. Railway Earnings.

201. The Estimate for net Railway earnings has been taken slightly above the amount of the probable earnings this year. It is assumed that the normal increase will not much more than counterbalance the absence of the specially heavy traffic connected with the famine.

1901-1902. Decreases in Expenditure in India.

202. The following are the more important decreases in Expenditure in India:—

	₹
Famine Relief	3,99,14,000
Construction of Railways charged to Provincial and Local Revenues	6,30,000
Guaranteed Railway, Surplus Profits	9,33,000

1901-1902. Famine Relief Expenditure.

203. Bombay is the only Province in which large famine expenditure is required next year. The Estimate of the Local Government is for ₹99,91,000. The Chief Commissioner of the Central Provinces thinks that some small relief will be required before the rains come next year in one pergana of the Balaghat District, and also possibly in an adjacent corner of the Seoni District, and in one or two remote localities in other parts of the Province; and one lakh has been entered for the Central Provinces.

1901-1902. Construction of Railways from Provincial and Local Revenues.

204. As explained in paragraph 181 above, the expenditure under this head is Local Expenditure for the extensions of the Mayaveram-Mutupet Railway by the Tanjore District Board. The estimated expenditure next year is ₹12,30,000, of which ₹5,88,000 will be charged to the loan which the Board has raised, and the remainder to this head against the Revenues of the Board.

1901-1902. Payment of Surplus Profits to Guaranteed Railway Companies.

205. The Great Indian Peninsula Railway having been acquired by the State, no payments of its surplus profits will be made next year; and the payments to the Bombay, Baroda and Central India Railway Company are expected to be less than in the Budget Estimate for 1900-1901.

206. The following are the more important increases in Expenditure in India:— *1901-1902. Increases in Expenditure in India.*

	R
3.—Land Revenue	10,07,000
Post Office	6,74,000
Telegraph	6,96,000
Law and Justice, Courts	5,04,000
Police	17,56,000
Education	7,11,000
Medical	6,08,000
Political	12,21,000
Scientific and Minor Departments	13,32,000
Miscellaneous	23,67,000
Protective Irrigation Works	6,37,000
Railways, Working Expenses	1,00,02,000
„ Interest on Debt	10,77,000
„ Interest on Capital deposited by Companies	5,31,000
Irrigation, Working Expenses	5,54,000
„ Interest on Debt	3,91,000
Minor Irrigation Works	6,31,000
Military Works	16,65,000
Civil Works	79,66,000
Army	53,37,000

207. Practically every Province shows an increase in Land Revenue Expenditure. The returning prosperity of the Provincial Revenues of most Provinces and the grants-in-aid made from Imperial Revenues, enable the Local Governments to undertake new expenditure. *1901-1902. Land Revenue Expenditure.*

208. The Expenditure on the Post Office and Telegraph increases every year. The increases next year are above the normal amounts as reforms and improvements are contemplated in both Departments. *1901-1902. Post Office and Telegraph Expenditure.*

209. Improvement in the efficiency of the Police is a pressing need throughout India, and necessitates increased expenditure in every Province. But the main item of the large increase under this head occurs in Burma, R12,44,000. It is proposed to make a large increase to the Military Police in order to release detachments of the Army from frontier stations in Burma. *1901-1902. Police Expenditure.*

210. All Local Governments provide for increased Expenditure on Education, that being one of the objects to which it is desired to allot larger grants. *1901-1902. Education Expenditure.*

211. The largest increase in Medical Expenditure occurs in Bengal, R5,09,000, the cause being plague prevention: smaller increases occur in the Punjab, the North-Western Provinces and Oudh, and Burma: there are decreases in Bombay, the Central Provinces, and Madras. *1901-1902. Medical Expenditure.*

212. The cause of the increase in Political Expenditure is a provision of 15 lakhs made for arrears of His Highness the Amir of Afghanistan's subsidy. Ordinarily provision is made only for a full year's subsidy, on the assumption that the arrears at the beginning and end of the year will be about the same. But the large arrears outstanding this year rendered a departure from the ordinary rule advisable for next year's Estimate. *1901-1902. Political Expenditure.*

213. The Census causes the increase under Scientific and Minor Departments. The amount entered in the Budget Estimate of this year on this account was R7,32,000, and the provision for next year is R18,10,000, making a total of R25,42,000. Other increases have also been allowed under this head by the Government of India and Local Governments. *1901-1902. Expenditure on Scientific and Minor Departments.*

214. The increase in Miscellaneous Expenditure is mainly due to the remission of the recovery of the famine loans mentioned in paragraph 172 above: the Bombay Government provides R13,75,000, and the Chief Commissioner, Central Provinces, R6,00,000 on this account. *1901-1902. Miscellaneous Expenditure.*

Fuller provision has also been made for remittance charges.

1-1902. penditure on tective Irriga- Works.

215. Every effort is being made to push on the construction of Irrigation Works which promise to afford protection against famine, and the Estimates provide for expenditure on all the schemes which are likely to be ready for the commencement of work next year.

1-1902. ilway Working penses.

216. The increase in the Working Expenses of Railways is required to earn the increased Revenue.

1-1902. igation penditure.

217. The increase in the Working Expenses of Irrigation Works is necessary to maintain and work the new canals on which Capital Expenditure is being incurred.

1-1902. ilway and igation erest Charges.

218. The increase in the Railway and Irrigation interest charges is the interest on the new Capital Expenditure.

1-1902. penditure, inor Irrigation orks.

219. The importance of Minor Irrigation Works, as a subsidiary preventive of famine, is recognised by increased expenditure both from Imperial and Provincial Funds.

01-1902. vil Works penditure.

220. The restriction of expenditure in recent years has been specially felt in the case of Public Works; and the position now admits of largely increased expenditure both by the Imperial and Provincial Governments to provide some of the new buildings and communications which are everywhere required. Of the total increase of ₹79,66,000, the sum of ₹26,65,000 is in the Imperial Section, ₹47,50,000 in the Provincial Section, and ₹5,51,000 in the Local Section. Of the Provincial increase a portion may be diverted to other heads by Local Governments. When the grants-in-aid of 164½ lakhs, mentioned in paragraph 188, were made, additions, aggregating ₹25,63,000, being the amount available after raising the closing Provincial balances of the year to the prescribed minimum for each Province, were made by the Government of India to the Provincial grants for 45.—Civil Works, the Local Governments being at liberty either to spend the additions on Public Works or to reappropriate them for other expenditure.

901-1902. rmy Expenditure.

221. The Budget Estimate of this year provided for savings of ₹38,50,000 in consequence of the absence of troops in South Africa: the troops are still absent in Africa and other troops have been sent to China: it is probable that they will be absent for a part of next year; but it was not considered sufficiently certain that they will be absent for any prolonged period to justify the Government in taking credit for the savings in the Estimate. The Estimate of this year also provided for savings in consequence of the absence of three Native Regiments in Ceylon, Singapore, and Mauritius. As new regiments have been raised to replace these as well as two other new regiments required for service outside India, making five in all, there is no similar saving in next year's Estimate. This causes an increase of ₹8,85,000. On the other hand, the fall in prices admits of a decrease of 40 lakhs in the grant for the cost of food supplies, and the absence of special provision to replace horses sent to South Africa reduces the estimate for the purchase of remounts by ₹29,37,000. The net result of these figures is a decrease in the Army Expenditure from accidental causes of ₹22,02,000.

The addition of that sum to the increase of ₹53,37,000, shown in paragraph 206, gives a total increase of ₹75,39,000 to be explained. This is mainly the portion incurred in India of the new Expenditure for increasing the efficiency of the Army, aggregating about 160 lakhs, which the Government of India, with the approval of the Secretary of State, has recently sanctioned. The remainder appears on the Home Estimates under Army £520,800, see paragraph 223 below, and in the Military Works Grant ₹17,75,000.

901-1902. evenue in ngland.

222. The Estimate of Sterling Revenue exceeds the Budget Estimate for the current year by £219,100. This is caused by the contributions to be paid by His Majesty's Imperial Government in consequence of the recommendations of the Royal Commission on Indian Expenditure, namely, £130,000 towards the cost of the transport of Troops, and £100,000 towards the Military charges for Aden. On the Expenditure side payments to His Majesty's Imperial Government, amounting to about £27,500, are to be withheld, raising the total relief to Indian Revenues, as a result of the Commission, to £257,500.

223. There is an increase in Sterling Expenditure of £894,900. *1901-1902. Expenditure in England.*
The permanent loans of this year and next and a rise in the rate of interest for temporary loans increase the interest charges by £136,900. There is a net increase in the interest and annuity payments connected with the Great Indian Peninsula Railway of £163,900, caused by the purchase of the Railway. Further receipts of capital cause a further increase in the interest payments on Railway Capital. The Army Expenditure shows an increase of £520,800, mostly under Ordnance Stores.

Section IV.—Statements comparing the figures of the Estimates under the more important heads of Revenue and Expenditure with those of past years.

224. The effect of the famines are apparent in these figures. It will be observed that the total Revenue is taken for next year at an amount slightly below the Revenue realised in 1898-99. It was considered prudent to frame the total estimate cautiously in view of the expediency of leniency in Provinces just recovering from famine.

225. As stated in paragraph 156, the prices realised at the sales of Bengal Opium in the present year have been high. The fluctuations in these prices being large from year to year and the state of affairs in China at present being such as to add a special element of uncertainty to this always uncertain head of Revenue, the Budget Estimate does not assume a continuance of these specially high prices, but takes the average price for next year at the moderate amount of R1,100 a chest. The price assumed in the Budget Estimate of this year was R1,200. The difference of R100 causes a decrease in the Estimate of next year as compared with that of this year of R44,40,000, most of which is counterbalanced by an increase in the quantity to be sold. The quantity of Bengal Opium taken as to be sold next year exceeds that taken in the Budget Estimate of this year by 3,600 chests yielding an increase, at the assumed price of R1,100 a chest, of R39,60,000. The monthly quantity to be sold up to December next has been finally fixed: the quantity to be sold in the remaining three months of the financial year will be fixed in June when the outturn of the poppy crop is known: for Budget purposes it is assumed that the present monthly quantity will continue till the end of the year.

The outturn of the crop in the current year was above the average, and the payments to the cultivators consequently exceeded the Budget Estimate by five lakhs. Next year provision is, as usual, m

The exports of Malwa Opium from Bombay in the current year are expected slightly to exceed those of the year 1899-1900 on which the Budget Estimate was based; and a continuance of this small improvement is assumed in the Estimate for next year.

(*a*) Chiefly excise on local manufacture. (*b*) Chiefly duty on imported salt.

226. As explained in paragraph 157, the Salt Revenue has improved considerably this year in spite of the famine, and there is every reason to expect that the greater part of the improvement will be maintained next year. The estimate for next year is a moderate estimate of what is now the normal Revenue from Salt.

The increase in expenditure occurs in Madras, where the Local Government is largely increasing its purchases in pursuance of the policy adopted in its Salt Administration. Those purchases will yield a return in future years.

228. The decline in Excise Revenue anticipated in the Budget Estimate of this year in consequence of the famine has occurred in Bombay to more than the extent taken, and in the Central Provinces to nearly the extent taken. But there have been much larger increases in other Provinces. For next year it is estimated that the level of this year will be maintained in other Provinces, and that in Bombay and the Central Provinces there will be some recovery, there being signs of improvement in the later months of the present year in both these Provinces.

Chiefly Rice . .	72,48,190	1,01,12,130	87,63,905	87,25,000	90,09,000	90,08,000
LAND CUSTOMS AND MISCELLANEOUS .	6,51,230	6,11,490	7,66,751	7,32,000	8,00,000	8,16,000
GRAND TOTAL .	4,64,12,950	4,80,21,620	4,70,06,862	4,70,13,000	4,98,62,000	4,78,21,000
Charges . . .	21,13,790	21,48,440	23,06,176	23,53,000	24,32,000	24,65,000

230. The above table shows a most satisfactory increase in the Customs Revenue. The most striking feature is the very large increase this year in the duties on sugar. The additional countervailing duties yield 11½ lakhs more than the Budget Estimate and 10⅝ lakhs more than the actuals of 1899-1900. The ordinary five per cent duty on sugar appears under the head "Articles of Food and Drink" in which the increase is over 12 lakhs, nearly all of it being in the duty on sugar. The imports of sugar having been so abnormally large this year, it is not considered prudent to assume that these very large receipts will continue next year: the amount for the countervailing duty is, therefore, taken in the Budget Estimate of next year 7 lakhs lower than the Revised Estimate of this year, and that for "Articles of Food and Drink" 8½ lakhs less.

The duties on silver have declined considerably: we have not assumed any substantial recovery next year.

The duties on Oils, Manufactured Articles, and Raw Materials all show substantial increases, which we estimate to retain only partially next year.

The Export duties on rice show an increase of nearly 3 lakhs, which we estimate to retain next [illegible]

On the other hand, there are declines, not serious, in the duties on Arms, Liquors, Chemicals, and Cotton Goods.

ASSESSED TAXES.

	Accounts, 1897-98.	Accounts, 1898-99.	Accounts, 1899-1900.	1900-1901.		1901-1902, Budget.
				Budget.	Revised.	
	R	R	R	R	R	R
Deduction by Government from Salaries, Pensions, and Interest payments . . .	44,44,940	43,84,540	43,84,515	44,70,000	44,87,000	44,95,000
Other Collections . .	1,45,09,710	1,48,37,370	1,51,19,901	1,50,07,000	1,51,33,000	1,50,64,000
TOTAL .	1,89,54,650	1,92,21,910	1,95,04,416	1,94,77,000	1,96,20,000	1,95,59,000
Charges . . .	3,22,780	3,28,120	3,32,364	3,44,000	3,36,000	3,64,000

231. The decrease of the Estimate for next year below the Revised Estimate for this year is due to the purchase by the Government of the Great Indian Peninsula Railway: the income-tax on the surplus profits of that Railway Company now disappears.

FOREST.

	Accounts, 1897-98.	Accounts, 1898-99.	Accounts, 1899-1900.	1900-1901.		1901-1902, Budget.

233. The explanations required regarding the Interest figures are given in paragraphs 185, 186, 199, and 218. The Revised Estimate for this year anticipates a net receipt of Savings Banks Deposits, apart from interest, of 9½ lakhs instead of the net withdrawal of 20 lakhs taken in the Budget Estimate. And the Estimate for next year takes credit for a net receipt of 20 lakhs.

POST OFFICE.

	Accounts, 1897-98.	Accounts, 1898-99.	Accounts, 1899-1900.	1900-1901.		1901-1902, Budget.
				Budget.	Revised.	
India—	R	R	R	R	R	R
Revenue . .	1,87,91,630	1,91,40,671	1,96,24,722	1,98,08,000	2,03,04,000	2,00,74,000
Expenditure . .	1,56,19,620	1,55,86,694	1,63,13,233	1,72,04,000	1,69,81,000	1,78,78,000

TOTAL ENGLAND	2,180,086	2,286,235	2,355,624	2,322,600	2,329,700	2,327,600

238. Political pensions are decreasing slowly: Superannuation Allowances and Pensions are increasing steadily with additions to the pension list: Stationery and Printing Charges must increase with the growing needs of the administration of the country. The large increases in Miscellaneous Expenditure have been explained in paragraphs 172 and 214. As regards Exchange, it may be explained that the entries under the head XXIV.—Exchange or 31.—Exchange represent (1) the difference between the net Sterling Expenditure at 1*s.* 4*d.* the rupee and the actual average rate of the year, and (2) the difference between the amounts of remittances between England and India at the rate of 1*s.* 4*d.* the rupee and the rate at which the sums are brought to account under various contracts with Railway Companies and others. In the Revised Estimate of this year the transactions result in a small entry on the Expenditure side: next year they result in a larger entry on the Revenue side.

FAMINE RELIEF AND INSURANCE.

Bombay . . .	1,16,41,072	2,48,52,000	2,95,31,000	99,91,000
England converted into Rupees at R15 = £1	55,750	...	1,18,000	...
TOTAL .	3,11,23,771	5,00,25,000	6,33,76,000	1,01,11,000

240. The following table gives an estimate of the indirect expenditure and loss of revenue :—

	1899-1900, Accounts.	1900-1901, Revised.	1901-1902, Budget.
	R	R	R
Loss of Revenue—			
Land Revenue . . .	1,90,85,000	1,30,27,000	41,50,000
Provincial Rates . . .	17,28,000	16,89,000	1,35,000
Other Heads . . .	47,02,000	27,22,000	8,70,000
	2,55,15,000	1,74,38,000	51,55,000
Deduct—Net Gain of—			
Railway Revenue	79,82,000	40,00,000	...
Irrigation . .	11,14,000	...	...
	1,64,19,000	1,34,38,000	51,55,000
Increase of Expenditure—			
Compensation for dearness of provisions and other charges	40,88,000	66,03,000	3,58,000
Total estimated cost of famine in addition to the charge under 33.—Famine Relief .	2,05,07,000	2,00,41,000	55,13,000

241. The Budget allotments for increased agricultural advances connected with the famine were about 20 lakhs this year: additional allotments, aggregating 122 lakhs, were sanctioned during the year. The increase on this account in the Estimate of next year amounts to about 30 lakhs, chiefly in Bombay.

242. The loans to Native States to help them in dealing with famine relief in their territories have far exceeded the provision of 75 lakhs mentioned in paragraph 135 of Part II of the last Financial Statement. The loans actually sanctioned during the year amount to the large total of over four crores of rupees. This includes the large loan of two crores to the Hyderabad State, about a crore advanced to the Berar Administration, 68 lakhs to Bombay States, and 38 lakhs to Rajputana States.

Guaranteed Railways—						
Miles open on April 1	2,588	2,588	2,588	2,627	2,612*	1,305

* Includes the mileage of the Great Indian Peninsula Railway as it was a Guaranteed Railway for the first three months of the year.

243. The Revised Estimate of net receipts on State Railways in 1900-1901 is higher than the Budget Estimate by R82,41,000 or £549,400. The improvement is a very general one though it is most marked in the case of the East Indian, Rajputana-Malwa, Indian Midland and Great Indian Peninsula Railways. It is due to a general development of traffic, to increased open mileage, and to heavy traffic in food stuffs consequent on famine.

244. The net receipts from State Railways in 1901-1902 are estimated at R42,05,000 or £280,300 more than the Revised Estimate for 1900-1901. This increase is due to the inclusion, under this head, of the transactions of the Great Indian Peninsula Railway for the whole year, whereas this year it was a State Railway for nine months only: to large additions to the open mileage: to the consequent development of traffic; and to an expected return to normal conditions on the North-Western Railway, the only Railway on which there was an important decline in earnings this year. The increase in working expenses is due to increased traffic which causes in the other side the increase in earnings and to provision having been made for heavier repairs and renewal of rolling stock. The increase in interest and other charges in India is due to the progress of Capital outlay, and in England chiefly to provision having been made for a full year's interest and annuity payments in respect of the Great Indian Peninsula Railway as against only a half-year's payments provided for in the Revised Estimate.

245. The Revised Estimate of net receipts from Guaranteed Railways is R1,62,000 or £10,800 higher than the original Estimate, due almost entirely to an improvement in traffic on the Great Indian Peninsula Railway during the first three months of the year, during which period this line continued to be classed under this head. The Budget Estimate of net receipts for 1901-1902 is R32,61,000 or £217,400 lower than the Revised Estimate for the current year and is due to the exclusion of the transactions of the Great Indian Peninsula Railway, which are now shown under "State Railways."

246. The decrease in the Budget Estimate of surplus profits and other charges for 1901-1902, as compared with the Revised Estimate for 1900-1901, is due to the Great Indian Peninsula Railway having become a State Railway.

IRRIGATION.

Irrigation.	Accounts, 1897-98.	Accounts, 1898-99.	Accounts, 1899-1900.	1900-1901.		1901-1902, Budget.
				Budget.	Revised.	
Major Works.	R	R	R	R	R	R
Revenue — Direct Receipts	2,37,77,440	2,21,29,300	2,36,77,938	2,30,74,000	2,57,58,000	2,34,43,000
Revenue — Land Revenue	96,47,380	1,00,87,584	1,00,52,606	1,06,71,000	1,09,59,000	1,13,33,000
Expenditure — Working Expenses	89,21,190	94,03,929	99,71,283	98,91,000	1,04,27,000	1,04,45,000
Expenditure — Interest	1,28,42,490	1,31,26,938	1,34,51,236	1,38,49,000	1,38,27,000	1,42,40,000

Expenditure	96,77,170	94,03,466	1,05,29,591	1,07,67,000	1,03,35,000	1,13,97,000
Statistics of Major Works.						
Capital Outlay to March 31	32,63,98,030	33,31,93,752	34,26,13,013	35,31,57,720	35,19,94,013	36,32,74,013

247. The Revised Estimate of receipts from Major Works is higher than the Budget Estimate by R29,72,000. The increase is due to the larger demand for water from the canals in the North-Western Provinces and Oudh and the Punjab, in consequence of a failure of the rains, as well as to the development of irrigation from the Chenab Canal and the opening of the Jamrao Canal in Sind. The increase in the receipts from Minor Works occurs also in the North-Western

Provinces and Oudh and the Punjab, and is due to the same cause. The increased Revenue of 1900-1901 caused an increase in the collection charges, and damages by floods rendered special repairs necessary in the Punjab and Madras. The Budget Estimate of direct receipts from Major Works anticipates a decrease of ₹23,15,000. Seasonable rainfall has considerably reduced the area irrigated by the canals in Upper India during the present *rabi* season, except by the Chenab Canal, in the revenue of which an increase of ₹5,05,000 is expected. The increase in the indirect receipts is due to the further development of irrigation from the Chenab and Jamrao Canals.

248. The financial results obtained during 1898-99 and 1899-1900 from Irrigation Works, for which Capital and Revenue Accounts are kept, are given below :—

	1898-99.	1899-1900.
MAJOR WORKS.	₹	₹
Capital Outlay—		
Direct and Indirect . During the year . .	70,71,840	97,06,074
Direct and Indirect . To end of year . .	34,83,46,160	35,80,52,223

RECEIPTS.						
India . . ₹	62,26,319	65,91,962	61,77,332	62,48,000	62,94,000	62,22,000
England . . £	28,911	30,519	29,058	27,300	25,500	25,600

249. The expenditure on Imperial Military Works in India is expected to be less than the Budget Estimate by ₹10,09,000, while that in England has been increased by ₹3,84,000. The grant of the year was increased by ₹2,20,000 transferred from the Military Estimates for expenditure on certain mobilization works, but a lapse of ₹7,48,000 on the total grant is anticipated. A special addition of ₹17,75,000 has been made to the Budget grant for 1901-1902: this is part of the large new expenditure mentioned in paragraph 221, as having been sanctioned to increase the efficiency of the Army. It is given for the following purposes:—

	₹
The new Cordite Factory . . . . . (in addition to 2 lakhs provided from the ordinary grant)	6,00,000
The new Gun Carriage Factory . . . . . (in addition to 2 lakhs from the ordinary grant)	2,20,000
Mounted Infantry Schools	2,50,000
Accommodation for a third Howitzer Battery . . .	5,00,000
Coast Defence Electric Lights	75,000
A new Small Arms Factory	50,000
Accommodation for increase in personnel of the Sub-Marine Mining Establishment in India	80,000

250. The expenditure on Imperial Civil Works during 1900-1901 is expected to be more than the Budget Estimate by ₹1,49,000; the increase being due to special grants having been sanctioned during the year for the Military Secretariat, Calcutta, and for the purchase of a site for the Bagdad Residency. The Budget grant for 1901-1902 is higher than that for 1900-1901 by ₹26,65,000, special grants having been allotted for new public offices at Calcutta, Simla, Chittagong, and Bangalore, and a further contribution having been made towards the Simla Extension project. The expenditure on Provincial Civil Works during 1900-1901 is expected to be more than the Budget Estimate by ₹3,39,000, while that on Local Civil Works is expected to be less than the Budget Estimate by ₹6,92,000. The Provincial Budget Estimates for 1901-1902 exceed those of the

present year by the large amount of R47,50,000. This is possible in consequence of the returning prosperity of most of the Provinces and of the special contributions made from Imperial as mentioned in paragraph 188.

The Budget grant for 1901-1902 for Local Civil Works is slightly in excess of that for 1900-1901, as in Bengal and Madras it has been found possible to devote additional funds to the construction of roads and other works.

251. With regard to the Expenditure in 1900-1901, it may be mentioned that from the large savings that have accrued by the absence of the Indian Contingents in South Africa and China, the Government of India has sanctioned special new expenditure with the object of improving the efficiency of the Army. Among the more important of these measures are the following :—

Purchase of six batteries of German guns and an additional 20,000 Lee-Enfield rifles at a cost of £262,000.

300 artillery horses have been procured for £18,000.

The equipment of four general hospitals of the Field Army has been completed at a cost of £9,000.

£10,000 have been incurred for 10 miles of light tramway material and for railway sidings and water-supply arrangements at rest-camps.

£24,000 have been spent on light railway material.

The acquisition of land for tactical instruction has cost £6,000.

The grant of compensation to Australian shippers of horses has cost £10,000, and bounties to British soldiers extending their colour service has involved an expenditure of £15,000.

£12,000 have been spent on account of the addition of a howitzer battery to the Field Artillery in India, and £7,000 on temporarily increasing the Native Army reserves.

The total cost of all these measures exceeds £425,000.

With regard to the Expenditure of next year, those causes of increase may first be stated which are beyond the control of the Government of India. In the Budget for next year it has been assumed that there will be no savings owing to the despatch of troops out of India without replacement, and as compared with the current year's Budget there will be an increase of £316,000 on this account. The rise in price of metals and home stores accounts for an increase of about £100,000. The abatement of famine in many parts of the country gives, on the other hand, a reduction of £267,000, so that the net addition to the expenditure due to unavoidable causes may be approximately taken at £149,000.

The Government of India has also deemed it necessary to sanction several measures involving new expenditure for the improvement of the efficiency of the Army. Foremost comes the re-armament of the Native Army, for which £395,000 have been provided. £105,000 have been set aside for the reorganisation of the Transport Service.

The purchase of 81 maxim guns for the Field Army and coast defences will cost about £34,000, and the purchase of new 10-pr. guns for mountain batteries in India will cost £27,000.

The addition of two howitzer batteries to the Field Army and of one company of Royal Garrison Artillery accounts for an increase of £79,000.

The formation of five schools for mounted infantry in India will involve an expenditure of £43,000, while £26,000 represent the increase due to the addition of one British officer per regiment of Native Infantry in India and of eight officers for the Commissariat-Transport Department.

Provision has also been made for the following :—

Two 6″ B. L. guns for the re-armament of Choki Point battery, £11,000; purchase of 18 machine guns of different patterns for trial, £8,000; provision of Grenfell sights for the Field Artillery, £8,000; improvement of the equipment of field batteries and ammunition column units in India, £18,000; provision of cordite ammunition for 6″ B. L. guns of coast defences, £8,000; for increasing the popularity and improving the efficiency of the Volunteer Forces in India, £7,000; Bandolier equipment for the Field Army, £13,000; augmentation of the submarine mining establishments, £7,000; and the purchase of 294 horses for the artillery, £25,000.

The total cost of the measures involving new expenditure exceeds £944,000, in addition to £118,000 provided in the Military Works Estimates.

Section V.—Capital Expenditure on Railways and Irrigation Works not charged to Revenue.

RAILWAY CONSTRUCTION.

252. The expenditure on Railway Construction for which the Government of India undertakes any financial responsibility or gives any direct guarantee will be ₹8,30,75,000 in the current year and ₹10,32,44,000 in 1901-1902, the amount having been ₹8,96,77,803 in 1899-1900 and ₹7,30,84,000 in the Budget Estimate of this year. The distribution of the total expenditure on Railway Construction between State and Companies' Agency in each of the three years from 1899-1900 to 1901-1902 is as follows :—

	1899-1900, Accounts.	1900-1901, Revised Estimate.	1901-1902, Budget Estimate.
Expenditure in England.	£	£	£
1. State Lines	605,337	648,000	1,478,000
2. Old Guaranteed Railways	678,000	337,200	510,500
3. Extensions of ditto	62,865	117,700	50,000
4. Other Guaranteed or Assisted Railways	866,742	788,400	1,076,400

259. The Railways outside Government Accounts shown above are the following :—

	Accounts, 1899-1900.	Revised, 1900-1901.	Budget, 1901-1902.
	₹	₹	₹
Bengal and North-Western Railway Extensions	35,01,900	4,12,000	11,60,000
Kalka-Simla . .	7,09,000	8,17,000	24,04,000
Bengal Dooars . .	12,03,600	24,86,000	17,98,000
TOTAL .	54,14,500	37,15,000	53,62,000

260. The expenditure on the Provincial and Local State lines is distributed as follows :—

	Accounts, 1899-1900.	Revised, 1900-1901.	Budget, 1901-1902.
	₹	₹	₹
Jorhat and Cherra-Companyganj lines . .	3,488	3,000	6,000
Mayavaram-Mutupet .	27,001	2,70,000	12,30,000
Hyderabad-Shadipalli .	4,856	...	..
TOTAL .	35,345	2,73,000	12,36,000

IRRIGATION CONSTRUCTION.

261. The figures are :—

Accounts, 1899-1900.	Budget, 1900-1901.	Revised, 1900-1901.	Budget, 1901-1902.
₹	₹	₹	₹
89,69,400	1,00,00,000	90,08,000	1,00,00,000

The expenditure during the current year will probably fall short of the Budget Estimate by ₹9,92,000. The progress of works has been slower than anticipated in all Provinces except Madras. In order to provide for an adequate rate of progress on the large projects, now in hand, the Budget Grant for 1901-1902 has been fixed at ₹1,00,00,000 as in the current year.

262. The following table shows the projects included in the programme of this and next year, and the amounts to be spent on each :—

NAME OF PROJECT.	Expenditure in 1900-1901.	Expenditure in 1901-1902.
	₹	₹
Mandalay canal	9,00,000	7,00,000
Shwebo „	1,44,000	8,00,000
Bari Doab „	2,50,000	5,57,000
Chenab „	7,50,000	7,35,000
Jhelum „	33,97,000	24,98,000
Desert „	3,33,000	3,97,000
Jamrao „	9,25,000	5,61,000
Other projects	23,09,000	37,52,000
TOTAL .	90,08,000	1,00,00,000

Section VI.—Provincial Finance.

263. In view especially of the grants-in-aid of Provincial Revenues, aggregating 164¾ lakhs, which have been mentioned more than once in this Statement, it is proposed in this Section to give some figures and explanations relating to the Provincial Re[illegible] and Expenditure of the several Provinces.

264. The current Provincial Settlements were arranged in 1897, to have effect for the five years 1897-98 to 1901-1902. In estimating the figures for each Settlement the Provincial heads of Revenue and Expenditure are taken at amounts representing the normal Revenue and Expenditure at the stage of growth existing at the time, future increases of Expenditure being left to be met from future increases of Revenue. A fixed adjustment is made, either by deduction or by addition, of the amount required to place the Revenue in equilibrium with the Expenditure. The following table shows for each Province the Estimate of the Settlement, the opening Provincial balance on April 1, 1897, the Revenue and Expenditure in each year since 1897-98, and the closing balance of each year :—

	Estimate for the Settlement of 1897-98 to 1901-1902.	Accounts. 1897-98.	1898-99.	1899-1900.	Revised, 1900-1901.	Budget, 1901-1902.

Closing Balance		5,00,000	15,04,000	[illegible]	...	20,00,000

265. The circumstances of the years during which the present Settlement has been current have been of an abnormal character, and have affected Provincial Revenues most unfavourably. The famine of 1896 and 1897 affected the North-Western Provinces and Oudh, the Central Provinces, and Bombay most severely, Madras, Bengal, and the Punjab seriously, and Burma slightly. The famine of 1899 and 1900 has affected Bombay and the Central Provinces most severely, the Punjab very seriously, and some of the other Provinces slightly. Assam, though unaffected by either famine, suffered very severely from the great earthquake of June 1897. All Provinces have had to incur heavy expenditure on plague preventive measures.

To enable the Local Governments to cope with those calamities, it was necessary for the Government of India to come to the aid of Provincial Revenues. The great bulk of the expenditure on famine relief was specially treated as Imperial, and, in addition, the Government of India has in the past four years from 1897-98 to 1900-1901 made the following special grants-in-aid of Provincial Revenues :—

	1897-98.	1898-99.	1899-1900.	1900-1901.
	R	R	R	R
Central Provinces	7,72,000	5,00,000	19,32,000	34,15,000
Assam	8,00,000	18,00,000	...	...
Bengal	...	17,00,000	...	...
North-Western Provinces and Oudh	10,27,000	10,00,000	...	...
Punjab	...	5,00,000	95,000	5,98,000
Madras	...	16,96,000	3,49,000	...
Bombay	12,18,000	48,75,000	34,37,000	64,79,000

These amounts are included in the total Provincial Revenues of the several years in the table in paragraph 264, a fact for which allowance must be made in drawing any deductions as to the progress of Provincial Revenues in the period.

266. The strain thrown on Provincial Revenues has been so great that these grants of the past have not been sufficient to place all the Provinces in a satisfactory financial position, or to enable them to undertake even a moderate portion of the many useful measures involving expenditure which want of funds have compelled them to postpone. The evil of excessive economy, hampering the progress of the numerous and vital interests for which Provincial Revenues are allotted, is so great that the Government of India has decided to devote a considerable portion of the anticipated Imperial surplus of 1901-1902 to giving further aid to Provincial Revenues. The following grants-in-aid are accordingly provided in the Estimates of next year :—

	R
Central Provinces	26,89,000
Assam	2,00,000
Punjab	12,40,000
Madras	32,14,000
Bombay	91,00,000
TOTAL	1,64,43,000

These amounts also are included in the total Revenues for the year 1901-1902 in the table in paragraph 264.

267. The grants are to be devoted, first, to restoring the closing balance to the minimum prescribed for each Province, and, in the second place, to increasing the grants for Provincial Expenditure. The effect of raising the balance to the minimum will be to allow the Local Governments to devote all their current Revenues to Expenditure.

268. The following is a short account of the present financial condition of each Province, from which the reasons for making the grants will be apparent.

CENTRAL PROVINCES.

269. This small Province has been severely tried during the whole of the period under review, having suffered from two very serious famines almost in succession, the first of which had been preceded by three or four distinctly unfavourable seasons. The estimates of expenditure next year after elimination of the special expenditure of 6 lakhs mentioned in paragraph 214, are all moderate, and could not be further restricted. The grant-in-aid required to avoid a *minus* closing balance was ₹16,64,000: this has been increased to ₹26,89,000 which, after restoring the Provincial closing balance to the prescribed minimum of 8 lakhs, admitted of an increase of ₹2,25,000 to the grant proposed by the Chief Commissioner under 45.—Civil Works, raising that grant to ₹19,45,000, as compared with ₹15,00,000, the amount taken for the head in the Settlement in 1897.

The Revenues, without the special grants-in-aid, have every year been below the standard of 1897, and the expenditure has been restricted so as to prevent its increasing above that standard at anything like the normal rate of increase.

BURMA.

270. The Provincial Revenues of Burma are in a most prosperous condition. The Revenues have increased very much above the standard of 1897, and the Lieutenant-Governor is in the fortunate position of finding difficulty in usefully spending all the funds at his disposal. The Settlement estimate for 45.—Civil Works was ₹53,47,000: the grant for 1901-1902 is ₹88,00,000. There is no question of this Province requiring aid from Imperial Revenues.

ASSAM.

271. The large cost of repairing the damages caused by the earthquake constitutes the sole reason for Assam requiring aid from Imperial Revenues. The Provincial Revenues show a fairly satisfactory increase over the standard of 1897, and similar increases of expenditure have been possible.

The estimates, as submitted by the Chief Commissioner, resulted in a closing balance slightly above the prescribed minimum of 5 lakhs; but to secure that result he had restricted the grant for Civil Works 2½ lakhs below what he considered to be required for the proper continuance of the work of repairing earthquake damages. A grant-in-aid of ₹2,00,000 was made, and the grant under 45.—Civil Works was increased by ₹2,50,000 to ₹16,05,000, as compared with the Settlement estimate of ₹14,35,000.

BENGAL.

272. This Province has quite recovered from the effects of the famine, and has entered on what promises to be a period of prosperity. The Revenues have increased considerably above the standard of 1897, and the expansion of Expenditure (after 1897-98, in which year the expenditure on Famine Relief increased the Provincial Expenditure) has not yet kept pace with the improvement; and the opening balance of 1901-1902 will be ₹22,04,000 in excess of the prescribed minimum of 20 lakhs. But the Bengal Government proposes, and has been allowed, to spend, in addition to the current Revenues, the whole of this excess

next year, so that the closing balance will be just the minimum. The Settlement estimate for 45.—Civil Works was R32,44,000: the grant for 1901-1902 is R48,64,000. Bengal stands in no need of aid from Imperial Revenues.

NORTH-WESTERN PROVINCES AND OUDH.

273. The position of this Province is very similar to that of Bengal, and the same remarks apply, except that the Provincial Revenues were not able to bear any part of the famine expenditure in 1897-98, and the increases above the standard have not been quite so great as in Bengal. The opening balance of 1901-1902 will be R25,64,000 in excess of the prescribed minimum of 20 lakhs, and the Local Government proposes to spend next year almost the whole of the excess in addition to the current Revenues. The Settlement estimate for 45.—Civil Works was R27,80,000: the grant for 1901-1902 is R48,62,000. The Revenue for next year has been cautiously estimated. This Province also stands in no need of Imperial assistance.

PUNJAB.

274. The Punjab Provincial finances have been very seriously crippled by the two famines, in spite of the very great restrictions in expenditure which the Local Government effected in view of the calamities. In the first year of the new Settlement the Revenues increased slightly above the standard of 1897, but there has been practically no further increase since: the Local Government in view of the very favourable prospects of the present season takes a sanguine view and estimates for a large increase of Revenue next year, and it is to be hoped that its anticipation will prove correct, though that is the most doubtful of all the figures in this Financial Statement. The Provincial balances have been exhausted. The estimates proposed by the Local Government for next year resulted in a surplus of R6,59,000—an amount insufficient to raise the balance to the prescribed minimum of 10 lakhs—and the Local Government, in view of the urgent need for larger expenditure, asked permission to spend the surplus instead of devoting it to building up again the Provincial balance. The grant-in-aid for this Province was fixed at R12,40,000—an amount which will enable the Local Government to spend all the current Revenues and close the year with the prescribed minimum. The Settlement estimate for 45.—Civil Works was R27,40,000: the grant for 1901-1902 is R37,33,000.

MADRAS.

275. The Provincial Revenues in Madras have increased moderately above the standard of 1897, but the Expenditure has increased in a greater proportion; and the financial position is consequently unsatisfactory. On the estimates, as submitted by the Madras Government, the grant-in-aid required to avoid a *minus* closing balance next year was R6,14,000 and it was decided to make a special grant-in-aid of R32,14,000—an amount which will enable the Local Government to spend over 13 lakhs in addition to the current Revenues and to close the year with the prescribed minimum of 20 lakhs. The Settlement estimate for 45.—Civil Works was R22,00,000: the grant for 1901-1902 is R34,05,000.

BOMBAY.

276. The two famines have hopelessly disorganised the Provincial finances of Bombay: special grants from Imperial have been required in every one of the four years of the current Settlement; and, unlike all other Provinces, an era of more hopeful future prospects has not yet dawned on Bombay: we must wait for the next monsoon before we can look forward to any improvement in its Provincial finances. In addition to bearing as Imperial, as in the past, all the direct famine expenditure in 1901-1902, it was necessary to make a grant-in-aid of R62,48,000 to avoid a *minus* closing balance. The Government of India decided to increase this grant to 91 lakhs, which admits of an addition of 8½ lakhs to the very restricted grant for 45.—Civil Works proposed in view of the need for economy by the Local Government, and will still enable it to close the year with the prescribed minimum of 20 lakhs, provided that the estimates are realised. In the presence of severe famine it is difficult to say with confidence that the estimates will be realised, but they have been framed with caution. The Settlement estimate for 45.—Civil Works was R31,66,000: the grant for 1901-1902 is R36,17,000.

Section VII.—Ways and Means.

HOME TREASURY.

277. The following are the details of the transactions of the Home Treasury in the Budget and Revised Estimates for 1900-1901 and in the Budget Estimates for 1901-1902:—

	Budget, 1900-1901.	Revised, 1900-1901.	Budget, 1901-1902.

TOTAL	33,629,268	39,445,343	30,872,143

1900-1901. Home Treasury Ways and Means.

278. In framing the Budget Estimates of the current year it was assumed that the cash balance in the Home Treasury on the 1st of April 1900 would be £2,223,668, and that the Secretary of State would sell Bills on India to the extent of £16,440,000 during the year. The Estimate also provided for the release of £500,000 of the gold held on Currency account in the Bank of England, and for a net addition of £500,000 to the Temporary Debt by the issue of India Bills. The issue of a permanent Sterling Loan was not contemplated, but the raising in England of funds for the expenditure of Railway Companies was expected to result in a net receipt by the Secretary of State of £672,900. With these several receipts and a reduction of £202,100 in the cash balance of the Home Treasury, it was intended that the Secretary of State should meet the net disbursements in England on account of Government Expenditure and Miscellaneous Family and other Remittances which in March last were estimated at £18,315,000.

The actual cash balance on the 1st April 1900 was higher than that taken in the Budget Estimate of the current year by £1,107,275. Of this improvement, a sum of £663,600 was due to the repayments by the Imperial Government on account of Indian Expenditure in connection with the war in South Africa having been larger than was assumed in the Revised Estimate. There was also a decrease of £376,653 in the net disbursements of the Home Treasury as compared with the Revised Estimate of 1899-1900, and the receipts from the sale of Council Bills were higher by £67,022.

The large increase of the Famine Expenditure in India during the current year and the heavy demands for famine loans to Native States and to agriculturists, in excess of the liberal provision made on these accounts in the Budget Estimate, imposed a severe strain on the Indian treasury balances, and it was found necessary to restrict the drawings of the Secretary of State. The Revised Estimate of Council Bills is now placed at £13,500,000 or less than the amount entered in the Budget Estimate by £2,940,000. A decline of £158,500 in the net receipts by the Secretary of State on account of the Capital of Railway Companies is also anticipated in the Revised Estimate of 1900-1901. On the other hand, the net disbursements at the Home Treasury for Government Expenditure and the deposit and ordinary remittance transactions of the year are estimated to be less than the Budget by £345,900, and it is expected that the recoveries from the Imperial Government on account of the charges incurred in India in connection with the war in South Africa and the China Expeditionary Force will amount to £1,386,300. Nothing was entered on the latter account in the Budget Estimate as the long continuance of field operations in South Africa was doubtful, and the expedition to China was not contemplated when the estimates were framed.

The heavy demands for rupees in India have necessitated large purchases of silver, and the payments in England on this account are now estimated at £6,033,000. To cover these payments, gold to the extent of about four millions has been remitted from India in instalments from October 6, 1900, to March 9, 1901, £3,988,000 being entered as the receipts during the currrent year by the sale in England of the gold remitted; and the gold held in London on April 1, 1900, on account of the Currency Department, £1,500,000, has been released. Of the latter amount, £500,000 were entered in the Budget Estimate; the improvement in the receipts of the Home Treasury due to this cause is, therefore, £1,000,000.

The only payment of gold to the Bank of England on Currency account during the current year has been a sum of £100,000, which was set apart and held under the Act, VIII of 1900, in December 1900. This amount was a few weeks later released to be used for the purchase of silver, and at present no reserve of gold is held in England on account of the Indian currency note circulation.

The result of the several variations from the Budget Estimate above explained is a reduction of £2,411,300 in the balances of the Home Treasury during the current year. When it was known that there would be so large a reduction, it became necessary to raise a public loan in England, and in July last the Secretary of State invited tenders for India 3 per cent Stock for £3,000,000. The loan was issued at the fixed price of 95½ per cent; the applications received amounted to over five million pounds sterling.

The closing cash balance of the current year is now estimated at £3,717,543, or higher than that taken in the Budget Estimate by £1,695,975, being the difference between the reduction in the balances of £2,411,300 above explained and the sum of the public loan of £3,000,000, and of the increase of £1,107,275 in the cash balance on the 1st of April 1900.

279. The Budget programme provided for the issue of £5,000,000 of India Sterling Bills, of which £4,500,000 were in renewal of Temporary Debt the liability for which would fall within the current financial year. An addition to the Temporary Debt of £500,000 has been made as contemplated in the Budget Estimate. But of the Bills issued in September 1900 a sum of £500,000 was borrowed for a period of six months, and the liability for discharge falls, therefore, within the present financial year. A further issue of £500,000 in renewal of these Bills has, therefore, been made, raising the gross amount issued and

1900-1901. Temporary Sterling Loans

discharged during 1900-1901 to £5,500,000 and £5,000,000, respectively. The results of these Temporary Loans have been as follows:—

Month of Issue.	Amount tendered.	Amount accepted.		Average rate of interest per cent per annum.
	£	£		£ s. d.
June 1900 .	5,588,000	2,000,000	for twelve months.	3 6 2
September „ .	6,290,000	1,000,000	ditto	3 16 7
		500,000	for six months.	3 16 2
November „ .	4,545,000	1,000,000	for twelve months.	3 17 9
March 1901 .	4,547,000	1,000,000	ditto	3 12 0

The rates of interest payable on the temporary loans continue to rule high. The stringency in the London Money Market accounts for this as well as for the low price at which the India Stock was issued.

280. The net issues to Railway Companies in England during 1900-1901 are now estimated at £47,600 against a net receipt of £302,900 taken in the Budget Estimate, or an increase of £350,500 in the net outgoings. The usual details are as follow: —

	Budget.	Revised.
RECEIPTS.	£	£
Subscribed Capital—		
(*a*) State Lines	2,363,500	773,500
(*b*) Guaranteed Lines	1,174,200	600,000
Miscellaneous	3,000	3,100
TOTAL	3,540,700	1,376,600
ISSUES.		
For Discharge of Debentures—		
(*a*) State Railways	1,200,000	45,000
(*b*) Guaranteed Railways	574,200	132,800
For Stores, Establishment Charges, etc.—		
(*a*) State Railways	703,400	789,700
(*b*) Guaranteed Railways	760,200	456,700
TOTAL .	3,237,800	1,424,200

The decrease of £2,164,200 in the receipts on account of Subscribed Capital is made up as follows:—

	£
Debentures renewed instead of being replaced by fresh Capital—	
Bengal-Nagpur Railway	155,000
Indian Midland Railway	1,000,000
Madras Railway	321,400
Bombay, Baroda and Central India Railway . . .	120,000
	1,596,400
Receipts on account of Capital, less by—	
Bengal Central Railway	20,000
Bengal-Nagpur Railway	45,000
Indian Midland Railway . . .	370,000
Bombay, Baroda and Central India Railway	112,000
Madras Railway	20,800
	567,800
TOTAL .	2,164,200

The conditions obtaining in the London Money Market led to the postponement, as far as possible, of the raising of fresh Capital by Railway Companies.

281. The bulk of the decrease of £217,200 in the Revised Estimate of drawings for expenditure on stores, etc., is caused by the withdrawals on account of the Great Indian Peninsula Railway, after the purchase of the undertaking, having been shown under the Remittance Account between England and India instead of under the Capital Account of Railway Companies as provided for in the Budget Estimate.

282. The following are the details of the remittance transactions of Railway Companies working State lines in India to whom advances are made in England for the purchase of stores, etc., against adjustments in India by debit to the Railway accounts :—

	Budget. £	Revised. £
Advances for Purchase of Stores—		
East Indian Railway	1,000,000	839,900
Rajputana-Malwa Railway	90,000	154,300
South Indian Railway	62,000	100,000
Bengal and North-Western Railway	130,000	172,800
Great Indian Peninsula Railway	...	199,700
TOTAL	1,282,000	1,466,700
East Indian Railway Debentures (net)	1,600,000	1,775,500
South Indian Railway Debentures	50,000	250,000
Transfer fees, etc.	2,000	3,200
TOTAL	1,652,000	2,028,700
Net Remittance from India	370,000	562,000

The Budget Estimate provided for the issue of £2,199,700 of Debentures by the East Indian Railway Company, of which £599,700 were for the discharge or exchange of Debentures expiring in February 1901. The Company issued £1,000,000 of Debenture Stock in April last, which realised £951,300, and the further issue this year is to be restricted to £850,200: the bulk of the Debentures which it was intended to discharge have been renewed and only £26,000 will be discharged. The South Indian Railway Company have issued £200,000 of Debentures in excess of the amount entered in the Budget Estimate, to meet the expenditure on the Madura-Paumben and the Tinnevelly-Quilon Railways.

The aggregate advances for purchase of stores is expected to exceed the Budget Estimate by £184,700. This is due to the Budget provision for withdrawals by the Great Indian Peninsula Railway having been made under the Capital Account of Railway Companies as already explained in paragraph 281.

1900-1901. Family and Remittances.

283. The Family and Other Remittances are now expected to result in a net payment of £294,000, or £38,500 less than the amount entered in the Budget Estimate. The repayments in England of advances of various kinds made in India will be larger, and the disbursements on account of Indian money orders and remittances by the Administrators General less, than was anticipated in March last.

1901-1902. Home Treas Ways and

284. The net disbursements at the Home Treasury on account of Government Expenditure and the Ordinary Remittance, Deposit and Railway Companies' transactions are estimated at £19,415,600 during 1901-1902. Of this, it is proposed to provide £16,500,000 by the sale of Bills on India, and £1,000,000 by the issue of India Stock. The balance of £1,915,600 will be met in the following way, namely :—

(1) £500,000 of the sum spent by the Secretary of State in the purchase of silver this year will be reimbursed to the Home Treasury by a further remittance of gold from India of that amount.

(2) It is estimated that a sum of £304,000 will be recovered from the Imperial Government on account of the expenditure incurred in India in connection with the China Expeditionary Force and the war in South Africa.

(3) The cash balance of the Home Treasury will be drawn upon to the extent of £1,111,600. As stated in paragraph 278, the balance on the 1st April 1901 is estimated at £3,717,543. The reduction of this amount taken in the Budget Estimate provides for a closing cash balance of £2,605,943 on the 31st March 1902.

902.
rary Loans.

285. No increase to the Temporary Debt is contemplated, but it is proposed to issue India Bills for £5,000,000 during 1901-1902 to replace Bills of a corresponding amount which will fall due.

286. The Budget programme of the Secretary of State's drawings on India and of the transactions in connection with the Government Sterling Debt is announced with the usual reservation, and no pledge is given that it will be adhered to.

INDIA.

287. The following is a summary of the Estimates of Ways and Means in India during 1900-1901 and 1901-1902 :—

	1900-1901.				1901-1902.	
	Budget Estimate.		Revised Estimate.		Budget Estimate.

The headings in italics are connected with, and explained by, the corresponding figures of the Secretary of State's account in England. The others refer to purely Indian transactions.

288. The actual cash balances in the treasuries on the 1st of April 1900 were less than the amount taken in the Budget Estimate by more than 59 lakhs. The excess of Revenue over the Expenditure chargeable to Revenue is now expected to exceed the amount taken in the Budget Estimate by 2,05 lakhs: the causes of this improvement have been explained in the preceding Sections of this Statement. The expenditure of Local Governments chargeable to Provincial balances will be less than the Budget Estimate by 86 lakhs. The Capital Outlay of the Government shews an increase of about 84 lakhs, and the issues to Railway Companies for Capital Outlay an increase of about 31 lakhs, additional grants having been sanctioned to hasten the progress of Railway Construction. The main points, however, to be noticed in a comparison between the Revised and Budget Estimates of the expiring year are (1) the heavy disbursements on account of loans, principally famine loans to Native States and to agriculturists; (2) the payment of about 3,72 lakhs on account of recoverable expenditure in connection with the Indian contingents employed in China and South Africa on Imperial Service; and (3) the large profit which has accrued on the heavy coinage of rupees. The gain on the last account is estimated at more than 4,39 lakhs, and that amount will be credited to the newly constituted Gold Reserve Fund; but, as explained in paragraph 164 of this Statement, only 1,80 lakhs will be converted into gold during the current year, and this is the amount shown in the Statement in paragraph 287 as the portion of the Gold Reserve Fund paid for remittance to London. The balance of the profit, 2,59 lakhs, has been temporarily utilized for the grant of famine loans by the Government, but will be paid gradually to the Gold Reserve Fund. In the Revised Estimate the famine loans to Native States are taken at more than 4 crores, while only 75 lakhs were provided in the Budget Estimates. Additional allotments for loans to agriculturists were sanctioned during the year to the extent of 1,22 lakhs. To enable the Government to meet these large additional rupee outgoings it was necessary to curtail the sale of Council Bills during the first nine months of the year. The result is that the payments for Bills are now expected to be less than the Budget Estimate by 4,70 lakhs.

1900-1901. General Summ

289. This restriction of the Secretary of State's resources, coupled with the heavy disbursements in England for the purchase of silver for coinage, rendered it necessary otherwise to strengthen the Home Treasury balances. This was done partly by the issue of the sterling loan, partly by setting free the whole balance of the gold which the Bank of England held on Currency Account on the 1st of April 1900, namely, £1,500,000, and partly by remittances of gold to England during the course of the year to the extent of about £4,000,000. The gold so remitted has been sold by the Secretary of State and the proceeds credited to the Home Treasury in repayment of the outgoings for the purchase of silver bullion.

290. The pressing demand for rupees caused the Government to purchase in India about 15 lakhs worth of silver for coinage, and over 45 lakhs worth was obtained from the Gwalior Durbar. It was arranged with His Highness the Maharaja Scindia that the value of the silver should be treated as a temporary loan to the Government repayable in full in September 1901. This explains the two entries of R45,29,000 against the third line "Temporary Debt" in the table in paragraph 287.

1900-1901. Temporary Debt

291. In the last Financial Statement it was announced that the Government of India contemplated raising a rupee loan of three crores during 1900-1901. A 3½ per cent loan for this amount was accordingly issued. Tenders were opened on the 4th of July last. The results of the loan were:—

1900-1901. Rupee Loan.

Month of issue.	Amount tendered.	Amount accepted.	Average rate of accepted tenders.
	R	R	R a. p.
July 1900 . .	3,98,10,400	3,00,00,000	94 0 1·17

292. The year 1901-1902 is expected to open with a cash balance of 16,23 lakhs, and the surplus of Revenue in India is estimated at about 27,66 lakhs. The Capital Outlay on State Railways and Irrigation Works is estimated at 1,80 lakhs, the issues to Railway Companies for Capital Outlay at 1,56 lakhs, and the Expenditure chargeable to the Provincial balances of the Local Governments at 27 lakhs. The disbursements on account of the Secretary of State's sales of

1901-1902. Main Features

Bills on India are estimated at 25,25 lakhs, and it is proposed to pay a further portion, two crores, of the Gold Reserve Fund for remittance to London, in reduction of the balance of 2,59 lakhs mentioned in paragraph 288. Gold of the value of 75 lakhs of rupees will be remitted to England in repayment of the balance of the Secretary of State's outgoings during 1900-1901 for the purchase of silver bullion, and it is estimated that the disbursements in India in connection with the China Expeditionary Force and the troops absent in South Africa will amount to 86 lakhs. The temporary loan from the Gwalior Durbar of 45 lakhs will be repaid. Inclusive of the Deposit and other Remittance transactions of the year, the net outgoings from the treasuries in India are placed at 3,23 lakhs in the Budget Estimate, of which it is expected that about 75 lakhs will be counterbalanced by an increase in the "Unfunded Debt" consisting principally of Savings Bank Deposits. A rupee loan of two crores is entered in the Estimates. The balance of 48 lakhs it is proposed to meet by a reduction in the cash balances.

ings Banks, etc.

293. The following table gives the details of the transactions of Savings Banks during the last few years and the estimated transactions for 1900-1901 and 1901-1902 :—

Year.	Net additions to deposits, cash.	Interest.	Total addition.
	R	R	R
1892-93	54,89,000	33,94,000	88,83,000
1893-94	17,99,000	36,80,000	54,79,000
1894-95	— 8,45,000	29,70,000	21,25,000
1895-96	24,77,000	33,85,000	58,62,000
1896-97	—58,11,000	34,66,000	—23,45,000
1897-98	—65,71,000	32,70,000	—33,01,000
1898-99	— 8,84,000	32,29,000	23,45,000
1899-1900	1,40,000	33,48,000	34,88,000
1900-1901, Budget	—12,31,000	35,17,000	22,86,000
1900-1901, Revised	14,86,000	34,80,000	49,66,000
1901-1902, Budget	31,33,000	36,46,000	67,79,000

294. The Savings Bank Accounts consist mainly of the Post Office Banks, but the transactions of the various departmental Provident Funds and the Regimental Savings Banks are also included.

295. In preparing the Budget Estimate of the current year, a net withdrawal from the Post Office Savings Banks of 20 lakhs, apart from interest, was assumed, but the transactions of the first eight months of the year resulted in a net increase in the deposits of over 30 lakhs, and allowing for withdrawals usually made in the closing months of the year, it is now expected that there will be an increase in the net deposits of over 9 lakhs on account of the Post Office Banks.

296. The cessation of famine is likely to lead to larger deposits in the Post Office Savings Banks in the immediate future, and in the Budget Estimates of 1901-1902 a net deposit of 20 lakhs, apart from interest, is anticipated.

297. The other Savings Bank Accounts included in the figures in the above table do not shew any important variations.

ans by Govern-nt.

298. The transactions during the year 1900-1901 under the head of Loans granted by the Government were seriously affected by the famine. The net disbursements are now expected to amount to R5,08,41,000 against R90,52,000 entered in the Budget Estimate.

299. The total provision for loans next year is taken at 1,10 lakhs, but the recoveries are expected to exceed this amount by about 9 lakhs, due to the repayments in connection with the heavy disbursements made during the current year. Of the gross provision of 1,10 lakhs, a sum of 45 lakhs is for agricultural advances in the Bombay Presidency, where famine lingers.

01-1902.
ew Rupee Loan.

300. According to the programme now announced, it is the intention of the Government of India to raise a new loan in India of two crores of rupees, but full liberty is reserved, as usual, to vary the programme, as now announced, to any extent that may be considered desirable.

Section VIII.—Summary.

301. The principal features in this Statement are :—

(*a*) The Accounts of 1899-1900 closed with a surplus of £2,774,623.

(*b*) 1900-1901—

(1) The Revised Estimates of 1900-1901 show a total Revenue of £75,166,000, a total Expenditure charged to Revenue of £73,525,600, and a surplus of £1,640,400, an amount higher by £1,480,100 than the surplus estimated last March.

(2) There has been a very large coinage of rupees in the current year, which will amount to about 17 crores in the 12 months. The gross profits on the coinage amount to £3,055,000 and are shown as a Mint Receipt. But this does not affect the surplus as it has been decided to devote the profits to the formation of a Gold Reserve Fund, and the net profits, £2,930,000, are shown as a Mint charge for transfer to the Gold Reserve Fund. Of this, the amount held in gold for investment is £1,200,000 leaving a balance of £1,730,000 to be converted into gold gradually as surplus receipts allow.

(3) The expenditure on Famine Relief has exceeded the Budget Estimate by £880,000, and the collections of Land Revenue, Provincial Rates and Tributes have fallen short of the Budget Estimate by £474,000.

(4) The Army Expenditure has been less than the Budget Estimate by nearly £1,200,000, chiefly in consequence of the absence of troops in China and South Africa.

(5) The Opium Revenue has exceeded the Budget Estimate by over £500,000. The net Railway traffic earnings have exceeded the Estimate by over £500,000. And Irrigation and most other heads of Revenue also yield substantial increases.

(6) Loans to Native States affected by famine exceeding 4 crores of rupees, and additional allotments for agricultural advances amounting to 122 lakhs were sanctioned during the year.

(7) A loan of £3,000,000 was issued in England and a loan of three crores of rupees in India.

(8) The drawings of Council Bills in 1900-1901 are now expected to be £13,500,000, as compared with the Budget Estimate of £16,440,000.

(*c*) 1901-1902—

(1) The Budget Estimates of 1901-1902 show a total Revenue of £72,191,900, a total Expenditure charged to Revenue of £71,501,000, and a surplus of £690,900.

(2) Though it is probable that coinage of rupees will be necessary next year, nothing is entered in the Estimates on this account, as the amount of the coinage is uncertain and the entries would not affect the surplus. It is hoped that £1,333,300 of the arrear profits of coinage balance of £1,730,000 will be converted into gold for remittance before the end of the year.

(3) The expenditure on Famine Relief will amount to about a crore of rupees, almost all in Bombay. As the Famine Insurance Grant will be maintained at the fixed sum of 1½ crores or £1,000,000, the saving under this head, as compared with the Budget Estimate of 1900-1901, will amount to 3½ crores of rupees or 2⅓ millions sterling.

(4) The net Railway traffic earnings, and the other Revenue heads are expected to yield two crores of rupees or 1⅓ millions sterling more than in the Budget Estimate for 1900-1901.

(5) Grants to Local Governments in aid of Provincial Revenues exceeding £1,000,000, new Military Expenditure exceeding £1,000,000, and other considerable increases of expenditure have been sanctioned.

(6) Subject to the usual reservations, loans of £1,000,000 in England and of two crores of rupees in India are announced as contemplated for capital expenditure on Railway and Irrigation Works, and the drawings of Council Bills are entered at £16,500,000.

(*d*) The following table shows the capital expenditure on Railways and Irrigation Works :—

APPENDIX II.

Memorandum by the Hon'ble Major-General Sir Edwin Collen, G.C.I.E., C.B., on Military, Military Works, and Marine Expenditure for the years 1900-1901 and 1901-1902.

The estimates with which the Military and Marine Department of the Government of India is concerned are the following:—

I.—Indian Military Estimates.
II.—Home (India) Military Estimates.
III.—Military Works Estimates.
IV.—Marine Estimates.

2. They will be dealt with in the order given above. But I will preface my examination of them, as usual, with some explanation of the more important measures which have been carried out or initiated during the past year.

3. Taking the Indian and the Home (India) Military Estimates together, the expenditure for the year 1901-1902 is estimated to exceed the amount provided in the Budget for 1900-1901 by £791,100. This figure, however, does not give the true increase to military expenditure in the coming year, as compared with the provision in the Budget of the current year. To arrive at the true figure abnormal causes of variation must be eliminated. In the first place, the excess provision amounting to £266,666, which was provided in the Budget for the current year to meet the expected rise in the cost of food supplies for men and animals, must be thrown out. Again, the savings amounting to £280,000 on account of the absence of the troops lent for service in South Africa and the Colonies must be taken into consideration as, in the Budget for next year, full provision has been made for the established strength. For the first time, also, a credit of £230,000 has been afforded in the Home Estimates for 1901-1902 in consequence of the recommendation of the Royal Commission on Indian Expenditure. Throwing out the above items, the increase in the Budget for next year comes to £1,008,000.

4. Some of the reasons which make this increase necessary are similar to those which were indicated by me in my memorandum of the 21st March last year; but, in addition to these, we have had brought home to us, by the striking lessons of the war in South Africa, the urgent need for improvement in many directions. Following the plan pursued in 1899 we drew up last autumn a list of our more pressing military requirements, and selected from this such items as we could at that moment make provision for, from savings due to the absence from India of troops in South Africa and China, or for which we foresaw the possibility of making provision in the coming year. Lately, we have further prepared a similar and more complete list from which selections have again been made, up to the limit of our financial resources. The savings referred to have supplemented to an important degree the funds ordinarily available so that in one way and another the year under review has seen an exceptionally large number of important military measures carried through, or at least instituted and put in a fair way towards completion.

5. Some of the principal of these measures I will briefly enumerate, dividing them into the following headings: Field Army, Frontier Defence, Frontier Railways, Internal Defence, Coast Defence, Ordnance Factories, and General requirements.

Field Army.

6. Foremost among the requirements of the field army is the introduction of the ·303" rifle for all troops. This important measure is being pushed forward as much as possible, but unfortunately for us in India the very large demands on the manufacturing establishments in England consequent on the South African war have prevented the contractors from fulfilling their promises, and it is inevitable that the completion of the re-armament should be somewhat delayed. No less important is the improved armament of our artillery. Various improvements which were introduced experimentally in England eighteen months

or so ago have now successfully withstood the severe test of field service and are being adopted in our field batteries; they include the "spade" brake and the "Grenfell" sight, both of which have been found very satisfactory in South Africa. The year has passed without our being able to obtain any new guns for our mountain batteries, but a satisfactory type of gun has at length been decided on at home, and we hope to complete this very necessary measure next year at a cost of R4,00,000 (£26,600). Further, intended improvements to the artillery branch are an increase of 594 horses to field batteries costing R5,40,000 (£36,000), half of which has been met from savings; an increase to the establishments of mountain batteries at an initial cost of R3,50,000 (£23,300), and an annual expenditure of R6,37,000 (£42,460); and an addition of three howitzer batteries, two of which will we hope be provided next year. The necessity for an extended use of machine guns is another evident result of the South African war, and we are obtaining immediately sufficient Maxims to give two each to all regiments of the 1st and 2nd divisions of the field army, as well as to all other British regiments in India. These guns, sixty-eight in number, will cost R3,42,000 (£22,800). At the same time we are obtaining several machine guns of other descriptions from England for thorough trial, at a cost of R1,66,000 (£11,060).

7. I mentioned last year an important increase of 92 British officers to the Native army. The necessity of a further step in the same direction has now been recognized, and we propose to add another officer to every Native infantry regiment, or a total further increase of 133 officers. The cost of this for a whole year will be about R6,00,000 (£40,000), half of which sum only has been entered in the Estimates of 1901-1902.

8. The increased use of mounted infantry must be a distinct feature in future warfare, and provision for the training of such troops has therefore become very necessary. With this object we propose to form five schools of instruction and have provided R9,00,000 (£60,000) in the estimates of the coming year for the purpose.

9. In matters of equipment two items resulting from the experience of the South African war are the issue of a number of Zeiss and other binoculars and telescopes to mounted troops, and the adoption of a bandolier for the carriage of ammunition. The pattern in the latter case has not yet been decided on, but we have provided two lakhs (£13,300) in the estimates which will suffice for the first two divisions of the field army.

10. Turning to the important question of transport, the reorganization which I alluded to in my memorandum of March last could not be adopted in its entirety owing to the large expenditure involved, and we have been obliged to content ourselves with a scheme which will at least give us a definite organization and one which will be capable of rapid development and expansion on mobilization. This scheme has been approved by the Secretary of State, and the cadres of mule corps, cart trains, and camel corps, which are its salient feature, are being formed. The eventual cost of the organization will be nineteen-and-a-half lakhs annually (£130,000), and fifteen-and-three-quarter lakhs (£105,000) have been provided on this account in the Estimates of 1901-1902. Meanwhile the necessities of the supply branch of the Commissariat-Transport Department will be partly met by an addition of eight officers and eight probationers, which has been sanctioned by the Secretary of State.

11. Other measures towards increasing the preparedness and efficiency of the field army are the provision of equipment required from England for four more general hospitals, costing R50,000 (£3,300); the organization of a corps of military staff clerks, involving extra expenditure to the extent of R56,000 (£3,700); an increase to the annual allowance of practice ammunition for field artillery, costing R63,000 (£4,200); and a similar increase at a cost of R68,000 (£4,530) for native infantry on their being rearmed with the ·303" rifle.

'ontier Defence.

12. Under the headings Frontier Defence and Railways fall the construction of a new fort at Drosh which is nearly finished; the completion of the Khyber defences, which have been handed over to the Khyber Rifles; the provision of additional water-supply and accommodation for the garrison, and the completion of the defences at the Malakand. Under the same heading is a road from Kohat to Peshawar which is being executed by the Public Works Department

at a cost of R2,47,000 (£16,460); about one-third of this work is already completed. Then it has been decided to make a 2-foot 6-inch railway from Khushalgarh to Kohat and Thal, the formation as far as Kohat being for a 5-foot 6-inch gauge in view of the eventual bridging of the Indus. The work was begun in January and is being pushed on rapidly. The Nowshera-Dargai Railway to which I alluded last year is practically completed and is attracting a good amount of traffic. *Frontier Railways.*

13. The rearmament of the volunteers which is an important item under the heading Internal Defence is perforce delayed for the unavoidable reason which retards the rearmament of the field army, but we hope to give at least a percentage of volunteers the ·303" rifle before very long. In the same category is the addition of a company of garrison artillery to the army in India, which we have recommended. *Internal Defence.*

14. In connection with Coast Defence some long-deferred requirements have been taken in hand during the past year, although the more pressing needs of the land forces have compelled a further postponement of other measures which must before long receive attention. We are about to supply the 6-inch guns of the defences at Bombay with cordite ammunition at a cost of R1,37,000 (£9,130) and in 1902-1903 similar provision will be made for the guns of that calibre in the Karachi and Hughli defences. We have provided a lakh and seventy thousand rupees (£11,300) in the estimates of 1901-1902 for the provision of breech-loading guns for the Rangoon defences instead of the 40-pounder muzzle-loading guns now mounted there. A number of new machine guns have also been ordered for all coast defence works at a cost of R1,66,000 (£11,060). Not the least important measure for the better security of our coast defences is the establishment at the fortress of Aden of an ordnance workshop, fitted up with all necessary machinery to admit of repairs to the guns, etc., in the defences there being executed on the spot. This necessary work has been put in hand and will, it is hoped, be completed next year. To assist in the defence of important seaports we propose to make arrangements for the more efficient training of volunteers; and with the same object in view the establishment of regular troops employed on submarine mining will be increased next year. *Coast Defence.*

15. Many of the measures mentioned above have thrown extra work on, or have shown the necessity for increasing the capacity of, our ordnance factories, and some large items of extra expenditure in the present and coming years are the result of the increasing necessity that India should be as far as possible independent of England in the matter of warlike stores. This is shown particularly clearly in the difficulty which we are experiencing in obtaining our requirements of rifles to rearm the native troops. At the same time our manufacturing establishments have so improved of late years that we propose to establish a small-arms factory in India. This measure will, however, take some time to carry out and the expenditure on it in 1901-1902 will be trifling. The lyddite filling factory at Kirkee which I referred to last March will, I hope, soon be working; the new cordite factory at Wellington has progressed during the year, and we hope that the preliminaries for the central gun-carriage factory which is to be built at Jubbulpore will soon be completed. *Ordnance Factories.*

16. We now come to my final heading, general requirements of the army, which includes a number of very important measures. I have only sufficient space to allude in the briefest way to the following. We propose to introduce an improved system of recruiting in Madras, through the agency of special staff officers, a measure which has already proved most satisfactory in Bengal, Punjab and Bombay. The cost of this will be only some R44,000 (£3,000) a year. An expenditure of R83,000 (£5,530) a year has been sanctioned on improving the pay and prospects of warrant officers of the Indian army departments, a class whose duties are generally arduous and who are often entrusted with great responsibility. The system of training regimental orderlies to supplement our small staff of nurses in military hospitals has been so successful that we are expending a further R12,000 (£800) so as to provide extra duty pay for a larger number of men so trained. A most important measure in the interests of the health of the British army is the substitution of a metal tank to be packed on mules, for the carriage of drinking water, instead of the time-honoured *pakhai* and *massak*, both of which are constant sources of danger and probably of disease in barracks; and equally important from the point of *General requirements.*

view of efficiency as well as of the prevention of disease, is the gradual introduction in British regiments of patent cooking stoves, with a view to allowing of all cooking being done—as is the case in England and the Colonies—by soldier cooks. Last year an experiment was tried of sending sickly soldiers for short sea trips, and we propose to extend this useful practice in 1901-1902; I hope that the results may materially benefit the British troops in India. Further measures with a similar object are the extension of the employment of medical officers on special sanitary and bacteriological research work; the gradual development of our system of dairies; the completion of installation of Pasteur-Chamberland filters at two stations; continued experiments in incineration; and efforts to arrive at a satisfactory system for the removal of rubbish and thorough cleansing of cantonments. We have given much attention during the year to the question of mechanical punkah-pulling, the adoption of which is, we consider, most desirable. A number of experiments have been made, with the result that those systems which will allow of combined lighting of barracks and punkah-pulling by electricity seem likely to be the most satisfactory. We have decided to obtain the assistance of an expert adviser in the matter, and we have provided four lakhs (£26,600) in next year's estimates in the hope of being able to instal a satisfactory system at some stations at least in the course of 1901-1902. In connection with the usual peace training of troops, the annual grant for camps of exercise and instructions was reduced in the current year's estimates from one lakh to 75,000 rupees. For next year we have been able to increase the amount to two lakhs (£13,300). Finally, I should mention an increase of seven officers to the Army Veterinary Department in India, which for some years past has been unequal to the numerous duties required of it.

17. The last-mentioned item brings me to one or two points which are worthy of notice, although they do not fall under the various categories into which I have divided the foregoing measures. I referred last year to the large numbers of horses which we were purchasing to replace those sent with troops to South Africa. These extra purchases have been trained partly by batteries of artillery in this country and the remainder at temporary remount depôts which were established at Umballa and Bangalore. The result of these arrangements is that we are now in a position to supply trained horses to the cavalry regiments and batteries of the Indian establishment now in South Africa as soon as ever the course of events shall permit of their return to India. The supply of horses and ordnance mules to the army has again been hampered by the prevalence of contagious disease at the Hapur Depôt to which I alluded in my memorandum of March last. The origin of the disease which is diagnosed by the Imperial Bacteriologist as lymphangitis, is traced by that gentleman definitely to the ship-load of Italian mules imported in 1899. The important question of remounting the army and of improving the breed of horses in India has been under consideration during the past cold weather by a commission of which Major-General Tyler, Inspector General of Artillery, was President, and I hope that their report may be of assistance in the future consideration of these much discussed problems.

18. A measure which is of considerable Imperial as well as of Indian importance is the raising of five new regiments of native infantry to replace those serving in certain colonial garrisons. The employment of native regiments in these places enables the Imperial Government to withdraw the British troops hitherto required there, but it is not advisable that the Indian army should be permanently reduced on this account, and the Secretary of State has accordingly agreed to a corresponding increase, the whole cost of which will be borne by the Imperial Government.

19. The past year has seen a continuance of that assistance which I said in March last we had been able to render to the army in South Africa. A large number of officers of the Indian Staff Corps are still serving there, many in very responsible posts, and a great number with distinction and credit, as has already been shown in the published despatches of the Generals in the field. We have also sent great quantities of supplies, including as many as 200,000 pairs of boots and shoes, 180,000 helmets and 100,000 warm coats, other garments in lesser numbers, considerable numbers of tents as well as hospital equipment, food-stuffs, etc.

20. But in addition to this we have had to fit out and despatch a considerable expedition of our own, and one to which special interest attaches, as the regiments of the Indian army which compose it have for the first time in history fought side by side with the allied forces of the other great powers of the world. The expeditionary force to China which was despatched in July and August last, under Lieutenant-General Sir Alfred Gaselee, consists of one cavalry and four infantry brigades and line of communication troops, numbering in all about 20,000 officers and men, 11,000 transport, hospital, and other non-combatants, 4,000 coolies for pack work, and 9,500 horses and transport animals. The despatch of the force was effected without a hitch notwithstanding the adverse circumstances at Calcutta of great heat and a strike among the Chinese carpenters. Forty-seven transports were chartered and fitted, thirty-two at Bombay and fifteen at Calcutta, in addition to the use of the Royal Indian Marine ships *Clive*, *Canning*, and *Dalhousie*. The whole arrangements reflect very great credit on Captain Goodridge, Director, Royal Indian Marine, Captain Wilson, Deputy Director (who directed the whole of the first preparations in the absence of the Director in South Africa), and the dockyard staffs of Bombay and Calcutta. Since the expedition started large quantities of food-stuffs have been despatched to China, as well as a very complete supply of warm clothing. Statements have appeared in the press to the effect that our Native soldiers have been insufficiently clad during the great cold of the winter in North China. Such rumours are without foundation. Ample supplies were sent of warm under-clothing, blankets, Balaclava caps, gloves, mittens, poshtins, thick overcoats, etc., and I have ascertained from Sir A. Gaselee, in reply to a special enquiry, that what was provided left nothing to be desired. Special attention was also paid to the medical arrangements: besides a liberal supply of field hospitals, a hospital ship was fitted out (for the first time in Indian waters) and this was supplemented by the munificence of His Highness the Maharaja Scindia who has supplied, fitted out and maintained another ship, the *Gwalior*, entirely at his own expense. His Highness as well as His Highness the Maharaja of Bikanir and Colonel Sir Partab Singh of Jodhpore have personally taken part in the campaign, and for the first time on record we have regiments of Imperial Service Troops joining with the regular troops of the Indian army in an over-sea expedition.

The special Commissioners, Colonels Hutchinson and Wingate, who were directed to report on compensation for dearness of provisions, commissariat procedure and accounts, to whom I alluded in March last, extended their enquiries to other matters connected with commissariat administration and have submitted admirable reports, from which we shall derive much benefit in the improvement of the system. Their proposals are now under consideration. A committee is now sitting on the whole subject of the system under which the accounts of the army and its departments are prepared; another committee has considered the question of increasing the powers of General Officers Commanding Districts, and a third has dealt in great detail with matters connected with the expenditure and accounting for hospital stores, etc. A number of the recommendations made by the latter have already been adopted, and I hope that business will be much accelerated thereby. I am also able to record with satisfaction a very large reduction, especially by the Commissariat Department, in the numbers of reports and returns hitherto in use.

As this is the last memorandum on the estimates which I shall have the honour of laying before the Council, I have attached a paper, which may be of some interest, showing the principal improvements in the efficiency of the army and our defences since 1885. I now turn to the details of the various estimates.

I.—Indian Military Estimates.

Revised Estimates, 1900-1901.

Comparison—
Revised for 1900-1901
and
Budget for 1900-1901.

The revised Indian military estimates for 1900-1901, compared with the budget for the year, show a net saving of ₹1,46,69,000 caused by an increase in receipts of ₹20,71,000 and a decrease in expenditure of ₹1,25,98,000.

4. The increase in receipts is chiefly due to credits on account of the value of animals and stores sent to China, the cost of which is debitable to the Imperial Government.

5. The more important causes which have led to the decrease in expenditure are as under :—

(*a*) There is a decrease of R40,00,000 on account of the pay and subsistence of the force sent to China, India being relieved of all expenditure in connection therewith.

(*b*) The budget assumed that the Indian Contingent sent to South Africa in 1899-1900 would return or be replaced by the middle of the current year, but as this prospect has not been realised, the provision made for the last six months becomes a saving (R39,50,000).

(*c*) The difference between the credits taken by debit to Imperial Government for local stores issued from stock to the South Africa, China, and Jubaland Forces, and the amounts likely to be spent on their replacement, accounts for a net decrease of R21,00,000.

(*d*) An increase of R47,30,000 was anticipated owing to rise in prices of food supplies for men and animals, but this is not now expected to be fully realised as rates have somewhat fallen. The probable saving on this account is put at R14,80,000.

(*e*) A sum of R3,93,000 has been appropriated from the Indian estimates to meet the cost of supplementary demands from England.

(*f*) Smaller expenditure is anticipated to the extent of (i) R8,60,000 for army reliefs and commissariat services, (ii) R6,00,000 for regimental pay and allowances, (iii) R5,69,000 for medical establishments, supplies and services, (iv) R5,00,000 under the Remount Department grant, (v) R1,13,000 for barrack supplies and services, and (vi) R1,00,000 for army and garrison staff.

(*g*) The military estimates will be relieved of the pay and allowances of officers and others deputed on plague duty, which are debitable to the Civil Department (R1,90,000), while a saving of R1,35,000 is anticipated on account of exchange compensation allowance.

6. On the other hand, there have been increases in expenditure, the more important of which are the following :—

(*a*) More sea transport charges due chiefly to chartering of transports to convey details to England (R13,25,000).

(*b*) Cost of special expenditure to be incurred *in India* against the military estimates from savings due to the absence of troops in China and South Africa (R12,00,000).

(*c*) In the Ordnance Department the expenditure is expected to show an increase of R2,55,000, while the deduction of R4,25,000 made in the Indian estimates to counterbalance an excess provision in the Home estimates accounts for an increase to that extent.

(*d*) Some minor increases are (i) R1,44,000 on account of special services and military operations due chiefly to expenditure in connection with the blockade of the Mahsud Waziris; (ii) additional grants-in-aid to cantonment funds, R1,01,000; (iii) new cantonment general hospitals, R95,000; (iv) improvement of the equipment of the field artillery in India, R1,36,000; and (v) expenditure in connection with the contingent sent from India to take part in the Commonwealth celebrations at Sydney, R1,09,000.

Estimates, 1901-1902.

7. The estimates for 1901-1902, in the net, amount to R17,07,58,000, or R74,03,000 more than the budget for 1900-1901. This is due to a decrease in receipts of R20,66,000 and an increase in expenditure of R53,37,000.

Comparison—
Budget for 1900-1901
and
Budget for 1901-1902.

8. The decrease in receipts is accounted for by the fact that a special credit of R20,57,000 was taken in the budget for 1900-1901 for the value of horses forming the peace complement of the units despatched to South Africa, which was chargeable to the Imperial Government.

9. The more important causes of the increase in expenditure are the following :—

(*a*) In the Budget for 1900-1901 a deduction of ₹38,50,000 was made on account of the absence of the Indian Contingent on service in South Africa, whereas no such deduction has been made for next year.

(*b*) A deduction was similarly made on account of Native infantry regiments serving in the Colonies, but as new regiments have been raised to replace them the necessary provision appears in next year's estimates (₹8,85,000).

(*c*) Larger provision for reorganisation and improvement of the commissariat-transport service, for purchase of transport animals, and for grass farms, ₹11,54,000.

(*d*) Larger provision for ordnance establishments and stores chiefly on account of the cordite and central gun-carriage factories, and in connection with the re-armament of the Native army and improvement of field artillery equipment, ₹7,00,000.

(*e*) The addition of two howitzer batteries and of one company royal garrison artillery accounts for an increase of ₹10,23,000; for the re-armament of the Native army an additional sum of ₹4,16,000 has been provided.

(*f*) The formation of five schools for mounted infantry in India involves an expenditure of ₹6,50,000, while ₹3,86,000 represents the increase due to the addition of one British officer per regiment of Native infantry in India and of eight officers for the Commissariat-Transport Department.

(*g*) Provision has also been made for the following :—₹2,03,000 for the completion of new 10-pounder mountain battery guns. ₹2,84,000 for railway works and water-supply for mobilisation rest-camps, ₹2,00,000 for bandolier equipment for units of the 1st and 2nd divisions of the field army, ₹1,24,000 for "Grenfell" sights for field artillery, ₹1,20,000 for purchase of machine guns and pack mountings for trial, and ammunition and components for "pompoms," ₹1,03,000 for increasing the popularity and efficiency of the volunteer force, ₹1,09,000 for improvement of submarine mining defences, and ₹88,000 for electric lights for coast defences at Bombay and Rangoon.

10. Among other causes of increased expenditure may be mentioned the following: Larger provision for an additional native mountain battery and for increased establishments (₹97,000), increased regimental pay and allowances (₹2,00,000), provision for full authorised reserves for the Native army (₹1,98,000), no deduction having been made as in the current year's budget for excess provision in the home estimates (₹4,25,000), improved sanitation of the Rangoon Cantonment sudder bazar (₹1,04,000), increased provision for camps of exercise and volunteer corps (₹2,01,000).

11. The foregoing increases will, however, be partly counterbalanced by certain decreases, the more important of which are the following :—

(*a*) Lower prices for food supplies for men and animals, ₹40,00,000.

(*b*) The provision for purchase of remounts and their road expenses is ₹29,37,000 less, as special provision was made in 1900-1901 for replacement of horses sent to South Africa and other requirements.

II.—Home (India) Military Estimates.

Revised Estimates, 1900-1901.

Comparison—
Revised for 1900-1901
and
Budget for 1900-1901.

The second of the estimates with which the Military Department is concerned is the home estimate for army effective and non-effective charges. The Home Budget Estimates for 1900-1901 provided for a gross expenditure of £4,707,700, while in the Revised Estimates provision has been made to the extent of £4,362,200 or £345,700 less than the Budget Estimate.

2. This saving of £345,700 in the Revised, as compared with the Budget Estimate for 1900-1901, is chiefly due to the dislocation of the arrangements regarding Indian reliefs resulting in smaller payments on account of furlough allowances and pay, during the voyage, of British forces serving in India, and

"Indian Troop Service;" to decrease in the payments for stores, furlough allowances of officers of the Indian Service, pay and pensions of non-effective and retired officers of the Indian Service and retired pay, etc., of British forces for service in India.

The net figures of the Revised Estimate show a saving of £337,500 on those of the Budget Estimate for 1900-1901, due to a decrease in expenditure of £345,700 as explained above, and a decrease in receipts of £8,200.

Estimates, 1901-1902.

Comparison—Budget for 1900-1901 and Estimate for 1901-1902.

The receipts and expenditure for 1901-1902 are as follows :—

	Receipts.	Expenditure.	Net expenditure.
	£	£	£
Effective	248.300	2,814,800	2,566,500
Non-effective	18,500	2,413,700	2,395,200
TOTAL .	266,800	5,228,500	4,961,700

The receipts for 1901-1902 include contributions to be made to the extent of £230,000 by the Imperial Government in respect of the cost of the transport of troops, and of military charges for Aden, and in consequence of the recommendations of the Royal Commission on Indian Expenditure ; and compared with the Budget for 1900-1901 they show an anticipated total increase of £223,300. The total gross expenditure for 1901-1902 is higher by £520,800 than the amount provided in the budget for the preceding year. This amount is chiefly accounted for by the increased provision for ordnance and other army stores and to the expected return of troops from South Africa, and the resumption of transfers to the Army Reserve.

The gross charges on account of effective services, as estimated in the coming year, include payments to the War Office in respect of the British forces serving in India (£760,000) ; furlough allowances and pay during the voyage of British forces serving in India (£108,000) ; furlough allowances of officers of the Indian Service (£230,000) ; Indian Troop Service (£250,000) ; passage of officers and troops otherwise than in transports (£19,000) ; miscellaneous (£20,600) ; and stores for India (£1,427,200).

The gross charges on account of non-effective services are made up of the retired pay, etc., of the British forces for service in India (£600,000) ; pay of the non-effective Colonels of Royal Artillery (£22,700) ; pay and pensions of non-effective and retired officers of the Indian Service (£1,670,000), miscellaneous pensions, etc. (£84,000), and the Indian Military Service Family Pensions (£37,000).

The net expenditure for 1901-1902 is more by £297,500 than that for the preceding year, and, as explained above, this is due to an increase of £223,300 in receipts and £520,800 in gross expenditure.

III.—Military Works Estimates.

Excluding English expenditure, the Budget Estimate for 1900-1901 amounted to R1,15,09,000 (£767,267); the revised estimate of expenditure is taken at R1,05,00,000 (£700,000). There will, therefore, have been less expenditure in India of R10,09,000 (£67,267), which is due mainly to the transfer of funds to meet additional expenditure in England on stores and to an anticipated lapse of R7,48,000 (£49,867) on grants for works.

2. The Budget Estimate for 1901-1902, excluding English expenditure, is R1,31,74,000 (£878,267) or R16,65,000 (£111,000) more than that of 1900-1901. The difference is due to a special grant of R17,74,900 (£118,327)

ing allowed for certain works which have been recognized by the Government India as being of special urgency and importance.

3. The main heads of expenditure in the Military Works estimate amount the following sums, in round figures:—

	R
For original works, including those in progress and those to be commenced . . .	62,88,000 (£419,200)
„ repairs	34,63,000 (£230,867)
„ establishments and tools and plant . .	29,62,000 (£197,467)
„ Barrack Department establishment supplies and tools and plant	8,12,000 (£54,133)

4. Expenditure, amounting to R3,50,800 (£23,387), will be incurred on water-supply projects, R1,22,370 on sanitary works, R3,17,000 (£21,133) for coast and inland fortifications, and R1,74,000 for works on the North-West Frontier: R4,00,000 (£26,667) will be spent on the installation of mechanical punkah-pulling in barracks, and provision has been made in the budget for R8,00,000 (£53,333) for the cordite factory in the Nilgiris, R4,20,000 (£28,000) for the central gun-carriage factory at Jubbulpore, and also R3,00,000 (£20,000) for renewals of buildings, etc. The remaining works consist of those for new hospitals, barracks, etc., and will provide for the ordinary requirements of the Ordnance, Commissariat, Remount, and Marine Departments.

Excluding renewals, provision is made for 99 new works, of which 55 are in progress and 44 have yet to be commenced. A sum of R5,35,000 (£35,667) is provided for minor works costing less than R2,500 each.

IV.—Marine.

Revised Estimates, 1900-1901.

Comparison—
Revised for 1900-1901
and
Budget for 1900-1901.

The net total of the Budget Estimate of the Royal Indian Marine for 1900-1901 was R14,20,000 (£94,667), the Revised Estimate stands at R10,23,000 (£68,200), showing a decrease of R3,97,000 (£26,467).

The decrease is chiefly due to large recoveries from the Home Government in connection with the employment of Royal Indian Marine vessels on Imperial service. Also to larger deductions on account of recoveries for dockyard labour in connection with the China Expeditionary Force, and to reduced expenditure on repairs and on coal for His Majesty's ships of war in Indian seas, counterbalanced to some extent by increased expenditure under other heads owing to the troopships having been kept working throughout the year and to large local purchases of coal to meet requirements usually met by importing coal from England.

Estimates, 1901-1902.

Comparison—
Budget for 1900-1901
and
Estimate for 1901-1902.

The net total of the Marine Estimate for 1901-1902 is R14,40,000 (£96,000) against R14,20,000 (£94,667), the total of the Budget for 1900-1901 showing an increase of R20,000. This is caused by an increase in expenditure amounting to R75,000 (£5,000), due to the addition of the *Hardinge* to the establishment of vessels of the Royal Indian Marine and to other causes, counterbalanced by increased receipts of R56,000 (£3,733).

APPENDIX.

Statement of important measures of improvement in the army and in the defence of India since 1885.

1885.

Increase to the strength of the army.

In 1885 the permanent establishment of British troops was increased by the addition of—

Cavalry	1,332
Artillery	1,373
Infantry	7,952
TOTAL	10,657

The strength of the Native Army was increased by—

Cavalry	4,704
Infantry	11,968
Artillery, approximately	3,000
TOTAL	19,672

The approximate cost was calculated at £1,196,800 a year, excluding non-effective charges.

Increase and redistribution of garrison batteries.

Six companies of garrison artillery were added to the Indian establishment, and two of these were located at Roorkee and one each at Barrackpore, Bombay, Karachi, and Quetta. The garrison companies in India were redistributed in 1892.

The cost was approximately R3,18,000 initial, R9,12,000 annual.

Equipment of mountain batteries with 2·5-inch R. M. L. guns.

It was decided to re-arm the mountain batteries, and eventually all mountain batteries were gradually equipped with the 2·5-inch R. M. L. gun. It has now been decided to re-arm the mountain batteries with a new 10-pounder gun at a cost of R4,05,000.

Special defence works.

The question of improving the coast and frontier defences of India was taken up vigorously in 1885. Schemes were prepared by the Defence Committee and approved by the Secretary of State, and the cost of the proposed works was spread over a number of years. A new head of account called the "special defence works" was accordingly opened and special defence divisions formed at the various ports and on the frontier for the execution of the works. In 1890, after a general forecast of the expenditure on special defence works had been submitted to the Secretary of State, His Lordship's sanction was received to a total expenditure against Indian revenues of five crores and three lakhs, including the moiety of the cost of the works at Aden.

The works were practically completed in 1897 at an expenditure chargeable to Indian revenues of R4,08,00,850, *viz.* :—

	R
On works, including establishments and tools and plant	2,67,11,391
On armaments, floating defences, etc.	1,40,89,459
TOTAL	4,08,00,850

In addition, a sum of ₹11,78,435 was charged to the Home Government for a share of the cost of the Aden defences, and a sum approximating 50 lakhs was allowed for establishment charges for carrying out the works, tools and plant, etc.

Coast defences of India.

Designs for the principal defensive works at Aden were elaborated in 1883, were put in hand in the latter part of 1884 and were in progress until 1897. In 1885 the sanction of the Secretary of State was obtained to proposals for the defence of Bombay, Karachi, Calcutta, and Rangoon. In 1890 it was finally decided that the expenditure on coast defence works should be limited to ₹3,13,26,818,* including the cost of armament and floating defences. Special arrangements were made for the execution of the works which were completed in 1897 at a cost of ₹2,69,62,203 as shown below :—

	₹
* Works	1,54,47,600
Armaments and floating defences	1,58,79,218
TOTAL .	3,13,26,818

These sums do not take account of expenditure on establishment, tools and plant :

PORTS.	Works.	Armaments and floating defences.	TOTAL.
	₹	₹	₹
Aden (excluding Imperial share) . . .	27,85,138	16,28,941	44,14,079
Karachi	16,15,929	16,66,171	32,82,100
Bombay	96,73,111	39,98,567	1,36,71,678
Hooghly	6,08,388	14,07,120	20,15,508
Burma	9,42,848	18,40,612	27,83,460
General	6,45,286	1,50,092	7,95,378
TOTAL .	1,62,70,700	1,06,91,503	2,69,62,203

The expenditure on works, besides providing the necessary batteries complete with arrangements for range and position-finding, etc., at the various ports, includes the cost of the following additional works :—At Aden, barracks for three batteries of Royal Artillery (₹5,93,663) ; at Karachi, a new lighthouse (₹1,11,865) and the removal of deep-water point and the extension of the east groyne (₹3,50,000) ; at Bombay, a wet basin (₹15,41,018) ; and in the Hooghly, land communications and new jetty (₹2,39,240), also a harbourage for two torpedo boats (₹1,27,501) ; at Rangoon, the protection of Syriam Bank against erosion which was threatening the battery (₹2,96,188), and accommodation for one garrison battery of Royal Artillery (₹1,07,363) at this place.

The outlay on armaments represents the provision of 10-inch B.-L. guns, 6-inch B.-L. guns, quick-firing guns, and R. C. machine guns with the necessary ammunition.

The floating defences comprise seven 1st class torpedo-boats, two torpedo gun-boats, and two turretships at Bombay re-armed with breech-loading guns.

Frontier defences of India.

Proposals for providing defence works on the North-West Frontier of India were submitted to the Secretary of State for the first time in 1885, although in 1883 and 1884 large proposals were made—and in some cases the work begun—for strategic railways and roads. In 1887 sanction was obtained to revised proposals, and in 1890 the Secretary of State finally sanctioned an expenditure of ₹1,88,47,312 * on both works and armament.

	₹
* Works	1,39,09,200
Armament	49,38,112
TOTAL .	1,88,47,312

These frontier defences may be divided into three main groups, those in advance and rear of the Bolan pass and Peshin plateau, those for the defence of the Khyber pass and its debouchure, and thirdly those for strengthening certain important strategical points in rear and for the protection of our supply depôts.

The works have been completed and the armament provided, the final outlay being—

	R
On works	1,04,40,691
„ armament	33,97,956
TOTAL	1,38,38,647

Strategic Railways, Roads, and Bridges.

The expenditure on these has been R14,44,87,000 or £9,632,467.

Appointments and Organisation.

(Commissariat-Transport Department.)

Consequent on the recommendations of the Army Organisation Commission, the appointment of Commissary General-in-Chief was created in 1885. No change was made at that time in the status of the Commissariat Departments of the three Presidencies, but that of Bengal was divided into two circles, each under a Commissary General. In 1889 all three administrations were brought under the Government of India; and in 1899, with the introduction of a system of promotion for officers by length of departmental service, the former separate lists for each Presidency were amalgamated into one list for all future appointments.

1886.

Formation of reserves for the Native Army.

In 1886 a plan to provide a reserve for the Native Army was sanctioned by which men passing into the reserve, still belonged to their respective regiments. Reservists are required to do an annual training, and when called up for service rejoin their regimental depôts.

The scheme was limited at first to the Bengal Army and Punjab Frontier Force, and subsequently extended in 1887 to the Madras and Bombay Armies.

Two reserve forces were originally formed:—the active reserve and the garrison reserve; the former was limited to 218 men per battalion of infantry in Bengal, and 160 per battalion in Madras and Bombay, and the following in the artillery:—

Native mountain artillery—

Gunners 22
Drivers 34 } per battery.

British mountain batteries—

Native Drivers 34 per battery.

The garrison reserve was abolished in 1892.

In 1899 the reserve per regiment was raised to—

In infantry regiments of the Punjab and Bengal Commands, exclusive of Gurkha battalions and local corps. In Burma battalions of Madras infantry, excluding the 10th Burma (Gurkha) Rifles. In the 24th, 26th, 27th, 28th, 29th, and 30th Bombay Infantry.	280 reservists per regiment.
In the corps of Bengal Sappers and Miners	250 reservists.
In regiments of the Bombay Command, including the Bombay Sappers and Miners, but excluding the 24th, 26th, 27th, 28th, 29th, and 30th Bombay Infantry and local corps.	160 reservists per regiment.
In regiments of the Madras Command, including the Corps of "Queen's Own" Madras Sappers and Miners, but excluding the Burma battalions of Madras Infantry.	60 reservists per regiment.

Raising of military police in Bengal and Bombay for service in Burma.

The military police force required for the pacification of Burma was raised in India in 1886 and 1887.

In March 1886 a force of 3,000 was raised in Northern India.

In July 1886 two additional police battalions were raised and in October 1886 the raising of 2,000 additional military police was ordered.

In December 1886 4,000 additional police was raised.

In 1887 a military police battalion of 500 men was raised and another force of 4,000 police.

In 1888 three additional levies were raised as follows :—

Shan States Levy	600 Punjabis.
Mogaung Levy	500 Gurkhas and hillmen.
Chin Levy	400 Punjabis and 200 Hindustanis.

The total number of Indian police sanctiond for Upper Burma amounted to about 18,500. The military police in Burma is a highly efficient force.

Mobilisation of the army.

A general mobilisation committee was formed in 1886, and it was decided that the plan of mobilisation should be by "army corps" for service beyond the frontier, and "divisions" or "brigades" of all arms, according to circumstances, for service within the frontiers of India, or beyond sea.

This was changed in 1890 to the system of mobilisation by divisions. The basis of the plan is mobilisation by stations, *i.e.*, certain stations are detailed from which the troops will be withdrawn in order to form the field army. Obligatory garrisons for all India have been laid down.

Special grants have been made from time to time to facilitate mobilisation arrangements.

Raising of additional Native mountain batteries.

To provide for the requirements of Burma, two additional Native mountain batteries were raised in 1886, at an approximate cost of ₹3,20,000 initial and ₹2,80,000 annual.

Water-supply of cantonments.

Special attention has been given to the subject of the water-supply of cantonments, and for some years nine lakhs of rupees were expended annually on works of this class. The following important projects have been carried through since 1886:—Chakrata, Peshawar, Mhow, Allahabad, Dum-Dum, Lucknow, Agra, Dagshai, Subathu, Murree, Rawal Pindi, Bangalore, Meerut, Quetta, Secunderabad. The mobilisation camps have been provided with supplies of piped water.

1887.

Enlargement of the arsenal at Rawal Pindi.

In January 1887, in connection with the scheme for the defence of the North-West Frontier, the Secretary of State sanctioned such extension of the Rawal Pindi arsenal as appeared to the Government of India to be necessary. A scheme for providing the additional accommodation required to fully meet existing or immediately prospective conditions was drawn up and sanctioned in May 1888, and the enlargement was completed in 1891-92 at a cost of ₹1,41,000. A further extension of the arsenal was sanctioned in 1898 on the recommendation of a special committee and is being carried out at an estimated cost of ₹1,98,930.

Scheme of regimental institutes.

In 1887, with a view to increase the comfort and well-being of the British soldier in India, it was decided, with the approval of the Secretary of State, to combine, improve and develop the reading and general recreation rooms and the canteens and

refreshment shops which were then maintained for British troops in India under the designation of regimental institutes. A scale of accommodation was laid down and the scheme has been carried out as far as funds have permitted.

Amalgamation of the Supply and Transport Branches, Commissariat Department.

The Supply and Transport Branches of the Commissariat Departments in the three Presidencies were amalgamated in February 1887.

1888.

Reorganisation of the commands and staff in India.

The reorganisation of the commands and staff in India was carried out in 1888. The principal changes introduced were:—

The Generals' commands were reduced from 33 to 30 and were divided into 1st class districts commanded by Major-Generals, and 2nd class districts commanded by Colonels with the temporary rank of Brigadier-General.

The larger stations were placed under the command of Colonels on the Staff.

The divisional and district staff (musketry staff excluded) in the Adjutant General's and Quartermaster General's Departments were amalgamated, the combined duties being performed by officers designated "District Staff Officers, 1st class," and "District Staff Officers, 2nd class." These designations have since been altered to Assistant Adjutant General and Deputy Assistant Adjutant General. The estimated saving by the above measures was ₹2,21,052.

Introduction of improvements in the organisation of the Hyderabad Contingent.

In 1888 the conditions of service in the Hyderabad Contingent were improved:

(i) The establishment of British officers was increased from four to six per regiment (subsequently increased in 1890 to eight).

(ii) The artillery, cavalry and infantry, respectively, were linked together.

(iii) The rates of good-conduct pay and pensions and half-mounting allowance were assimilated to those in force for the regular army.

Transfer of the Horse-Breeding Department from the Military to the Revenue and Agricultural Department.

The question of the transfer of the administration of the Horse-Breeding Department from the Military to the Revenue and Agricultural Department was considered by a conference at Delhi in 1888, and the transfer was carried out in 1889.

Re-armament of the turretships and provision of seven torpedo and two gun-boats for coast defences.

In 1888 8-inch B.-L. guns were substituted for the old 10-inch M.-L. guns on board the turretships *Abyssinia* and *Magdala*, which form part of the defences of Bombay, costing, with sundry alterations to the ships, £47,430.

Provision of gun-boats for Bombay and torpedo-boats for the several ports in India, and transfer of the India defence vessels to the control of the Admiralty.

In 1886—88 two additional gun-boats were sanctioned for Bombay, costing £130,000, as well as seven torpedo-boats for the several Indian ports, costing about £89,000.

The last of these arrived in India in July 1889. In 1890 the vessels referred to were handed over to the control of the Admiralty under certain conditions.

1889.

Organisation of Mounted Infantry in Upper Burma.

In 1889 325 British and 680 Native mounted infantry were raised for service in Upper Burma.

Engineer Field and Siege Parks.

In 1889 measures were taken to complete the engineer field parks at Rawal Pindi and Quetta and to keep this equipment separate from all other stock and ready for immediate issue when required. Similar precautions have since been taken as regards the field park units at Karachi.

Re-armament of Royal Horse and Field Artillery in India.

In 1889 horse and field batteries were re-armed with 12-pounder B.-L. guns, and during 1897—99 sanction was accorded to the substitution of pole for shaft draught in batteries of horse and field artillery and the conversion of field artillery guns to take 15-pounder projectiles at an estimated cost of six lakhs. Cordite ammunition was gradually introduced for these services at an eventual cost of £46,500. In 1900 the introduction of the spade brake, the tray system of carrying ammunition, and the assimilation of all carriages and wagons to one pattern with pole draught was sanctioned for field artillery at a cost of R12,59,740.

Reorganisation of the establishment of officers of the Military Accounts Department.

This was undertaken to meet the requirements of the second circle of military accounts and audit in the Bengal Presidency, and also to provide travelling inspectors of accounts. Consolidated rates of salaries were introduced.

Extension of the Foundry and Shell Factory at Cossipore.

To enable the Foundry and Shell Factory at Cossipore to undertake the manufacture of the fuzes used with the new 12-pounder B.-L. guns and to carry out the repairs of these guns, it became necessary to extend the foundry. The work was put in hand in 1889 and completed during 1892-93 at a cost of R1,72,000.

1890.

Amalgamation of the three Staff Corps.

(*a*) In 1890 the Bengal, Madras, and Bombay Staff Corps were amalgamated as the Indian Staff Corps under Royal Warrant, dated 28th January 1891.

(*b*) The "General List" of cavalry and infantry ceased to exist as separate bodies except for succession to Colonel's allowance.

Increase to ammunition columns.

In 1890 the number of wagons per ammunition column unit was increased from three to six, the 33 additional wagons required being sent at once to the ammunition column stations.

Re-arrangement of the commands and staff of the Royal Artillery.

In 1890 India was divided for the purpose of artillery commands into six artillery circles. The artillery and the forts in each circle were placed under the supervision of a Colonel on the Staff so far as armament, equipment, and inspection are concerned. On the abolition of the presidential army system in 1895 the commands and staff were re-arranged: the artillery in each command was placed under the supervision of a Colonel on the Staff with the temporary rank of Brigadier-General.

Construction of a wet basin in the Dockyard at Bombay and deepening of the Duncan Dock.

In 1890 projects were sanctioned for the construction of a wet basin in the Dockyard at Bombay, and for deepening the Duncan Dock at a total estimated cost of ₹18,32,641. The works were completed in 1898 and 1893, respectively.

Military Works.

The Military Works Department was extended to the Madras and Bombay Presidencies.

1891.

Reconstitution of the 24th and 26th Bombay Infantry.

In 1891 the reconstitution of the 24th and 26th Bombay Infantry as frontier (Baluchistan) regiments was undertaken.

In 1898 their composition was again changed to—

Classes.	24th Bombay Infantry Companies.	26th Bombay Infantry Companies.
Hazaras	2	2
Pathans { Khattaks	1	1
Pathans { Waziris	1	1
Punjabi Mahomedans	2	0
Baluchis and Brahuis	0	2
Sikhs, other than Jat Sikhs	2	

Grant of increased pay to the Native Cavalry.

In 1891 the pay of silladar cavalry was raised as notified in G. G. O. No. 224 of 1891. The cost was appoximately ₹8,68,500.

Artillerymen for the armaments of the coast and frontier defences and inland forts.

In 1891, in order to increase the number of artillerymen for coast and frontier defences, 25 men were added to each of the 23 garrison artillery companies in India at a cost of ₹3,75,000. The existing 222 lascars were increased to 650 and placed on the footing of fighting men. This measure cost ₹53,489 initial and ₹1,50,919 annually.

Manufacture of steel in India.

In 1891 the manufacture of steel for projectiles and gun-carriages was recommended to the Secretary of State, and the proposals having been approved, the steel factory at Cossipore commenced work in June 1892. The result has been most satisfactory, and the scope of the factory has been considerably developed. The initial cost of the measure was ₹1,25,000; the annual cost ₹5,700.

Establishment of a harness and saddlery factory in Southern India.

In 1891 the establishment of a second factory in India for the supply of harness, saddlery, and accoutrements was determined on, but owing to lack of funds the complete scheme was never accomplished. In 1898, however, the harness and saddlery workshops in the Bombay Arsenal were abolished and the similar workshops at Madras were enlarged so as to meet the requirements of both Madras and Bombay Commands in this respect with a resulting saving of ₹6,337 a year.

1892.

Establishment of recruiting centres.

Recruiting centres in each of which a depôt was established were established for the regiments of the Bengal Army in 1892 at a cost of about a lakh for the first year, with a recurring annual charge of R75,000, each to form the centre of a recruiting district. Each centre is under the control of the recruiting staff officer with or without one or more assistant recruiting staff officers. The system of recruiting centres was extended to the Native troops in the Bombay Command in 1896 at a cost of about R32,500 per annum.

Reorganisation of the Intelligence Branch.

In 1892 the Intelligence Branch of the Quartermaster General's Department was reorganised at a cost of about R55,000 per annum—

(*a*) An Assistant Quartermaster General was appointed head of the branch.
(*b*) The branch was divided into four sections, each under a Deputy Assistant Quartermaster General, a Staff Captain and a paid attaché with an adequate clerical staff.
(*c*) The staff pay of Staff Captains was in 1899 increased from R150 to R250 per mensem.
(*d*) The formation of an Intelligence Section in the office of the Assistant Adjutant General, Hyderabad Contingent, was sanctioned in 1892.
(*e*) An Intelligence Branch for Burma was sanctioned in May 1890 and continued until April 1900, when a small Burma Section was added to the Intelligence Branch of the Quartermaster General's Department at Simla.

Local battalions for service in Burma.

In order to increase the efficiency of the Madras Army in 1892, the 30th and 31st Madras Infantry were reconstituted as the 5th and 6th Burma Battalions. In 1894 the 29th Madras Infantry was similarly converted into the 7th Burma Battalion.

These local battalions were formed from men transferred from the Burma Military Police as shown below:—

10th Madras Infantry	(1st Burma Battalion)	from the Kubo Valley Police Battalion.
12th	(2nd	Chin Levy.
33rd	(3rd	Shan States Levy.
32nd	(4th	Myingyan Military Police Battalion.
30th	(5th	Pyinmana and Katha-Magwe Military Police Battalions.
31st	(6th	Shwebo Military Police Battalion.
29th	(7th	Magwe and Mandalay Military Police Battalions.

The approximate cost of this measure was R2,42,000.

Revision of the hutting system in the Native Army.

In 1892, with a view to provide improved accommodation for the Native Army, the system of hutting was revised. An annual grant for the reconstruction of lines in Bengal is given.

Full hutting-money is still admissible, but in lieu of half hutting-money a monthly repair allowance of R100 per regiment has been introduced.

In Madras a uniform system has been adopted, under which the ownership of the huts will be gradually transferred to the State, the men being granted an allowance for maintaining the huts in good condition. An annual grant of R70,000 is given accordingly for repairs, etc., of lines.

Similarly, the Bombay Army has been given an annual grant of R50,000, *i.e.*, R18,000 for repairs and R32,000 for the construction gradually of new lines. The accommodation for the Punjab Frontier Force is provided by the Military Works Department at the cost of the State, while the Gurkha battalions at permanent stations are given special grants when new lines or reconstruction become necessary, and a repair allowance every four years.

Establishment of a reserve of horses.

The establishment of a reserve of 1,000 horses to meet the demands of field service was sanctioned in 1892, but money for it was not forthcoming until 1896. The initial cost was about seven lakhs. Recurring cost on account of feed, keep, etc., ₹1,50,000.

1893.

Reorganisation of Hindustani regiments on the class regiment system.

In order to attract a better class of recruit and to render service in these regiments more popular, they were reorganised in 1893 as class regiments as follows :—

Group.	Class.	Centre.
1st and 3rd Bengal Infantry .	Brahmins	Allahabad.
2nd, 4th, and 16th Bengal Infantry	Rajputs	Agra.
7th, 8th, and 11th Bengal Infantry	"	Lucknow.
6th and 10th Bengal Infantry	Jats .	Delhi.
13th Bengal Infantry . .	Rajputs	"
5th and 12th Bengal Infantry .	Musalmans	Bareilly.
7th and 18th Bengal Infantry .	"	Benares.
19th Bengal Infantry to be linked with 39th Garhwal Rifles	Khas Gurkhas	Lansdowne.

Since then the 5th, 12th, 17th, and 18th Bengal infantry have been linked together with their regimental centre at Benares.

The approximate cost of this measure was ₹78,000 *plus* charges on account of (*i*) change in uniform, (*ii*) cost of transit of transfers, (*iii*) pensions and gratuities.

Additions to the strength of the Ordnance Department.

The personnel of the Ordnance Department was increased in 1893 by an addition of three officers to the number of Assistant Superintendents of Factories so as to provide an Assistant Superintendent for each factory. (Annual cost ₹20,408.) A further increase of four officers was made in 1896 in order to provide a small reserve at an annual cost of ₹30,128.

Inspectors of Ordnance Machinery.

Five Inspectors of Ordnance Machinery were added to the Department in 1893 in view of the necessity for specially skilled supervision for the B.-L. guns and hydro-pneumatic mountings at the coast defence stations.

Magazine rifles for British troops in India.

During 1893 the British infantry were re-armed with the Lee-Metford rifle at a cost of £327,500, and it was decided in 1897 to re-arm the seven regiments of British cavalry with Lee-Enfield carbines and the Royal Artillery with converted Martini-Enfield artillery carbines : this re-armament was completed in 1899.

Exchange Compensation.

Exchange compensation allowance was given to all servants of Government not domiciled in India to compensate them for the depreciated value of the rupee in which currency their salaries are paid, and a privileged rate of exchange for furlough allowances calculated in Indian currency, when paid in England, was fixed.

Rules for the preparation and submission of accounts of British troops on field service.

The old system for the preparation and rendering of accounts on field service having failed in the Miranzai and Hazara Expeditions, a new system was introduced for the use of British troops in the field.

1894.

Reorganisation of the Bombay Army.

In 1894 the composition of the Bombay Army was changed, class companies being formed and a proportion of foreigners enlisted; men belonging to non-fighting classes were eliminated. The revised composition was notified in G. G. O. No. 311 of 1895.

Indian Army Reserve of Officers.

In order to provide officers on mobilisation taking place, the formation of an Indian Army reserve of officers was sanctioned in 1894, the regulations governing admission thereto being published in G. G. O. No. 308 of 1894.

Indian Articles of War.

In 1894 the Indian Articles of War (Act V of 1869) having been found defective, it was amended by a Bill (Act XII of 1894).

Reorganisation of the Military Works Services.

In May 1894 a committee was appointed under the Presidentship of the Honourable Mr. D. R. Lyall, Indian Civil Service, to report on the measures that would, in their opinion, be practicable to reduce establishment charges and percentages in the Military Works and Public Works Departments, and as to the best means of effecting economy without interfering with efficiency in the execution of military and public works. One of the recommendations of this committee was that the Military Works Department should be abolished, and that works done by that service should be transferred to the Public Works Department, which was to be manned by Royal Engineer officers only. The Government of India, however, decided that a separate agency for the execution of military works should be maintained, but that the organisation of the Military Works Department should be largely modified. It was proposed to abolish the graded system which had become unworkable, and to constitute the service on a purely military basis. Detailed proposals for carrying out this change were submitted to the Secretary of State in July 1897. Under the revised arrangements, which involved the abolition of the Military Works Department, employment upon military works duties was to be the normal duty of Royal Engineer officers in India, and this employment was to be considered regimental duty. It was proposed that the new organisation should follow the lines of the system in force in the Imperial Service at Home and in the Colonies adapted to suit the reorganisation of the Army in India in four Commands. These proposals received the sanction of the Secretary of State in March 1899, and the reorganisation was brought into effect from 1st October of that year.

1895.

Abolition of the presidential army system.

In 1895 the great reform which had been discussed for so many years was carried out, the Bengal Army was sub-divided into the Bengal and Punjab Commands and the presidential armies of Madras and Bombay were formed into two Commands, the Quetta District going to Bombay and Burma to the Madras Command. The whole army of India, consisting of the Punjab, Bengal, Madras, and Bombay Commands, each under a Lieutenant-General, was placed under the direct command of the Commander-in-Chief in India and the control of the Government of India. The staff of each Command was re-arranged and assimilated as far as possible.

Increase to the pay of the Native Army.

In June 1895 the pay of all non-commissioned ranks in the Native Artillery, Sappers and Miners, and the Native Infantry was increased by R2 per mensem. The Madras Cavalry, the Viceroy's Body-Guard, and the local corps shared in this increase. The increase in annual expenditure was about R30,00,000.

Increase of pay to the Hyderabad Contingent.

In 1895 the pay of sowars of the Hyderabad Contingent was assimilated to that of the Bengal and Bombay Cavalry, and in 1896 the increase of pay sanctioned for the Native Army was extended to the Hyderabad Contingent artillery and infantry.

Reorganisation of the Madras Army.

In 1895 it was decided to reorganise the Madras Army on the class company system, Telugus being eliminated.

Establishment of a Proof Department at Balasore.

In order to carry out the proof of projectiles manufactured at the Shell Factory, Cossipore, a proof department was established at Balasore in 1895, at an initial and an annual expenditure of R1,89,323 and R23,416, respectively.

The Secretary of State has also sanctioned the enlargement of the scope and establishment of this proof department so as to include the proof of small-arm ammunition, with effect from 1st April 1901. The cost of this will be only R36,000 initial and R17,117 annual.

Abolition of the Gunpowder Factories at Madras and Kirkee.

In consequence of the introduction of cordite, the gunpowder factory at Madras was abolished in 1895 and that at Kirkee was closed on 1st April 1900.

1896.

Amalgamation of the Bengal, Madras, and Bombay Branches of the Indian Medical Service.

In 1895-96 the Bengal, Madras, and Bombay Branches of the Indian Medical Service were amalgamated into one service under the direct administrative control of the Government of India. The Surgeon General with the Government of India was at the same time made the head of the amalgamated service, and his designation was changed to the Director General, Indian Medical Service.

Accounts.

Relief was afforded from the accumulated interest of the Patriotic Fund to the sufferers in the Chitral Relief Expedition, 1895.

Orders were issued that the rates payable to British troops serving in India on account of compensation in lieu of clothing and those recoverable from them on account of issues of clothing made on payment should be identical, and that they should be fixed at the actual cost of supplying the articles in India.

1897.

Military Works.

The high level road through the Bolan Pass which was commenced in 1882-83 was completed at a cost of R21,79,469.

Reorganisation of the Hyderabad Contingent.

In 1897 both cavalry and infantry regiments of the Hyderabad Contingent were organised on the class squadron and class company system and the future class composition laid down in G. G. O. No. 1165 of 1897.

Re-establishment of Cantonment Hospitals.

In consequence of the issue, in 1897, of new rules under the Cantonments Act (XIII of 1889), cantonment hospitals have been re-established at almost all the large stations garrisoned by British troops.

Sanitary Officers.

In 1897 the appointment, as an experimental measure, of three district sanitary officers for the sole duties of investigating the causes of disease and giving advice in sanitary matters was recommended to, and sanctioned by, the Secretary of State. The appointment of one sanitary officer for each Command has now been approved.

Accounts.

Measures were adopted by which it was hoped to obtain a more effectual check than formerly existed over claims to compensation for dearness of provisions and forage to Native troops and followers, together with a simplification of procedure in the submission and audit of such claims.

I

Raising an additional Mountain Battery.

An additional Native mountain battery was sanctioned in 1898, at an approximate cost of R1,60,000 initial and R1,40,000 annual.

Establishment of a Central Gun-Carriage Factory.

The establishment of a central gun-carriage factory at Jubbulpore in place of the three existing factories was recommended to Secretary of State in 1898 as conducive to economy as well as to efficiency in manufacture. The proposal has been approved and steps towards the establishment of the factory are now being taken. The initial cost is estimated at 26 lakhs, but there will, on the other hand, be an annual saving of nearly R1,20,000 on labour and establishments.

Changes in ordnance organisation.

With a view to increased efficiency and economy of manufacture, the ordnance factories were placed under the direct control of the Director General of Ordnance in 1898, a measure which resulted in a saving of R8,712 per annum.

As a corollary to the above change, the reorganisation of the Ordnance Department in India, by the reduction of the circles of ordnance supply from four to two, was recommended to the Secretary of State in June 1900, and received His Lordship's sanction. The reorganisation was carried into effect from 1st November 1900.

Accounts.

In consequence of the grant by the Imperial Government to British soldiers serving in England and the Colonies of a messing allowance of 3*d*. per diem, similar measures were introduced in India, and, with the approval of the Secretary of State, orders were issued sanctioning the grant in India of a messing allowance of 2¼ annas a day to European non-commissioned officers and men in addition to their usual pay and extra-duty pay; and exempting them from the payment of the stoppage of 9 pies a day hitherto made on account of the grocery ration.

Formation of a Central Office of Audit and Account for dealing with the accounts of Ordnance Factories in India.

This measure was undertaken in consequence of the transfer of the direct control of the factories of the Ordnance Department in India to the Director General of Ordnance in India.

1899.

Redistribution of commands and staff on the North-Western Frontier.

In 1899 the commands and staff on the North-Western Frontier were redistributed as follows, and notified in India Army Circular No. 45 of 1900:—

(i) A 1st class district, under the General Officer Commanding Punjab Frontier Force, was formed embracing the whole frontier from Abbottabad to Dehra Ghazi Khan.

(ii) The Brigadier-General Commanding the Peshawar District became subordinate to the General Officer Commanding Punjab Frontier Force.

(iii) A new 2nd class district, styled the Derajat District, was formed under the General Officer Commanding Punjab Frontier Force.

Military position on the North-Western Frontier.

On the conclusion of military operations on the Punjab Frontier in 1898, the whole question of the military position on the North-Western Frontier was thoroughly considered by the Government of India, and in 1899 it was decided to withdraw regular troops from the Khyber, expanding the Khyber rifles, that regular troops should be withdrawn from the Samana, Kurram, Tochi, and the Gomal and Shahur Valleys, and that thereafter these places should be garrisoned by militia or military police.

Cantonment Regulations.

Under the authority of the Cantonments Act (XIII of 1889), rules have been drawn up for the administration of cantonments. The rules were finally published and given effect to in 1899.

Provision of an adequate war reserve of Military Assistant Surgeons.

The necessity for providing a larger reserve of military assistant surgeons to meet the requirements of the field army on mobilisation was considered in 1899, and a scheme was put forward which has now been sanctioned. This involved an increase to the establishment, the cost of which is estimated at—

	R
Initial	1,55,160 spread over five years.
Annual recurring	7,250 in the sixth year and thereafter.

Horse runs for Native cavalry.

In view of the increasing difficulty experienced by Native cavalry in obtaining suitable remounts, a scheme for the establishment of horse runs by these regiments on irrigable land was sanctioned in 1899. Grants of land on favourable terms were made on the Chenab Canal and loans of money allowed to enable regiments to start operations. The experiment is now under trial.

North-Western Frontier defences.

The defences at the Malakand, including Chakdara, in the Khyber, and on the Samana were strengthened and improved so as to be proof against tribal attack.

Accounts.

The rules relating to payment of compensation for dearness of provisions were modified so as to provide for compensation being based on the local price of that quality of food-grains which would be ordinarily eaten by the class of men to which the Native soldier or follower belongs.

Pensions.

The rates of wound pensions admissible to non-commissioned officers and soldiers of the Native Army were considered inadequate and, with the sanction of the Secretary of State for India, were increased.

Organisation of transport.

The experience of the Chitral and Tirah Expeditions led to prolonged consideration by two special committees and by the Government of India of the whole subject of organising the standing transport so as to adapt it to the much larger requirements of mobilisation. In 1899 a provisional scheme for organising a large part of the existing transport into corps and cadres was ap[illegible] this has now been [illegible] more extensive scheme for the mai[illegible]

received the sanction of the Secretary of State. Simultaneously, in 1899, rules were formulated and approved for the organisation into units of all transport hired or purchased in time of war; and in order to facilitate the collection of such transport from private owners, the terms to be allowed for hire of animals or men were carefully detailed and widely published. A further measure with the same object is the compiling of an accurate census of transport, which is now in preparation, and the maintenance of registration officers permanently in districts. The scheme for enrolling camels from the grantees on the lands adjacent to the Chenab Canal has been most successful.

The organisation of transport has necessitated the addition of 38 officers to the Transport Branch of the Commissariat-Transport Department at a cost of R6,20,000 annually. The total extra cost is R19,40,000.

Complement of transport.

Questions connected with the maintenance of a large standing transport have been very prominent in the years under review. The complement of transport which had been developed in 1885 was increased in 1891 by 2,000 mules at a cost of eight lakhs. A further increase of 1,750 mules was sanctioned in 1896 in connection with the provision of mobilisation equipments for the divisions of the field army, and again by 2,000 mules in March 1900, when the total authorised complement of mules became 22,270.

1900.

Volunteers.

Since 1885 the strength of the volunteer force has risen from 13,368 to 31,000 approximately at the present time. During this period several new corps have been formed and the formation of reserves has been sanctioned.

In 1892 Government sanctioned an annual grant of R30,000 for volunteer buildings, and R20,000 annually for field days, and the camp of exercise grant was raised from R15,000 to R60,000. Wound and injury pensions to volunteers, and pensions to their widows, have been granted under certain conditions; the capitation for mounted and artillery volunteers has been raised by R10, and the same amount is paid to infantry volunteers trained in gun drill in addition to ordinary capitation. The volunteer officer's decoration and volunteer long-service medal have been extended to India, and volunteer officers are given an outfit allowance of R100 on first appointment.

Withdrawal of detachments of troops from isolated positions.

In pursuance of the policy of withdrawing detachments from isolated and unimportant stations as far as may be consistent with the internal safety of the Empire, a number of small stations have been given up, and troops have been generally concentrated at the more important strategic centres whence they can be more readily drawn for mobilisation, and can also be better trained.

Manufacture of cordite in India.

The experimental manufacture of a small quantity of cordite at Kirkee having, after prolonged trial, proved that this explosive could be made in India equal in quality to that produced in England, the establishment of a cordite factory in the Arvenghat Valley, Nilgiri Hills, was finally decided on, and the factory is now in course of erection. The manufacture is expected to result in a large saving as compared with the cost of cordite imported from England, and to recoup the initial cost within a very few years.

Lyddite filling factory.

It has been decided to fill lyddite shell in India, and the factory will form a branch of the Small-Arms Ammunition Factory, Kirkee.

Hut accommodation at the summer camps in the Murree Hills and at Chakrata, Ranikhet, and Dalhousie.

For the benefit of the health of the troops summer hutted camps in the hills have been established at Gharial, Kuldanna, Kalabagh, Thobba, Khyra Gully, Bara Gully,

Dalhousie, Chakrata, and Ranikhet, but want of funds has prevented the development of the poli y as much as could be desired.

Supply—Grass and Dairy Farms.

In matters connected with supplies for troops the establishment of Government dairies has been prominent since 1889, when in consequence of the representations of a committee on the prevalence of enteric fever dairies were established experimentally at Allahabad, Bareilly, and Rawal Pindi. The first-named was attached to the grass farm at that station, and under the management of Lieutenant (now Captain) Meagher has attained to a state of considerable prosperity, all the troops in the garrison being supplied with excellent dairy produce. It was then determined to work dairies—wherever possible—in conjunction with grass farms, and under advice from Captain Meagher such combined farms have been started and are now working satisfactorily at Lucknow, Cawnpore, and Umballa ; dairies have also been inaugurated at Aden, Mhow, Jubbulpore, Agra, etc., in most cases under the direction of Captain Meagher. At the same time it was recognised that to ensure success, whether of grass or dairy farms, trained and continuous management was necessary. A system has therefore been adopted which places all farming operations under a Director of Farms in the Punjab and Bengal, respectively, and Assistant Directors as well as subordinates to manage local farms are trained at the Allahabad Farm by Captain Meagher, who has been appointed Director of Farms in Bengal.

In concluding this summary, I would point out that it does not, except in a few instances, embrace the various proposals which have been made and sanctioned for the years 1900-1901 and 1901-1902, as many of these have not yet been carried to completion ; and I have also alluded to these especially in my memoranda on the estimates, in March 1900, and in that which I now submit. The expenditure which has been accepted by the Government of India on these measures amounts to ₹3,48,28,140. The improvements represented by this expenditure include the re-armament of the Native Army, increase to the officers of the Army and of the Commissariat-Transport Department, the reorganisation and increase of the Artillery, establishment of mounted infantry, improvements in the volunteer force, the reorganisation of the transport, increase in horses, important proposals connected with mobilisation [redacted] equipments, increase in amount of ammunition issued, improvement in equipment of the field batteries, new mountain guns, completion of hospitals and medical equipment, provision of field railway, large development of manufacturing power, higher efficiency in coast defences, and a great many other items.

E. H. H. COLLEN, *Maj.-Genl.*

March 20, 1901.

APPENDIX III.

Memorandum by the Hon'ble Sir Arthur Trevor, K.C.S.I.

It was explained in the memorandum appended to the Financial Statement this time last year that in consequence of certain changes, of which a summary was given, in the procedure for the consideration of Railway Projects, the memorandum would then and for the future be confined mainly to the presentment of such details in connection with the Railway Programme for the ensuing and two following years as do not find a place in the Financial Statement.

For any information which may be wanted in regard to proposals not in the programme, reference is invited to the History of Railway Projects revised and brought up to date which was issued in October last.

2. In connection with the form of the present programme which is printed as Statement A to this memorandum, there are two points which call for notice.

The first is that for the grouping according to the source from which the expenditure is to be met, and the agency to be employed, which has hitherto been adopted, a new grouping has been substituted which is designed to illustrate the principle on which the resources available have been distributed.

That principle is that, in framing the railway programme, the amount required to meet the needs of open lines, so far as they can be foreseen, should be regarded as a first charge upon the money available for railway purposes, and that every effort should be made to provide in full for all demands arising out of the development of existing traffic—that next in order provision should be made for the steady prosecution and early completion of lines in progress, preference under this head being given to Companies' lines over those under construction by the agency of the State, and, lastly, for new projects which depend on the ability of the State to find money to complete them without financial embarrassment to the Government.

In the abstract at the end the totals are given according to the old as well as according to the new grouping for facility of comparison.

3. The other point is that in order to admit of the continuous application of the principle above stated, the minimum of 6½ crores, which was adopted last year as the basis of the programme for the years following that actually dealt with in the Budget, has been abandoned. The forecast for 1902-1903 and 1903-1904 has been based on the aggregate of the actual demands so far as they can be at present foreseen by the Railway administrations concerned, for open lines and lines under construction, which alone come to 10¼ crores for 1901-1902 and nearly 7 crores for 1902-1903. The obligation to find this amount if possible being accepted, it will remain to consider in connection with the preparation of the Estimates for each successive year whether the amount can be found or not; if not, in what directions reduction can be effected with the least mischief, and if, on the other hand, the financial position is as easy as may be hoped for, how far it is possible to go in undertaking new lines from among those shown in Statement B, in addition to the comparatively obligatory provision for lines open and in progress.

4. As has been explained on former occasions it must be clearly understood that except in so far as it embodies the actual Budget provisions for the year next ensuing, the whole programme is provisional only, that the order of priority given to the new projects which it is proposed to include in it, as funds permit, is always liable to reconsideration, and that the actual inception of any particular project depends on its final acceptance by the Government of India and the Secretary of State, on the financial situation when the time comes, and in some cases on the possibility that offers may be received for its construction by a Company which may admit of its being carried out independently of the programme.

5. Turning to details it will be observed that, whereas the total of the sums shown in the programme presented last March for the year now ending amounted to Rs. 7,30,84,000 only and included no provision for any new railway, the Government of India have been able during the course of the year to make supplementary grants for different lines, raising the total to Rs. 8,30,75,000, and that out of these grants it has been possible to commence work on the Gondia-Jubbulpur line, one of the three projects

mentioned in paragraph 5 of last year's memorandum as having been struck out owing to the pressure of famine demands, and also on a second line, the Midnapur-Jherriah, which was shown last year as for commencement in 1901-1902 only.

Of the other two lines struck out last year the Dhulia-Amalner line is for the present in abeyance owing to the transfer of the Great Indian Peninsula Railway to the State and the Godra-Baroda Chord still awaits the possibility of providing funds.

The commencement of the 4th line, that from Sakri to Jainagar, to which reference was made in the same paragraph, has unfortunately been delayed by the inability of the Bengal and North-Western Railway Company to raise the necessary funds on debentures the currency of which they were obliged to limit to the short unexpired term of their contract for the working of the Tirhoot State Railway, of which the Sakri-Jainagar line will form a part. This difficulty has lately been got over, it is understood, by the Secretary of State's acceptance of liability for debentures of a suitable term after the determination of the Tirhoot Contract, and it is hoped the line may now soon be put in hand.

6. For 1901-1902 the allotments amount to Rs. 10,32,44,000 against the minimum of 6½ crores shown in the programme last year. So far as can at present be foreseen the whole of this amount will be required to meet the pressing needs of open lines and for the energetic prosecution of lines under construction, including the three lines recently commenced, namely, the Khushalgarh-Kohat, Gondia-Jubbulpur and Midnapur-Jherriah, but it is hoped that later in the year it may be possible to find a place for the commencement of the section of the Godhra-Baroda Chord in British territory. For the length in Baroda territory funds will be found by the Durbar.

In 1902-1903 we may hope, if the present financial position is maintained, to commence the first ten or twelve of the lines entered in Statement B and most of the remainder in 1903-1904.

7. The usual summary of railway progress giving the lengths of the lines is entered as an Statement E to this memorandum.

8. The capital expenditure on railways falling within the categories now included in the programme for the ten years from 1892-93 to 1901-1902 is shown below :—

[Lakhs of rupees.]

	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99.	1899-1900.	Revised Estimate, 1900-1901.	Budget Estimate, 1901-1902.
Capital expenditure on open lines	108	120	184	167	240	179	221	335	405	460
On construction of new lines .	472	392	390	421	654	691	661	562	426	572
TOTAL .	580	512	574	588	894	870	882	897	831	1,032

9. The subjoined table shows the progress made in the development of railway communication, including lines financed by Native States or Companies outside the programme, during the 5½ years of my officiating and substantive tenure of the office of Public Works Member :—

YEAR.	AT COMMENCEMENT OF YEAR.			DURING THE YEAR.		REMARKS.
	Opened.	Commenced but not open.	Sanctioned but not commenced.	Opened.	Sanctioned.	
1895-96	18,855	2,195	22	821	2,415	
1896-97	19,677	3,741	48	713	1,054	
1897-98	20,390	4,008	129	743	917	
1898-99	21,156	3,948	349	1,339	631	
1899-1900	22,491	2,454	286	1,266	732	
1900-1901	23,763	2,597*	430	1,386	392	* Of which 1,300 miles will probably be ready for opening in 1901-1902.
TOTAL .	...	...	...	6,268	6,141	

10. The exceptionally favourable character of the earnings from Railways during the years 1899-1900 was noticed in last year's memorandum, and it was anticipated that according to the revised estimates then available the customary loss on the direct railway account, that is, " the amount by which the net earnings fall short of the interest

charges which have to be met, including strategic railways and loss arising from the special exchange provisions of the old Railway contracts," would be reduced to about 1¼ lakhs. It is satisfactory to be able to announce that this anticipation has been more than fulfilled, and that the actuals show, for the first time in the history of Railways in India, an absolute surplus, which amounts to over 11⅓ lakhs.

It was stated at the same time that with the cessation of the exceptional traffic due to the famine and the despatch of troops to South Africa a falling off was to be looked for, and in the estimates for the year now ending the probable deficit was put down at 73 lakhs, but according to the most recent estimates, it appears that there will once more be an actual gain, this time of about 23⅓ lakhs, on the direct account of the year. This result is no doubt partly due to the unfortunate continuance of famine conditions during earlier months of the year and to the movement of an unusually heavy crop of rice in Burma and of cotton in Bombay, but it is again distinctly encouraging.

The estimates for 1901-1902 allow for a deficit of about 24¾ lakhs.

11. Statement C is a list of Branch lines for the construction of which by private enterprise, outside the programme, arrangements have been made or are under consideration; and Statement D corresponds in a revised and amplified shape with Statement C, appended to last year's memorandum, which included a good many lines on which famine relief work, though sanctioned, was not actually undertaken. In connection with this Statement attention is invited to paragraph 6, page 2 of the last issue of the History of Railway Projects, where it is stated that Government will be prepared to receive proposals for the completion of some, if not all, of these lines on the understanding that the work already done will be given free of cost together with the land and the surveys already made.

A. C. TREVOR.

CALCUTTA;
March 20, 1901.

STATEMENT A.

STATEMENT

OF

Anticipated Capital Expenditure on Railways, Open or under Construction, for which Government have accepted any direct financial responsibility for the three years 1901-1902 to 1903-1904, including all Open Lines.

Branch lines under Rebate terms are excluded.

At the commencement of 1900-1901, *i.e.*, on the 1st April 1900, the total length of railway open for traffic was 23,763·78 miles, made up as follows :—

	Miles.	Miles.
Standard gauge—		
(i) State lines worked by companies	4,312·72	
(ii) State lines worked by the State	5,043·29	
(iii) Guaranteed companies	2,612·13	
(iv) Assisted companies	874·84	
(v) Lines owned by native states and worked by companies	703·55	
(vi) Lines owned by native states and worked by State railway agency	122·97	
		13,669·56
Metre gauge—		
(vii) State lines worked by companies	7,051·88	
(viii) State lines worked by the State	644·63	
(ix) Assisted companies	347·56	
(x) Lines owned by native states and worked by companies	381·58	
(xi) Lines owned and worked by native states	997·98	
(xii) Foreign lines	73·25	
		9,496·88
Special gauges—		
(xiii) State lines worked by the State	36·00	
(xiv) Assisted companies	192·40	
(xv) Lines owned by native states and worked by companies	242·31	
(xvi) Lines owned by native states and worked by State railway agency	33·62	
(xvii) Lines owned and worked by native states	93·07	
		597·40
TOTAL		**23,763·78**

(a) Although for convenience classed amongst State railways, this line is the property of the Bengal Central Railway Company.
(b) Worked by the Indian Midland Railway Company.
(c) Worked by the Bombay, Baroda and Central India Railway Company.
(d) Worked by the Great Indian Peninsula Railway Company.
(e) Although forming an integral part of the East Coast State railway, this line is shown separately as it is worked by the Nizam's Guaranteed State Railways Company.
(f) Including 6·13 miles of military line not used for public traffic.
(g) Worked by the North-Western State railway.
(h) Worked by the Eastern Bengal State railway.
(i) Worked by the Bengal and North-Western Railway Company.
(j) Worked by the Assam Railways and Trading Company.
(k) Worked by the Southern Mahratta Railway Company.
(l) Worked by the South Indian Railway Company.
(m) Although for convenience classed amongst State railways, this line is the property of the Bengal and North-Western Railway Company.
(n) Worked by the Southern Mahratta Railway Company.
(o) Worked by the South Indian Railway Company.
(p) Excluding 3·66 miles of the Lucknow-Bareilly railway between Daliganj and Aishbagh, but including the length, Bara Banki to Burhwal 16·70 miles, and the length over Cawnpore bridge 0·59 mile laid on a mixed gauge.
(q) Worked by the Eastern Bengal State railway.
(r) Worked by the Bengal and North-Western Railway Company.
(s) Worked by the Assam Railways and Trading Company.

2. And the mileage under construction or sanctioned for construction on the same date was 3,018·03 miles, as follows :—

		Miles.	Miles.
Standard gauge—			
(i)	State lines worked by companies	431·35	
(ii)	State lines worked by the State	171·90	
(iii)	Guaranteed companies	109·87	
(iv)	Assisted companies	0·79	
(v)	Lines owned by native states and worked by companies	20·75	
(vi)	Lines owned by native states and worked by State railway agency	79·61	
Metre gauge—			
(vii)	State lines worked by companies	1,009·06	
(viii)	State lines worked by the State	132·19	
(ix)	Assisted companies	151·56	
(x)	Lines owned by native states and worked by companies	382·39	
(xi)	Lines owned and worked by native states	307·85	1,983·05
Special gauges—			
(xii)	State lines worked by companies	55·73	
(xiii)	State lines worked by the State	41·90	
(xiv)	Assisted companies	91·16	
(xv)	Lines owned by native states and worked by companies	31·81	
(xvi)	Lines owned by native states and worked by State railway agency	0·11	220·71
	TOTAL		3,018·03

There was thus a grand total of railways completed and in hand, on the 1st April 1900, of miles . 26,781·81

			Miles.	Miles	Miles

3. During 1900-1901, *i.e.*, from 1st April 1900 to 31st March 1901, 392·13 miles of new railway have been authorized as follows :—

	Miles.	Miles.
Metre gauge—		
(i) State lines worked by companies	51·34	
Special gauges—		
(ii) State lines worked by companies	252·67	
(iii) State lines worked by the State	88·12	
		340·7
TOTAL		392·1

And 1,386·82 miles have been or are likely to be opened to public traffic as follows :—

	Miles.	Miles
Standard gauge—		
(iv) State lines worked by companies	39·74	
(v) State lines worked by the State	171·90	
(vi) Guaranteed companies	50·12	
(vii) Lines owned by native states and worked by State railway agency	79·61	
		341·7
Metre gauge—		
(viii) State lines worked by companies	439·13	
(ix) State lines worked by the State	23·09	
(x) Assisted companies	107·56	
(xi) Lines owned by native states and worked by companies		
(xii) Lines owned and worked by native states	147·00	
		947·7
Special gauges—		
(xiii) State lines worked by companies	55·73	
(xiv) State lines worked by the State	41·90	
(xv) Lines owned by native states and worked by State railway agency	0·11	
		97·7
TOTAL		1,386·8

* Correction of mileage.
† Worked by the administration of the Jodhpur-Bikaner railway.

4. The total length of open line at the commencement of 1901-1902, *i.e.*, on the 1st April 1901, will, therefore, be 25,155·70 miles, comprising—

	Miles.	Miles.
Standard gauge—		
(i) State lines worked by companies	6,517·38	
(ii) State lines worked by the State	4,435·47	
(iii) Guaranteed companies	1,305·13	
(iv) Assisted companies	874·84	
(v) Lines owned by native states and worked by companies	703·55	
(vi) Lines owned by native states and worked by State railway agency	202·58

A slight change in the form of Accounts is explained.

The Accounts, 1899-1900, show improvement over Revised Estimate of £222,000; Railway Revenue net profits are £77,000.

Revised Estimate, 1900-1901, shows Revenue increase exceeding £2,100,000, excluding Mint receipts. High prices of Opium gave £572,000 additional. Salt, £106,000. Excise, £138,000. Customs, £190,000. Railway Receipts, £965,000. Irrigation, £208,000. Total of main items of increase £2,395,000. Land Revenue shows decrease £382,900, although Bengal and Burma show improvement of £150,000.

Expenditure shows increase under Famine Relief and Insurance £876,000. Railway Revenue Account £323,000. Interest £200,000. Other Public Works decrease by £118,000. Army Services by £1,185,000, chiefly China and South Africa Savings. Salaries and Expenses, Civil Departments, decrease £124,000. Grand result, Surplus increased to £1,640,400.

Estimates, 1901-1902, compared with Revised Estimate of 1900-1901. Land Revenue increase £474,800. Railway Revenue £331,400. Other Heads £183,400. Total increase of Revenue, as compared with Revised Estimate, 1900-1901, £1,086,500. Against this, a lower estimate of prices diminishes Opium receipts by £589,300. Lower estimate Sugar imports causes decrease Customs £136,100. Irrigation receipts decrease by £127,400. Total items of decrease, excluding Mint, amount to £1,014,600.

Expenditure Army Services increase £2,062,100. Other Public Works £728,400. Railway Revenue Account £652,400. Direct demands on Revenue £161,600. Salaries and Expenses, Civil Departments, £493,200. Miscellaneous Civil Charges £123,900. Famine Relief and Insurance decrease £3,245,000. Net increase of expenditure, excluding Mint, £923,500. Estimated Surplus £690,900.

R1,64,50,000 allotted as grants-in-aid to Provincial Revenues to restore financial equilibrium.

Estimated Capital Expenditure on Railways and Irrigation £5,395,000. Discharge of Temporary Debt £301,900. Payment of Council Bills £16,830,200 as against £16,500,000 to be drawn. Total Capital requirements £6,642,000.

Capital Receipts. Surplus £690,900. To be raised by Railway Companies £1,663,400. Increase to Permanent Debt £2,240,000, including two crores loaned in India and £1,000,000 in England. Addition to unfunded Debt £502,500. Repayment of loans and advances £111,200. Reduction of combined Balances, India and England, £1,434,000. Closing Balances, March 31, 1902, Indian, £10,500,327; England, £2,605,943.

Railway Programme—Expenditure on open lines R4,59,97,000, Lines under construction R4,59,47,000, Lines only recently commenced R1,13,00,000. Irrigation, R1,00,00,000. Net deficit, Railways, £164,800, due to large provision for repairs, renewals, and other improvements.

Famine results, current year, Direct Relief R6,33,76,000. Loss of Land Revenue and Provincial Rates R1,47,16,000. Compensation for dearness of provisions, etc., R66,03,000. Loans to Native States R4,11,00,000. Special Agricultural Advances R1,42,00,000.

Countervailing Duties, no conclusion yet possible. Net receipts, ten months R15,29,552. Importation from United Kingdom, Straits Settlements, Hongkong, and Mauritius show large proportionate increase.

Coinage for 11 months R15,07,80,754. Profits of this year already paid to Gold Reserve Fund, £800,000; to be added for March £400,000. Profits from April 1 to December 31, 1900, about £1,730,000 to be paid into Fund as resources permit.

Holdings on March 7—

Rupees in the Currency Reserve	R5,87,12,865
Value of Silver bullion in the Currency Reserve	R1,78,48,764
Gold in the Currency Reserve	£6,956,946
Notes in Circulation	R28,09,15,765
Gold in the Gold Reserve Fund	£800,000
Total Silver	R7,65,61,629
Total Gold	£7,756,946

Circulation of Currency notes in hands of public steadily increasing since 1896-97. Average for last 11 months R23,84,00,000.

Economic progress is examined and shows to be satisfactory.

General results in view of famine and plague exceedingly good.

Government of India Notifications, Appointments, Promotions, etc.

MILITARY SECRETARY'S OFFICE.

NOTIFICATION.

No. 289-*M*.

Calcutta, the 20th March 1901.

His Excellency the Viceroy and Governor-General will leave Calcutta at 10-33 P.M., Calcutta time, on Wednesday, the 27th March 1901.

His Excellency will visit the Nepal Terai and arrive at Simla about the end of April 1901.

His Excellency's departure from Calcutta and arrival at Simla will be private.

All covers intended to reach His Excellency the Viceroy and Governor-General during His Excellency's tour should be addressed "His Excellency the Viceroy's Camp" without the addition of any post-town.

The party accompanying His Excellency on tour is as follows :—

W. R. Lawrence, Esq., C.I.E., Private Secretary.
Lieutenant-Colonel the Hon'ble E. Baring, Military Secretary.
Lieutenant-Colonel E. H. Fenn, C.I.E., Surgeon to the Viceroy.
Captain C. Champion de Crespigny, Aide-de-Camp.
Captain C. Wigram, Aide-de-Camp.
Captain the Hon'ble G. B. Portman, Aide-de-Camp.
Captain the Earl of Suffolk, Aide-de-Camp.

All communications connected with business of a mere routine nature should be sent, as usual, to the headquarters of the several Departments.

By Command,

E. BARING, *Lieut.-Colonel,*
Military Secretary to the Viceroy.

R. E. V. ARBUTHNOT,
Under Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Fort William, the 19th March 1901.

No. 487-*G.*—Captain M. A. Tighe, Indian Staff Corps, a Political Agent of the 3rd class, is granted privilege leave for one month and twenty-eight days, with effect from the 15th April 1901, and is also granted furlough for one year under article 340 (*b*) of the Civil Service Regulations, in continuation of the privilege leave.

No. 187-*I.B.*—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, 1879 (XXI of 1879), and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to direct that the following addition shall be made opposite the entry XVI (The Code of Civil Procedure, XIV of 1882) in the first schedule to the notification of the Government of India in the Foreign Department, No. 1811-I. B., dated the 1st July 1898, as modified by the like notification No. 1892½-I.B., dated the 9th July 1898, namely :—

(1A.) In section 11, after the words "for the time being in force" the words "and any suit, instituted against a subject of His Highness the Nizam, of which their cognizance is barred by an order in writing signed by the Resident" shall be added.

The 22nd March 1901.

No. 1236-*I.B.*—In exercise of the power conferred by section 17 of the Indian Explosives Act, 1884 (IV of 1884), as applied to the Hyderabad Assigned Districts and the Cantonment of Secunderabad by the notifications of the Government of India in the Foreign Department, Nos. 4742-I. and 4743-I., dated the 4th November 1887, respectively, the Governor-General in Council is pleased to declare that the following substances shall be deemed to be explosives within the meaning of the said Act :—

(1) Picric acid, subject to the following exceptions :—

(*a*) Picric acid when wholly in solution shall not be deemed an explosive.

(*b*) Picric acid which is being manufactured or stored in a factory, building, or place exclusively appropriated to the manufacture or storage of picric acid, and in such manner as effectually to prevent any picric acid from coming into contact (whether under the action of fire, or otherwise) with any basic metallic oxide or oxidising agent, or other substance capable of forming with picric acid an explosive mixture or explosive compound, or with any detonator or other article capable of exploding picric acid, or with any fire or light capable of igniting picric acid shall not be deemed an explosive.

(2) Picrates and mixtures of picric acid with any basic metallic oxide or any oxidising agent, or with any other substance capable of forming with picric acid an explosive mixture or an explosive compound (for whatever purpose used or manufactured), shall not be deemed explosives unless such picrates or mixtures be wholly in solution.

(3) Acetylene when liquid or when subject to a pressure greater than $1\frac{1}{10}$ atmospheres :

Provided that acetylene in admixture with oil-gas in a proportion not exceeding twenty parts by volume of acetylene in every one hundred parts of the mixture, when subjected to a pressure not exceeding one hundred and fifty pounds to the square inch, shall not be deemed an explosive :

Provided, further, that such acetylene and oil-gas shall be mixed together in a chamber or vessel before the gases are subject to compression.

(4) Acetylene when in admixture with atmospheric air or with oxygen gas in whatever proportion and at whatever pressure and whether or not in admixture with other substances.

II. In exercise of the power conferred by section 6 of the said Act, the Governor-General in Council is pleased to prohibit the manufacture, possession or importation of such acetylene as is declared by paragraph 1 of this notification to be an explosive :

Provided that nothing in this prohibition shall apply to acetylene in admixture with air when such admixture takes place only in a burner or contrivance in which the mixture is intended to be burnt :

Provided, also, that nothing in this prohibition shall be held to apply to an admixture of acetylene and air which may unavoidably occur in the first use or re-charging of an apparatus properly designed and constructed with a view to the production of pure acetylene.

No. 736-*F.*—The services of Captain F. J. H. Barton, Indian Staff Corps, Commandant of the Khyber Rifle Corps, are replaced at the disposal of the Military Department, with effect from the date of the expiration of the furlough granted to him by the notification of the Government of India in the Foreign Department, No. 705-F., dated the 8th March 1900.

No. 468-*E.A.*—Whereas the Governor-General in Council has power and jurisdiction over Native Indian subjects of His Majesty within the undermentioned territories beyond the limits of British India, that is to say, the island of Bahrein and the southern shores of the Persian Gulf :

In exercise of such power and jurisdiction and of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, 1879 (XXI of 1879), and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to direct that the Assistant to the Political Resident in the Persian Gulf and Assistant Political Agent at Bahrein shall exercise the powers of a Magistrate of the first class as described in the Code of Criminal Procedure, 1898 (Act V of 1898), in respect of offences committed by Native Indian subjects of His Majesty within the said territories.

No. 503-*G.*—Mr. A. B. Barnard, Officiating Assistant at Head-Quarters to the General Superintendent of Operations for the Suppression of Thagi and Dakaiti, is appointed to officiate temporarily, in addition to his other duties, as a Resident of the 2nd class and as General Superintendent of Operations for the Suppression of Thagi and Dakaiti, with effect from the 11th March 1901, and during the absence on privilege leave of Mr. G. R. Irwin, of the Indian Civil Service, or until further orders.

No. 505-*G.*—The services of Mr. A. Williams, of the Indian Civil Service, a Political Agent of the 1st class, are, on his return from furlough, placed at the disposal of the Home Department, with effect from the date on which he may assume charge of the appointment of Deputy Secretary to the Government of India in the Home Department.

No. 507-*G.*—During the absence of the Governor-General in Council from Calcutta, the Under Secretary to the Government of Bengal in the Judicial, Political and Appointment Departments, will hold charge of that portion of the Foreign Department which is left in Calcutta.

No. 508 *G.*—Captain J. N. Macleod, Indian Medical Service (Bengal), an officiating Agency Surgeon of the 2nd class, is appointed to be an Agency Surgeon of the 2nd class, substantive *pro tempore*, with effect from the 21st May 1901.

No. 512-*G.*—With the sanction of His Majesty's Government, the Governor-General in Council is pleased to recognise the provisional appointment of Mr. D. A. Stuart as Consul for the Netherlands at Madras.

No. 470-*E.A.*—The services of Assistant Surgeon Tamiz-ud-din Ahmed are placed at the disposal of the Home Department with effect from the date on which he relinquished charge of his duties as His Britannic Majesty's Vice-Consul at Hodeida and Camaran.

H. S. BARNES,
Secretary to the Government of India.

FINANCE AND COMMERCE DEPARTMENT.

NOTIFICATIONS.

OBSERVATIONS.—The Agent of the Bombay, Baroda and Central India Railway Company has applied that the General Rules for working open lines of Railway in British India, which have been published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide* the *Gazette of India* of the 23rd March 1895), as modified by the Government of India circulars Nos. 3 Railway, dated the 22nd May 1896, 3 Railway, dated the 3rd February 1897, 12 Railway, dated the 9th December 1897, resolution No. 84 R. T., dated the 25th January 1898, and circulars Nos. I Railway, dated the 3rd March 1898, III Railway, dated the 15th March 1898, I Railway, dated the 26th April 1899, V Railway, dated the 3rd July 1899, X Railway, dated the 1st December 1899, IV Railway, dated the 19th January 1900, and XII Railway, dated the 17th October 1900, which were published under Public Works Department notifications Nos. 257, dated the 28th May 1896, 55, dated the 5th February 1897, 3, dated the 5th January 1898, 32, dated the 28th January 1898, 104, dated the 10th March 1898, 134, dated the 23rd March 1898, 197, dated the 5th May 1899, 298, dated the 14th July 1899, 517, dated the 7th December 1899, 29, dated the 25th January 1900, and 432, dated the 26th October 1900 (*vide* the *Gazette of India* of the 30th May 1896, 6th February 1897, 8th January 1898, 29th January 1898, 12th March 1898, 26th March 1898, 6th May 1899, 15th July 1899, 9th December 1899, 27th January 1900, and 27th October 1900), may be made applicable to the Petlad-Cambay railway.

RESOLUTION.—The Governor General in Council is pleased to sanction the application of the General Rules for working railways open for traffic which may, for the time being and hereafter from time to time, be in force on the Bombay, Baroda and Central India railway to such portions of the Petlad-Cambay railway as are situate in British territory, with effect from the date or dates on which the said railway or portions thereof may be opened for the public carriage of passengers, animals or goods.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3), of the Indian Railways Act, 1890; also that the General Rules, cited in the foregoing observations—which have already been published in the *Gazette of India*—be kept at railway stations as directed by sub-section (6) of the same section.

Ordered, also, that this resolution be communicated to the Government of Bombay, for information and guidance.

No. 123.—The following is published for general information :—

No. 317 R. T.

GOVERNMENT OF INDIA—PUBLIC WORKS DEPARTMENT—RAILWAY TRAFFIC.

Calcutta, the 18th March 1901.

READ—

Sections 3 (4), 16 (2), 47 and 148 (1) of the Indian Railways Act, 1890 (IX of 1890).

Government of India, Public Works Department, notification No. 480½, dated the 30th October 1890, and the Government of India resolution No. 736 R T., dated the 17th October 1890, published thereunder.

Government of India, Public Works Department, notification No. 4, dated the 6th January 1898—published in part I of the *Gazette of India* of the 8th January 1898—appointing the Director of Railway Traffic as the officer who, in the case of a railway administered by Government, is to make General Rules under section 47 of the Indian Railways Act, 1890.

Letter No. 291 R. T., dated the 13th March 1901, from the Director of Railway Traffic.

OBSERVATIONS.—The Director of Railway Traffic has applied for leave to adopt the General Rules for working railways under construction and not used for the public carriage of passengers, animals or goods, which rules were published in the *Gazette of India* of the 8th November 1890, under Public Works Department notification No. 480½, dated the 30th October 1890, on the Khusalgarh-Kohat-Thal railway.

RESOLUTION.—The Governor General in Council is pleased to sanction the application of the General Rules which are referred to in the foregoing observations to the Khusalgarh-Kohat-Thal railway, which has been sanctioned for construction.

ORDER.—Ordered that the General Rules which have already been published in the *Gazette of India* of the 8th November 1890, be further notified to the railway servants and to the public by a copy thereof being kept open to inspection, free of any charge, in the office of the Engineer in charge of the construction of the railway.

Ordered, also, that this resolution be communicated to the Engineer-in-Chief, Khusalgarh-Kohat-Thal railway, for information and guidance, and that it be published under a notification in part I of the *Gazette of India*.

No. 125.—The following is published for general information :—

No. 316 R. T.

GOVERNMENT OF INDIA—PUBLIC WORKS DEPARTMENT—RAILWAY TRAFFIC.

Calcutta, the 18th March 1901.

Read—

Sections 3 (4), 16 (2), 47 and 148 (1) of the Indian Railways Act, 1890 (IX of 1890).

Government of India, Public Works Department, notification No. 480½ dated the 30th October 1890, and the Government of India resolution No. 736 R. T., dated the 17th October 1890, published thereunder.

Memorandum from the Consulting Engineer to the Government of India for Railways, Calcutta, No. 1150, dated the 7th March 1901, forwarding letter from the Agent and Chief Engineer, Kalka-Simla railway, No. 939, dated the 28th February 1901.

OBSERVATIONS.—The Agent and Chief Engineer of the Kalka-Simla railway has applied for leave to adopt the General Rules for working railways under construction and not used for the public carriage of passengers, animals or goods, which rules were published in the *Gazette of India* of the 8th November 1890 under Public Works Department notification No. 480½, dated the 30th October 1890, on the Kalka-Simla railway.

RESOLUTION.—The Governor General in Council is pleased to sanction the application of the General Rules which are referred to in the foregoing observations to such portions of the Kalka-Simla railway as are situate in British territory and have been sanctioned for construction.

ORDER.—Ordered that the General Rules, which have already been published in the *Gazette of India* of the 8th November 1890, be further notified to the railway servants and to the public by a copy thereof being kept open to inspection, free of any charge, in the office of the Engineer in charge of the construction of the railway.

Ordered, also, that this resolution be communicated to the Consulting Engineer to the Government of India for Railways, Calcutta, for information and guidance, and that it be published under a notification in Part I of the *Gazette of India*.

F. R. UPCOTT,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 21st March 1901.

NOTIFICATIONS.

No. 1137 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 16th March 1901 :—

No. 102 of 1901.—Mokshagundam Visvesvaraya, executive engineer of the Bombay Public Works Department, stationed at Poona. *Improvements in the automatic action of sluice gates of waste weirs or dams of storage reservoirs.*

No. 103 of 1901.—Emery James Churcher, Barrister-at-Law, of Basti, in the North-West Provinces of India. *An improved stirrup.*

No. 104 of 1901.—Thomas Henry Lewis, engineer, late of 51 Lime Street, London, England, but now of 2a Richmond Gardens, Hithergreen, London. *Improvements in devices for producing acetylene light more especially intended for use in cycles, carriage and hand-lamps.*

No. 105 of 1901.—Chhatrapati Manilal Mathuradas, merchant, of Jambusar, in Broach District, Bombay Presidency. *A substitute for coffee, called "The new coffee."*

No. 106 of 1901.—Montague Churchill Shann, an assistant in Messrs. Burn & Co., Ld., of Howrah, residing at No. 8 Dacre's Lane in Calcutta, British India. *Improvements in suspension bridges.*

No. 107 of 1901.—William Andrew Bole, engineer, of 722 South Negley Avenue, Pittsburg, state of Pennsylvania, U. S. A., and Edwin Ruud, engineer, of 214 Wood Street, Pittsburg aforesaid *Improvements in gasifiers for internal combustion engines.*

No. 108 of 1901.—John William Kincaid, locomotive engineer, 16 West 15th Street, in the city of Covington, state of Kentucky, U. S. A. *A mechanical stoker.*

No. 109 of 1901.—Norman Wilson Storer, electrical engineer, of Edgewood Park, Allegheny, Pennsylvania, U. S. A. *Improvements in systems of electrical distribution.*

No. 110 of 1901.—The Empire Cash Register, Limited, whose registered offices are at Monument Square Chambers, London, E. C., England. *Improvements in cash registering machines.*

No. 111 of 1901.—Solar Motor Company, manufacturers, a corporation organized under the laws of the state of New Jersey, and doing business at 186 Devonshire Street, Boston, in the state of Massachusetts, U. S. A. *Improvements in solar generators.*

No. 112 of 1901.—Marconi's Wireless Telegraph Company, Limited, of 18 Finch Lane, Threadneedle Street, in the city of London, England. *Improvements in apparatus for wireless telegraphy.*

No. 113 of 1901.—Gerald Fitzgerald Stannus, Captain, 20th Hussars, Mhow, Central India. *An improved game register.*

No. 114 of 1901.—Frank Steel, rice miller, residing at Dawbong, in the city of Rangoon, in Burma. *An improved accessory for polishing rice and dressing rice meal.*

No. 115 of 1901.—Wilhelm Kellner, civil engineer and a subject of the German Emperor, at present residing at the town of Garfeln, Post Office Box at Verlar, in the province of Westphalia, kingdom of Prussia, part of the German Empire *Umbrella or screen for wheels and motor carriages with attachment.*

No. 116 of 1901.—C. Ramaswamiah, pensioned Deputy Tahsildar and Magistrate, North Chittrai Street, Madura. *Improvements in water-lifts, to be called "C. Ramaswamiah's Halasyam water-lift."*

No. 117 of 1901.—Arthur Hoare, civil engineer, of 8 Elphinstone Circle, Bombay. *Improvements in starting gears for mechanical punkahs.*

No. 1138 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 296 of 1900.—Thomas Henry Pearse, gentleman, of 89 State Street, Boston, Massachusetts, U. S. A. *Improvements in cotton gins and wool burrers.* (Specification filed 12 March 1901.)

No. 8 of 1901.—Mervyn Hanbury Lowther Clark, engineer, of 53 Ladbroke Grove, Kensington, London, England. *Improved search light and signalling apparatus.* (Specification filed 12 March 1901.)

No. 37 of 1901.—John Sketchley Morton, gentleman, of 121 Lake Street, Oakland, county of Alameda, state of California, U. S. A. *Improvements in pumps.* (Specification filed 8 March 1901.)

No. 47 of 1901.—Ernest Major, gentleman, of Waterdale, Cookham Dene, in the county of Berks, England. *Improvements in supports for bicycles.* (Specification filed 13 March 1901.)

No. 1139 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 179 of 1891.—Francis Edward Elmore. *Improvements in mandrils for electrolytically deposited tubes.* (From 19 April 1901 to 19 April 1902.)

No. 326 of 1892.—Charles Hodgson. *Improvements in apparatus for working railway points and signals.* (From 14 April 1901 to 14 April 1902.)

No. 13 of 1893.—William Bull. *An improvement in burning bricks and tiles.* (From 13 March 1901 to 13 March 1902.)

No. 4 of 1894.—James Price Cleghorn. *The manufacture of Indian cement.* (From 13 March 1901 to 13 March 1902.)

No. 260 of 1894.—Freidrich Hermann Schule. *A new or improved machine for sorting cereals and removing stones and grit therefrom.* (From 17 December 1900 to 17 December 1901.)

No. 125 of 1895.—Deutsche Metallpatronenfabrik. *Apparatus or machinery for closing and securing metal tubes.* (From 22 August 1901 to 22 August 1902.)

No. 126 of 1895.—Deutsche Metallpatronenfabrik. *Method of and apparatus for filling tubes with viscid or semi-fluid material.* (From 22 August 1901 to 22 August 1902.)

No. 389 of 1896.—Henry Vander Weyde. *An improved method of and apparatus for producing, branding and packing for transport blocks of ice, sub-divided or sub-divisible into cubes.* (From 21 May 1901 to 21 May 1902.)

No. 53 of 1897.—Charles James Grist. *Improvements in the manufacture of waterproofing coating compositions for wearing apparel, covers, engine and other packings, acid tank linings, and for other uses.* (From 6 September 1901 to 6 September 1902.)

No 54 of 1897.—Charles James Grist. *Improvements in the manufacture of insulating compositions for electrical purposes.* (From 6 September 1901 to 6 September 1902.)

No. 1140 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (*2*), of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India, and of authorising others so to do, has ceased :—

No. 133 of 1896.—Thomas Royle. *Improvements in purifying water.* (Specification filed 3 December 1896.)

No. 160 of 1896.—Sidney Pattisson. *Improvements in saddles for velocipedes.* (Specification filed 7 December 1896.)

No 234 of 1896.—Louis Pelatan and Fabrizio Clerici. *Improvements in apparatus for the electrolytical separation of precious metals from their ores or other materials containing them.* (Specification filed 3 December 1896.)

No. 256 of 1896.—John Coryton Roberts. *Improvements in the manufacture of tea chests and other packing cases or boxes.* (Specification filed 8 December 1896).

No. 322 of 1896.—John Thompson and Charles Everard. *Improvements in and relating to bicycles.* (Specification filed 7 December 1896.)

No. 346 of 1896.—Redlhammer Brothers. *Improvements in bracelets, necklaces and the like.* (Specification filed 5 December 1896)

No. 348 of 1896.—Andrew Pillatt. *Improvements in furnaces and in rocking grate bars for the same.* (Specification filed 7 December 1896.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

No. 199 of 1895.—Newton John Suckling. *Improvements in or relating to stamp batteries.* (Specification filed 4 December 1895.)

Fee in respect of the continuance of an exclusive privilege—

4 (*b*) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of R50 for the above invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The Office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October, 1895, in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitor's room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

S. C. HILL,
Secretary under the Inventions and Designs Act, 1888.

7, COUNCIL HOUSE STREET;
Calcutta, 22nd March, 1901.

THE HON'BLE THE RESIDENT IN MYSORE.

NOTIFICATION.

Bangalore, the 6th February, 1901.

No. 12.—In exercise of the powers conferred by rule 26 of the Legal Practitioners' Rules published under Notification No. 2113 I. A. of the Government of India, in the Foreign Department, dated the 14th May, 1900, and in supersession of the Rules of Practice (Nos. 20 and 23, dated respectively, the 23rd July and 19th September, 1879) framed by the Judicial Commissioner of Mysore, the Hon'ble the Resident in Mysore is pleased to make and issue the following rules for fixing and regulating the fees payable by any party in respect of the fees of his adversary's Advocate or Pleader upon all proceedings in the Court of the Resident and in the Courts subordinate thereto:—

Save by special leave of the Court, and except in the case of an Advocate or Pleader appearing on behalf of Government, no fee shall in any case be entered as recoverable in a decree or order, except on production of a certificate from the Advocate or Pleader that he has received such fee.

2. In suits, or in appeals from original or appellate decrees in suits, for money, effects or other personal property, or for land or other immoveable property of any description, fees shall be payable on the following scale:—

(*a*) When such suits or appeals are decided on the merits after contest, or are compromised subsequent to the settlement of issues and after a partial or complete trial, but before delivery of judgment, or where such appeals are decided *ex-parte*—

(*i*) if the amount or value of the claim shall not exceed R5,000, 5 per cent., provided that in no case shall the fee payable be less than five rupees;

(*ii*) if the amount or value shall exceed R5,000, and shall not exceed R20,000 on R5,000 as above, and on the remainder, 2 per cent.;

(*iii*) if the amount or value shall exceed R20,000, and shall not exceed R50,000, on R20,000 as above, and on the remainder, 1 per cent.;

(*iv*) if the amount or value shall exceed R50,000, and shall not exceed R80,000, on R50,000 as above, and on the remainder, ½ per cent.;

(*v*) if the amount or value shall exceed R80,000, R1,000

(*b*) When such suits are decided *ex-parte*, or when such suits or appeals are decided on confession of judgment, or are dismissed for default after all the requisite pleadings have been filed, or are compromised after the settlement of issues, but before trial—

(*i*) if the amount or value of the claim shall not exceed R5,000, not exceeding 2½ per cent, provided that in no case shall the fee payable be less than five rupees;

(*ii*) if the amount or value shall exceed R5,000, and shall not exceed R20,000, on R5,000 as above, and on the remainder, not exceeding 1 per cent.;

(*iii*) if the amount or value shall exceed R20,000, and shall not exceed R50,000, on R20,000 as above, and on the remainder, not exceeding ½ per cent.;

(*iv*) if the amount or value shall exceed R50,000, and shall not exceed R80,000, on R50,000 as above and on the remainder, not exceeding ¼ per cent.;

(*v*) if the amount or value shall exceed R80,000, not exceeding R500.

3. In suits or appeals, withdrawn or compromised, (*a*) before any defence is put in, (*b*) before the settlement of issues, but after defence is put in, or dismissed for default without a determination on the merits of the case before all the requisite pleadings have been filed in Court, and in appeals from orders, re-hearing on review and other miscellaneous cases, including proceedings in execution of decrees, fees shall be payable on the following scale:—

(*i*) if the amount or value of the claim shall not exceed R5,000, 1¼ per cent.; provided that the fee shall not be less than R5 in any case other than a proceeding in execution;

(*ii*) if the amount or value shall exceed R5,000, and shall not exceed R20,000, on R5,000 as above, and on the remainder, ½ per cent.;

(*iii*) if the amount or value shall exceed R20,000, and shall not exceed R50,000, on R20,000, as above, and on the remainder, ¼ per cent.;

(*iv*) if the amount or value shall exceed R50,000, and shall not exceed R80,000, on R50,000 as above, and on the remainder, ⅛ per cent.;

(*v*) if the amount or value shall exceed R80,000, R250;

(*vi*) in applications for execution of decrees, the fees shall be calculated on the amount realised by the application.

4 In all miscellaneous applications after decree which are decided on the merits after contest, except such as have been hereinbefore specially provided for, a reasonable fee, not in any case

exceeding R20 in the Court of the Resident, or R10 in a Court subordinate thereto, shall be allowed.

5. The words "the amount or value or the claim" in Rules 2 and 3 mean the value as set forth in the plaint or memorandum of appeal, and, where Court-fees are payable *ad valorem*, the value on which such Court-fees are paid.

6 Fractions of a rupee in the amount or value of a claim are to be rejected in calculating the fee payable thereupon.

7. In cases in which the subject matter of the claim does not admit of valuation, the Court shall fix a reasonable fee not less than five rupees, regard being had to the time occupied in the preparation and hearing of the case and the nature of the questions raised therein.

8. If several defendants or respondents, who have a joint or common interest, succeed upon a joint defence, or upon separate defences substantially the same, not more than one fee shall be allowed, unless the Court shall otherwise order for a reason which shall be recorded in the judgment. If only one fee be allowed, the Court shall direct to which of the defendants or respondents it shall be paid, or shall apportion it among the several defendants or respondents in such manner as the Court shall think fit.

9. If several defendants or respondents who have separate interests, set up separate and distinct defences and succeed thereon, a fee for one legal practitioner for each of the defendants or respondents who shall appear by a separate legal practitioner, may be allowed in respect of his separate interest. Such fee, if allowed, shall be calculated, with reference to the value of the separate interest of such defendant, or respondent, in the manner hereinbefore prescribed.

10. For each fee allowed under the two last preceding rules, the value of the stamp on one vakalatnama only shall be awarded as costs.

11. Except where an adjournment is made with the consent of all parties, or where, from insufficiency of notice, a party has not had reasonable time to prepare himself for trial, or where the adjournment is necessitated by a cause beyond the control of the party, an adjournment should not be granted save on the condition that the party applying pays all the costs of the day, including a reasonable fee not exceeding R10, to the legal practitioner engaged by his adversary.

12. The fee allowed on the percentage scale for prosecuting or defending a suit is intended to cover all proceedings up to decree; and where a suit is remitted for re-hearing and disposal or for a finding on issues, the proceedings on such order must be regarded as a further proceeding in the trial of the suit, and no further fee can be allowed in respect of such proceedings.

Small Cause Courts.

13. In suits under Act IX of 1887 (the Provincial Small Cause Courts Act) where costs are awarded by the Court, and where the certificate prescribed in rule 1 of these rules has been obtained, the fees payable in respect of an adversary's Advocate or Pleader in a Court of Small Causes shall be as follows :—

(*a*) In suits not exceeding R100 in value. } R5.

(*b*) In suits exceeding R100 in value. } R5 on R100 and R3 for every hundred rupees or part thereof in excess of R100.

14. Where an Advocate or Pleader is employed merely to obtain execution of a decree, one rupee shall be allowed as costs for that purpose in claims below R100, and one rupee for every hundred rupees or part thereof in claims above that amount. No fee shall be allowed in case of a second or further application to obtain execution of the same decree.

DONALD ROBERTSON,
Resident.

H. CHENNAYA,
Acting Registrar.

REVENUE DEPARTMENT.
Land Revenue Branch.

NOTIFICATION.

The 16th March, 1901.

No. 1493-*L R*.—The following is published for general information with reference to section 42 of Act I of 1894 :—

F. A. SLACKE,
Secretary to the Govt. of Bengal.

MEMORANDUM OF AGREEMENT made the thirty-first day of July in the year of our Lord one thousand and nine hundred between the National Juce Mills Company Limited

(hereinafter called "The Company") of the one part and the Secretary of State for India in Council (hereinafter called "The Government") of the other part: WHEREAS the Company applied to the Local Government for consent under section 39 of the Land Acquisition Act (Act I of 1894) to the acquisition of land measuring 3,200 feet in length by 100 feet in breadth situate in the village of Banupore pargana Muzaffarpur within the territorial jurisdiction of the police outpost of Sankrail district Howrah for the construction of a road with drains on either side for the use of the public leading from the Rajgunge Road to the Sankrail Ferry opposite the bazar of that name on the other side of the Sankrail Khal and for the purpose of building cooly bungalows and quarters for the clerks employed in the mills: AND WHEREAS the Local Government having been satisfied after having had an enquiry made under section 40 of the Land Acquisition Act by Mr. F. W. Duke C.S. the Covenanted Deputy Collector of Howrah that the acquisition is needed for the construction of the works aforesaid and that the said work will prove useful to the public has by letter No. 1 B.T.R. dated the 27th January last to the address of Messrs. A. Yule and Company given consent to the acquisition of the land about two-thirds of which will be 100 feet in width and the remaining 1,000 feet or so at the south end which passes amongst houses and is likely to affect parts of homestead lands 50 feet in width as delineated in the map or plan hereunto annexed on condition that the road which is to be made pucka together with the side-drains should be made over to the District Board of Howrah (if that body is willing to accept them) within twelve months after the land has been acquired and duly made over to the Company: NOW THIS INDENTURE WITNESSETH that it is hereby mutually covenanted by and between the said parties hereto for themselves their successors and assigns in the manner following that is to say (1) that the Company shall pay to Government cost of acquisition of the said land (2) that on payment of the cost of the acquisition of the said land together with the proper cost of the land acquisition proceedings in connection thereto including the cost of any reference and appeals to courts the fees of assessors and other law charges and cost of the establishment recoverable under the rules of the Board of Revenue for the Lower Provinces Bengal framed under the Land Acquisition Act the land shall at the cost of the Company be conveyed and transferred to the Company by the Secretary of State for India in Council (3) that within twelve months from the date of such transfer of the land the Company shall make a road 30 feet wide including side-drains and metal the same and shall make over the road and side-drains to the District Board of Howrah (if that body is willing to accept them) (4) that the public shall be entitled to use the said road from Rajgunge to Sankrail Ferry without any let or hindrance. IN WITNESS WHEREOF the parties to these presents have hereunto set and subscribed their respective hands and seals the day and year first above written.

Signed sealed and delivered in the presence of—

NARA SINHA DUTT,
Howrah.

No. 854-*S.*—The Agents to the Governor General for Rajputana and Central India are pleased to grant 2 months' privilege leave combined with furlough for one year and two months to Major E. C. Spilsbury, R.E., Superintending Engineer and Secretary in the Public Works Department to these Administrations, with effect from the 1st April, 1901, or such subsequent date as he may avail himself of it, under paragraph 4 of the Home Department Resolution No. 224-240, dated 25th January, 1901.

E. C. SPILSBURY, *Major, R.E.,*
Secretary to the Hon'ble the Agent to the Governor-General in the Public Works Department, Rajputana and Central India.

TELEGRAPH DEPARTMENT.

NOTIFICATIONS.

Simla, the 22nd May, 1900.

TELEGRAMS FOR THE TROOPS IN SOUTH AFRICA.

No. 9.—The following revised notification is published for general information :—

Until further notice, State and Private telegrams *in plain language* addressed to persons serving with the Field Force in South Africa will be accepted *at Sender's risk*, and charged for at the rate of Rr-8 per word from offices in India or Burma. Telegrams in Code or Cypher cannot be accepted at this reduced rate. The address should consist of the following :—

(1) The name, or number, or both of the person to whom the telegram is addressed (in the case of officers the rank may be omitted, and in the case of telegrams for Non-Commissioned Officers and men the name may, in like manner, be omitted if the number is given. Such omissions, however, add to the risk of the telegram going astray, more especially when addressed to Non-Commissioned Officers and men), and

(2) The Regiment (*this will be counted and charged for as one word irrespective of the number of words used*).

These telegrams should be addressed "Bombay for South Africa" (*which words will be signalled free*), and not to any particular Telegraph Office in South Africa. The Bombay Telegraph Office will forward them to the Officer Commanding at Capetown, who will deliver them to the Addressees at whatever place in South Africa they may be stationed.

Senders of telegrams should accurately describe the Regiment, Battalion, Battery or Corps, to which the Addressees are attached, as it appears in the "Army List." For example: the address of an Officer or Private in the "Rifles" should give the number of the Battalion, and make it quite clear whether it is a Battalion of the "Rifle Brigade," the "King's Royal Rifle Corps," the "Royal Irish Rifles," or the "Scottish Rifles (Cameronians)."

The reduced rate will also apply to telegrams addressed to members of the Nursing Staff serving in South Africa, and any telegrams addressed to a Nurse will be treated in the same way as those intended for soldiers and sailors.

Telegrams for officers, Non-Commissioned Officers and men in South Africa who are known to be suffering from wounds or sickness may be addressed to them as if they were with their regiment or corps. Such telegrams, on arrival at the place where the regiment or corps is stationed, will be redirected to the proper hospital.

When, however, the name of the hospital is known to the sender of the message, he may address the telegram direct to that hospital, *e.g.*, "Field Hospital, 1st Cavalry Brigade," or to "No. 2 General Hospital" or to "Mooi River Hospital."

In any case, the telegram should, as already stated, be addressed by the sender to "Bombay for South Africa," which words will not be charged for.

The following are given as examples of addresses and counting :—

"Captain Armstrong, 64th Royal Field Artillery, Bombay for South Africa" (*three words*); "Captain Armstrong, Wynberg Hospital, Bombay for South Africa" (*three words*); "7303 Murphy, 2nd Battalion, Royal Dublin Fusiliers, Bombay for South Africa" (*three words*); "7303, Mooi River Hospital, Bombay for South Africa" (*two words*).

II. Notification No. 5, dated the 8th May, 1900, is hereby cancelled.

The 5th December, 1900.

No. 37.—The British Government announces that the transmission of Private telegrams for the Orange River Colony and the Transvaal, *viâ* Cape Colony and Natal, is now suspended.

Telegrams for Pretoria, Johannesburg, Vereeniging, Germiston, Middelburg, Heidelberg, and Standerton are, meanwhile, being accepted for transmission, *viâ* Lourenco Marques, at the usual rates. These telegrams should be written in plain English, and will be accepted only at the risk of the sender. They are also subject to censorship and to delay in transmission.

The 31st January, 1901.

TELEGRAMS FOR SOLDIERS AND SAILORS OF THE BRITISH AND INDIAN FORCES IN CHINA.

No. 43.—The following revised Notification is issued for general information :—

Until further notice, private telegrams, *in plain language*, for members of the British or Indian Military and Naval Forces in China, from their friends in India or Burma will be accepted *at sender's risk* and at the reduced rates mentioned below to the three following stations only, *viâ* Madras :—

1. To Shanghai at R 0-15-0 per word.
2. „ Weihaiwei „ 1-3-0 „
3. „ Taku „ 1-4-0 „

In the Official Instructions the words "*Reduced Rates*" should be inserted, and will be signalled free.

Telegrams intended for Military or Naval members stationed at Hongkong should be addressed to *Shanghai*, and those for members stationed at Tientsin or Pekin should be addressed to *Taku*. These reduced rates will also apply to telegrams for Civilians in Military or Naval employ in China.

In the address the name and number of the Regiment, Battalion, Battery, or Corps will be counted and charged for as *one* word, irrespective of the number of words used. For instance, in a telegram addressed to "Capt. Brown, 23rd Field Battery, Royal Artillery, Shanghai," the number of words to be charged for will be *four* only, instead of *eight* words, as usual.

II. Notification No. 34, dated the 22nd November, 1900, is hereby cancelled.

Calcutta, the 7th March, 1901

No. 47.—The following revised notification is published for general information :—

The Post Master General, London, announces that the British Government have decided to suspend at Aden and the Cape of Good Hope the transmission of all telegrams in Code or cipher, whether of Foreign Governments or private persons, to or from British Central Africa, St. Helena and Ascension. Telegrams in plain language are subject to censorship and can only be accepted at the risk of the sender.

Code messages for the following places, *viz.*, Cape Colony, Natal, Rhodesia, Zanzibar, Seychelles, Mauritius, Madagascar, British and German East Africa, Mozambique and Lourenco Marques may, however, be accepted, if the words used are in one or other of the following Code Books, which have been deposited with the authorities at Aden, *viz.* :—

(1) A B C (4th edition).
(2) A Z.
(3) Scott's (9th edition).
(4) A I.
(5) Telegraphenschluessel of W. Staudt and O. Hundius (published by Julius Springer at Berlin).
(6) The Mercuur Code (2nd edition), enlarged and revised, with the First Supplement.
(7) Broomhall's Comprehensive Cipher Code.
(8) Western Union Telegraphic Code and International Cable Directory, Universal Edition, 1900
(9) Atlantic Cable Directory of registered addresses and Directory Code, 1898.
(10) Atlantic Cable Directory of registered addresses and Directory Code, 1900.
(11) Watkin's Telegraphic Code with Appendix (17th edition), 1900
(12) International Mercantile Telegraph Code (Meyer), 1880.
(13) The General, Commercial, and Mining Telegram Code, 1897, by C. A. Moreing and F C. McCutcheon.
(14) Bedford McNeill's Mining and General Telegraphic Code 1899.

Telegrams should be endorsed to the effect that the words used actually represent the corresponding expressions given in the above named Code Books.

As delays occur at Aden in consequence of the difficulty of determining which Code has been employed, senders of telegrams to the above-named places in East and South Africa should write on the message draft the name of the Code employed. For instance A B C; A Z; Scott's; A I; Staudt; Mercuur; Broomhall's; Directory; Atlantic, 1898, Atlantic, 1900; Watkin's; Meyer; McCutcheon; or McNeill. This information will be included in the "Official Instructions" and transmitted free of charge.

II. Notification No. 39, dated the 13th December, 1900, is hereby cancelled.

No. 47-*A*.—In the event of the establishment in British India of a censorship over telegrams, the first twelve Code Books mentioned in Notification No. 47, dated the 7th of March, 1901, will be used in India for purposes similar to that for which they are employed in Aden.

The public are recommended to provide themselves with such of the Codes as may appear suited to their requirements.

H. A. KIRK,
Director, Traffic Branch.

HIGH COURT—ORIGINAL SIDE.

NOTIFICATION.

Calcutta, the 19th March, 1901.

The Honourable the Chief Justice of Bengal has, under article 725 (4) of the Civil Service Regulations, granted to the Honourable Mr. J. G. Apcar, Clerk of the Crown, High Court, ten months' leave on medical certificate from the 15th of April, 1901, with liberty to return to duty in eight months if permitted to do so.

By Order,

W. R. FINK,
Registrar.

AGENT TO THE GOVERNOR GENERAL IN CENTRAL INDIA.

NOTIFICATION.

Central India Agency, Indore, the 16th March, 1901.

No. 2467.—With reference to Central India Agency Notification No. 3035, dated the 8th April 1899, the Agent to the Governor General in Central India directs that the following rules be observed with regard to counterfeit coins :—

(1) All counterfeit coin sent to the Mints for examination under existing orders should in future be sent through the Local Government.

(2) That where there are two or more specimens of a coin of the same die or of similar moulds the Local Government may keep one informing the Mint Master of the fact.

(3) That copies of the statements of counterfeit coins received at Railway stations and submitted to the Mints at Calcutta or Bombay should be sent to the Local Government.

(4) That Local Station Masters and other Railway officials should be instructed to give the earliest possible information to the Police of the tender of any counterfeit coin.

By Order,

C. J. WINDHAM, *Captain*,
First Assistant to the Agent to the Governor General in Central India.

THE HONOURABLE THE AGENT TO THE GOVERNOR-GENERAL AND CHIEF COMMISSIONER IN BALUCHISTAN.

NOTIFICATIONS.

Quetta, the 11th March, 1901.

No. 2651.—In continuation of this office Notification No. 1717, dated the 14th February, 1901, and pending the arrival of Khan Bahadur Maula Bakhsh, Rafik Khan Muhammad, Native Assistant to the Agent to the Governor-General in the Khojak Pass, is appointed to officiate as Extra Assistant Commissioner and Extra Assistant Commissioner of Peshin in addition to his own duties, with effect from the forenoon of the 24th January, 1901, the date of his assuming charge.

No. 2645.—Consequent on the confirmation of R. S. Pandit Nand Lall as an Extra Assistant Commissioner, the Honourable the Agent to the Governor-General and Chief Commissioner is pleased, under the provisions of article 109 of the Civil Service Regulations, to confirm Rafik Khan Muhammad as Native Assistant to the Agent to the Governor-General in the Khojak Pass, with effect from the 1st October, 1899, reserving the right to reverse the arrangement now made, should Pandit Nand Lall at any time revert to his original appointment.

By Order,

A. McCONAGHEY, *Captain*,

First Assistant and Secretary to the Agent to the Governor-General and Chief Commissioner in Baluchistan.

RESIDENT IN MYSORE.

NOTIFICATION.

Bangalore, the 14th March, 1901.

J. CLIBBORN, *Major, I.S.C.*,
Principal, Thomason College.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1900, the price of this Quinine will be as follows :—

1-pound tin,	R18,	or, post-free,	R18-12.
½ „	R 9,	„	R9-8.
¼ „	R4-8,	„	R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৯০০ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন	১৮৲ বা ডাকমাশুল বিনা	১৮৲০	
½ আধ „ „	৯৲	„	৯৲০
¼ সিকি „ „	৪৲০	„	৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে, এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনিডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকট শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারে।

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (7th edition with Curve Table). R3.

XIII. Drawing (by Lieut. R. Pulford, R E.). † R6.

XIIIa. Drawing, First Principles of Geometrical (by do.). R1-4.

XIV. Simple Applied Mechanics (3rd edition), Parts I and II in one. R1-8.

Simple Applied Mechanics, Part II (1st edition) 8*a*.

XV. Examples of Estimating. Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition). R3-12.

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. R1.

XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 6*a*.

Note.—The complete Treatise forms the course of the Civil Engineer and Upper Subordinate classes at the Thomason College in Civil Engineering. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve. 4*a*.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 36 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. 12*a*.

Notes on Chemistry of Building Materials. R1-8.

Tate's Mechanism. R1.

Barman's Descriptive Mineralogy. R2-4.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India. In one large sheet, 12*a*.; mounted on cloth and bound. R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. 12*a*.

Tyndall's Hand-Book of Specifications. (In the Press.)

The Indian Engineer's Pocket Book. R1.

Wooden Bridges and Designs. By Rai Kunhya Lal. (In the Press.)

Blasting under Water (2nd edition). 10*a*.

Waugh's Instructions for Topographical Surveying. R1.

Analysis of Lime and Cement Stones. By Murray Thompson, Esq., M.D., F.R.S.E. 6*a*.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width, very useful for Projects. R1-6.

SCIENCE BOOKS.

Wilson's Inorganic Chemistry. R1-8.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). R1-8.

Boileau's Tables of Log sin² ½ P (for computing time (4*a*.).

Cape's Logarithms, with Tables of Squares, Cubes, etc. R1-4.

Cape's Geometry. R1-4.

Cape's Mechanics. 8*a*.

Todhunter's Plane Trigonometry. R2-8.

Todhunter's Differential Calculus. R2-8.

Military Topography. 8*a*.

HINDUSTANI.

Elements of Hindustani Grammar. 8*a*.

Technical Dialogues—English and Urdu. R1.

A Vocabulary of Common and Technical Words in English-Urdu. 12*a*.

History of India (*Itihas Timirnâsak*), Hindi, Parts I and II. Both 6*a*.

Short Account of Ganges Canal (English and Urdu). Each 4*a*.

NOTE AND FIELD-BOOKS, etc.

Note Books (Section paper), large. Each R1-4.

Surveying Field Books (ruled). 14*a*.

Levelling Field Books (English Pattern). R1-4.

„ „ „ (Canal „). R1-4.

„ „ „ (College „). R2-0.

P. W. D. Note-Book. R1-4.

„ **Measurement Book.** R1-4.

Circular Card-board Protractors, 2 inches. R2.

MISCELLANEOUS.

Distributary, Velocity and Discharge Table. By Capt. Allan Cunningham. 8*a*.

Description of Venomous Snakes. (The drawings of all the venomous snakes of Upper India, with description and all important information, extracted from the "Thanatophidia of India.") R1-8.

Ditto ditto in Urdu. R1-4.

Perspective (fully explained). By Col. A. M. Braudreth R.E. R1-12.

Thomason College Calendars for 1892,* 1895,† 1896† and 1897.† Each R2.

Ditto ditto for 1898‡ and 1899,† Pt. I. R3-6.

* Date of Edition on sale.
† Originally published at R15, reduced to R6.

* This does not contain the Entrance Examination papers of the Superior Accounts Branch, Public Works Department.
† These include question papers for entrance to Engineer and Upper Subordinate Classes and Superior Accounts Branch, Public Works Department.
‡ This does not contain the Entrance Examination Papers of the Upper Subordinate Class.

Forms of Accounts, P. W. D., for Sub-Divisional Officers, in English (very old). 4*a*.

Memo. of Instructions for Road Project. R1.

Project for College Mess (sample Project). 8*a*.

Ferrotype Printing Processes. 8*a*.

Thomason College Library Catalogue. R1-12.

Ditto, Supplement, 1895 to 1899. Each 2*a*.

Irrigation by Rajbahas.
Irrigation Tract, No. I.
" II.
" III.
} 4*a*. each.

Land Measuring Chain Statement. Area of kucha and pucka Bighas. sheet. 4*a*.

Report of the Ganges Canal Committee (Major Crofton's Project for remodelling the Ganges Canal according to the views of Major-General Sir Arthur Cotton, R.E., K.C.S.I.), 1866. 8*a*.

Report of the Ganges Canal. By Captain J. Crofton, R.E., with Estimates and Plan—

Vol. I, Report, 1865. R1.
Vol. II, Estimates. 12*a*.

Shakesperian Readings, *viz.*:—

PLANS OF STATIONS.

Lithographed Plans of the Cantonments and Regimental Lines in the different Military Stations of India. Drawn to a uniform scale and prepared between 1864 and 1868 for the Government of India, P. W. Department. (Useful for Executive Engineers' and Superintending Engineers' Offices.)

Bengal, 51 Plans.
Madras, 99 Plans.
Bombay, 91 Plans.
N.-W. Provinces, 104 Plans.
Oudh, 21 Plans.
Rajputana, 4 Plans.
British Burma, 19 Plans.
Central Provinces.

} Whole lot R 2 each.

A set of Professional papers both loose and quarterly numbers inclusive of Railway freight R10. This is not quite complete.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(FIRST SERIES.)

Vol. I. (Quarterly, Nos. 1 to 5), bound R1-8.
Quarterly, Nos. 1, 2, 3, 4, and 5,
Vol. II, Quarterly, Nos. 6 and 7,
" VI, " No. 25,
" VII, " Nos. 26, 27, 28, and 29,
Extra No., April 1870.

4*a*. each, inclusive of postage.

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, and IX of the series 4*a*. each, inclusive of postage.

Quarterly Number 41 A of Vol. X. Each 8*a*.

Cloth covers for Volumes of 1st and 2nd Series, at 8*a*. each.

Index to Professional Papers and loose Papers, 1st and 2nd Series, at 2*a*. each.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of admission to the different classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason Civil Engineering College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876 :—

Terms of subscription payable annually in advance.

For the Complete Series, *including postage* . . . R22-8

	Without postage.	With postage.
	R a. p.	R a. p.
For the Calcutta Series	10 0 0	12 8 0
" each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
" a part of the Calcutta Series purchased separately, *inclusive of postage in India*		2 0 0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit :—

	For town.	For mofussil.
	R a p.	R a. p.
For the Calcutta Series ; per copy . .	0 8 9	0 10 0
" each of the Madras, Bombay, and Allahabad Series ; per copy . . .	0 5 3	0 5 9
" the Calcutta Series. For the year .	7 2 6	8 0 3
" each of the Madras, Bombay, and Allahabad Series. For the year . .	4 4 6	4 11 0

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrapper of the Indian Law Reports, Calcutta Series, at the following rates payable in advance :—

	One page.	*Half page.*	*Quarter page.*
For one issue	R 20	R 14	R 9
" three issues	" 55	" 36	" 24
" six "	" 100	" 68	" 45
" nine "	" 145	" 96	" 64
" twelve "	" 180	" 120	" 80

Several volumes of the BENGAL LAW REPORTS, from August 1808 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates :—

	Without postage.	With postage.
	R a. p.	R a. p.
Bengal Law Reports, for one year . .	20 0 0	22 8 0
Single copies, R2 per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 3

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta. Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.
